MESSAGES FROM THE PRESIDENT OF THE UNITED STATES.

No.		Date.	Page.
407.	Transmitting a report of a general inspection of the military posts of the western department, and remarks concerning the militia of the United States, by Major General Edmund P. Gaines	1829, Feb. 27	103
433.	In reference to the protection of the trade between Missouri and Santa Fé, in New Mexico	1830, Feb. 8	277
449.	On the measures necessary to preserve Pea Patch island, and estimates for additional appropriations for Fort Delaware	1830, Mar. 31	369
478.	Transmiting a report of the Secretary of War relative to a compromise of the title of the island on which Fort Delaware has been constructed	1831, Feb. 19	694
501.	In reference to a compromise of title to the island on which Fort Delaware stands	1832, Jan. 20	827

REPORTS FROM THE SECRETARY OF WAR.

390.	Showing the operations of the War Department in 1828	1828, Dec. 2	1
391.	On the reorganization of the subsistence department of the army	1828, Dec. 15	38
392.	On the importance of military roads for the defence of the northwestern frontier, with an estimate	1828, Dec. 23	39
393.	On the expediency of compelling cadets to continue in the military service, with a statement of the number appointed from 1821 to 1828.	1828, Dec. 23	40
395.	Relative to the purchase of additional land for the use of Fort Washington.	1829, Jan. 17	43
399.	Communicating the Army Register for 1829	1829, Feb. 2	68
401.	On the expediency and effect of the use of ardent spirits in the army	1829, Feb. 3	83
403.	Communicating the annual returns of the militia of the several States	1829, Feb. 5	87
404.	On the expediency of abolishing the office of major general, of appointing three brigadier generals, and abolishing brevet rank in time of peace.	1829, Feb. 12	91
408.	On the condition and occupancy of the land belonging to the United States at the armory at Harper's Ferry	1829, Mar. 2	142
409.	On the expenditures at, and operations of, the armories during the year 1828	1829, Mar. 2	149
410.	Showing the operations of the War Department in 1829	1829, Dec. 8	150
412.	Relative to land for the accommodation of the military posts at Green Bay and Fort Winnebago	1829, Dec. 24	202
413.	On the expediency of constructing fortifications on the island of Key West	1829, Dec. 29	203
415.	On the expediency of merging the marine corps into the infantry or artillery of the army, and on the proper organization of the ordnance department of the army	1829, Dec. 29	210
418.	On the increase of the number and pay of the corps of engineers	1830, Jan. 4	218
419.	Recommending an appropriation to mount troops for the protection of the frontiers of Arkansas	1830, Jan. 6	219
421.	Relative to an allowance of money in lieu of the present ration of spirits in the army	1830, Jan. 14	247
423.	Relative to the number of surviving officers and soldiers of the revolution	1830, Jan. 19	250
425.	Transmitting the Army Register for 1830	1830, Jan. 25	251
429.	Transmitting the annual returns of the militia of the several States	1830, Feb. 4	271
437.	On the causes of desertion of soldiers in the army, and suggestion of remedies for preventing the same	1830, Feb. 19	284
440.	On the defence of the northern frontier of the United States	1830, Mar. 2	295
442.	Estimates of the expense of arming and organizing the militia of the United States according to a particular plan	1830, Mar. 3	297
443.	Amounts of the appropriations for constructing and repairing fortifications of the harbors and coasts of the United States from 1815 to 1829, and of the number of troops garrisoning the same	1830, Mar. 9	304
445.	Communicating the applications and appointments as cadets at the Military Academy at West Point from its establishment to 1829, and the annual and general expenses of the same during that period	1830, Mar 15	307

No.		Date.	Page.
447.	Communicating a statement of the expenditures at the United States armories, and of the arms manufactured therein, during the year 1829	1830, Mar. 26....	365
453.	On the compensation of the officers of the army attached to the several bureaus	1830, May 6....	372
454.	Transmitting the proceedings of a court-martial in the case of Adjutant General Roger Jones	1830, May 14....	450
455.	Report of an examination and survey of various sites for the establishment of an armory on the western waters	1830, May 28....	479
457.	Communicating a statement of the amount expended upon the army proper from 1821 to 1829	1830, May 29....	580
458.	Showing the operations of the War Department in 1830	1830, Dec. 7....	585
461.	On the apportionment and distribution of sixty thousand Infantry Tactics among the militia of the States and Territories	1831, Jan. 13....	624
462.	Communicating a statement of the military roads constructed by the army of the United States	1831, Jan. 13....	625
463.	On the necessity of an increase of the engineer corps and topographical engineers exclusively for military purposes	1831, Jan. 14....	630
465.	On the importance of topographical engineers of the army	1831, Jan. 21....	631
466.	On the expediency of reducing the number of officers of the army	1831, Jan. 31....	632
467.	Transmitting the Army Register for 1831	1831, Jan. 27....	662
468.	On the subject of a change in the organization of the Military Academy at West Point	1831, Jan. 28....	676
469.	On the construction of fortifications at Ocracoke inlet	1831, Feb. 3....	680
472.	Communicating a statement of the number and rank of officers of the army on duty in the line, staff, or detached service, and those absent on furlough	1831, Feb. 8....	683
475.	Transmitting the annual returns of the militia of the several States for the year 1830	1831, Feb. 9....	687
476.	On the application of officers of the army for compensation for private property lost by the destruction of Fort Delaware by fire	1831, Feb. 15....	692
479.	Communicating a statement of the sums paid to officers of the army on account of regular and extra pay in the year 1829	1831, Feb. 22....	694
480.	Recommending an appropriation of fifty thousand dollars for the repair of Fort Delaware	1831, Feb. 22....	700
484.	Communicating a statement of the expenditures at the United States armories, and the arms manufactured therein, during the year 1830.	1831, Mar. 2....	706
485.	Showing the operations of the War Department in 1831	1831, Dec. 6....	708
490.	In reference to a bill providing for the organization of the Ordnance department	1831, Dec. 29....	806
494.	Communicating a report, plan and estimate, for the construction of Fort Griswold, in the State of Connecticut	1832, Jan. 4....	807

RESOLUTIONS OF STATE LEGISLATURES.

414.	Of Vermont, for the construction of certain fortifications, and that persons under twenty-one and over thirty-five years of age be exempted from militia duty in time of peace	1829, Dec. 29	209
424.	Of Maine, that the fortifications on the Penobscot bay and river be repaired	1830, Jan. 25	250
439.	Of Massachusetts, for the settlement and payment of the claims of that State for militia services in the war of 1812–'15	1830, Feb. 22	292
448.	Of Maine, for the settlement and payment of the claims of Massachusetts for the services of the militia of that State during the war of 1812–'15	1830, Mar. 29	367
486.	Of Massachusetts, for a more perfect organization of the militia of the United States	1831, Dec. 12	768
491.	Of Vermont, for a more perfect organization of the militia of the United States	1832, Jan. 8	806
493.	Of Connecticut, for a more perfect organization of the militia of the United States	1832, Jan. 4	807
516.	Of Indiana, for a more perfect and uniform organization of the militia of the United States	1832, Feb. 27	935

MEMORIAL.

509.	Memorial and proceedings of a convention of militia officers of Pennsylvania for the improvement of the militia system of the United States.	1832, Feb. 6	856

MISCELLANEOUS DOCUMENTS.

397.	Application for an increase of pay of the surgeons and assistant surgeons of the army	1829, Jan. 29	64
434.	Application of the city of St. Louis for aid to establish a public hospital for sick and disabled soldiers and others	1830, Feb. 11	281
451.	Recommendation of General Jesup that a mounted force be employed for the protection of the country south of the Missouri river	1830, April 8	371
482	Application of the officers of the militia of Massachusetts that an efficient and uniform system be adopted for the regulation and government of the militia of the United States	1831, Feb. 23	701
497.	Application of an officer of the army to be indemnified for liabilities incurred in obedience to orders in the command of Amelia island, in the war of 1812–'15	1832, Jan. 4	812
504.	Letter of Major T. Cross, acting quartermaster general, on the claim of an officer of the army for an allowance for quarters	1832, Jan. 21	830
506.	Application of certain officers of the army that the pay of surgeons and assistant surgeons be increased	1832, Jan. 30	849

AMERICAN STATE PAPERS.

MILITARY AFFAIRS.

20TH CONGRESS.] No. 390. [2D SESSION.

ANNUAL REPORT FROM THE DEPARTMENT OF WAR, WITH THE PRESIDENT'S MESSAGE, SHOWING THE OPERATIONS OF THAT DEPARTMENT IN 1828.

COMMUNICATED TO CONGRESS DECEMBER 2, 1828.

DEPARTMENT OF WAR, *November* 24, 1828.

SIR: I have the honor herewith to transmit for your information the annual reports of the officers who superintend the several branches of the public service intrusted to this department, showing in detail the operations of each during the past year, and the state of the funds appropriated and applicable to those services, respectively.

The report of the major general of the army, marked A, with its accompanying documents, exhibits the present number, station, organization, and discipline of our military force. From this report it will appear that some important changes have been made during the past year in the distribution of the troops, and that one of the effects of this distribution has been considerably to diminish the numerical force of the two military schools of practice. The value of these institutions is fully appreciated by the department, although some of the principal benefits anticipated from the concentration of so large portions of the army at two points have never been realized for want of means for their proper equipment; and as they were the cherished favorites of my immediate predecessors, they would not, if for no other reason, have been disturbed but to meet the positive emergencies of the government.

These schools have, from their first establishment, materially lessened the disposable force of the army for ordinary service, and about the time of their formation, or a little anterior to it, and with a view probably to this object, the garrisons of several important posts along our northern and western frontier were wholly withdrawn, and others materially reduced. This subtraction of force from ordinary service was not, however, under the peculiarly favorable circumstances of the country, injuriously felt, until within a late period, when several events have occurred which, in the opinion of the department, rendered it proper to restore a portion of these detachments to their former and appropriate duties, and a neglect to do which might have seriously affected the interest and perhaps endangered the peace of certain portions of the Union.

In the course of the last year the Winnebagoes and other Indian tribes living in the neighborhood of the posts which had been evacuated, and emboldened probably by that circumstance, commenced a series of petty, but savage, warfare on the adjoining white population, and rendered it necessary to march a strong military force into that country, the effect of which was to quell, for a time at least, these disturbances. But in the course of the past spring and summer fresh symptoms of discontent and hostility were manifested by the Indians, and the people of Illinois, and more particularly the inhabitants of the lead mine district, became again so much alarmed as to suggest the necessity, not only of permanently garrisoning the former military posts of Chicago and Prairie du Chien, but of establishing a new one in the centre of the Winnebago country, for the purpose of watching the movements of the Indians, and to serve as a connecting link between the chains of fortification on the Mississippi and on the lakes.

Within the same period unpleasant contentions had arisen on our northeastern frontier between the citizens of the State of Maine and the subjects of the adjoining British province, in consequence of conflicting claims of property and jurisdiction, and which threatened, unless promptly repressed by the presence of a military force, to involve the local authorities, at least, of the two countries in serious collisions.

Besides these inducements for strengthening our inland frontier, another important one was found in the expediency of affording timely and efficient aid to our revenue officers in defeating the purposes boldly avowed by high authority, and not yet abandoned, of introducing foreign goods into the United States, either by stratagem or force, without the payment of duties:-and this precaution was more particularly necessary along the Niagara frontier, where we had no troops, and where it is notorious that large quantities of foreign goods are now collected with this obvious design.

Such were the reasons for establishing the new and reoccupying the old military posts mentioned in the report of the major general: and to effect these objects, a reduction of the military school of practice at Jefferson Barracks became indispensable. This new disposition of our inland force has, it is believed, been universally acceptable to our citizens in the north and northwestern parts of the Union, and, it is hoped, will be approved by Congress.

The numerous fortifications completed and completing along our maritime frontier, in the progressive execution of our great system of national defence, have imposed on the department the necessity of withdrawing also from the school of artillery practice at Fortress Monroe nearly one-half of its force, for the purpose of assisting in the completion of the unfinished works, and of garrisoning and preserving those which are completed. The school of practice is not, however, thereby broken up, but may still proceed with the same efficiency and success proportionate to its numbers, as heretofore. As little more has been taught at the two schools than the *manuals* of the artillery and infantry, the same system of instruction may be continued, and with nearly the same advantage, at every post where a regiment or battalion is stationed, and where a competent instructor will always be found.

The views of the army and its staff, presented in the various reports herewith submitted, cannot, I apprehend, fail to be satisfactory to Congress and to the nation, whether regarded in reference to its military discipline, its present employments, or its fiscal economy. While a portion of that able arm of the military establishment, the corps of engineers, is employed in constructing works of military defence, another portion, aided by scientific and enterprising officers detailed from the line of the army, is co-operating with our citizen engineers in developing the capacities of the country for internal improvement, and in building up works which belong exclusively to the department of political economy. The Quartermaster General, at the same time, assisted by other officers and soldiers of the line, is engaged, not merely in military erections and accommodations for the troops, but in the construction of roads and bridges for the citizens at large. And the Ordnance department, with the force under its control, displays a corresponding energy and skill in the fabrication of arms and other munitions of war, as well for the militia of the States as for the regular army. Indeed, the reports from these three departments exhibit the army of the United States, not in the light in which standing armies in time of peace have usually been regarded—as drones who are consuming the labor of others—but as a body of military and civil engineers, artificers, and laborers, who probably contribute more than any other equal number of citizens, not only to the security of the country, but to the advancement of its useful arts.

The Military Academy, it is believed, has conquered all the prejudices which formerly existed against it, and is scattering the fruits of its science, and communicating, by its examples, the lessons of industry and order there taught, not merely to the rest of the army, but to the youths of our country generally; and the interchange of the theoretic science of this national school with the practical skill and judgment of our citizen engineers, which is now going on throughout the United States, will soon furnish every part of the country with the most accomplished professors in every branch of civil engineering. The report of the last board of visitors, remarkable for its good sense and practical views, and herewith presented, shows that this institution is still advancing in usefulness; and I beg leave to recommend to the favorable consideration of Congress the many important suggestions which it contains.

The report of the Chief Engineer, including that of the board of internal improvement, will be sure to receive the full and deliberate consideration of the national legislature; and it would be impossible, by any remarks of mine, to add anything to the intrinsic interest which this document possesses. Besides its military details, it presents a full view of the extensive operations now in train, under the superintendence of this department, for the accomplishment of the numerous objects of internal improvements, to which the recent appropriations of Congress on that subject are applicable. There are probably no expenditures of the government which come so directly home to the interests and feelings of the great body of the people of the United States, or which are viewed with more lively and unqualified satisfaction, than those which relate to internal improvement; and may I be permitted to express an opinion that the liberal appropriations, both specific and general, made to such objects during the last session of Congress, were amongst the most valuable acts of its legislation, and a hope that the same policy may be continued?

In short, the organization and arrangement of every department of the army, not as relates to its efficiency merely, but to its admirable systems of accountability and economy, are worthy of all praise, and reflect the highest credit on my predecessors, by whom they have been devised and put into operation. As regards its distribution, which must depend on the varying circumstances of the country, some changes, in addition to those which have recently been made, will probably be deemed expedient in the course of the next season. The policy of pushing our military posts, (such as Fort Snelling, on the Mississippi, Fort Leavenworth, on the Missouri, and including, perhaps, some others on the Arkansas and Red rivers,) so far within the Indian country, and so far ahead of the regular advances of our population, may well be questioned. Instead of protecting our frontier inhabitants against the incursions of the Indians, these isolated garrisons must, in the event of a serious Indian war, inevitably become the first victims of its fury. At present they only serve to invite wild and profitless adventurers into the Indian country, the usual consequences of which are personal collisions with the natives, and the government is then put to the expense of a military expedition to vindicate the rights of these straggling traders.

Had not the season been too far advanced to effect such distant movements, it was in contemplation of the department last summer, when it came to the resolution to advance a portion of its force so as to cover and protect our stationary and laboring population in the northwest, to draw in at the same time some of our most remote garrisons, in order to form a connected line of defence, the several parts of which should mutually support each other—within which no hostile Indian would dare to venture, and beyond which no white citizen, unless protected by a military escort or a proper license to trade with the Indians, should be permitted to pass.

Besides the great expense and hazard of supporting these very distants posts, another serious evil attends most of them. The luxuriant vegetation which covers the banks of our western rivers where troops are stationed, and which annually dies and rots on the ground, produces the most fatal diseases; and this evil can be remedied only by the introduction of population and herds to destroy and consume this excess of vegetation. The garrison of Fort Leavenworth, on the Missouri, has suffered the most severely from this cause. It is situated on dry and elevated ground selected with special regard to health; but the rich bottoms in its vicinity occasion the sickness, and it is doubtful whether a change of location to any other point high up the Missouri could escape or even diminish the causes of the evil.

I unite with Major General Macomb, for the reasons he has assigned, in recommending the necessary provisions for mounting a portion of the men who compose our most remote garrisons in the Indian country.

It appears from the report of the Surgeon General that, owing to the increased number of military posts, and to the numerous detachments from the army engaged on internal improvements, the officers of the medical staff are not sufficiently numerous for the exigencies of the service. I therefore concur with him in recommending its increase, by the addition of four surgeons and ten assistant surgeons; and I beg leave to remind Congress that a bill was reported in the House of Representatives during the last session,

but not definitively acted on, for graduating the pay of the medical staff; and I also take the liberty of calling to their recollection the fact that the laws constituting the department of the Commissary General of Subsistence will expire on the 3d of March next.

The report of the officer who superintends the Indian bureau, marked K, shows the manner in which the duties of this department, growing out of our intercourse with the Indian tribes, have been discharged during the past year.

The want of system and regulation for the administration of this branch of the public service has long been severely felt, and has probably subjected the officers to whom it has been intrusted to more animadversion and censure than has fallen to the lot of any other public functionaries. The different views entertained, not only by different classes of our citizens, but even by the different officers acting under this department, in regard to the leading measures of policy which ought to govern our intercourse with the Indians, have furnished fruitful sources of complaint against the department, and often of collision between the officers themselves.

It is believed that a minute and well-digested code of regulations, analogous to those which govern the other bureaus of the department, and founded on the policy and views of the government, so far as they can be collected from existing laws and treaties with the Indians, would not only afford great facility in transacting this branch of business, but materially reduce its expenses, and at the same time better fulfil the benevolent purposes of the government in regard to these unfortunate people. Encouraged in this belief by the knowledge that my predecessors had entertained similar opinions, I some time since addressed letters, by your permission, to Governor Cass and General Clark, individuals alike distinguished for general intelligence and great experience in Indian affairs, inviting their attendance at the seat of government for the purpose of aiding the department in preparing the contemplated system of regulations. They have both arrived, and are engaged on the work, which, it is confidently expected, will be completed in time to be submitted to and receive the deliberate consideration of Congress during the commencing session.

While on the subject of Indian affairs, I should feel that I did not discharge my whole duty were I to neglect to call the attention of the government to the expediency, if not absolute necessity, of more clearly defining, by legislative enactments, the nature of the relations by which we are to stand allied to the Indian tribes; and especially to prescribe what, as to between them and ourselves, shall be the reciprocal rights, both of property and government, over the vast tracts of country which they claim and inhabit.

At the commencement of our present government these tribes, with few inconsiderable exceptions, occupied a country in the interior far beyond the range of our population, and our relations with them were the simple ones which exist between remote and independent nations; or they were rather the relations of war, and most of our intercourse with them was carried on through the officers of the army stationed along our frontier posts; and it was probably to the posture in which we then stood in regard to them that the War Department was first indebted for the superintendency of Indian affairs. Since that period our white population, in its rapid and irresistible progress to the west, has been sweeping past and around them, until now a large proportion of these tribes are actually embosomed within the organized and settled parts of our States and Territories. In the mean time we have been entering into treaties with them, not of peace merely, but of property, of intercourse, and trade; and have actually contracted between them and ourselves most of the complicated relations which appertain to the municipal state, without, however, having fixed the boundaries of the authority by which these relations shall be controlled.

While some of our citizens, who are the advocates of primitive and imprescriptible rights in their broadest extent, contend that these tribes are indpendent nations, and have the sole and exclusive right to the property and government of the territories they occupy; others consider them as mere tenants at will, subject, like the buffalo of the prairies, to be hunted from their country whenever it may suit our interests or convenience to take possession of it. These views of their rights and disabilities are equally extravagant and unjust; but the misfortune is, that the intermediate line has never been drawn by the government. Nothing can be more clear to one who has marked the progress of population and improvement, and is conversant with the principles of human action, than that these Indians will not be permitted to hold the reservations on which they live within the States by their present tenure for any considerable period. If, indeed, they were not disturbed in their possessions by us, it would be impossible for them long to subsist, as they have heretofore done, by the chase; as their game is already so much diminished as to render it frequently necessary to furnish them with provisions in order to save them from starvation. In their present destitute and deplorable condition, and which is constantly growing more helpless, it would seem to be not only the right but the duty of the government to take them under its paternal care, and to exercise over their persons and property the salutary rights and duties of guardianship.

The most prominent feature in the present policy of the government, as connected with these people, is to be found in the efforts that are making to remove them beyond the limits of the States and organized Territories.

A very extensive tract of country lying to the west and north of the Arkansas Territory, remarkable for salubrity of climate, fertility of soil, and profusion of game, has lately been set apart for the colonization of the Indians. Liberal pecuniary inducements have been offered by Congress to emigrants, and many have already embraced the offer. But the ultimate success of this project has been greatly endangered, and may yet be defeated, by the operation of another prominent measure of government, which, although suggested by the most humane motives, comes in direct conflict with the plan of colonization.

The annual appropriation of $10,000 to the purpose of educating Indian children and teaching them the mechanic arts has had the effect to draw to almost every Indian reservation, in addition to the agents and interpreters, a considerable number of missionaries and teachers with their families, who having acquired, principally by the aid of this fund, very comfortable establishments, are unwilling to be deprived of them by the removal of the Indians; and thus we have found that while the agents specially employed by the government for this purpose are engaged in persuading by profuse distributions of money and presents the Indians to emigrate, another set of government agents are operating, more secretly to be sure, but not with less zeal and effect, to prevent such emigration.

These remarks are not intended as a personal reflection on the missionaries and teachers, much less on the pious and respectable *patrons* of these benevolent institutions, who no doubt are disposed to lend a ready support to every humane measure which the government may think proper to adopt in favor of

these depressed people; but are rather intended to show the natural and unavoidable tendency of the system itself to counteract the leading policy of the government.

If the project of colonization be a wise one, and of this I believe no one entertains a doubt, why not shape all our laws and treaties to the attainment of that object, and impart to them an efficiency that will be sure to effect it?

Let such of the emigrating Indians as choose it, continue, as heretofore, to devote themselves to the chase in a country where their toils will be amply rewarded. Let those who are willing to cultivate the arts of civilization be formed into a colony consisting of distinct tribes or communities, but placed contiguous to each other, and connected by general laws which shall reach the whole. Let the lands be apportioned among the families and individauls, in severalty, to be held by the same tenures by which we hold ours, with perhaps some temporary and wholesome restraints on the power of alienation. Assist them in forming and administering a code of laws adapted to a state of civilization. Let the $10,000 appropriation be applied, within the new colony, exclusively for the same objects for which it is now expended; and add to it from time to time so much of our other annual contributions as can be thus applied without a violation of public faith.

In regard to such Indians as shall still remain within the States and refuse to emigrate, let an arrangement be made with the proper authorities of the respective States in which they are situated for partitioning out to them, in severalty, as much of their respective reservations as shall be amply sufficient for agricultural purposes—set apart a tract, proportioned in size to the number of Indians, to remain in common, as a refuge and provision for such as may by improvidence waste their private property, and subject them all to the municipal laws of the State in which they reside. Let the remainder of the reservation be paid for by those who hold the paramount right, at such prices as shall be deemed, in reference to the uses which Indians are accustomed to make of lands, reasonable; and the proceeds to be applied for the benefit of those of the tribe who emigrate after their establishment in the colony, or to be divided between those who emigrate and those who remain, as justice may require.

It may, perhaps, be fairly doubted whether the ten thousand dollar appropriation, independently of its tendency to prevent emigration, produces, under the circumstances in which it is now expended, any useful results. These schools, it is true, impart to a certain number of Indian youths so much information, and so far change their habits, as to inspire them with all the passions and desires, and particularly the passion for accumulating individual wealth, peculiar to a state of civilization; and then these half-educated men are turned loose among their respective tribes, without any honorable means of satisfying the desires and wants which have been thus artificially created. The lands of the tribe being common and unalienable, they have no motive to cultivate and improve them. There is no floating wealth to attract their ambition, and the only and usual means of gratifying their cupidity for money is by employing the advantages acquired by their education, to appropriate to themselves more than their just share of the large contributions annually made by the government; and in this way they, with some few honorable exceptions, render not only themselves, but the very arts they have acquired, obnoxious to the nation at large.

If, however, it should be deemed most expedient to continue to expend a portion of the $10,000 fund on the Indians remaining within the States, the missionaries and teachers should be located on the tracts proposed to be set apart for the common use of each tribe; from whence the information they supply, and the arts they teach, might be advantageously applied by the adjoining Indians to the improvement of their separate property; and where they might also take charge of those Indians who may, by improvidence, have expended their private estates.

It is, in my opinion, worse than useless to impart education and the arts to the Indians, without furnishing them, at the same time, with appropriate subjects on which to employ them.

I have the honor to be, with great respect, your obedient servant,

P. B. PORTER.

The PRESIDENT *of the United States.*

A.

HEADQUARTERS OF THE ARMY, *Washington, November,* 1828.

SIR: In obedience to your instructions of the 20th of September last, I have the honor to lay before you:
1st. A statement showing the organization of the army, marked A.
2d. A return of the actual strength of the army, marked B.
3d. A return of the strength of the eastern department, designating the posts and garrisons, marked C.

4th. A return of the strength of the western department, designating the posts and garrisons, marked D.

5th. A general map, exhibiting in one view a distribution of the whole force, designating those posts occupied by the artillery and those by the infantry, marked F.

6th. A statement showing the whole number of recruits enlisted in the army from the 1st of January to the 30th of September, 1828, marked E.

7th. An estimate of the amount which will be required for the current expenses of the recruiting service for the year 1829, marked G.

Since I have taken the command of the army no reports of inspections have been received from the generals commanding departments, nor from the field officers of the artillery; the latter, however, are now engaged in inspecting the companies of their respective regiments, and it is presumed that their reports will be received in due time.

Inspector General Wool has been engaged in the inspection of the arsenals and other objects connected with the Ordnance department. He has inspected the arsenals of Washington, Frankford, Watervliet, Watertown, Rome, Detroit, and Pittsburg, and the armory at Springfield and the ordnance and ordnance stores at New York, Newport, and Boston. He reports that there is an evident improvement in the arrangement of these arsenals, and that by condemning and selling the damaged and unserviceable articles a considerable amount in money has been realized, and the arsenals freed of a quantity of rubbish which, while it occupied considerable space, impeded also the proper arrangement for inspections of the useful and serviceable articles.

Inspector General Croghan has visited the posts on the lakes and the Atlantic frontier from Maine to Virginia, including the new post established at Houlton Plantations, in Maine. He reports favorably of the condition of the troops, as regards their discipline, police, and general instruction, and recommends some improvements in the quarters and hospitals, which will be attended to by the proper departments.

Both inspectors general will continue the inspections which they have been directed to make—the former of the remaining arsenals, armories, ordnance, and ordnance stores, and the latter the remaining posts occupied by the troops.

Since the last annual report from the headquarters of the army, made by my predecessor, several movements of the troops have taken place, new posts established, and others reoccupied. These movements and changes are explained in the following statement, together with the circumstances that led to them:

Four companies of the 2d regiment of infantry were ordered to form a garrison at Houlton Plantations, in Maine, for the purpose of keeping order, and in assisting the civil authorities in maintaining the sovereignty of the Union in that quarter, in consequence of irregularities which were committed on the eastern frontier of that State. These companies are now engaged in establishing their winter quarters, and in opening communications, by means of roads, with the navigable waters leading into the Atlantic, to facilitate the procurement of their necessary supplies.

From the restlessness evinced by the Winnebagoes and other tribes in the northwest, partly arising from intrusion upon lands in the mineral district claimed by them to be within their boundaries, by white people in search of lead, and in consequence of a belief entertained by these tribes, from the smallness of the military force in their neighborhood in comparison with what it had been several years before, that the government might not find it convenient to increase it, and that they might therefore with impunity resume the depredations which had led to the establishment of those posts in the first instance, it was found necessary to establish a new post at the portage between the Fox and Wisconsin rivers, and to reoccupy Chicago, at the southern extremity of Lake Michigan, and Fort Gratiot, at the entrance of Lake Huron; and with a view to maintain the sovereignty of the United States on the Canadian line, besides the re-establishment of Fort Gratiot, Fort Niagara, an important post at the entrance of Niagara river, on Lake Ontario, has been reoccupied. These troops posted along the Canadian line may be so disposed of, should it be found necessary, to aid in preventing any infractions which may be attempted of the revenue system.

In order to effect these changes, the 1st regiment furnished the garrison of the post at the portage of the Wisconsin and Fox rivers, while it continued to occupy Fort Crawford, at the Prairie du Chien, and Fort Snelling, at the junction of the St. Peter's with the Mississippi. The 2d regiment, which heretofore occupied the posts at the Sault de Ste. Marie, Green Bay, and Mackinac, moved down to occupy the post of Forts Gratiot and Niagara, the residue of the regiment being at Houlton Plantations. The 5th regiment, which was stationed with the sixth at the school of instruction at Jefferson Barracks, relieved the second at Green Bay, Sault de Ste. Marie, and Mackinac, besides furnishing two companies for the garrison at Chicago. The march of the 5th regiment by the way of the Wisconsin and Fox rivers must have produced an imposing effect on the tribes of Indians through whose country it passed—an effect which was contemplated by the movement. It will be seen by the accompanying map of the distribution of the troops that there is a complete cordon from Green Bay to the Mississippi, which must have a powerful influence over the Winnebagoes, and afford protection to the Indian trade which passes in that direction; and there is every reason to believe that neither the Winnebagoes nor their confederates will attempt any hostilities so long as the troops maintain their present positions.

The remaining regiments of infantry occupy the positions which they held at the last annual report, with the exception of some movements of detachments of the 4th regiment in Florida to facilitate the migration of the Creeks to the west of the Mississippi, and the stationing of a portion of that regiment which was intended for the garrison of New Orleans at Baton Rouge, with a view of protecting the arsenal at that place, and to be ready to fall down upon New Orleans or the intermediate country should circumstances require it. Also one company of this regiment has been ordered to occupy Fort St. Philip, which was without a garrison, for the purpose of guarding the works and public property at that place, and particularly at Fort Jackson, on the opposite side of the Mississippi, which fort was much exposed to depredations during certain seasons of the year. These troops will also be in a position to aid in enforcing the revenue laws, should there be a necessity for their service in that regard.

The infantry forms a very efficient corps in its present organization, armament, and equipment; still it has suggested itself, by the nature of the country which opens upon the plains towards the Mexican frontier and towards the Rocky mountains, that the efficiency of such of the regiments which occupy the posts which have reference to that frontier could be greatly augmented by providing the means of mounting the light companies, and giving them the character and effect of rangers or mounted *chasseurs*. Such an armament would enable the commandants of garrisons in that quarter to overtake and punish, promptly, any of those mounted tribes which inhabit the plains that may venture to commit depredations on the frontier inhabitants or their property, while it would at the same time enable the

government to check any unlawful enterprises in that quarter. From the nature of the country, which is admirably calculated for the support of horses and for their use, together with the cheapness of the animals, as well as the means of their subsistence, it is believed that a very small addition to the appropriation for the Quartermaster's department would enable the mounting and support of one or two companies, which would be a very useful experiment; all the necessary equipments being already provided, so far as it regards the furniture for the horses. Such corps, from the celerity with which they may be moved, will put it in the power of the commandants of garrisons to reinforce, promptly, any garrisons along the frontiers that may be threatened, besides afford the means of convoys and expresses where occasion should require. It is not proposed to have a costly cavalry, but merely to procure such horses which that frontier affords, where they can be had at a very low rate.

The artillery, from the nature of its arms, properly forms the garrisons of forts on the maritime frontier, and is distributed along the coast from Maine to Louisiana, inclusive, as indicated by the accompanying returns and the map above alluded to. Since the last annual report some changes have taken place, so as to throw the companies of the several regiments in such manner as to form one continuous line, and to be more immediately under the command of their respective colonels and field officers. Thus, the third regiment occupies all the forts on the seaboard from Eastport, in Maine, to New London, in Connecticut. The fourth occupies all the forts on the seaboard from New York to Annapolis, in Maryland, besides furnishing one company as a guard for the public stores at West Point. The first regiment occupies the forts on the Potomac, Hampton Roads, in Virginia, and on the Cape Fear river, in North Carolina, besides furnishing a guard of one company for Bellona arsenal, near Richmond, in Virginia; and the second regiment occupies the forts on the seaboard from Charleston, in South Carolina, to the passes leading from Lake Pontchartrain to the Gulf of Mexico, besides furnishing a guard to the arsenal established at Augusta, in Georgia.

The artillery school of practice established at Fortress Monroe, which has heretofore consisted of ten companies, has been reduced to six companies, as will appear by the accompanying order, No. 58, marked H, to which I beg leave respectfully to refer you. It will also be perceived by that order that the original organization of the school remains unchanged. It may be proper to remark, in regard to this institution, that the want of means has prevented its establishment to its full extent upon the plan originally contemplated. It is believed, however, that under the arrangement set forth in the order above mentioned it may be made instrumental in diffusing throughout the artillery the practical knowledge necessary to the efficiency of that arm. The artillery heretofore has been too much confined to the duties of infantry from a want of a suitable equipment in its proper arm. Arrangements with the Ordnance department are making for a supply of ordnance and ordnance stores, to enable the artillery to exercise at the sea-coast batteries as well as the field-pieces, and, within certain limits, to practice with the mortars, howitzers, and light and heavy pieces, and the machinery appertaining, not intending, however, to have more guns mounted than the respective garrisons can serve, the remainder, if any, to be housed and kept in store for other occasions. By this means all the artillery will have an opportunity of perfecting themselves in the manual of their proper arm, and possess, at the same time, the means of repelling any insult that may be offered to the American flag at their stations respectively.

The promptness with which the changes and movements of the troops have been made indicate the efficiency of the staff departments intrusted with the management of the necessary transport and supplies consequent thereon, while it affords satisfactory evidence of the present state of the discipline of the army.

Respectfully submitted.

ALEXANDER MACOMB,
Major General, Commanding the Army.

Hon. PETER B. PORTER, *Secretary of War.*

R. JONES.

ADJUTANT GENERAL'S OFFICE, *Washington, November 5, 1828.*

G.

ADJUTANT GENERAL'S OFFICE, *Washington, November 5, 1828.*

SIR: Pursuant to your instructions, I submit the following estimate for the expenses of the recruiting service of the army for the year 1829, and the first quarter of 1830:

Bounties for 2,721 recruits, at $12 per man	$32,652 00
Premiums for enlisting the above, $2 per man	5,442 00
	38,094 00
Contingent expenses of the recruiting service, including quarters, fuel, bunks, straw, allowance to citizen surgeons for examination and medical attendance, magistrates' fees for administering oaths, and all expenditures on their account, until put in march for their regiment, at $7 per man	19,047 00

The number of recruits estimated for 1829 is calculated as follows:

The vacancies existing in the rank and file of the army on the 30th of September last, as exhibited by the latest monthly returns received, were		1,255
To which add the number of discharges that will take place by the expiration of enlistments from the 1st of October, 1828, to the 31st of December, 1829		1,454
And the number of casualties by death, desertion, and discharges for inability, &c., for the same period		1,000
		3,709
From which must be *deducted*—		
Recruits not assigned to regiments	238	
Recruits on the march	297	
And the estimated number that will be enlisted between the 1st of October and the 31st of December, 1828	453	
		988
Total number of recruits required for 1829		2,721

According to the amount expended of the appropriation for the recruiting service for 1828, in the first three quarters of the year, it is calculated that on the 31st of December next there will remain in the treasury a balance of the appropriation for "bounties and premiums" of	$11,832 00
And of the appropriations for contingencies	3,000 00
In addition to the above balance, there will be required for the year 1828 an appropriation for "bounties and premiums," after deducting the sum ($9,000) already appropriated under that head for the first quarter of 1829, the sum of	17,262 00
And for "contingencies," in addition to the above balance, there will be required an appropriation for the year 1829, after deducting the sum ($5,000) already appropriated under that head for the first quarter of 1829, the sum of	11,047 00

Appropriation required for the *first quarter* of 1830:

"Bounties and premiums"	$9,523 50
"Contingencies"	4,761 75
Total sum required	14,285 25

NOTE.—The above estimate for the first quarter of 1830 is based upon that of 1829, which affords the best data that the nature of the calculation will admit of.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Major General MACOMB, *General-in-Chief U. S. Army, Headquarters, Washington.*

H.

ORDER No. 58.

ADJUTANT GENERAL'S OFFICE, *Washington, October* 29, 1828.

1. In conformity with the views of the War Department, the following distribution of the artillery will be made forthwith:

The 1st regiment.—The colonel and lieutenant colonel to take post at Fortress Monroe, and the major at Bellona arsenal.

Company F to garrison Fort Washington, Maryland; Brevet Major Mason.

Companies A, H, I, E, G, B, Fortress Monroe, Virginia; Brevet Majors Worth and H. Whiting; Captains F. Whiting, Saunders, Kirby, and Dana.

Company C, Bellona arsenal, Virginia; Brevet Major Brooks.

Company D, Fort Johnson, North Carolina; Brevet Major Churchill.

The 2d regiment.—The brevet colonel to take post at Savannah, and the major at St. Augustine.

Companies F and A, to garrison Fort Moultrie, South Carolina; Brevet Major Heileman and Captain Legate.

Company B, Fort Johnson, South Carolina; Captain Belton.

Company C, Augusta arsenal, Georgia; Brevet Major Fanning.

Companies I and E, Oglethorpe barracks, Savannah, Georgia; Captains Baden and Lyon.

Company D, Fort Marion, Florida; Brevet Major Gates.

Company H, Fort Wood, Louisiana; Captain Zantzinger.

Company G, Fort Pike, Louisiana; Captain Mountfort.

The 3d regiment.—The colonel to take post in the city of Boston, the lieutenant colonel in New London, and the major in Portsmouth.

Company A, to garrison Fort Sullivan, Maine; Captain Childs.

Company F, Fort Preble, Maine; Captain McClintock.

Company D, Fort Constitution, New Hampshire; Captain Ansart.

Companies H, B, and I, Fort Independence, Boston harbor, Massachusetts; Captains Mackay, Fraser, and Lendrum.

Companies G and C, Fort Wolcott, Rhode Island; Brevet Major Lomax and Captain Thruston.

Company E, Fort Trumbull, New London, Connecticut; Captain Taylor.

The 4th regiment.—The colonel to take post in Philadelphia, the lieutenant colonel in New York, and the major in Annapolis.

Companies C, A, G, and H, to garrison Fort Columbus, New York; Captains Spotts, Gardner, Monroe, and Schmuck.

Company F, West Point, New York; Captain L. Whiting.

Company D, Fort Delaware, Delaware; Brevet Major Pierce.

Companies E and B, Fort McHenry, Maryland; Brevet Major Payne and Captain Ripley.

Company I, Fort Severn, Maryland; Captain Erving.

2. This arrangement of the artillery is not to interfere with the establishment of the school of practice at Fortress Monroe; and the graduates from the Military Academy will repair thither, agreeably to the orders heretofore given, unless otherwise specially directed.

3. Companies which shall be found deficient upon inspections will be ordered to Fortress Monroe by special direction from general headquarters, with a view to their improvement and instruction, as well as such officers as may be found deficient in practical knowledge

4. The commanding officer of the eastern department will exercise the same authority over Fortress Monroe as he does over any other post within his command, while there is reserved to the general-in-chief, under the approbation of the War Department, the exclusive right to make regulations connected with the post as a school of practice. All reports and returns will be made, accordingly, to the general of department.

5. Those officers who have heretofore formed the staff of the artillery school, with the exception of the officers of the quartermasters', subsistence, ordnance, and medical departments, are by this order relieved, and their places supplied by the field and staff officers composing the garrison under this arrangement.

6. The library, apparatus, instruments, and other property belonging to the school and to the post will be turned over to the quartermaster of the post, to be held subject to the orders of the relieving officer.

7. The detachment of the 4th regiment of artillery, mustered as a band for the school of practice, and supported as such by that institution, will remain at the post, and be considered as transferred to the regiment forming the garrison, and will be mustered accordingly.

8. In this distribution of the artillery, the commandants of regiments will take a general supervision of their respective regiments, see that the companies are completed in officers and men, according to their legal organization, and duly instructed and exercised in the duties appertaining to their arm; in this they will be assisted by their field officers. The captains and subalterns being comfortably quartered with their companies, will have every opportunity of perfecting the discipline and instruction of the non-commissioned officers and private soldiers, and will be held accountable to their superior officers for the state of their respective companies.

9. The quartermaster's department will furnish the necessary transportation to carry into effect the movements indicated in this order, and will make such arrangements for the accommodation of the troops at the posts, respectively, to which they are ordered, as may be necessary.

10. The commanding officers of such posts, to which this order has reference, are charged with the immediate execution of it, so far as relates to the troops under their command.

By order of Major General Macomb.

R. JONES, *Adjutant General.*

B.

ENGINEER DEPARTMENT, *Washington, November* 19, 1828.

SIR: In obedience to your order of the 22d of September last, I have the honor to report the condition of the fortifications, the works of internal improvement, and of the Military Academy, on the 30th of that month, with their progress during the year ending on the same day.

The accompanying table (A) exhibits the sums available for those objects during the period specified; from which it will also appear that the amounts advanced to the disbursing agents on account of the several objects of expenditure have been, as far as returns are received, satisfactorily accounted for.

The table marked B exhibits the fortifications of which plans have been made and submitted for adoption by the board of engineers, arranged in classes according to the order in which they should be begun, with estimates of costs, and for which appropriations have not as yet been made.

Fortifications.

1. *Fort Adams, Newport, Rhode Island.*—Great progress has been made during the year in the construction of this fort. The materials used are of an excellent quality, and the workmanship of superior execution. A partial inspection of the work was made in July last by the chief engineer.

2. *Fort Hamilton, New Utrecht Point, New York.*—In consequence of the limited amount appropriated for this work its progress has been less than desired. The quantity of work executed, however, is considerable, and consists of the excavation and removal to the proper places of more than 32,000 yards of earth, of the laying of 3,233 cubical yards of stone masonry, of 2,193 cubical yards of brick masonry, laid in arches, and in cutting to a smooth surface of 36,013 feet of freestone. The materials, and particularly the stone, are of superior quality, and the workmanship strong and excellent. The chief engineer likewise partially inspected this work in July last.

3. *Fortress Monroe, Hampton Roads, Virginia.*—Owing to the limited supply of stone during the past summer, arising from causes over which the contractor for furnishing that material had no control, its masonry did not progress to the extent contemplated, which will account for the large amount—upwards of $42,000 of the appropriation—remaining to be applied after the termination of the third quarter of the year. Considerable work has, however, been effected towards its completion. Nearly all the casemates on the water fronts are finished, and a considerable portion of the rampart on the other fronts formed. The sum asked to be appropriated for next year, together with that remaining available on October 1, and appropriated for the first quarter of the ensuing year, it is believed will be ample to complete the

body of the work. All the supplies except that of stone have been abundant, and obtained at reasonable rates.

4. *Fort Calhoun, Hampton Roads, Virginia.*—The deposit of stone for the formation of its base has been continued, and is now of such extent and firmness as to justify the construction, during the next year, of the first or lower tier of the castle. The whole of the foundations are laid to a height which will admit of the work being prosecuted at all stages of the tides. The materials used are of a durable quality, and the work executed is substantial.

5. *Fort Macon, Beaufort, North Carolina.*—The injuries sustained by this work from the storm of August, 1827, have been repaired; besides which, enough earth to form the glacis to the level of the terreplein of the covert way has been excavated and put in place. The masonry and other parts of the work have likewise, notwithstanding the lateness of the season when the appropriation for the year became available, made considerable and satisfactory progress.

6. *Fort at Oak island, North Carolina.*—In consequence of the late period of the year at which the appropriation was available, the superintending engineer was unable, before the month of July, to organize the requisite force of masons to resume the construction of its masonry. He has, however, subsequently been able, besides making extensive excavations, to lay 115 cubical yards of stone and 2,131 cubical yards of brick masonry; and he confidently believes that, by the end of the year, the citadel will have so progressed as to receive its terminating grillage. In addition to the foregoing, the damages sustained by the storm of August, 1827, have all been repaired.

7. *Fort, Charleston harbor.*—In consequence of there being no officer available for that service, it has been out of the power of the department to detach one to superintend its construction before now, without material injury to other works already commenced, from one of which it would have been necessary to withdraw the officer. Arrangements will, however, be made to detach one from a northern station so soon as the operations at one of them are suspended for the winter, which may be expected to take place some time during this month.

8. *Fort, Cockspur island, Savannah river, Georgia.*—An officer has been assigned to superintend the construction of this work, and he will proceed to the execution of his orders so soon as he can be furnished with the necessary plans, &c., which are now copying for the purpose.

9. *Fort, Santa Rosa island, Pensacola bay, Florida.*—An officer has also been assigned to the superintendence of this work, who will be ready to commence its construction immediately after the receipt of the plans, &c., which are now under progress of being copied for transmission.

10. *Battery, Bayou Bienvenu, Louisiana.*—As had been anticipated by this department in its last annual report, this work, as far as the nature of the soil on which it is erected (a prairie tremblaute) would admit, has been completed. The cost of the work executed has exceeded the amount appropriated by the sum estimated for this work for the ensuing year, in consequence of the settling being so much greater than had been expected or could have been foreseen, especially when the labor bestowed and the means resorted to in preparing the foundation to guard against that casualty are considered. An inspection of it was made in March last by an officer of engineers, who reports that the materials used in its construction are of an excellent quality, the workmanship well executed, and that no injury appears to have been sustained by the settling.

11. *Fort Jackson, Plaquemine Bend.*—The superintending engineer reports that the unexpended balance of the appropriation for this year, added to the appropriation for the first quarter of the next, will suffice for its completion, unless the coming season should prove unfavorable, either by storms, Mississippi floods, or other unforeseen causes, which would operate to increase the labor of excavating, or necessarily compel the suspension of that operation to another year, and consequently require the reorganization of the required force, which in that country is always attended with great cost; to avoid which, he requests that a small appropriation may be made, to revert to the treasury in case it is not wanted for that object. A special inspection of this work was likewise made in March last by an officer of engineers, who reports that the work was in a prosperous condition, the materials used of a good quality, and likely to be durable. The superintending engineer reports, in addition, that the diseases of the climate have been less severely felt during the past season than during any previous year, confirming the opinion that with the improvement of the grounds and the completion of the works the site will become as healthy as any other locality of the Lower Mississippi below New Orleans.

12. *Fort at Mobile Point, Alabama,* has progressed satisfactorily during this year. The officer who inspected Fort Jackson also inspected this fort. He reports that the materials used are of an excellent and durable quality, and that great attention has been paid to the workmanship, as exhibited in its appearance.

13. *Fort Chef Menteur.*—As anticipated at the date of the last annual report, this fort was completed soon afterwards, and occupied by a military garrison. A special and minute inspection of it was made in March last by an officer of engineers, who reports that the materials of which it is built are of an excellent quality, and the workmanship good, and that he could not discover the slightest injury of any kind.

Sea-wall for the protection of George's island, harbor of Boston.—The sum appropriated during the last session of Congress proved insufficient to complete this work. The top course of the wall is all that remains to be done to complete it, and an appropriation for that object is accordingly respectfully recommended.

The board of internal improvement have been employed since the date of the last annual report as follows, viz:

1. In preparing their report on the reconnoissance made of a route across the Cumberland mountains, with a view of constructing a national road from the city of Washington to New Orleans.

2. In making their report of the examination of the Muscle and Colbert's shoals, with a view of making a steamboat canal to avoid the obstructions in the navigation of the Tennessee river at those points.

3. In preparing a report on the projected canal to unite the Hiwassee with the Coosa.

4. In revisiting the country between Barnstable and Buzzard's bays, with a view of projecting a plan for connecting them by a sloop canal navigation; and,

5. In preparing a full report on the contemplated canal between the Atlantic and Gulf of Mexico; as also on the navigation along the coast of the Gulf of Mexico to the Mississippi.

Civil constructions.

1. *Continuation of the Cumberland road from the Ohio river to Zanesville, Ohio.*—The construction of this work has been continued on the principles explained in the last annual report. No full report of the operations during the past year has yet been received; but it is known that contracts have been made for its completion, which will be effected during the present year, the sum appropriated by the act of the 19th of May last being sufficient for that purpose.

2. *Repairs of the Cumberland road between Cumberland and Wheeling.*—The sum of thirty thousand dollars, appropriated for this purpose by the act of the 2d March, 1827, has been expended in repairing those portions of the road which most required it, leaving yet more than one-half of the road unrepaired. The propriety of asking for an additional appropriation for this object is therefore respectfully submitted.

3. *Construction of a road from Detroit, in Michigan Territory, to Chicago, in the State of Illinois.*—With the sum of twenty thousand dollars, appropriated by the act of the 2d of March, 1827, thirty-three miles of this road have been completed in a fair and substantial manner, and it already affords important facilities to emigrants and to the inhabitants of the vicinity. With the appropriation of eight thousand dollars by the act of the 19th of May, 1828, an additional portion of about eighteen and a half miles has been placed under contract, and will be completed by the 15th of June next; and the funds already appropriated will be sufficient to complete the road to the river Raisin, making a distance of fifty-three and a quarter miles from Detroit. To continue this work advantageously during the next year an additional appropriation of ten thousand dollars, as mentioned in the general estimate, is required.

4. *Construction of a road from Detroit to the Maumee.*—This work has progressed during the year in a satisfactory manner, and the sum appropriated by the act of the 19th May, 1828, will, it is believed, suffice for its completion.

5. *Improvement of the navigation of the Mississippi river.*—In the autumn of 1827 the operations for this purpose were carried on between the mouth of the Ohio and White rivers, a distance of about four hundred miles, and the obstructions removed in that portion of the river as completely as the stage of the water would permit. During the present fall the operations on the same portion of the river have been continued under much more favorable circumstances, the water having been about seven feet lower than last year, which has enabled the superintendent to effect the removal of all the obstructions on the sand-bars and island chutes as far as New Madrid; and should the stage of the water and the health of the workmen continue favorable, the operations will be continued this year as low down as Natchez, or perhaps to Baton Rouge. The reports of masters of steamboats and others are highly favorable as to the efficiency of the work which has been done.

6. *Improving the navigation of the Ohio river.*—The stage of the water in this river has not been as favorable as usual for the prosecution of the operations, and in consequence the progress has not been so great as was anticipated. Considerable progress was, however, made in removing rocks, snags, and logs from the channel of the river, and fallen timber from its banks. The work was suspended about the middle of October, to be resumed, however, should circumstances permit.

7. *Deepening the channel to the entrance of Presqu' Isle bay.*—The works projected for this purpose have been completed in a substantial and satisfactory manner, and have already nearly accomplished the intended object, there being in no place less than 7 feet water on the bar, where 4 feet was formerly the greatest depth, and steamboats and other vessels navigating Lake Erie enter and leave the port without any difficuty. Violent storms on the lake have caused a breach in the point of land forming the bay, which, if not repaired, may cause serious injury to the harbor by producing a bar inside. I would therefore suggest the propriety of asking for an appropriation for this purpose, as recommended by the local engineer.

8. *Completion of a pier at Buffalo, in the State of New York.*—This work, for which an appropriation was made by the act of the 19th of May, 1828, has been prosecuted to advantage, and the breaches made in the old pier have been closed by the new one constructed on the inside of it, and protected by a mole of stone on the outside, raised 15 feet above the level of the lakes. This pier and mole have been extended complete for 240 yards, the benefit of which has been already experienced, and their strength tested by the late storms, from which no injury was sustained.

9. *Erection of piers at the mouth of Dunkirk harbor, in the State of New York.*—This work, commenced last year, has been nearly completed by means of the additional appropriation made on the 19th of May last; some injury was sustained in consequence of the storm which visited Lake Erie on the 13th of October, the works being then in an unfinished state, but it is believed that its extent was not very great, and will be soon repaired.

10 *Removing obstructions at the mouth of Ashtabula creek, in the State of Ohio.*—The works constructed for this purpose have in part effected the object of removing the sand-bar which obstructed the channel, leaving but a small gravel bar next to the creek, the compactness of which is such that it will probably require to be excavated by machinery. The portion of the piers commenced last season has been completed, and when they shall have been carried out as far as the plan contemplates, they will form a safe and commodious harbor.

11. *Removal of obstructions at the mouth of Cunningham creek, in the State of Ohio.*—By the severe storms the last winter and this fall, a pier constructed by a company of citizens, together with an experimental pier 60 feet in length, constructed by the United States engineer, was entirely destroyed; in consequence of which the original plan was abandoned, and a succession of solid blocks of pier-work filled with stone substituted for the old pier; and the same mode of construction will be continued until the work shall have been carried out as far as contemplated by the plan.

12. *Removal of obstructions at the mouth of Grand river, in the State of Ohio.*—The construction of the works for this purpose has been successfully prosecuted, and the effect produced by them is such that the harbor has been accessible at all times during the summer; and when the contemplated works shall have been completed there is every reason to believe that the benefits anticipated from them will be fully realized.

13. *Improvement of Cleveland harbor, in the State of Ohio.*—Under the act of the 2d of March, 1827, works for this purpose were commenced, and the construction has been continued with success. Most of the vessels navigating the lake already find little or no difficulty in entering the harbor. To prevent any accumulation of sand at the entrance in future, it is purposed to continue the works further into the lake, the bed of which is of clay.

14. *Removing the sand-bar at the mouth of Black river, in the State of Ohio.*—The execution of works for this purpose, under the act of the 23d of May, 1828, was intrusted to an officer of engineers, by whom arrangements were immediately entered into for the commencement of the work, by making contracts for materials and procuring the necessary machinery. These arrangements were in such a state of forwardness as to permit of the commencement of the work about the last of October.

15. *Removing obstructions at the mouth of Huron river, in the State of Ohio.*—The channel leading into Huron river continues to improve, so that vessels have found no difficulty in entering it, and the completion of the projected works will constitute it a safe harbor. The greater part of the sum appropriated by the act of the 19th of May last has been expended in raising to their intended height the portions of piers already constructed, the deepening of the channel having occasioned a settling of from 6 to 9 and 12 feet in the work.

16. *Completing a pier at the entrance of La Plaisance bay, in Michigan Territory.*—The sum appropriated for this purpose by the act of the 2d of March, 1827, has been advantageously applied, and the construction of a breakwater is nearly completed; it will, however, be necessary to extend the works in order to give perfect security to the harbor.

In relation to the works on Lake Erie, I would here remark that the openness of the last winter was such that very little ice formed along its shores, and the works were consequently exposed to all the storms (which were frequent and violent) that occurred; notwithstanding which no injury was sustained by any of those constructed under the direction of the United States engineer, except that of Dunkirk, occasioned by the works being moored on a smooth rock.

17. *Construction of piers at the mouth of Oswego harbor, in the State of New York.*—The prevalence of high winds on Lake Ontario, combined with that of general sickness among the inhabitants of the vicinity of Oswego, has prevented the completion of this work, which it was expected would be accomplished during the last season; and the injury sustained by the unfinished part of the piers, in consequence of a violent storm in October, has rendered it necessary to estimate for an additional sum to enable the superintendent to meet his engagements with the contractor.

18. *Clearing out and deepening the harbor of Sackett's Harbor, in the State of New York.*—To effect this object a dredging machine worked by steam was procured, and has been during the season in successful operation.

19. *Erection of a pier on Steel's Ledge, near the harbor of Belfast, in the State of Maine.*—Since the date of the last annual report this work has been completed, and by the report of its condition in October, it appears to be perfectly firm and substantial.

20. *Removing obstructions to the navigation of Kennebec river at Lovejoy's Narrows, in the State of Maine.*—The sum appropriated by the act of the 2d of March, 1827, having been found insufficient to effect this work, as was stated in the last annual report, an additional appropriation was made on the 19th of May last, which will, in all probability, suffice for the purpose. In consequence of the shortness of the season for working in the water on the Kennebec river, all that can be effected this year will be the making of a contract and preparing for the execution.

21. *Improvement of the harbor of Saco, in the State of Maine.*—Contracts were made for the erection of piers and other works for this purpose agreeably to the act of the 2d of March, 1827, and considerable progress has been made in their construction; but the execution of one of them has been delayed by a difficulty in procuring possession of one of the sites; to remove which difficulty the interference of the legislature of the State will be necessary.

22. *Removing obstructions in the Berwick branch of the Piscataqua river, in the State of Maine.*—The agent appointed to superintend the operations on this river made arrangements during the summer of a very satisfactory kind, and the work has been successfully commenced.

23. *Removing the sand-bar at the mouth of Merrimack river, in the State of Massachusetts.*—Under the act of the 23d of May, 1828, a project for works to effect this object has been adopted, and an agent appointed to carry it into execution; but no report of the arrangements made for the purpose has yet been received.

24. *Preservation of Deer island, in Boston harbor, in the State of Massachusetts.*—Under the same act as the preceding an agent has been appointed for carrying on this work; very advantageous contracts have been made for supplies of materials, and the construction commenced.

25. *Preservation and repair of Plymouth beach, in the State of Massachusetts.*—The sea-wall and other works constructed for the purpose have had the desired effect, and are generally in a good condition. Some additions may be necessary at a future time to maintain the advantages resulting from them.

26. By the act of the 20th of May, 1826, an appropriation was made for the preservation of the point of land forming Provincetown harbor, in the State of Massachusetts. The appointment of an agent for the construction of works for this purpose was referred to the officer of engineers under whose general superintendence all the public works in this section of the country are carried on; but no report on the subject has been received this year.

27. *Improvement of Hyannis harbor, in the State of Massachusetts.*—The prevalence of boisterous weather has prevented the operations on this work from being carried on as rapidly as was expected, and a portion of the appropriation made by the act of the 2d of March, 1827, remains unexpended. The works have been constructed in a permanent and satisfactory manner as far as they have progressed, but additional funds will be required to complete them.

28. *Erecting a pier and beacon on Allen's Rocks, Warren river, in the State of Rhode Island.*—An appropriation for this purpose was made by the act of the 23d of May, 1828, and an agent has been appointed, who has made suitable arrangements to carry on the work with effect next year.

29. *Erecting piers at Stonington harbor, in the State of Connecticut.*—By the act just mentioned an appropriation was also made for this purpose, and an agent has been appointed to carry it into effect, who is now engaged in making the necessary contracts to commence the work as early in the spring as circumstances will allow.

30. *Removing obstructions to the navigation of Saugatuck river, in the State of Connecticut.*—The operations for this purpose, under the act of the 2d of March, 1827, have been completed, and attended with the desired results.

31. *Building piers and repairing the old piers at New Castle, in the State of Delaware.*—The services of the officer of engineers who directed the construction of these works having been required elsewhere, the superintendence of them was intrusted to a civil agent, under whose direction the construction has been

satisfactorily continued, and before the close of the working season it is believed that the state of the two principal piers will be such as to place them out of danger from the ice.

32. By the act of the 23d of May last an appropriation was made for the repairs of public piers at Port Penn, Marcus Hook, and Fort Mifflin, the superintendence of which was intrusted to the agent who has charge of the works at New Castle, and arrangements have been made for effecting the repairs at an early period.

33. By the same act an appropriation was made for purchasing a dredging machine, to be used in removing the shoals that obstruct the navigation of Ocracoke inlet, in the State of North Carolina. The execution of this duty has been assigned to the officer of engineers commanding at Fort Macon, who has made arrangements for effecting the purpose.

34. By the same act an appropriation was also made for deepening the inland passage between the St. John's, in Florida, and the St. Mary's, in Georgia. There being no officer of engineers or other agent of this department in the vicinity of those rivers, all that the department has yet been able to effect with respect to this work has been to enter into a correspondence with a competent gentleman, a resident of Florida, who it is hoped will undertake the direction of the operations.

35. By the same act an appropriation was also made for removing obstructions to the Apalachicola river, in Florida; for which purpose an agent has been appointed, who is engaged in making arrangements for carrying on the work during the winter.

36. By the same act an appropriation was made for deepening the channel through the Pass au Heron, near the bay of Mobile, in the State of Alabama; which operation, together with that of deepening the harbor of Mobile, under the act of the 20th of May, 1826, has been placed under the direction of the engineer officer commanding at Mobile Point. The latter operation is in successful progress, and the former will be commenced as soon as circumstances shall permit.

37. And by the same act appropriations were also made for deepening the channel at the mouth of Pascagoula river, in the State of Mississippi, and for removing obstructions to the navigation of Red river, at the part called the Raft, in the State of Louisiana, and the Arkansas Territory. The charge of those operations has been intrusted to the commanding engineer on the Gulf of Mexico, by whom arrangements will be made as early as practicable for their execution.

Surveys for which special appropriations have been made by acts of Congress, viz:

1. A survey of Roanoke inlet and sound, in the State of North Carolina, with the view of ascertaining the practicability of making a permanent ship-channel between Albemarle sound and the Atlantic ocean, at Roanoke inlet, or elsewhere.

2. Surveying the obstructions to the navigation of the Wabash river, between its mouth and Eel river, in the State of Indiana.

3. Surveying the mouth of Sandy creek, which discharges itself into Mexico bay, on Lake Ontario, in the State of New York, for the purpose of constructing a harbor at that place

4. Survey and examination of the southern shore of Lake Ontario, in the State of New York, between Genesee and Oswego rivers, with a view to the improvement of the most accessible and commodious harbors on the frontier.

5. Survey of Genesee river and harbor, in the State of New York.

6. Survey of the harbor of Nantucket and the passage leading into it.

7. Survey of the river and harbor of St. Mark's, in Florida, with a view to ascertain the practicability and expense of deepening the same.

These surveys are under progress, and it is believed will be ready to be reported upon before the close of the next session of Congress.

8. The surveys ordered to be made for the purpose of continuing the location of the national road from Zanesville to the seat of government of Missouri have been diligently prosecuted during the year, and the location effected as far as Vandalia, in Illinois, in addition to which an experimental survey has been made of the country between the latter place and St. Louis, at which point the operations have been suspended for the season.

Surveys made during the year by order of the President, under the provisions of the act of April 30, 1824.

1. Survey of the Kennebec river, below Gardiner, in the State of Maine.

2. Survey of the Androscoggin river, in the State of Maine.

3. Survey of the Oliverian canal route, in the State of New Hampshire.

4. Survey of the Pasumsick canal route, in the State of New Hampshire.

5. Survey of the Taunton and Weymouth canal route, in the State of Massachusetts.

6. Survey of the Alleghany river, from Pittsburg to Franklin, in Pennsylvania, with a view to the improvement of its navigation.

7. Survey of a canal route from the Akron summit of the Ohio canal to the Chenango river.

8. Reconnoissance of a route for a road from Uniontown, in Pennsylvania, through Pittsburg, to Lake Erie.

9. Survey of a route for a railroad from Hudson, in New York, to Pittsfield, in Massachusetts.

10. Survey of a route for a railroad from Owego to Ithaca, in the State of New York.

11. Survey of a route for a railroad from Ithaca to Catskill, in the State of New York.

12. Survey of the Kentucky river from its mouth to Boonsborough, with a view to improve its navigation.

13. Survey of a canal route from Elizabeth river to Lockwood's Folly, in the State of North Carolina.

14. Survey of a canal route from the Neuse river to Beaufort harbor, in North Carolina.

15. Completing the reconnoissance of a route for a road from Washington city, in the District of Columbia, to the western part of the State of New York.

16. Surveys in Indiana, with a view of connecting the waters of Lakes Erie and Michigan with those of the Ohio river, and of improving the navigation of the Wabash and White Water rivers.

17. Surveys of the several routes for the continuation of the Cumberland road to the District of Columbia.

18. Survey of the country between the headwaters of the Savannah and Tennessee rivers, to ascertain the practicability of connecting them by a canal or railroad.

19. Survey of the country between the headwaters of the Tennessee and Alatamaha rivers, to ascertain the practicability of connecting them by a canal or railroad.

20. Survey of a route for a canal from the village of Monroe to La Plaisance bay, in the Territory of Michigan.

The field operations on the above surveys will probably have been completed and the reports on them prepared before the close of the next session of Congress.

In addition to the above surveys the Baltimore and Ohio Railroad Company have been assisted in their operations by some of the officers under the orders of this department.

In August last an application was also made by the South Carolina Canal and Railroad Company for the assistance of the government in making surveys, with a view of constructing a railroad from Charleston to Hamburg, in South Carolina; and agreeably to your instructions a civil engineer, with a suitable number of assistants, has been ordered to prepare for that purpose, and will proceed to Charleston without delay. Previous engagements have prevented an earlier compliance with the request of the company.

The Military Academy continues to sustain its high reputation, as will fully appear by the accompanying report of the board of visitors for this year, marked C. I would beg leave to recommend to your favorable consideration the suggestions made by the board of visitors, with a view to the further improvement of the institution.

In closing this report I beg leave to repeat the remarks made by my predecessor in his last annual report, urging the necessity of providing by law for an addition to the present number of officers in the corps of engineers, for purposes exclusively military, independent of the other duties to which they may be assigned; and also the consideration of the proposed plan for organizing the topographical engineers, which has been heretofore submitted to the War Department. The experience of each year affords additional evidence of the necessity of augmenting the number of officers in order to perform the duties assigned to this department.

In compliance with a resolution of the Senate of December 18, 1827, an officer of engineers was instructed to make an examination of certain sites for the establishment of an armory on the western waters. This service has been performed, and a report on the subject will be submitted at an early period.

All of which is respectfully submitted by, sir, your most obedient servant,

C. GRATIOT, *Colonel of Engineers.*

Hon. P. B. PORTER, *Secretary of War.*

A.

Exhibiting the fiscal concerns of the Engineer department for the year ending September 30, 1828, in which the funds which had accrued within that period, and the manner of their accruing, are stated, and accounted for by showing their application; and showing, also, the amounts expended upon the several works under construction; and the amounts required to complete them.

Designation of the appropriations and the objects to which they are applicable.	Funds available for the service of 1828, and whence derived.			Amount available accounted for.				
	From appropriations for 1828.	From balances of appropriations undrawn from the Treasury and those remaining in the hands of agents September 30, 1827, and from amounts arising from moneys refunded.	Aggregate available.	Amount applied corresponding with accounts rendered and settled to September 30, 1828.	Amounts undrawn from the Treasury, and remaining in the hands of agents Sept. 30, 1828.	Aggregate accounted for, and corresponding with the aggregate available.	Cost of the several works on September 30, 1828.	Amount required to complete the several works.
Fort Adams, at Brenton's Point, Newport, Rhode Island	$80,000 00	$31,446 28	$111,446 28	$90,692 75	$20,753 53	$111,446 28	$339,861 07	$390,305 45
Fort Hamilton, at New Utrecht Point, New York	60,000 00	15,293 60	75,293 60	67,731 08	7,562 52	75,293 80	277,868 35	145,177 45

Third class, seven works	1,854,575 58
Total	11,743,626 31

NOTE.—The classification in this table, distinguishing three periods, exhibits the works enumerated in the order of their efficiency, to meet the earliest possible emergency.

C.

UNITED STATES MILITARY ACADEMY, *West Point, June*, 1828.

The board of visitors, in pursuance of your invitation, have attended the examination of the students in this academy, which commenced on the 2d instant, and they have now the honor to submit the result of their observations.

The board were requested to report upon the actual state and progress of the institution, and to make such suggestions for its improvement as they might deem necessary; and in the performance of this trust it is intended to confine their report strictly to the objects for which they were to assemble.

The sound policy of such an establishment, and its propitious influence upon the safety and welfare of the Union, may well be assumed as undeniable truths. The value of the academy is not a matter of speculation. It is tested by experience, and its utility has been made manifest to every judicious observer. The institution was founded by the government of the United States for national objects, and it has deserved and received the steady and continually increasing patronage of Congress. It is likewise cherished by the influence of public opinion, founded on the character of its pupils, and on the reports of successive boards of visitors, convened from every part of the United States; and we have to add our entire and cordial concurrence of the general approbation which has been expressed by our predecessors.

The various branches of *mathematics* occupy the principal attention of the two junior classes, and this department of science is justly entitled to the pre-eminent place it occupies, considering the relation it bears to natural philosophy and the science of war. The examinations were minute and strict, and gave great satisfaction to the board. The pupils showed, by their answers and demonstrations, the diligence and zeal with which mathematical studies had been prosecuted, and the very great precision and accuracy with which they were taught. It appeared to have been the object of the professors to have the exact sciences deeply and thoroughly understood, while, at the same time, it appeared to be a principle in the discipline of the academy to assign to the cadets such reasonable portions of study as should not be oppressive, and were best calculated to call into exercise and unfold the strongest faculties of the mind.

In the department of natural philosophy it was observed, with pleasure, that since the last annual report the introduction of a new set of text books had placed the course of instruction more entirely than it had hitherto been on a level with the methods and spirit of the science of our day. But in this part of the course an important deficiency is deemed by the board to exist. The instruction is chiefly confined to the application of the pure mathematics to the phenomena of nature, without a proper series of experimental illustrations of the facts assumed, or conclusions deduced This deficiency must continue to detract from the utility of the institution, so long as it remains unsupplied with the proper philosophical apparatus; and the board earnestly recommend to the consideration of government a due appropriation for this important object.

On the subject of astronomy the board regret to find there is no suitable apartment which can contain and preserve such astronomical instruments as are already in possession of the institution. And in reference to astronomical studies, which form such a necessary and interesting branch of natural philosophy, a regular observatory would be highly useful for the more successful initiation of the cadets in practical astronomy. There appears to be no good reason why this branch of the academic studies should form an exception to the intimate union between theory and practice, which is preserved in teaching the other sciences in the academy, and which is so exceedingly conducive to the prosecution of every branch of military science.

The board have been very favorably impressed with the attainments of the cadets in the art of drawing. The specimens exhibited showed taste and genius, and reflected much credit on their course of instruction.

The knowledge of the students in chemistry, considering the limited means afforded them, was very creditable to the institution, and afforded great gratification to the board. They were, however, strongly impressed with the importance of having the professorship in chemistry and mineralogy immediately supplied. In the department of chemistry there appears to be a great deficiency in the movable apparatus requisite to illustrate the principles of that science; and the apartments where the lectures are delivered do not afford sufficient space for the erection of the furnaces and other suitable means of explaining the practical parts of the course. The board, therefore, are of opinion that a laboratory ought to be erected, of sufficient dimensions to contain a suitable lecture room, and that the chemical apparatus be enlarged, and adequate funds provided for these purposes.

In civil and military engineering the examination was long and arduous, and the cadets exhibited a knowledge of these subjects at once comprehensive and minute, and gave the most indubitable proofs of their skill and learning by the promptness of their answers and the accuracy of their illustrations.

In the theory of modern warfare the cadets showed that they had attained correct knowledge of the relative number of the different descriptions of troops requisite to constitute an efficient army, in reference to the character of the enemy and the localities of the country which might happen to be the theatre of operation. It was manifest that they understood the precautions necessary to guard against surprise on a line of march, as well as those which belong to the selection of encampments. The practical evidence which was given of a complete knowledge of infantry tactics was still more gratifying. In all the various duties incident to the school of a soldier, company, and battalion, a perfection was manifested which those of the board who have had experience on such subjects have never seen surpassed in our country, and which has rarely been equalled by soldiers in regular service. The exercises and manœuvres appertaining to light infantry and riflemen were equally gratifying. Everything connected with the operations of this important description of military force was performed with a quickness and precision that evinced the attention, fidelity, and skill of the instructors in this department.

The board must not withhold the expression of their high gratification at witnessing the course of instruction in practical artillery. In the lecture room the examination comprehended the most important applications of science to this branch of the military service. In the laboratory and in the field almost all that is practical in the preparation of every description of ammunition and military fire-works; and in the service, manœuvring and firing of guns, howitzers, and mortars, was exhibited in a manner showing a degree of proficiency and skill commensurate with the ability and zeal with which this department is conducted.

The general police of the institution met with the entire approbation of the board. Arms and accoutrements are kept in good order. The cadets are neat and cleanly in their persons, orderly in their

deportment, generally exhibiting activity, health, and vigor of constitution; and the rooms which they occupy in the barracks are kept in a manner that entitles them to the highest commendation. The guard duties are so well arranged that, while they afford security that few infractions of the regulations for the government of the institution can escape detection, they may be said scarcely to interfere with the regular studies of the cadets.

The board have bestowed their attention on the civil economy of the institution. They have examined with care the adjutant's and quartermaster's books, and they have the satisfaction to state that those books furnish clear testimony of a correct discharge of duty. They feel assured, however, that the business of those officers cannot be done without the aid of clerks; and they respectfully submit to the consideration of government the necessity of an appropriation for the support of a clerk in each of those departments.

The inspection of the paymaster's office gave entire satisfaction to the board. They also examined the bill of fare, which, by contract with the superintendent, the steward is bound to furnish to the cadets; and they consider it to be good and entirely sufficient. If the steward fail in a proper discharge of his duty, the superintendent, on complaint by any cadet, causes an inquiry to be made, and the omission or neglect of duty to be corrected with the greatest promptitude.

The tailor is under a contract to furnish clothing, and the materials are to be of a specified value, and at a moderate advance; and the shoemaker is under similar restrictions.

The storekeeper is authorized to sell only a few articles of necessity; and those at a fixed and moderate advance. Every reasonable precaution seems to have been taken to secure the cadets from imposition and fraud.

In relation to the medical department, the board can bear their testimony to the faithfulness with which its duties are performed.

In concluding the subject of the civil economy of the establishment, the board would suggest the importance of the erection of a suitable building for military and other auxiliary exercises during the winter season, and in bad weather at all seasons. The winters at West Point are so severe, and the place so exposed to high winds, that it is necessary to suspend, in a great degree, all field exercises from the first of November to the first of April. During the other parts of the year the cadets are required to take a great deal of exercise, and during these inclement months no such exercise can be performed. This sudden transition from a very active to a very sedentary life is calculated to impair health, under any climate, however excellent. With such a building as is suggested, the field and other exercises could be carried on throughout the winter season; and it is estimated that a building from which such benefits are to flow would not exceed the expense of six thousand dollars.

The examination of the senior class in national and constitutional law did them great honor. Their answers on every branch of the subject showed that they had been taught diligently and skilfully, and that they had well and thoroughly studied the leading principles of those sciences. As many of the scholars of this institution are probably destined to fill important stations in the government or public service of their country, it appeared to the board that the elements of moral and political science were wisely selected as a part of the general course of instruction.

The board beg leave to add that among the suggestions which have been made by their predecessors for the amelioration and improvement of the course of instruction, and which, in our estimation, deserved the favorable reconsideration of the government, is the propriety of the disuse of the practice of employing cadets of a higher class to teach those of a junior. Such a supply of teachers might better be drawn from the graduates of each year than from the subordinate pupils. The board forbear to enter more minutely into the details of the institution, which are no doubt well understood by that department of the government to which they have the honor to address themselves.

In concluding their observations the board ought not to withhold the expression of their strong and decided conviction of the wisdom that appears in the establishment, the discipline, the studies, and the whole management of this institution. It is devoted to the initiation of a portion of our youth from every part of the country in the sciences connected with the military art, and is intended to bring into the civil administration of the government in peace, and into the national service in war, a succession of well educated men, calculated to be safeguards and ornaments to the nation. In the consideration of this subject there is one advantage belonging to this academy which struck the minds of the board with great force, for it appeared to be of surpassing value. The moral discipline of the institution is perfect; the avenues to vice are closed; and the temptations to dissipation seem to have been vigilantly guarded against. The locality of the academy is well adapted, not only for the promotion of public convenience, but to facilitate the views and wishes of the instructors. The board feel that it is due to themselves, as well as rendering a just tribute to distinguished merit, to observe that every facility has been afforded them in their inquiries and examinations by the superintendent and the whole academic staff. The ability and character, as displayed throughout the various branches of the institution, have inspired the board with sentiments of great respect.

The undersigned have the honor to be, respectfully, your obedient servants,

WM. CARROLL, *President.*

Hon. Secretary of War.

C.

QUARTERMASTER GENERAL'S OFFICE, *November* 19, 1828.

SIR: In compliance with your order of the 20th of September, I have the honor to submit a report of the operations of the Quartermaster's department for the 1st, 2d, and 3d quarters of the present year; to which I take the liberty of adding those of the 4th quarter of last year, thus presenting the operations of an entire fiscal year. This course I have considered necessary in order to correct the unfounded reports in regard to the extent of the pecuniary accountability of the department, which were industriously circulated through this city during the last winter, and have since been widely circulated elsewhere; which reports, whether the result of honest misapprehension or intentional misrepresentation, I feel it to be due to myself as well as the public to counteract.

The balance in the hands of the several officers of the department at the date of the last report was		$38,410 27
To which is to be added—		
1. Amount remitted in 4th quarter of 1827	$45,307 02	
Amount remitted in 1st quarter of 1828	100,400 00	
Amount remitted in 2d quarter of 1828	169,400 00	
Amount remitted in 3d quarter of 1828	138,349 39	
		453,456 41
2. Proceeds of sales of damaged public property and rents of unoccupied barracks during the same period		2,947 23
Total to be accounted for		494,813 91
From which deduct accounts rendered for disbursements in the 3d quarter of 1827, which were received subsequently to the date of my last report	$7,388 84	
For the 4th quarter of 1827	92,615 34	
For the 1st quarter of 1828	75,233 98	
For the 2d quarter of 1828	133,788 54	
For the 3d quarter of 1828, so far as received	139,287 34	
		448,314 04
Leaving to be accounted for		46,499 87

Most of which is applicable to the service of the present quarter.

All the accounts for the 4th quarter of the last year, the 1st and 2d quarters of this, with those of fifty-one officers for the 3d quarter, have been received; and I have no doubt the whole amount outstanding will be accounted for at the end of this year.

The commanding officers of companies, ordnance depots, and recruiting stations render their accounts for clothing and other property derived from the department with great promptitude and accuracy.

The duties of the officers of this department relate principally to the movement and quartering of the troops, the purchase, preservation, and distribution of public property, the erecting of barracks, storehouses, hospitals, &c., and the survey and construction of military roads. The disbursement of public money is merely incidental to the performance of the duties enumerated, and the labor which it involves is comparatively small. It has been the policy of the department to reduce its expenditures as much as possible; but it will be seen, by an inspection of the foregoing statement, that the various appropriations for which it has been accountable during the year fall but a few thousand dollars short of half a million; in addition to which, two officers of the department, one acting under instructions from the Second and Third Auditors and the other from the Engineer department, have been charged with a pecuniary accountability exceeding seventy thousand dollars.

Of the public works confided to the superintendence of the department the road in East Florida, denominated "*The Old King's Road*," has been completely repaired at Tomaka, forty-five miles south of St. Augustine.

The causeways connected with the bridge authorized by an act of Congress, passed March 2, 1827, to be erected over the St. Sebastian's river at St. Augustine, were nearly completed when the troops employed on the works were withdrawn; the quartermaster at St. Augustine reports that but little has since been done, and that the appropriation is not sufficient to erect the bridge unless the troops be employed.

The unfinished portions of the road from Memphis, Tennessee, to Little Rock, Arkansas Territory, and of that from the latter place to Cantonment Gibson, have been completed.

The road authorized from Cantonment Towson to Natchitoches has been made by the troops; that authorized from Cantonment Towson to Fort Smith was commenced during the summer, but owing to the reduced state of the command at the former post it was found necessary to suspend the work.

With a view to carry into effect the provisions of an act of Congress of the 24th of May last, authorizing a military road to be made in the State of Maine from the mouth of the river Matanawcook, where it enters into the Penobscot, to Mars Hill, near the northeastern boundary of that State, the execution of which was confided to this department in July last, an officer of the department was instructed to make the necessary exploration and survey. In compliance with which he caused the country to be explored and commenced the survey, but in consequence of the sickness of an agent whom he had employed, and whose place he states could not be supplied, he was compelled to suspend the work; it will be resumed so soon as the weather shall admit, and it is hoped will be completed in time to enable us to open the road during the next season.

I have the honor to be, sir, your obedient servant,

TH. S. JESUP, *Brigadier Gen. and Quartermaster Gen.*

Hon. P. B. PORTER, *Secretary of War.*

D.

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, November* 22, 1828.

SIR: I have the honor to submit to your view a statement of the moneys remitted and charged to contractors and the disbursing officers of the commissariat for the 1st, 2d, and 3d quarters of the year, amounting to $278,684 49
And the sums accounted for by them for the same period, amounting to..... 259,324 34

Leaving a balance to be accounted for of..... 19,360 15

Of this sum of $19,360 15, due on the 30th of September last, $1,100 were remitted late in the 3d to meet the expenditures of the 4th quarter, and $1,869 89 were placed in the hands of Lieutenant E. B. Griswold, by order of the commanding officer at Fort Howard, on the resignation of the regular assistant commissary at the post, and remained unaccounted for by him at the time of his decease; making $2,969 89 totally inapplicable to the period embraced by the statement; and leaving $16,390 26 actually in possession of the disbursing officers at all the posts, which will be applied to the expenditures of the 4th quarter of the year; and no doubt will, together with the $1,100 remitted for that purpose, be strictly accounted for at its expiration.

It affords me great satisfaction to report that the accounts of the officers of the commissariat have been promptly rendered, so that only seven remain unreceived; and those, although at the most remote posts, will, in all probability, reach the office in the course of the ensuing week.

Very respectfully, your most obedient servant,

GEORGE GIBSON, *C. G. S.*

Hon. P. B. PORTER, *Secretary of War.*

Statement exhibiting the moneys remitted to contractors from January 1 *to September* 30, 1828, *the sums charged to them on account of failures, and the amounts accounted for by them; the balances in the hands of the disbursing officers of the department on December* 31, 1827; *the moneys remitted to them in the first, second, and third quarters of* 1828; *the sums charged to them for sales to officers on the frontier posts; sales of empty boxes, barrels, &c.; and the amounts accounted for by them for the same period; together with the balances in their possession at the expiration of the third quarter of the year.*

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE.
WASHINGTON, *November* 22, 1828.

GEO. GIBSON, *Commissary General of Subsistence.*

E.

PAYMASTER GENERAL'S OFFICE, *November* 27, 1828.

SIR: I have the honor herewith to submit a report of the transactions of the pay department for the last quarter of the year 1827, and for the first, second, and third quarters of 1828.

The money drawn from the Treasury within the time stated amounts to $1,135,198 68 of which $40,457 19 only remain to be accounted for. This balance is in the hands of paymasters whose districts embrace the most remote posts, the difficulty of travelling to and from which will account for the delay in rendering their accounts. I have every reason to believe that the whole amount has been expended by this time, and will be accounted for before the close of the year without loss to the government.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

Hon. P. B. PORTER, *Secretary of War.*

Statement of the amount of money drawn from the appropriations for the pay department, and remitted to the disbursing officers, on account of payments for the fourth quarter of the year 1827, *and the first three quarters of the year* 1828 ; *the amount unexpended, and forming part of their estimates for the fourth quarter of* 1828 ; *the balance to be accounted for, the periods to which the troops have been paid, and accounts rendered.*

Names of paymasters.	Amount of funds remitted in the fourth quarter of 1827, and first three quarters of 1828.	Amount unexpended, and forming part of estimates for the fourth quarter of 1828.	Balances remaining to be accounted for.	Periods to which the troops have been paid and accounts rendered.	Remarks.
David S. Townsend	$57,900 00	$4,201 38		September 1, 1828	Balance due Paymaster Kirby, $1,030 92
Edmund Kirby	41,800 00			November 1, 1828	
Thomas J. Leslie	125,700 00	4,885 60		September 1, 1828	
Charles B. Tallmadge	161,000 00	12,521 03		September 1, 1828	
Timothy P. Andrews	140,000 09			November 1, 1828	
Charles H. Smith	118,700 00	5,477 28		September 1, 1828, and some officers to October 1.	
Abraham A. Massias	54,800 00	11,294 41		September 1, 1828, and partially to October 1.	
Thomas Wright	59,700 00	3,562 80		September 1, 1828, and partially to November 1.	
Daniel Randall	50,000 00			September 1, 1828, and partially to November 1 by Paymaster Wright	On furlough.
Benjamin F. Larned	40,600 00			September 1, 1828, and some officers to October 1.	Due Paymaster Larned, $1,879 21.
Asher Phillips	30,000 00		$21,574 83	May 1, 1828, and partially to September 1.	The troops on the Arkansas receive but two payments in the year, to wit: After the April and October musters.
Thomas Biddle	173,849 50	22,466 83½		September 1 and November 1, 1828	
Alphonso Wetmore	None				On furlough ; troops paid by Paymasters Biddle and Gwynne.
David Gwynne	52,000 00		18,882 36	May 1, 1828, and partially to July 1	
Lewis G. DeRussey	24,200 00	610 70		September 1, 1828 ; some few officers to a later period.	
	1,130,249 50	65,020 03½	40,457 19		
				Payments to militia and Indians:	
Thomas Wright	3,226 15				Florida militia.
Benjamin F. Larned	1,723 03				Michigan militia and Indians.
	4,949 18				
Total	1,135,198 68				

PAYMASTER GENERAL'S OFFICE, *City of Washington, November* 27, 1828.

F.

COMMISSARY GENERAL'S OFFICE, *Philadelphia, October* 29, 1828.

SIR: I have prepared and have the honor to enclose seven statements, as follows, viz:

No. 1. Of moneys drawn from the appropriation for the purchasing department, during the first three quarters of 1828.

No. 2. Of moneys drawn from the appropriation for the purchase of woolens, in advance, for 1829, during the same period.

No. 3. Of moneys received and disbursed during the same period, on account of the purchasing department.

No. 4. Of moneys received and disbursed on account of the appropriation for purchasing woolens, in advance, for 1829, during the same period.

No. 5. Of moneys received and disbursed on account of contingent expenses.

No. 6. Comparative statement of the cost of clothing for the United States army, during the years 1827, 1828, and 1829, and

No. 7. Statement of the cost of clothing for the United States army, during the year 1829.

These statements, prepared in obedience to your instructions dated 30th September, 1828, I hope will be received in time and meet your approbation. The duplicates shall be transmitted without delay.

I have the honor to be, sir, with great respect, your most obedient servant,

C. IRVINE, *Commissary General of Purchases.*

General PETER B. PORTER, *Secretary of War.*

No. 1.

G.

SURGEON GENERAL'S OFFICE, *November* 8, 1828.

SIR: In compliance with your instructions I have the honor to report that the amount expended on account of the medical department during the year ending September 30, was $21,970 77, the whole of which has been satisfactorily accounted for. The annual requisitions were received at the stated periods, and the supplies immediately forwarded to the several posts; they were reported to be of the best quality, and to have arrived in good order. The returns and reports required by the regulations have also been duly received. The accounts of all surgeons having public property under their charge have been examined and settled for the year; and the hospitals appear to have been amply supplied in every respect. The number of deaths reported during the two first quarters was 65; of which 14 were from consumption, 12 from intemperance, and 2 from accidents; leaving but 37 from all other causes for the six months. All the officers of the department are on duty, except four, who are on furlough from sickness, two under arrest, and one attending a court-martial.

As several posts have for some time been, and still are, without a surgeon, I beg leave to remark, that on the reduction of the army in 1821, the surgeons and assistant surgeons allowed by law were just sufficient to supply the several posts and stations then established and occupied. Since that period the number has been considerably increased, so that it is now impracticable to furnish one surgeon to a station, even if they should be all on duty. By the subjoined list it appears that fifty-four medical officers are required to supply one to each post, while the whole number allowed by law is fifty-three; of which seven are off duty, as above stated, and two are on the march with detachments, leaving but forty-four surgeons to fifty-four stations. At the larger and more sickly posts, however, there should be at least one surgeon and one assistant; and especially at the remote ones on the Arkansas, Missouri, Upper Mississippi, the lakes, and in Florida, where, in case of the death or sickness of the surgeon, medical attendance cannot be obtained on any terms for many months, as was the case not long since. Agreeably to the statement herewith submitted, it appears that the smallest number by which the necessary medical attendance can be furnished is twelve surgeons and fifty-five assistants, making no allowance for those who may be sick or accompanying detachments, or for the several recruiting stations, except New York and New Orleans. I have, therefore, respectfully to request that application may be made to Congress, at the approaching session, for an additional number of medical officers, not less than four surgeons and ten assistants, in addition to the eight surgeons and forty-five assistants now allowed by law.

I beg leave also to call your attention to the several reports heretofore made on the subject of graduating the pay of the surgeons in proportion to the length of time they may have been in service, and to remark that bills for that purpose have been twice reported by the Military Committee of the House of Representatives, but have not been acted on.

Very respectfully, your obedient servant,

JOSEPH LOVELL, *Surgeon General.*

Hon. P. B. PORTER, *Secretary of War.*

ORDNANCE DEPARTMENT, *Washington, November* 21, 1828.

SIR: I have the honor to submit herewith a general report of the operations of this department during the past year.

Statement marked A exhibits an account of the moneys drawn from the treasury and remitted through this department during the year 1827 to disbursing officers and contractors, and also the amount of the accounts rendered, and the balance remaining in the hands of each at the close of the year. By this statement it appears that the remittances during the year 1827 amounted to $812, 424 98
That the accounts rendered and settled during the same period amounted to 802, 178 95

And that the unexpended balances remaining in the hands of the several disburing officers at the close of the year amounted to 10, 246 03

The whole of which was accounted for in the first quarter of the present year.

Statement B shows the amount of funds transmitted to the several disbursing officers of this department, and to contractors during the first three quarters of the present year, by which it will be seen that the total amount transmitted was $748, 381 70
And that the accounts rendered amounted to 723, 229 16

Leaving an unexpended balance in the hands of disburing officers on the 30th of September, of 25, 152 54

All the amounts due up to the 30th of September last have been rendered from all the armories and arsenals.

Statement C exhibits an account of some of the principal articles made at the several armories and arsenals during the year ending September 30, 1828, by which it will appear that 24,830 new muskets and 1,000 Hall's rifles, with their various appendages, have been made at the armories, and that 18,415 small arms have been cleaned and repaired, and 85 new gun-carriages have been made at the arsenals.

Statement D exhibits an account of the expenditures made, and of the arms, artillery, and equipments procured, under the act of 1808, for arming and equipping the militia during the year ending the 30th September, 1828, and also the number of arms apportioned to each of the States and Territories during the year 1827. The arms procured are: 11,220 muskets; 1,300 rifles; about 7,000 sets of accoutrements for small arms; 20 six-pound cannon, and 72 field artillery-carriages, with their various equipments. The amount expended on this account was $205,637 23.

Statement E exhibits the general results of the operations of the public lead mines during the year ending September 30, 1828; to which is appended a brief statement, showing the quantity of lead made at these mines in each year from 1821 to the present time.

By these statements it will be seen that the rents during the year past amounted to one million two hundred and thirty-one thousand one hundred and seventy-three pounds, an amount much greater than was anticipated in the last annual report. It appears also that the total quantity of lead made at the mines since 1821 is about twenty-two and a quarter millions of pounds; and that the product of the year past exceeds that of all preceding years. It is not expected, however, that the business will continue to increase with the rapidity that it has done for some years past. The number of persons now engaged in the business is so great that much competition and a reduced price for lead is the consequence. And it may therefore be estimated that the business has now nearly, if not quite, reached its maximum.

Under the act of the last session, authorizing the establishment of an arsenal on the waters of Mobile or Pensacola bays, an officer of this department has been employed during the past summer in exploring the section of country comprehended in the provisions of the act Upon his report, and upon information obtained from a member of the board of engineers, from officers of the army, and from others who are well acquainted with the country, a site on the public lands at Mount Vernon, near Mobile river, in Alabama, has, with your sanction, been selected, and arrangements have been made for proceeding to erect the arsenal.

In conclusion, I beg leave to advert to the considerations submitted in the last annual report relative to a reorganization of this department. The measures then proposed have met with the approbation of your predecessors, and they were also approved by the committees of Congress to whom they were referred. But as the bills reported by the latter were not acted upon, I beg leave again respectfully to submit the subject for consideration.

I have the honor to be, sir, your most obedient,

G. BOMFORD, *Brevet Colonel, on Ordnance Service.*

Hon. PETER B. PORTER, *Secretary of War.*

20TH CONGRESS.] **No. 391.** [2D SESSION.

REORGANIZATION OF THE SUBSISTENCE DEPARTMENT OF THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 15, 1828.

DEPARTMENT OF WAR, *December* 15, 1828.

SIR: The enclosed communication from the commissary general of subsistence, suggesting the expediency of relaxing the restriction and limitations to which he is now subject, in regard to the times and places of making contracts for the supply of the army, &c., is respectfully recommended to the favorable consideration of the Committee on Military Affairs.

I have the honor to be your obedient servant,

P. B. PORTER.

Hon. WILLIAM DRAYTON, *Chairman of Committee on Military Affairs, House of Representatives.*

OFFICE OF COMMISSARY GENERAL OF SUBSISTENCE, *Washington, December* 11, 1828.

SIR: I have the honor to request that in the act for the re-establishment and reorganization of the subsistence department of the army, presented to the House last session and not acted on, the following alterations and additions may be made, viz: in lieu of taking the additional officers "from the captains, &c.," that they may be taken from the "line of the army;" and that the commissary general, instead of being confined to the necessity of making contracts, "may have discretionary power, under direction of the Secretary of War, to make purchases at such times and places as he may deem expedient." This I am induced to ask in consequence of the many failures of the existing contractors, from the recent sudden rise in the price of such provisions as are usually denominated "subsistence stores," and the refusal upon the part of many bidders for the succeeding contracts to comply with the terms of their proposals, clearly evincing that they are governed by a desire of self-interest alone, and that when emergencies arise the government must suffer. By possessing a discretionary power provisions could at all times and at any moment be purchased by the agents of the department for the posts on the Atlantic borders, without the necessity of contracting for deliveries to be made at specified periods, too remote for the contractors to make any calculations with certainty as to the stability of prices or of probable changes in the market; having by the present system to make four deliveries during the contract year, eight months elapsed before the first and eighteen months before the last could be made. For the posts on the upper lakes one officer contemplated by the bill could be most efficiently and advantageously employed in making purchases for those posts, and the remaining officer similarly employed for the remote posts on the rivers Mississippi, Missouri, Red River, Arkansas, &c., or to superintend the faithful fulfilment of the contracts to the west, should any such be made. For the past year two officers, not attached to the subsistence department, have been employed (with extra pay) to make purchases on the failure of contractors, and the urgency of these cases made it necessary for me to avail myself of the services of the first officers who could be spared for the duty.

I have the honor to be, with great respect, your obedient servant,

GEO. GIBSON, *Commissary General of Subsistence.*

Hon. P. B. PORTER, *Secretary of War.*

20TH CONGRESS.] No. 392. [2D SESSION.

ON THE IMPORTANCE OF MILITARY ROADS FOR THE DEFENCE OF THE NORTHWESTERN FRONTIER AND AN ESTIMATE FOR THE SAME.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 23, 1828.

DEPARTMENT OF WAR, *December* 18, 1828.

SIR: In compliance with the resolution of the House of Representatives of the 8th instant, requiring the Secretary of War to report "such proceedings as may have been had relative to the defence of the northwestern frontier, in conformity with the act of Congress of the 2d of March, 1827, and to furnish an estimate of the probable expense of completing the roads from Detroit to Fort Gratiot, and from Detroit to Saginaw, as well as his opinion relative to the importance of these roads as a part of the military defence of the country," I have the honor to state that the provisions of the said law looked solely to the construction of certain military roads previously laid out in the Territory of Michigan, and to the location and survey of the two other roads mentioned in the resolution. For the progress which has been made toward the completion of the former, I beg leave to refer to the annual report from this department, under date of November 24, 1828, accompanying the President's message, being document 1, page 42; and for an account of the proceedings which had been had in relation to the latter to the report of the chief of the Engineer department, herewith enclosed. This report also furnishes the best estimate which it is at present in the power of this department to exhibit of the probable expense of constructing said roads.

In answer to that part of the resolution which requires the opinion of the Secretary of War relative to the importance of the roads therein mentioned in a military point of view, I would refer the House to the able memoir of Governor Cass upon this subject (which forms part of document No. 42 of the 1st session of the 19th Congress) as exhibiting at length the general views which I entertain in common with him in regard to the importance of the proposed roads, as connected with the military defence of the country.

I have the honor to be your obedient servant,

P. B. PORTER.

HON. ANDREW STEVENSON, *Speaker of the House of Representatives.*

ENGINEER DEPARTMENT, *Washington, December* 11, 1828.

SIR: In compliance with your instructions relative to the resolution of the House of Representatives of the 8th instant, requiring the Secretary of War to report "such proceedings as may have been had relative to the defence of the northwestern frontier, in conformity with the act of Congress of March 2, 1827, and to furnish an estimate of the probable expense of completing the roads from Detroit to Fort Gratoit, and from Detroit to Saginaw, as well as his opinion relative to the importance of these roads as a part of the military defence of that country," I have the honor to report that in conformity with the act referred to in the resolution, commissioners were appointed by the President to carry into effect so much of its provisions as relates to the roads above mentioned, and that at an early period of last year they had fully complied with their instructions, and with the objects of the law.

As these commissioners were required only to "lay out" the roads agreeably to the terms of the act, they furnished no estimate of the cost of construction, and this department is not in possession of proper data on which to form a minute estimate of the expense of opening them; that which follows is founded on the best information which can now be had on the subject, by reference to persons acquainted with the country, and by a comparison with the cost of works of a similar character in the Territory of Michigan. On the road to Saginaw the settlements extend to Flint river, sixty miles from Detroit; the road as laid out passes through them, and it is believed that in consequence of the improvements already existing this section of the road may be constructed by an expenditure of $150 per mile, or $9,000. The country through which the remaining thirty-two and a half miles of the road (terminating at Campeau's trading-house on the Saginaw) passes being heavily timbered, presents similar difficulties to those found on the Chicago road between Detroit and Godfrey's trading-house, on the river Raisin, the expense of constructing which exceeded $500 per mile. The least sum, therefore, which this part of the road may be expected to cost will be for the thirty-two and a half miles, $16,250; which, added to the estimated cost of the first section, will make, for completing the road, ninety-two and a half miles, $25,250.

The country traversed by the road to Fort Gratoit being represented, likewise, as heavily timbered, will render necessary an expense equal per mile to that of the Chicago road; and the length of this road being about sixty miles, there will be required for its construction $30,000.

In relation to the importance of these roads as a part of the military defence of the northwestern frontier, I beg leave to refer you to Doc. No. 42 of the 1st session of the 19th Congress, being a report from the Military Committee to the House of Representatives, on the 16th of January, 1826. The report of General Brown, and the memoir of Governor Cass, which form part of the document referred to, furnish full and comprehensive views of the importance of the roads in connexion with the military defence of the frontier; and in addition I will remark, that since the date of that report Fort Gratoit has been reoccupied as an essential link in the chain of posts established with a view of maintaining a peaceful intercourse with the Indians residing on the waters of the upper lakes; thus adding, in some measure, to the necessity of completing this important communication at an early period.

The accompanying estimate is presented with a view of obtaining an appropriation at the present session to construct the Saginaw road as far as Flint river, and the portion of the Fort Gratiot road next to Detroit, during the ensuing year.

I am, respectfully, sir, your obedient servant,

C. GRATIOT, *Colonel of Engineers.*

HON. P. B. PORTER, *Secretary of War.*

Estimate of the amount of funds required towards completing the roads from Detroit to Saginaw, and from Detroit to Fort Gratiot; surveyed by commissioners under the provisions of the act of March 2, 1827.

For the Saginaw road	$9,000 00
For the Fort Gratiot	15,000 00
	24,000 00

G. GRATIOT, *Colonel of Engineers.*

ENGINEER DEPARTMENT, *December* 11, 1828.

20TH CONGRESS.] **No. 393.** [2D SESSION.

ON THE EXPEDIENCY OF COMPELLING CADETS TO CONTINUE IN THE MILITARY SERVICE, WITH A STATEMENT OF THE NUMBER APPOINTED FROM 1821 TO 1828, INCLUSIVE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 31, 1828.

DEPARTMENT OF WAR, *December* 25, 1828.

SIR: In compliance with the resolution of the House of Representatives of the 9th instant, I have the honor to lay before them a statement of the Adjutant General, furnishing the information required by that resolution; and it only remains for me to report to the House "such plan as I may think most practicable to compel such persons as may be appointed cadets at West Point to continue in the military service of the United States, and for so modelling the West Point Academy as to make the number of cadets to be annually educated at that place correspond, as nearly as practicable, with the number of vacancies which annually occur in the army of the United States."

The most obvious plan of compelling cadets who are educated at the expense of the government to continue in its military service would seem to be to extend the term for which they oblige themselves to serve as one of the conditions of their entrance when received into the academy, and which is at present five years. It is much doubted, however, whether such an extension would be expedient. It has been found by long experience that very few of the graduates resigned before the expiration of the five years; and in the equally few instances where they have afterwards retired from the service, it has almost invariably been in consequence of some pressing necessity, and not from inclination. If a continued service of five years at that stage of life which generally determines the future character of the man is not sufficient to fix the habits and predilections of an officer in favor of the profession of arms, it is hardly to be expected that any longer period will produce that effect. And the policy of detaining him in service against his will may well be questioned. The effect would be to render him useless, and consequently a burden on the public rather than a valuable servant.

It is believed that there are now inducements sufficient to retain in service all those who are educated at the Military Academy who have health and constitutions sufficiently strong to pursue the military profession; and such as are too delicate by nature and ill health ought not to be forced to continue in service when they are unable to perform the duties of their respective stations.

As regards the number of cadets annually educated at West Point, it has been found from experience, also, to be admirably adapted to the present organization of the army, and to correspond with the vacancies which ordinarily occur in the course of the year in the engineer, artillery, and infantry corps.

It will be seen by reference to the accompanying statement of the Adjutant General, that there are at present only two brevet second lieutenants (graduates of the Military Academy) attached to the engineers; ten to the four regiments of artillery, and twenty-nine to the seven regiments of infantry; all of whom will, in all probability, be promoted before the class of 1829 will have been graduated, which is a proof of the exact proportion of the cadets to the circumstances of the army. I therefore can devise no plan which would, in my opinion, improve the present system, either for obliging the cadets to continue in service, or for making the number of cadets educated at West Point more perfectly correspond than it now does with the vacancies which annually occur in the army.

It may not be improper to add, that the cadets who have been graduated, but have not yet received commissions other than brevets, although they are supernumeraries as respects the organization of the army, are not so as regards its service, as most of them are performing the military duties of other officers who are temporarily detached from the army to be employed in the civil service of the government.

Respectfully submitted.

P. B. PORTER.

Hon. A. STEVENSON, *Speaker of the House of Representatives.*

Statement exhibiting the number of appointments annually made in the army of the United States since December 31, 1820; the number of cadets who have received commissions and appointments of the lowest grade by brevet during the same period, and also the number of officers now in the army who entered it as cadets from the Military Academy.

Year.	Number of appointments made in the corps of engineers.	Number of appointments made in the regiments of artillery.	Number of appointments made in the regiments of infantry.	Total number of appointments annually made in the regular army from December 31, 1820, to December, 1828, inclusive.*	Number of cadets who have received commissions and appointments in the corps of engineers.	Number of cadets who have received commissions and appointments in regiments of artillery.	Number of cadets who have received commissions and appointments in regiments of infantry.	Total number of cadets annually commissioned and appointed brevet second lieutenants in the army, from December, 1820, to December, 1828, inclusive.	Total number of commissioned officers and brevet second lieutenants now in the army who entered it as cadets from the Military Academy, West Point.
1821	1	12	11	24	1	12	11	24	----------
1822	2	16	23	41	2	16	23	41	----------
1823	1	12	24	37	1	12	24	37	----------
1824	1	12	21	34	1	12	21	34	----------
1825	4	16	18	38	4	16	18	38	----------
1826	2	17	22	41	2	17	22	41	----------
1827	--------	13	27	40	----------	13	27	40	----------
1828	--------	12	20	32	----------	12	20	32	----------
Aggregate	11	110	166	287	11	110	166	287	320

ADJUTANT GENERAL'S OFFICE, *Washington, December* 17, 1828.

The number of officers commissioned and appointed in the army since 1820, as exhibited in the above analysis, is two hundred and eighty-seven, which is just the number of cadets educated at the Military Academy, and *who have received* commissions and appointments in the army within the last eight years; it follows, therefore, that all vacancies during this period, occasioned by death, resignation, or otherwise, in the corps of engineers, the four regiments of artillery, and the seven regiments of infantry, have been filled from the Military Academy. Of the whole number (287) 244 cadets have succeeded to vacancies and have been commissioned or are now entitled to receive commissions, and the remaining 43 are attached to regiments and corps, "by brevet of the lowest grade (2d lieutenant) as supernumerary officers," who, although awaiting vacancies, pursuant to the provisions of the 4th section of the act of April 29, 1812, are, nevertheless, performing all the appropriate duties of 2d lieutenants, and are as usefully employed as other officers of their grade.

These 43 brevet 2d lieutenants are attached to regiments and corps as supernumeraries (supernumeraries only as respects organization) agreeably to the following table:

Regiments and corps.	Graduates of 1825.	Graduates of 1826.	Graduates of 1827.	Graduates of 1828.	Aggregate.
Corps of engineers	2	2	----------	----------	4
Artillery	----------	----------	----------	10	10
Infantry	----------	----------	10	19	29
Total	2	2	10	29	43†

By comparing the tables herewith submitted it will be seen that all the graduates of 1827 and one of the class of 1828 (one having resigned) who were assigned to the artillery, have merged their brevets, and that ten of the graduates of 1827, together with the whole number attached to the infantry, of the class of 1828, except one brevet 2d lieutenant, whose resignation has been recently accepted, are awaiting vacancies and yet to be commissioned. If the number of brevet 2d lieutenants were now attached to the artillery and infantry in the ratio authorized by law, the aggregate at this time would be 112 instead of 43.

Of the 287 cadets educated at the Military Academy, and who have *received appointments* in the army since 1820, it appears that forty have resigned, twenty-one died, and three dismissed or struck from the rolls.

Respectfully submitted.

R. JONES, *Adjutant General United States Army.*

Hon. P. B. PORTER, *Secretary of War.*

* This column does not include the number of staff appointments which may have been conferred on officers of the line and who were already in the army.

† Brevet second lieutenants attached to the army as supernumerary officers.

20TH CONGRESS.] No. 394. [2D SESSION.

ON THE RELATIVE FORCE OR EFFECT OF LINEAL AND BREVET RANK, AS PRESENTED IN THE MEMORIAL OF BREVET MAJOR GENERAL WINFIELD SCOTT.

COMMUNICATED TO THE SENATE JANUARY 7, 1829.

Mr. BENTON, from the Committee on Military Affairs, to whom was referred the memorial of Major General Scott, reported:

That the memorialist sets forth that he received the brevet rank of major general in the army of the United States on the 25th of July, 1814, and has retained the same ever since; that General Macomb was appointed a major general in the line of the army on the 24th of May, 1828; and immediately thereafter, by an order of the President of the United States, placed in command of the army, and all officers and soldiers required to obey him. This order, as it affected himself, the memorialist sets forth that he considered to be illegal and refused to obey it, upon the belief that his own rank was superior to that of Major General Macomb, and, of course, that he was not subject to be commanded by him; and thereupon prays that a declaratory statute may be passed determining the rights and duties of brevet rank.

The committee, after duly considering the facts set forth by the memorialist and the questions growing out of them, are of opinion that there is no illegality in the order of the President placing Major General Macomb in command of the army and requiring all officers and soldiers to obey him, and that there is no case set forth in the memorial which requires the rights and duties of brevet rank to be determined by a declaratory act.

They therefore recommend that the prayer of the memorialist be not granted.

To the honorable the Senate of the United States of America:

The memorial of Winfield Scott respectfully represents that your memorialist entered the army of the United States a *captain*, May 3, 1808; that he was promoted to the rank of *lieutenant colonel*, July 6, 1812; to the rank of *colonel*, March 12, 1813; to the rank of *brigadier general*, March 9, 1814; and, for services set forth in the body of his commission, to the rank of *major general* by brevet, July 25, 1814.

That from this date until very recently your memorialist has always been considered and employed, in respect to all the rights of rank or command, as a major general; that within the same period he had under his orders, at different times, two major generals of the army, and three of the militia, neither of whom could he have legally commanded if his brevet commission or brevet rank had not been perfectly valid and effective; and that, for the whole period in question, he was never under the command, nor was it ever attempted to subject him to the command, of any officer not of the same grade, and his actual senior in that grade.

Your memorialist would most respectfully affirm, and he is ready to sustain by proof every proposition he has advanced or shall advance, that the office of "commander-in-chief," "commander of the army," or "*the* major general," as importing either, is, at this time, unknown to the laws; that there now exists in law or in fact no higher title or grade in the army than that of "major general," a title or grade which your memorialist has the honor to hold in common with two other officers; that military rank or command (convertible terms) is always determined in foreign armies, as well as in our own—*first*, by difference in grade and, *secondly*, by priority of date in the same grade; that from the commencement of our revolutionary war down to the present year, brevet rank has uniformly been held to give command in common with ordinary rank—except only (for reasons easily explained) within the body of an unmixed regiment or detachment of the same regiment; that this is evidenced by every decision of the Executive and every precedent of the army recorded or remembered; and that your memorialist cannot fall within the exception mentioned is evident from the fact that he is in rank and title equally above every regiment in the service of the United States.

Such, your memorialist humbly conceives, had been the law, the construction of law, and the settled practice in the army down to a recent event—the death of Major General Brown—who, under an arrangement purely executive, and by virtue of his seniority in the highest grade, that of major general, had commanded the army from June, 1821, to February 24, 1828, the date of his decease.

On the promotion of General Macomb to the vacancy of the deceased, with rank as major general from May 24, 1828, the President of the United States, without any new legislation changing the law or principles which have been stated, by an order bearing date May 28, 1828, placed Major General Macomb in command over the army, and required all officers, &c., to obey his orders, without any exception in favor of your memorialist, the senior, and, therefore, the superior major general.

Against this order, which your memorialist has honestly believed to be equally repugnant to his rights and to his honor, he has from the first respectfully and steadily protested; he has humbly prayed to be sent before a court-martial on the charge of disobeying the commands of the alleged superior major general, in order that the law and the principles involved in the case might be judicially, promptly, and definitively settled; and he has respectfully suggested an exemption from the commands of his inferior major general, by an arrangement of the several general officers of the line to separate geographical districts or departments, as prior to the executive arrangement of 1821. His entreaties have all been rejected; and finally, without any trial by his peers, your memorialist has been suspended from all command in the army.

By these decisions, contrasted with the prior decisions of the Executive and the usage of the army, your memorialist finds himself in the most painful situation. To submit would, in all probability, dishonor him in the opinion of his brother officers, and most certainly in his own; and not to submit does great

violence to the sentiment of duty and respect which he is proud to owe to the constitutional chief of the army.

Under these circumstances your memorialist prays your honorable body so far to entertain his case, and that of other officers similarly interested, as to determine, by a *declaratory statute*, the rights and duties appertaining to brevet rank; so that your memorialist, and others alluded to, may have the benefit of a certain and fixed rule for their conduct, in common with the rest of the army and their fellow-citizens in general.

And your memorialist, as in duty bound, will for ever pray, &c.,

WINFIELD SCOTT, *Major General United States Army.*

WASHINGTON, D. C., *December* 29, 1828.

20TH CONGRESS.] **No. 395.** [2D SESSION.

RELATIVE TO THE PURCHASE OF ADDITIONAL LAND FOR THE USE OF FORT WASHINTON.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 17, 1829.

DEPARTMENT OF WAR, *January* 16, 1829.

SIR: At the request of the writer I have the honor to transmit the enclosed letter, with its accompanying documents, addressed to this department by Moses Tabbs, esq., of this city, on the subject of a contemplated purchase by the United States of a tract of ground adjoining, and in part covered by, the military erections at Fort Washington, on the Potomac.

The whole history of this negotiation, comprising a description of the land, the situation of its titles, the terms of sale offered by the proprietors, and the views which have been entertained by this department in regard to the value of the property, and the expediency of making the purchase, will be found in the enclosed documents and others on the same subject among the files of the House of Representatives; and it will remain for Congress to decide what, if any, further measures shall be adopted for effecting a purchase of the whole or any part of said land.

I have the honor to be your obedient servant,

P. B. PORTER.

HON. ANDREW STEVENSON, *Speaker of the House of Representatives.*

WASHINGTON, *November* 20, 1828.

DEAR SIR: Before resorting to the disagreeable alternative pointed out by the enclosed letter from Mr. Digges, I have deemed it more respectful and proper to beg your attention to the subject to which this letter relates.

I have been repeatedly assured by the above-named gentleman that he has no other object in view, by the course he has directed me to pursue, than to secure himself to the amount of his claim against the United States, nor would he attempt this expedient if he could discover any untried remedy to which he could resort.

I find from the title papers connected with this claim that Fort Washington is situated upon part of Warberton Manor, and that the United States derive title to this part from the late Thomas A. Digges, of Prince George's county, Maryland. But it also appears from the same source, that Thomas A. Digges derives title to the whole of Warberton Manor from the last will and testament of his ascestor, Charles Digges, bearing date on the 28th of January, 1742, which most evidently did not intend to convey, nor did it convey, to Thomas A. Digges any greater interest than a life estate in the premises, and that Dudley Digges was entitled to the inheritance from the moment of his death. That such is the legal and proper construction of this will has been supported by the deliberate opinion of the late William Pinkney, esq., and since has been confirmed by a solemn decision of the highest court of judicature in the State of Maryland, from which decision it will appear that actions of ejectment have been sustained, at the suit of Dudley Digges, against occupants of other parts of this manor, who claimed title in virtue of conveyances from Thomas A. Digges, and under circumstances not materially variant from those attending the title of the government to the ground included within the walls of the fort.

It is true that Dudley Digges joined with his uncle, Thomas A. Digges, in a deed of confirmation, which may be said to exempt the claim of the United States from any affinity to the character of the cases to which I have referred. But there are facts attending this nominal transfer which it is of much importance to notice. Dudley Digges had, at the date of that deed, no knowledge of his legal claim to this property; an infant in experience, and under the guidance of his relation, he attempted to abandon his inheritance, for which that relation received the compensation. Apart from this consideration, which alone would be conclusive with a court of equity, it is a fact which would repel any force of contradiction, as I humbly apprehend, that that deed of confirmation was executed at a period when Dudley Digges had not a legal interest of any kind, which, in point of law, he could transfer to any one. For it is an important part of the history of this case that Dudley Digges had, previous to this deed of confirmation, conveyed to Daniel Carrol and Daniel Brent all his interest in his lands in Prince George's county, which he at that time held, "either in possession, remainder, or reversion," in trust for the payment of a debt due to the Bank of Washington, and afterwards for the education and support of his family. This debt to that bank is not yet redeemed; and I am of opinion that the legal title to this property was vested in the trustees from the date of the death of Thomas A. Digges, tributary, however, to the uses and purposes in that conveyance declared. But even admitting for a moment that the title of the United States, under the con

veyances from Dudley Digges and his uncle, to be doubtful, yet it cannot be pretended that the slightest obscurity attends the claim of Dudley Digges to the grounds adjacent to the fort, which have long since been improved and occupied for the purposes of the government; even the verbal license to occupy these grounds was connected with a condition which the government have hitherto refused to perform. They therefore hold them without a shadow of title, without compensation, and without consent. The legal title to these premises is then either vested in the trustees of Dudley Digges, in common with the rest of the lands included in the deed of trust, or it is vested in Dudley Digges, in virtue of the title by which he holds Warberton Manor, and in neither case have the government any claim in law or equity. If the title be vested, as is in the first instance supposed, the debt due from Dudley Digges to the United States must, at all events, be postponed in favor of the claim of the Bank of Washington, and even then I am of opinion that a court of equity would protect the balance of this property in the hands of his trustees for the benefit of Dudley Digges's wife and children.

Mr. Barbour, the late Secretary of War, in a communication to Congress, expressed a belief that the property in dispute was the only security for the debt due from Dudley Digges to the government. But if this portion of Warberton Manor were liable to execution at the suit of the United States, it would be prudent to estimate the consequences of such a resort. The executive officer of the government could only sell this property at public auction, and a part of the wall of the fort, together with buildings erected by the United States at an immense expense, and to which they cannot pretend a semblance of title, would become the property of the highest bidder. In this event it requires no force of argument to prove that the interest of the government will be at the mercy of the community. This property is too important to abandon. Its value has been multiplied to more than a half a million by the improvements the public have placed upon it The pretensions of the government cannot control the spirit of speculation, and they must bid the intrinsic value of this property to secure its possession. But it now appears that Dudley Digges's property within this district is directed to be sold to satisfy the debt due from him to the government, at the very time that government itself admits it has received an equivalent equal to its amount. No blame can be attached to any officer of the government for this act. But certainly any individual, standing in the attitude of the government in this instance, would feel his incompetence of character to answer the reproaches of justice; and the true dignity of this nation must shrink at the approach of its taint. Under these circumstances, I feel myself bound in duty to meet the government in the spirit of amity and compromise; and I hereby pledge myself to complete the title of the United States to *all* the lands occupied by them in and about Fort Washington upon condition that the government will suspend their present levy upon the property of Dudley Digges and accede to the award of the arbitrators mutually appointed by the parties. Even the slumbering spirit of justice breathes approbation upon the claim of Dudley Digges, and I have *that* sacred sanction to repeat it. That gentleman has been despoiled of a part of his patrimony by his relation; the government has fastened upon another portion, and, withholding the compensation sanctioned by their own medium of adjustment, insists upon an extremity at which the impulse of common justice revolts. I am apprised that the reputed extravagance of the award in favor of Dudley Digges has hitherto induced the agents of the government to abstain from its payment; but when it is considered that this mode of approaching the value of this property was adopted with the consent and at the instance of the proper functionary of the government; that the arbitrators were men beyond the reach of imputation, residing in the vicinity of this property, and therefore best qualified to estimate its value, I would humbly suggest it to be somewhat difficult to feel the force of such an objection. It is certainly not necessary to refer to the language of our own Constitution, or to the practice and positive institutions of all civilized nations, to shield the hereditary rights of an individual from the predatory depredation of lawless power. There is an intuitive sense of justice which openly rebels at such an aggression and stamps upon it a revolting appellation which, I confidently trust, the feelings of this nation are not prepared to sustain. I have, therefore, most respectfully to request that you will introduce the claim of Mr. Digges to the consideration of the Congress of the United States, in such a manner as you may think most acceptable to them, under a settled conviction that that august body would disdain to suffer an appeal from its own dispensation of justice to any tribunal constituted by its power.

I have the honor to remain, with sentiments of the highest consideration, your obedient servant,

MOSES TABBS.

GREEN HILL, *November* 6, 1828.

DEAR SIR: I hereby authorize you to institute suits against the occupiers of my property at and near Fort Washington.

Yours, &c.,

WM. DUDLEY DIGGES.

MOSES TABBS, Esq.

NOTE.—For the documents communicated with the preceding see Doc. 321 of this class.

20TH CONGRESS.] No. 396. [2D SESSION.

ON THE MEMORIAL OF BREVET MAJOR GENERAL WINFIELD SCOTT, AND THE DISTINCTION BETWEEN LINEAL AND BREVET RANK IN THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 27, 1829.

Mr. DRAYTON, from the Committee on Military Affairs, to whom was referred the memorial of Major General Winfield Scott, reported:

That the memorialist states that he was appointed a brigadier general on March 9, 1814, and a major general by brevet on July 25 of the same year, for services set forth in the body of his commission; that General Brown, by virtue of his seniority in the highest grade in our service, that of a major general, commanded the army from June, 1821, to the time of his decease, in February, 1828; that after General Brown's death, General Macomb being appointed to fill his vacancy, with the rank of major general, from May 24, 1828, the President placed him in command over the army, requiring all officers, &c., to obey his orders, without any exception as to the memorialist, who was an older major general, and therefore, according to law and military usage, could not be subjected to the command of his inferior in rank; that he protested against this order, believing it to be equally repugnant to his rights and to his honor, and prayed to be sent before a court-martial, on the charge of disobeying the orders of General Macomb, that his case might be judicially settled; that he also suggested an arrangement by which he would be exempt from the command of his inferior officer; that his application and suggestion have been rejected; and that finally he has been suspended from all command in the army. Under these circumstances, the memorialist prays that Congress, by a declaratory statute, would fix and determine the rights and duties appertaining to brevet rank.

Your committee believes that everything relating to brevet rank in the United States is to be found in the 61st and 62d of the Rules and Articles of War, and in two acts of Congress of July 6, 1812, and April 16, 1818. In the 61st article it is enacted "that officers having brevets or commissions of a prior date to those of the regiment in which they serve may take place in courts-martial and on detachments, when composed of different corps, according to the rank given them in their brevets or dates of their former commissions; but in the regiment, troop, or company to which such officers belong, they shall do duty, and take rank, both in courts-martial and on detachments, which shall be composed only of their own corps, according to the commissions by which they are mustered in the said corps." The act of July 6, 1812, authorizes the President to confer brevet rank upon officers of the army who "shall distinguish themselves by gallant actions, &c., or who shall have served ten years in any one grade:" *Provided*, That such officers "shall not receive additional pay or emolument, except when commanding separate posts, districts, &c., &c." The act of April 16, 1818, declares that brevet officers shall receive the pay, &c., of their brevet rank only when their command corresponds with that rank; and that, thereafter, no brevet commission shall be conferred but by and with the advice and consent of the Senate. In the opinion of your committee, the word "corps" (which has various senses, both in its military and ordinary acceptation) is intended, in the 61st article of war, to mean a regiment or regiments. The article refers to "officers having brevets or commissions of a prior date to those of the *regiment*" in which they serve; and in enumerating what may be comprehended in "corps," the expressions are "regiment, troop, or company." This interpretation of the word is corroborated by a decision of the President of the United States on the 1st of July, 1816, in the following words: "The terms regiment and corps, as used in the 61st article of war, will be considered as synonymous."—(General Regulations of the Army, No. 18.)

In the 62d article of war it is said: "If, upon marches, guards, or in quarters, different *corps of the army* shall happen to join or do duty together, the officer highest in rank of *the line of the army*, marine corps or militia, by commission there, on duty or in quarters, shall command the whole, and give orders for what is needful to the service," unless "otherwise specially directed by the President of the United States, according to the nature of the case." Upon reading these two articles, immediately connected with each other, the inference is irresistible that Congress purposed to comprise in them all the positions in which officers, of whatever rank, might be placed; in the 61st article, on courts-martial and in detachments composed of regiments or parts of regiments; and, in the 62d article, in all other military bodies, however large and however situated.

To ascertain what officer, by the 62d article, is entitled to the command, it is only necessary that the meaning of the technical term "rank in the line of the army" should be clearly understood. "Rank in the line of the army" is conceived to be rank in a military body specially organized for the exertion of physical force, or, in other words, for combating an enemy; and an officer in such a body has a direct and permanent command over the troops which compose it. The expressions, "rank in the line of the army," "rank in the line," "lineal rank," are generally used in contradistinction to staff appointments, and to rank which confers upon officers only an occasional right to command, including brevet officers and officers having commissions of a prior date to their lineal commissions. It cannot be predicated of staff officers, brevet officers, or officers with prior commissions, that they have a *direct* and *permanent* command over a division, brigade, regiment, &c. Staff officers have no *direct* command over the troops; they are the organs *through which* commands or instructions are communicated, or *by which* various duties necessary for the operations of an army are performed, such as providing subsistence, clothing, arms, &c. They are sometimes taken from the line and sometimes not. "It is at all times competent for the commander, when he shall judge that the good of the service requires it, to put an individual of the staff *temporarily* on *lineal duties;* that is when the individual holds *rank in the line.*"—(General Regulations of the Army, No. 125.) "Officers of the staff having *lineal rank*, or rank *assimilated* thereto, and officers of the line without troops, *may* be assigned to *temporary* and *separate* commands, correspondent to rank, by the general-in-chief."—(Ib., No. 444.) A brevet officer, as a brevet officer, has no *direct* or *permanent command* over troops; he may have a *direct temporary* command over them in a mixed, detached body, as described in the 61st article; but as soon as the parts of which the detachment is composed join the regiments to which they belong the command of brevet officers ceases. A brevet officer, also, has *direct* command over troops *so long as he is* in the situation specified in the acts of Congress which have been cited. When not in these situations, he has no other command than that which is attached to his lineal rank. An officer

in the line having a prior commission, which he may have held, can have no command corresponding with that prior commission excepting *temporarily*. The meaning of "*rank in the line of the army*," the committee trusts, has been sufficiently explained and illustrated. The only officers *in the line of the army*, according to its existing organization, are one major general, two brigadier generals, and a fixed number of colonels, lieutenant colonels, majors, captains, and subalterns. There are, nevertheless, two major generals, and several brigadiers, colonels, lieutenant colonels, majors, &c., &c., by brevet, who are not of the line, for the reasons already stated, and who could not be so, inasmuch as the act of 2d March, 1821, authorizes no greater number of officers than as above enumerated, whereas the number of brevet officers is frequently changing.

Where a detachment amounts to a regiment, composed of companies from different regiments, the highest officer of the line present would be a captain; where composed of battalions, the highest officer of the same description would be a major; where the detachment amounts to a brigade, consisting of two regiments, the highest lineal officer would be a colonel. In all these instances, supposing the grades of the officers to be no more than adequate to their commands, there would be no officer on duty whose lineal rank would give him the command of the regiment in the one case or of the brigade in the other. Under these circumstances, therefore, the object of the 61st article is to give the command of the detachment to the oldest officer present, whether of the line or otherwise. But in every situation in which the troops of the United States, as they are now organized, could be placed, the command of a major general of the line of the army would extend over the whole.

Where a detachment is composed of brigades, the 61st article does not apply; the 62d article then prescribes the rule, and its language is, that "if, upon marches, guards, &c., different corps of the army, (which comprehends brigades, divisions, corps d'armés, &c.,) shall happen to join, &c., '*the officer highest in rank of the line of the army*, marine corps, or militia, by commission, there on duty, &c., shall command the whole, unless otherwise specially directed by the President.'" A brevet officer not being of *the line of the army*, the command, by this article, could not devolve upon him, and could not be assumed by him, unless by the special appointment of the President. The inference drawn by the committee from the language of the 62d article is not at all affected by the acts of 1812 and 1818, which merely provide that brevet officers shall receive the *pay and emoluments* of their brevet rank when on duty, and having a command according to their brevet rank, and "*at no other time.*"

Should the committee have erred in its construction of the 62d article of war, and should it be considered that, under it, brevet officers, in common with officers of the line, may exercise the commands which are therein mentioned, it would not therefore follow that the oldest major general, whether by brevet or otherwise, must command the army. That article vests the power of selecting the commanding officer in the President. If a right to the command necessarily devolved upon the officer highest in rank, the power of selection, which the law has expressly given to the President, would be unmeaning and inoperative.

Taking a general view of brevet rank, the committee neither regards it as merely honorary or as equal to and identical with lineal rank. It is not merely honorary; for where the contingencies occur which are adverted to in the 61st article a brevet officer has, *of right*, the commands which are there given to him; he is also, *of right*, entitled to the *pay and emoluments* which are allowed to him by the acts of 1812 and 1818; and under the 62d article he is as eligible to the highest command in the army as a lineal officer. Brevet rank is not equal to or identical with lineal rank, because the existence of it is not necessary to the formation of any corps; for when a brevet officer dies or resigns, or is promoted, only the vacancy left by his lineal rank is supplied; and because an officer of higher rank by his brevet than a lineal officer in the regular and permanent organization of the army would be commanded by the latter if superior to him in lineal rank. So long as the corps of the army are not broken into detachments, so long as they preserve their entire formation, a brevet officer, by the rules and articles of war, has no military functions to perform; and under the acts of 1812 and 1818, excepting in the situations therein described, he is equally without command by virtue of his brevet commission.

It seems to the committee to be a corollary, deducible from what they have premised, that, without any interference of the Executive, the regular army of the Union would at this time be subject to the command of Major General Macomb, he being the officer highest in rank of the line of the army; and even were this proposition questionable, the committee entertains no doubt of his being entitled to that command, having been specially appointed to it by the President of the United States, under the authority conferred upon him in the 62d of the Rules and Articles of War.

The committee, being of opinion that our legislation is clear and explicit upon the subject under its consideration, has therefore altogether refrained from any inquiries into the military regulations or usages of other nations.

For the reasons submitted by it, the committee recommends the adoption of the following resolution:

Resolved, That it is inexpedient for Congress to pass any law relating to the rights and duties of officers with brevet rank.

Extract of a letter from the Secretary of War to the Chairman of the Committee on Military Affairs, House of Representatives, dated

JANUARY 14, 1829.

"For the general views and opinions of the department in regard to the claims set up by General Scott in his late memorial to Congress, I beg leave to refer the committee to my letter to that officer under date of the 15th of November last, in which the subject of brevet rank is discussed at large, a copy of which I have the honor herewith to transmit, and to add thereto a few remarks in relation to the specific objects which the memorialist professes to have in view.

"After setting forth his pretensions to rank and command, and alleging that injustice has been done to him by the President, he closes his memorial with a petition that Congress will determine by a declaratory statute the rights and duties appertaining to brevet rank; so that he, and other officers similarly interested, may have the benefit of a certain and fixed rule for their conduct in common with the rest of the army, and their fellow citizens in general.

"The prayer of the petitioner is simply for a declaratory statute. It asks no change of the existing

law, but an exposition by the authority of Congress of the law as it stands. It asks, in substance, of Congress the exercise of judiciary power, affecting, as he states, his interests, and those of other officers of the army.

"In considering the expediency of complying with this request, the question occurs whether by the exercise of this declaratory judgment in the form of an act of Congress the interests of *all* the officers of the army would be affected in the same manner with those of General Scott; and if not, whether a decision favorable to *his* interests might not bear gravely and injuriously on the interests and rights of other officers.

"To these questions the answer is obvious. There are two officers, now the two highest in the army, and seniors in service of General Scott by nearly ten years, whose interests would be deeply affected by a decision in his favor; namely, Major General Macomb, and brevet Major General Gaines. It is suggested that if Congress should deem the declaratory statute solicited by General Scott expedient, justice to Generals Macomb and Gaines would require that before passing sentence upon their interests and rights, they should enjoy the same opportunity of being heard with which he has been indulged.

"The memorialist does not point out in what respect the existing laws relative to brevet rank require explanation. He does not specify the statute upon which he grounds his claims, nor the point of difference between himself and the President of the United States upon the construction of the law, which has, in the opinion of the memorialist, rendered the interposition of a declaratory law in his favor necessary.

"The laws of the United States which have a bearing upon the rights and duties appertaining to brevet rank are—

"1. The Constitution of the United States, art. ii, sec. 2 and 3.

"2. The 61st and 62d articles of war, established by act of Congress, 10th April, 1806.

"3. The act of 6th of July, 1812, section 4, authorizing the President to confer brevet rank.

"4. The act of 16th of April, 1818, regulating the pay and emoluments of brevet officers.

"5. The act of 2d of March, 1821, to reduce and fix the military peace establishment of the United States.

"The memorialist has not designated, nor even intimated, which of the laws, or what provision in either of them, it is which requires an explanatory declaration by Congress.

"After giving the dates of his several commissions in the army, from that of a captain (May 3, 1808) to that of a brigadier general, (March 9, 1814,) he adds that, for services set forth in the body of his commission, he was promoted to the rank of major general by brevet, July 25, 1814.

"It appears upon the face of this instrument that President Madison, conformably to the authority given by the act of 6th July, 1812, section 4, did confer upon Brigadier General Winfield Scott, of the army of the United States, the rank of a major general by brevet in said army.

"This brevet of rank General Scott has, for some years past, considered as in all respects equivalent to a commission of appointment; an error which a bare inspection of the brevet itself, compared with the commission of brigadier general, might seem sufficient to rectify; the brevet of rank purporting on its face to have been conferred by the President alone without the concurrence of the Senate, and the commission of brigadier general, although vesting him with an office of inferior grade to that of the brevet, purporting to have issued by virtue of an appointment to which he had been nominated by the President, and to which the Senate had given their advice and consent. This mode of appointment being prescribed by the Constitution of the United States, a bare reference to it shows that a brevet which was conferred by the President alone, and under the authority of an act of Congress, was not, and could not be intended to be, of equivalent effect to that of a regular commission of major general. Another marked distinction between the phraseology of a regular commission and a brevet is, that the former enjoins it on the person to whom it is directed 'carefully and diligently to discharge the duties of' (the office to which he is appointed) 'by doing and performing all manner of things thereunto belonging;' while the latter simply confers the rank of the office by brevet, without referring to the office itself or any specific duties that are attached to it.

"The Constitution and laws of the United States are, indeed, so destitute of anything which can, in the remotest degree, sustain the claim of the memorialist, that a rigorous examination of them can only excite surprise that the attempt should ever have been made to deduce the pretension from them. He has therefore been compelled to resort to the practice of foreign armies for a principle which he affirms to be always applicable to our own; namely, that military rank or command, which he asserts to be convertible terms, is always determined first by the difference of grade, and secondly by priority of date in the same grade.

"Each of the preceding propositions as applied in this unqualified sense to our service is unfounded. Rank and command are in no respect whatever convertible terms. Even rank by regular commission gives no command, but only a right to be assigned to command, while brevet rank does not confer even this right. All military command must be assigned by the superior military authority; and no officer in our army, from the commissioned major general to the lowest subaltern, can assume a command but as authorized by his superior. The assignment of command must be made according to law; and commissioned officers are entitled to claim commands appropriate to the grades given them by their commissions, but not always by their seniority in those grades. Staff officers, for example, cannot claim command according to their grades; neither can engineer officers in the line, nor militia officers by their seniority, nor brevet officers by their brevets, except in cases prescribed specially by law. General Washington, in his letter of 11th August, 1780, to Generals Wayne and Irvine, truly says that military rank and an *eligibility* to military command are ideas which cannot be separated.

"Equally unsupported is the assertion of the memorialist that from the commencement of our revolutionary war down to the present year brevet rank has uniformly been held to give command in common with ordinary rank. The fact is directly the reverse.

"Of the brevets granted by the Congress of the confederation during the war of the revolution, some were conferred on European officers, chiefly French, on their arrival from Europe and entrance into our service; others upon officers of the same description on their return to Europe. In neither case did the brevet entitle them to pay, emolument, or command. Others were bestowed for distinguished services, but conferred only eligibility to command. After the close of the war, when their service had terminated, a brevet of advancement one grade in rank was granted to every officer of the army who had served in one grade since the year 1777, *having respect to seniority.* The war had ceased many months

before. The definitive treaty of peace itself had been signed, and by its ratification very shortly afterwards the whole army was disbanded,

"On the 20th of April, 1778, Congress passed the following resolutions:

"'*Resolved*, That no commissioned officer in the army of the United States who shall be honored with a brevet commission shall be entitled, by virtue of such brevet commission, to any higher rank in the regiment, troop, or company to which he belongs than he before held therein; such brevet commission giving rank only upon detachments from the line, and in general courts-martial; nor shall such brevet officer be entitled to receive any additional pay in consequence of such brevet promotion.

"'*Resolved*, That Major Ebenezer Stevens, in consideration of his services, and the strict attention with which he discharged his duty as commanding officer of artillery in the northern department during two campaigns, take rank by brevet as a lieutenant colonel of foot, and that he be commissioned accordingly.'

"The adoption, at the same time, of these two resolutions, conclusively shows that in conferring brevet rank Congress intended no grant, either of command or pay; and this is further illustrated by the following resolution, adopted on the 24th of November, 1778:

"'*Resolved*, That Lieutenant Colonel Stevens, of the artillery, now holding that rank by *brevet*, be *appointed* a lieutenant colonel of artillery; and that his *commission* bear date from that of his *brevet;* and that he be entitled to take *command* on the first vacancy that may fall in the artillery.'

"These three resolutions appear to establish, beyond all controversy, not only the distinction between a brevet and a commission of appointment, but the principle that the brevet gave no right or title to command.

"By the second resolution, Major Stevens, of the artillery, for his distinguished services during two campaigns, receives a brevet rank as lieutenant colonel of the *foot;* but the preceding resolution provides, by a general rule, that it shall give him neither command nor pay.

"The third resolution, adopted after another intervening campaign, *appoints* Colonel Stevens to the rank in the artillery which he already held by brevet; and being antedated at the time of his brevet, his commission *now* entitled him to the pay which his brevet could not give him. The resolution then entitles him to take command on the first vacancy that might fall in the artillery; a provision entirely superfluous if the brevet had already given him a right to the same command.

"On the 10th of September, 1783, Congress

"*Resolved*, 'That the Secretary of War inform the paymaster general that brevet commissions do not entitle to pay or emoluments, unless the same be expressed in the resolution granting such commissions.'

"This resolution is not confined to regimental officers, but is equally applicable to brevets of every grade.

"From the close of the revolutionary war until the adoption of the present Constitution of the United States, the only brevet granted by the Congress of the confederation is believed to have been that of brigadier general to Lieutenant Colonel Harmar, who commanded the first levy of troops of the confederation after the peace. This brevet was so far from being considered as equivalent to a commission of appointment, that in signing his name as a witness to the treaty of January, 1789, with the Six Nations, he styles himself 'Joseph Harmer, lieutenant colonel, commanding 1st United States regiment, and brigadier general by brevet.'

"From that time until the late war with Great Britain no brevets were conferred. Under the present Constitution of the United States, and the act of Congress of July 6, 1812, General Scott was himself the first who received the brevet rank of major general.

"When he claims, therefore, by virtue of his brevet rank, not only the command of a major general, but a command superseding the seniority of the officers immediately preceding him in the line of the army, he advances pretensions unheard of in the army of the United States, until thus brought forward by himself. If the averment in the memorial, that General Scott had under his orders, at different times, two major generals of the army, was intended (as it is presumed to have been) to refer to Generals Macomb and Gaines, the reply of this department is, that its files do not, it is believed, furnish any evidence of such a fact, other than the assertions of General Scott himself; while they exhibit, at the same time, the solemn and unqualified denials of each of the former officers of the correctness of such assertions, as applied to them respectively.

"The memorialist further affirms the law, the construction of the law, and the *settled* practice of the army, down to a recent event, the death of Major General Brown, had been such that brevet rank had uniformly been held to give command in common with ordinary rank. This assertion must appear strange when it is known that, for seven years preceding the death of General Brown, an unremitted and very ardent controversy had existed between brevet Major General Gaines and the memorialist himself upon this very question; that the memorialist had, in numerous letters to the Secretary of War, the late General Brown, and the Adjutant General, ineffectually urged the decision of this question in his favor; and that it remained unsettled at the decease of General Brown.

"The memorialist then complains that, on the promotion of General Macomb to the vacancy of the deceased, with rank as major general from May 24, 1828, the President of the United States, without any new legislation changing the law or principles which have been stated, by an order bearing date May 28, 1828, placed Major General Macomb in command over the army, and required all officers, &c., to obey his orders, without any exception in favor of the memorialist, the senior, and, therefore, the superior major general.

"Against this order, which the memorialist alleges he has honestly believed to be equally repugnant to his rights and to his honor, he states that he has, from the first, respectfully and steadily protested; that he has requested to be tried by a court-martial, on a charge of disobedience to the commands of Major General Macomb; that he has suggested an arrangement of the several general officers of the line to separate geographical districts; that all his entreaties have been rejected; and finally, that, without any trial by his peers, he has been suspended from all command in the army.

"If the statement of facts presented by the memorialist were correct, it would exhibit a case requiring not a declaratory exposition by the legislature of the law relating to brevet rank, but a procedure of a more directly judicial character with reference to the conduct of the President of the United States. The complaint is, in substance, a charge of gross and palpable abuse by the President of his authority, to the grievous injury and oppression of the memorialist; for surely gross and palpable must be that abuse which would justify a general officer of the army of the United States in a continued series, for the space of eight months, of acts of open and avowed disobedience to the official commands of his commander-in-chief,

uniting with this character that of chief civil magistrate of the Union. Should the committee be of opinion that there is a shadow of pretension for this complaint of the memorialist, I am directed by the President to inform them that he is prepared to account, in the manner prescribed by the Constitution, for all the acts by which the memorialist declares himself to have been aggrieved; and to show to the satisfaction of the House of Representatives, should they deem the call expedient, that these acts, far from being repugnant to the rights or the honor of the memorialist, have exhibited towards him a spirit of undeviating and unexampled indulgence. But, unwilling to occupy the time and attention of the House upon an inquiry, concerning which it is believed there will be no diversity of opinion, it is deemed sufficient now to say that it would involve the investigation of a voluminous correspondence for a period of seven years preceding the death of General Brown, during which the memorialist was claiming, with incessant and untiring importunity, the decision of the President upon the very principles which he now states to have been settled by uniform practice from the commencement of the revolutionary war down to the present year.

"This decision had, in kindness to the memorialist himself, though in resistance to his continual urgent demands, been deferred until the appointment of a major general of the army became necessary upon the decease of General Brown. It was decided by the appointment of General Macomb—decided in the manner the most inoffensive possible to the feelings of the memorialist, inasmuch as the decision, though unfavorable to his pretensions, spared him the mortification of a triumph awarded to his adversary in the controversy. It placed in command over them both an officer who, from the entrance into the army of them all, had been senior to both. It decided against the memorialist nothing but the principle, without subjecting him even to the immediate command of his antagonist and rival And now the memorialist exhibits the singular spectacle of heavy complaint against the President for that very decision which the memorialist had for seven years never ceased to invoke.

"Upon the whole it is believed that the memorialist has mistaken the nature both of the disorder and the remedy, by assuming the unfounded principle that brevet rank, as authorized by law in the army of the United States, is equivalent to a constitutional official appointment, and that it should be so decided by a declaratory act of Congress. This original error has been the source of all the disappointment of the memorialist in his pursuit of promotion, and of all the supposed grievances of which he now complains. The first source of this error was in his looking to the practice of the British army for a principle which he should have sought in the Constitution and laws of his own country; and his misfortune was, that, in overlooking the institutions peculiar to the British army, with which the practice is inseparably connected, but with which we have nothing analogous in our service, his application of the *practice* was to the exclusion of the *principle* of the British army itself; for the universal principle of all brevet rank in the British army as well as our own is, that it shall never permanently displace or interrupt the promotion of any other officer; while the claim of the memorialist has been and is, by virtue of his brevet, to pass by in the line of promotion his two immediate senior brigadiers, Generals Macomb and Gaines.

"I have the honor to be your obedient servant,

"P. B. PORTER.

"Hon. Wm. Drayton, *Chairman of the Military Committee House of Representatives.*"

Department of War, *November* 15, 1828.

Sir: The respect which the President cannot cease to entertain for your former services, has induced him to extend to the spirit of insubordination manifested in your late correspondence with this department, a degree of forbearance which he has found it difficult to reconcile with the stern principles of military obedience. Being convinced, however, by the earnestness and confidence with which you attempt to maintain them, that you have wrought yourself into a full and honest belief of the soundness of the extraordinary pretensions which you advance on the subject of brevet rank, and being desirous that you should distinctly understand the ground upon which you stand, and the consequences to which a perseverance in your present contumacious course will speedily and inevitably lead, he has instructed me to explain to you briefly his general views on the powers and properties of brevet rank, and the reasons which determined him not to submit the questions which you have thought proper to raise, either to the decision of a court-martial or to the opinions of a board of officers.

You advance the broad proposition that a brevet is in itself a commission, conveying equal authority and dignity with a commission of appointment, and gives to the officer holding it the same rights of rank and command; and that the 61st article of the Rules and Articles of War, so far from having been intended to confer any new and original rank or authority on a brevet officer, was designed to limit and restrict the powers which appertain to and are inherent in the office, by pointing out particular cases in which, and which only, brevet rank should not avail him.

The President, on the other hand, is of opinion that a brevet is in itself a mere honorary distinction, conferred as a reward for gallant, meritorious, or long-continued service; that it invests the person on whom it is bestowed with no independent or substantive office; that it conveys no right of command, except in the accidental and heterogeneous combination of troops described in the 61st article above referred to; that this and the next succeeding article, No. 62, contain substantially the whole and only law by which a brevet officer, as such, can ever be entitled to command; and further, that the latter clause of the 61st article, instead of being, as you contend, a restriction on the general and prescriptive powers supposed by you to be inherent in a brevet officer, is merely a protracted or negative description or qualification of the limited authority expressly conferred by the preceding clause of the article.

The first law, under our present government, which allows brevets to be granted at all, was passed in 1812, and authorizes the President to confer brevet rank on such officers of the army "as shall distinguish themselves by gallant actions or meritorious conduct, or who shall have served ten years in one grade."

That the brevet of a major general conferred by this law (and yours was so conferred) was not intended to invest the person to whom it should be given with a distinct and substantive office, clothed with all the powers which the laws have assigned to that station, is at once apparent on referring to the 2d section of the 2d article of the Constitution of the United States, which requires that "the President shall nominate, and by and with the advice and consent of the Senate appoint, ambassadors, other public ministers, and consuls, judges of the Supreme Court, and all other officers whose appointments are not

herein otherwise provided for" But it authorizes "Congress to vest, by law, the appointment of such *inferior* officers as they may think proper in the President alone."

The office of a major general in the army of the United States is, in regard both to the powers it involves and the distinction it confers, one of the highest known to our laws; and, in both these respects, is much more elevated than that of "consul," who is enumerated in the Constitution as not among the inferior class. The Congress of 1812, therefore, in authorizing the President alone to confer this distinction, could not have considered it in the light of an office; or, if they did, they must have deemed it of so little consequence, on account of the mere occasional and fugitive commands which it authorizes, as to fall within the class of "inferior" offices. If, on the other hand, they intended to authorize the appointment of an officer with powers such as you contend appertain to a brevet major general, the law itself, as well as the appointment you received under it, is unconstitutional and void, and you can claim nothing under either.

The marked difference of phraseology between that part of the law of July 6, 1812, which authorizes the appointment of certain officers by *commission*, and that part of the same law which allows brevets to be given, clearly shows the different lights in which those two species of rank were then considered. By the first section of that act the President is authorized, "*by and with the advice and consent of the Senate, to appoint* two brigadier generals," &c.; while the 4th section "authorizes the *President* (alone) *to confer brevet rank* on such officers of the army as shall have distinguished themselves," &c.

In your comments on the letter addressed to you from this department on the 3d of June last, you object to the assertion in that letter that the law "to reduce the military peace establishment of the United States" authorizes *only one* major general and *two* brigadier generals, and to the use of the article "the," as applied to Major General Macomb, and attempt to show, by quotations from various statutes, that the laws now in force do recognize several major generals, still more brigadiers, and a host of colonels.

It is true that our laws acknowledge, besides those enumerated in the act of 1821, numerous *officers* who hold honorary rank in consequence of brevets or commissions of a prior date to those by which they are now mustered; and these honorary distinctions will entitle them to temporary and occasional command under the 61st article. But our military establishment, as fixed by the law of 1821, acknowledges no more *officers* of any particular grade than are therein enumerated, although there may be more *officers* who claim such honorary distinction. The functions, for instance, appertaining to the office of major general in our present army, are by law assigned to one person only, and those of brigadier to two; and these three, strictly speaking, are the only officers of those grades known to the law of 1821. The former is at present filled by General Macomb, and the two latter by General Gaines and yourself, in virtue of regular commissions which have been issued to you respectively.

If any other person than the one assigned to it by this legal organization should be called to perform the duties of either of their offices, he would discharge its functions for the time being, not because he holds the office, but because holding another office which renders him eligible to this command, the President has temporarily assigned him to it.

To show that your views in regard to the organization and command of the army under the present establishment have undergone a most important change, and that they were, not many years since, in accordance with those expressed in a letter from this department of the 3d of June last, I take the liberty to make a quotation from a letter addressed by you to the Secretary of War, under date of the 14th of December, 1821. In that letter you say:

"The theory of its (the army's) present organization is simply this: one major general to command the whole line under the President, or (what is the same thing in this case) the War Department; two brigadiers, &c., &c. Since the 17th of October last, *the* major general (not *Major General Brown*) has been confined by indisposition, at a distance from general headquarters equal to twelve or thirteen days by post. He is in fact, at this moment, to be presumed as much disqualified for the actual command of the army as he is avowedly disabled from returning to his habitual station. On whom then does the *vacant command devolve ad interim?*"

I beg now to ask whether the above extract does not most distinctly recognize *one* and *only* one major general, and *two* and *only* two brigadiers, as authorized by the present organization of the army? and whether it does not also distinctly admit (what you have recently thought proper to question) the right of "the major general" to command the whole line of the army, including of course the two brigadiers?

The great and fundamental error into which you and other brevet officers, who have addressed the government in support of the pretensions of this species of rank, have fallen, is to be found in the obvious misinterpretation which you have given to the term "brevet," as used in the 61st article of the Rules and Articles of War, and the phrase "of the line of the army," as used in the 62d article; to which two articles, forming together the whole brevet code, as regards rank and command, I beg leave to call your particular attention.

It is assumed, as the base of the argument, that brevet rank is rank in the line of the army, and that the words "or commissions of a prior date to those of regiment in which they serve," as used in the 61st article, were intended as a definition of the word "brevet," which immediately precedes them, and, therefore, that a brevet means a commission of a prior date to those of the regiment in which the person holding it serves; whereas it is, I think, obvious that the word brevet and the words following it, quoted above, are intended to indicate two distinct and totally different subjects.

As relates to rank, the word "brevet," if my examinations have been faithful, is never coupled with the word "commission," either in the Rules or Articles of War, or in any other law of Congress passed anterior to the year 1818; but, on the contrary, they are used in contrast with each other, and as denoting two distinct subjects; the word "commission" being evidently intended to denote an authority to fill some office specially recognized by law to exist, and vacant at the time of the appointment; and brevet, the mere creation of a military rank at large, without reference to any place or vacancy to which it is applied.

Rank in the line of the army, or lineal rank, as understood by the President, is applicable to the existing organization of that portion only of the army which is intended for field operations or the exertion of physical force against an enemy. It is commonly used in contradistinction to *rank in the staff;* the business of staff officers being not to fight in the field, but to supply and superintend what are usually called the muniments of war, such as arms, clothing, subsistence, and whatever regards its health. But the phrase "lineal rank" is also used to indicate the rank which the officer holds in the particular corps in which he is by law arranged and doing duty, in exclusion of the rank which he holds or may have held in another corps, although in relation to such other corps it is or may have been lineal.

Suppose, as has already happened in our service, that in consequence of the reduction and reorganization of our army, a colonel of a regiment under the old establishment should be mustered and do duty as a lieutenant colonel under the new, his lineal rank in the new regiment would be only that of a lieutenant colonel; and his old rank of colonel, although lineal at the time it was conferred, in relation to the corps in which he then served, becomes extra lineal, or, as a lawyer would term it, collateral, in regard to the corps in which he is now arranged; and it is in this sense, and with a view to this distinction, that the words "of the line of the army" are used in the 62d article.

If you are correct in supposing that brevet rank is rank "by commission," and rank, too, "in the line of the army," then the 61st and 62d articles of the Rules and Articles of War, if not arrant nonsense, are at least utterly inoperative and useless; for the effect of them, if any, is to give the command of troops, in all the various situations therein described, to precisely the same officers, and to the identical officers, too, who would have been entitled to it if these articles had never been introduced.

But in the sense in which the President interprets the words "brevet," and "of the line of the army," those articles are peculiarly appropriate and pregnant with meaning; and they show, by the minuteness of their descriptions, and their obviously antithetic arrangement, as contrasted with each other, that they were intended to describe totally different persons

The laws fixing our military establishment look to a clear and distinct organization, which assigns to every corps of the army a certain number of officers of a particular grade, and who are regularly appointed and commissioned by the President, by and with the advice and consent of the Senate, to such an extent as to complete the legal establishment. But they also, as has been before observed, recognize certain occasional commands in officers who have only the honorary distinctions of "brevets," or "commissions of a prior date," &c.

In accordance with these principles, the 61st article provides that "in courts-martial, and on detachments, when composed of different corps, officers having brevets or commissions of a prior date to those of the regiment in which they serve may have command." And the 62d article declares that in certain other situations of the troops (comprehending all not described in article 61) they shall be commanded by "the officer highest in rank of the line of the army, marine corps, or militia, by commission, there on duty, &c., unless otherwise specially directed by the President of the United States."

The words "by commission" were evidently intended to be put in contrast with and to exclude "brevets" mentioned in the preceding article, and which, as I have before observed, were not, until the year 1818, treated in the light of commissions. And the words "officer highest in rank of the line of the army," it is equally evident, were intended to be placed in contradistinction to officers having "commissions of a prior date to those of the regiment in which they serve," as described in article 61, and to exclude not only brevet officers, who are the last persons who can show any claim to "rank in the line," but more particularly those officers "who hold commissions of a prior date," &c., and who, as regards the regiment or corps in which they are now mustered and serving, are not deemed to be "officers of the line."

As long as the integrity of the army or its several parts is preserved, so that each corps acts by itself in conformity with its legal organization, each officer will take command according to the rank or office in which he is mustered into service; but if different corps, or parts of different corps, are brought together to act as an integral body or detachment, and all of whom are not under the lineal command of the highest officer of the line present, then the 61st article interposes, and gives the command of this mixed corps, whose integrity has been thus broken, to an officer "having a brevet or commission of a prior date," &c., if there be one present of higher grade; their rank, such as it is, being general, and precisely applicable to this mixed condition of the troops. So on court-martial, (the other case mentioned in the 61st article,) where officers of different corps are combined for the purpose of acting as an entire body, "brevets," or "commissions of a prior date," will take effect.

An opinion has been advanced by some that brevet command is nowhere authorized except in article 61; and, as that article relates to regimental officers only, that general officers can in no case exercise command as such, in virtue of brevet rank; while others, admitting the above construction of the article to be correct, still contend that, inasmuch as there was but one general officer belonging to the army when those rules and articles were adopted, and, of course, the principles applicable to brevet rank and command could not reach him, it is fair to say that on the appointment of numerous officers of higher grade the same principles should, by *analogy*, be extended to them.

The President's views, however, are different from either of these. He is of the opinion, indeed, that article 61 has reference to regimental organization only; and that in virtue of this article, no brevet officer, or officer holding a commission of prior date, &c., can claim higher than regimental command. But he is also of opinion that the 62d article extends the principle of brevet command (so far as regards the right of selection to the chief command by the President) to officers of any grade, and to military bodies of every size and description, associated and doing duty together as described in said article. This article declares that "if, upon marches, guards, or in quarters, different corps of the army (thus embracing not only regiments, but brigades, divisions, marines, and militia, and supposing, too, of necessity, in such combinations, the presence of general officers) shall happen to join and do duty together, the officer highest in rank, of the line of the army, marine corps, or militia, by commission, there on duty, shall command the whole, and give orders for what is needful for the service, unless otherwise specially directed by the President of the United States, according to the nature of the case;" thus giving to the President a discretionary power, in all cases, to assign a brevet officer to any principal command in the army, although by doing so he displaces an officer of equal grade "of the line of the army by commission."

The construction which the President puts upon both of these articles, when taken in connexion, is that they give to brevet officers a right to regimental rank and command, as matter of course, if they think proper to exercise it, in detachments and on courts-martial; but as regards general officers, and regimental officers when not on detachments or on courts-martial, brevet rank confers on the officer holding it only (to use the significant expression of General Washington) "eligibility to command;" and that the last clause of the 62d article places the right of election in the President, the words "unless otherwise specially directed by the President," as here used, clearly implying a right in him to change the order of command pointed out in that article; and if so, the obvious mode of exercising it is by the substitution of brevet and other officers mentioned in the preceding article as susceptible of occasional commands.

But assuming that the principles established by the 61st article are applicable to general as well as regimental officers, there is no possible combination or disposition of the troops of the United States which, upon these principles, would give you a right to command over General Macomb; for it is impos-

sible to bring together a detachment or any mixed corps from the army over every part of which he has not a lineal command.

The opinion, therefore, of the President that General Macomb is your senior officer, and has a right to command you, rests, as you will perceive, on the facts that he is, in the language of the 62d article of the Rules and Articles of War, "the officer highest in rank of the line of the army by commission;" and that he has equally the right to command the whole and every part of the army, whether that army be considered one entire corps, or as composed "of different corps, happening to join and do duty together," unless the President should think proper specially to assign you or some other officer to such command.

In the various communications which you have addressed to this department in support of your supposed rights derived from your brevet, you have had frequent reference to the practice of other armies, particularly of the British army, to precedents which you consider applicable to the case in our service, and to acts of the government of the United States, particularly to an intended decision of the late President in your favor, which you consider as conclusive.

The President considers the practice of other armies as authority to be alleged in our own only in cases for which the law has not provided, and which are compatible with our own institutions. In the British army *the brevet* is a form of pomotion to office. Several officers have no other commission than a brevet, and it can, therefore, never give rise to a collision of rank between them. We have nothing analogous to this in our institutions, and therefore this practice is not applicable to us. The only *principle* applicable even to this meaning of the term brevet in the British army in common with ours is, that the brevet shall never permanently displace the rank and command of any other officer.

All the instances which you have cited, from our own service, of brevet commands exercised by officers in the army of the United States are cases of special assignment by direction of the President, under the authority given him by the 62d article of war. This observation is specially applied to the case of General Gaines and your commands over Generals Worrall and Bloomfield in 1814, the facts of which the President has fully ascertained.

With regard to the intimation given you in September, 1822, that the President had determined, in the event of the continued disability of General Brown, to call you to the command of the army, it is to be observed that you had claimed this command upon the authority of the 2d and 3d paragraphs of the third article of the then existing Army Regulations, sanctioned by an act of Congress; that these paragraphs have since been expunged from the Army Regulations as conflicting with positive legislation. The President presumes that Mr. Monroe's intention was founded entirely upon the regulations in those two paragraphs. He regrets to observe that in your controversy with General Gaines, in July, 1824, and in your letter to the Secretary of War of 18th February, 1827, the demand contained in your letter to the Secretary of War of November 12, 1821, and the authority upon which you supported it, entirely escaped your recollection.

Finally, upon a full view and examination of the subject, to which the President has devoted a long and laborious investigation, he is satisfied that your claim to command Major General Macomb by virtue of your brevet, or even of exemption from obedience to his command as the major general of the army by commission, is in positive conflict with the 61st and 62d articles of war; with the act of Congress of the 6th July, 1812; with the act of the 2d March, 1821, to reduce and fix the military peace establishment; with the existing Army Regulations; with the authority of General Washington, in his letter to Generals Wayne and Irvine; with the practice in our own service; with the executive acts and opinions, excepting while the two disputed paragraphs of the Army Regulations were in force; and even with the principles of the practice of the British army; and in these opinions, I deem it in candor due to you to say, the members of the administration, whom he has more than once consulted on the subject, unanimously concur.

The reasons which have influenced the President in refusing to submit the question whether you or General Macomb is the senior officer in rank to the decision of a court-martial or the opinions of a board of officers are:

That the right ultimately to decide under the law on the relative rank of all the officers of the army is vested in him exclusively. The President is the executive head of the civil department of our government, as well as of the military, which, by the spirit of our institutions, is always considered as subordinate to the former; and it is probably in his civil rather than in his military capacity that he is authorized to interpret the laws in relation to the army, and see them faithfully executed.

That the only law or regulation authorizing officers of the army or the President (other than is to be found in the general delegation of powers to the latter by the Constitution) to pass upon the question of relative rank is the army regulation No. 17, which allows questions of rank in doubtful cases to be adjusted, "for the time," by courts-martial before which they may arise, or by a board of three officers, called by an officer having power to order a general court-martial, but subject in both cases "to the final decision of the War Department;" thus expressly recognizing the right of the President to make such decision. These references, too, to courts-martial and boards of officers are only to be made in "doubtful" cases; and even then the spirit as well as the phraseology of the regulation seems to render such reference wholly optional; for surely the officer who orders the court or board of officers, and more especially he who has the ultimate power of decision, is the proper person to say whether a case is doubtful and ought to be referred.

That in a case like the one now presented, in regard to which the President does not entertain the least doubt, it would, to say the least of it, be highly useless, as well as disrespectful to the officers of the army, to precede his decision by eliciting, in this way, opinions which, whatever they might be, could not change that decision.

That a reference, in the present case, to a court or a board of officers would be inexpedient, inasmuch as it would be impossible to constitute a disinterested tribunal from the materials of the present army. On looking to the higher grades of the army for a president of the tribunal, he would find, first, General Macomb, who is directly interested in the issue of the inquiry; secondly, General Gaines, who, besides being interested in a similar question of rank, would be still more objectionable on account of the personal hostility known to exist between you and him; and, indeed, it would be found that almost every brevet officer would be interested in swelling the importance of that species of rank, and thereby his own positive rank in the army; and those, on the contrary, holding rank by commission only, would be inclined to increase its relative importance by detracting from that of the other.

That although the President is not disposed to call in question the legal or constitutional right by which his predecessor deemed himself authorized to organize a board of nine officers, in 1825, to inquire

into and express an opinion in the case of contested rank between yourself and General Gaines, yet allowing the right to exist, he would deem the exercise of it on this occasion extremely unadvised; for the abortive issue of the proceeding of 1825, to which I have alluded, assures him that a result equally useless would attend a similar proceeding now, as the same question, in substance, would be presented; and the board, if not composed of the same officers, would be filled with others equally interested, and with opinions equally committed. And he is, moreover, admonished by the excitement which this controversy on the subject of brevet rank has already produced, not to renew or increase it by causing the question to be again formally and judicially agitated by the officers of the army.

The President hopes that a dispassionate examination of the reasons for his decision will reconcile to your judgment and feelings a prompt and cheerful obedience to all the orders which that decision has rendered obligatory, and that your services, which have heretofore been useful and meritorious, may not be lost to the country.

You will perceive from the tenor of this letter that the request for a furlough, which you have renewed in yours of the 1st instant, cannot be granted.

I have the honor to be, very respectfully, your obedient servant,

P. B. PORTER.

Brevet Major General SCOTT.

WASHINGTON, *January* 17, 1829.

SIR: I have the honor to submit to you, and through you to the committee of which you are the chairman, the following proofs and illustrations in support of the propositions contained in my memorial, and as a hasty reply to the two letters from the War Department, the first addressed to me, and dated November 15, 1828, and the second addressed to you, and dated the 14th of this month, all of which papers are now before your committee.

As the Secretary of War has not communicated with those two letters my printed reply (dated November 30, 1828) to the first, I beg the committee will also consider it as a part of this communication.

I. The word *brevet*, which occurs in common parlance in our sixty-first article of war, and in three or four resolutions of the old Congress, is but the abbreviation of the compound term *brevet commission*.

1. This is evident from the following resolutions:

2. "*Resolved*, That no *brevets* be in future granted except to officers of the line, or in cases of very eminent services."—*Journals of Congress, for November* 24, 1778.

3. "*Resolved*, That no brevet commission be granted to any officer except with the consent of nine States."—*Journals, February* 20, 1779.

4. For a similar use of the compound *brevet commissions*, see the journals of the revolutionary period generally, particularly for September 10, 11, 30, 1783; July 31, 1787, and the act of April 16, 1818, sections 1 and 2.

5. The same use of the terms *brevet* and *brevet commission* occurs in the British code and army.—(See British *Articles of War, section* 15, *article* 1, for the single term, and British *General Regulations and Orders for the Army, p* 5, for the compound term.) This book and *Samuel on the British Army* will both be found in the Library of Congress, chap. xix. The latter work, at page 611, gives the British article in question. This was borrowed (*verbatim et literatim*) by Congress September 20, 1776,* and re-enacted, as the 61st article, April 10, 1806.

II. But the term *brevet* itself substantively means *commission*.

6. "*Brevet d'un officier*, an officer's commission."—*Chambaud's Dictionary.* (Library of Congress.)

7. "BREVET, [*French*,] commission, appointment. All officers in the old French service, from a cornet or sub-lieutenant up to a marshal of France, were styled *officiers à brevet*."—*James's*, (or the borrowed,) *Duane's Military Dictionary.*

8. "BREVET, [*French*, from *brevettum*, low Latin,] appointment in the army, and rank above the specific appointment for which pay is received; a lieutenant colonel being made colonel by brevet enjoys the pay only of the former, but the honor and privileges of the latter station."—*Todd's Johnson, 4to edition.*

9. "BREVET, a term expressive of promotion in the army, from the captain upwards, without additional pay until it reaches to the rank of major general, who is now entitled to a quarterly allowance."—*Crabbe's Universal Technological Dictionary.* (Library of Congress.) *James's Military Dictionary.*

10. The correctness of these definitions is rendered evident by an inspection and comparison of what is termed a *brevet* and what I shall call an *ordinary* commission. Take mine, for example. The former gives me "the *rank* of major general *by brevet*," the latter that of brigadier general. Both instruments of authority are engrossed on parchment, signed by the President, countersigned by the Secretary of War, under the seal of his department. Both, again, contain the same reciprocal injunctions requiring all inferiors to obey the holder and the holder to obey all superiors, and neither is termed on its face a *brevet* or *brevet commission*, but each expressly "this commission!"

III. So does *brevet commission*, as used in the examples above cited, mean *commission*.

11. This is evident from what has already been stated. The following illustrations may be added:

12. "*Resolved*, That Ebenezer Stevens, in consideration of his services," &c., &c., "take rank by brevet as lieutenant colonel of foot, and that he be *commissioned* accordingly."—*Journals of Congress, April* 30, 1778.

13. "*Resolved*, That the Secretary of War inform the paymaster general that brevet commissions do not entitle to pay and emoluments, unless the same be expressed in the resolution granting such commissions.—*Journals, September* 10, 1783.

14. "*Resolved*, That the *commissions* of major by brevet be issued to captains D., L., and H., and the *commissions* of captain by brevet be issued to lieutenants V., F., L., and M."—*Journals, February* 6, 1784.

15. If commissions giving rank by brevet had not been, and are not now, *commissions*, officers who held or hold rank in the British and American armies solely by brevet could not have been, and cannot

*See the Journals for this date, (Articles of War, sec. xiii, art 24.) Our whole code was borrowed at the same time by the committee *on spies*, consisting of Messrs. J. Adams, Jefferson, Rutledge, Wilson, and Livingston.—(Journals for June 5, 14, 1776; September 20, 1776.) The code was recognized and continued by the act of September 29, 1789, section 4, and re-enacted April 10, 1806.

now be, punished for violating either of the following all-important articles of war: 5, 25, 33, 36, 39, 45 48, 59, 83—borrowed, as above, from the British code. The punishment denounced in each of these articles in both armies is not against *officers*, but expressly "*commissioned* officers." In both armies there have always been (except for one period in our own) many officers who held rank solely by brevet. The present number in our army, including topographical engineers and second lieutenants, is about fifty. They are, therefore, "*commissioned* officers," in common with those who hold *ordinary* commissions.

16. Again: By the 64th and 66th articles of war (borrowed from the British code) it is enacted that general and regimental courts-martial shall consist of certain numbers of "*commissioned* officers," respectively; and in both the American and British armies officers are almost daily detailed as members of courts-martial who hold rank solely by brevet.—(See paper F, interrogatory 12.)

17. "All commands in the regular forces belong to the eldest officers, whether of cavalry, artillery, *engineers*, infantry, or marines. In case two *commissions* of the same date interfere, a retrospect is to be had to former *commissions*."—*British General Regulations and Orders for the Army, p. 4, edition* 1822. (This edition is *not* in the Library of Congress.)

18. So in the edition of the same book of 1811, (Library of Congress,) after stating that an admiral shall rank with a [full] general, a vice-admiral with a lieutenant general, a rear admiral with a major general, &c., &c., it is said:

19. "The rank and precedence of sea officers in the classes above mentioned are to take place according to the seniority of their respective *commissions*."—*Pages* 8, 9.

20. Now it is admitted by the President in the letter before me that in the British army "general officers have no *commission* other than a *brevet*." It follows, therefore, that *brevets* are included in the word "*commission*," three times used in the extracts above, Nos. 17 and 19.

21. But that *commission* standing alone is the *generic* term, including all *species* of commissions, is rendered absolutely certain by the following reference:

22. In an ordinance of the King of Great Britain giving "power and authority to grant *brevet* commissions in *our* service to all the said [East India] company's officers now serving abroad, conferring upon them the same rank in the army in our East Indies only as they now enjoy in the company's service, the *commissions* to bear the respective dates of their present commissions in the service of the said company," &c., &c., it is added:

23. "And all such officers to whom you shall grant *commissions* in the manner herein directed are to be acknowledged and to command in their respective stations as if they had received *commissions from us*."—*Hough on Courts-Martial, p. 366, note 3* (Library of Congress, chap. xix.)

IV. Commissions being the *generic* term, whence and what are the *species* therein included?

24. These are enumerated and contradistinguished in the 61st article of war, and so precisely in the British code, from which our article is borrowed.

(25.) "*Article* 61.—Officers having brevets or commissions of a prior date to those of the regiment in which they serve may take place in courts-martial and on detachments, when composed of different corps, according to the ranks given them in their brevets or dates of their former commissions; but in the regiment, troop, or company to which such officers belong, they shall do duty and take rank, both in courts-martial and on detachments which shall be composed only of their own corps, according to the commissions by which they are mustered in the said corps."

(26.) Here are enumerated *three* species of commissions: 1. "Brevets." 2. "Commissions of a prior date to those *of* the regiment in which they [the holders] serve;" or, more briefly, "former commissions." 3. "Commissions by which they [the holders] are mustered in the said *corps*," (meaning "regiment, troop, or company to which such officers belong;") or, as the same *third* species is described in the beginning of the article, commissions "*of* the regiment in which they [the officers] serve;" that is, *regimental* commissions.

26. The *third* species, it is seen, is twice described by periphrastical additions; whereas the *first*, from the same paucity of single appropriate *English* words, is specified by one *foreign* word *(brevet)* borrowed for that purpose.

27. It may be remarked that the *generic* term *commission*, standing alone, without explanation or qualification, does not once occur in the 61st article. The species only are given—*brevets, former commissions*, and (what for brevity's sake I have called, and shall continue to call) *ordinary commissions*.

28. The article, it will be perceived, relates solely to rank and command, and has for its object to restrict, within any particular "regiment, troop, or company," the *first* and *second* specific commissions in favor of the *third* species. Hence, and hence only, the use of those specific terms in this place.

29. *Brevet* or *brevet commissions* is also used in other laws when it is designed to restrict the receipt of *pay and emoluments* (which would otherwise *attach, of course*, to the rank therein conferred) to particular situations. Thus the act of 1812, sec. 4, under which all the existing brevets in the American army are held, after authorizing brevet rank, specially provides:

30. "That nothing herein contained shall be so construed as to entitle officers so brevetted [*commissioned*] to any additional pay and emoluments, except when COMMANDING separate posts, districts, or detachments, when they shall be entitled to and receive the same pay and emoluments to which *officers of the same* GRADES are now, or hereafter may be, allowed by law."

31. This *proviso* was subsequently modified thus:

32. "*Be it enacted, &c.*, That the officers of the army who have brevet commissions shall be entitled to and receive the pay and emoluments of their *brevet rank* when *on duty, and having* A COMMAND ACCORDING TO *their* BREVET RANK, and at no other time."—*Act April* 16, 1818, *sec.* 1.

33. That similar and even greater restrictions existed in respect to *pay and emoluments* in the revolutionary army, see paragraph above, No. 13; and that such exist in the British army, see Nos. 8 and 9.

34. There is one, and but one, other use made of the specific term *brevet*, or *brevet commission*, in our laws. Every war and every peace establishment has been made by law to consist of so many individuals—no more, no less. This has been done by an accurate enumeration of the several grades, and the number of individuals in each grade, *neither* to be increased or diminished except by like authority—an act of Congress. The offices or places so limited may be called *vacancies*, original or accidental—original *before* filled, accidental when they afterwards fall vacant. Those offices or places are, indeed, precisely so called in our *General Regulations for the Army*, Nos. 19 and 20, page 17. All those offices or places are filled by *ordinary* commissions.

35. But the acts of Congress in force, viz: act of July 6, 1812, sec. 4; act of April 16, 1818, authorize *extra* rank to be granted to the same officers who have been appointed or promoted to fill those ordinary "*vacancies*."

36. This *extra* rank is called *brevet* rank, and the commission which confers it a *brevet*, or *brevet commission*, simply because the words "by brevet" (see No. 10, above) are inserted in the body of the commission, and those words only denote—1, that the rank shall be of no avail *within* a regiment; 2, that it shall carry with it pay and emoluments *but* in certain situations; and 3, that the commission is not given to fill one of those *limited* "*vacancies*."

37. In all other respects the commissions containing the two words "*by brevet*" are as full, as valid, and effective as any other military commissions; and the only reason why the *number* to be granted has not been *limited* by law, as in the case of the "vacancies," is, that *by law* they are made to depend on the following *contingencies:* 1st, the performance of gallant actions; 2d, other meritorious conduct; 3d, ten years' service in any one grade.—*Act of July* 6, 1812, *sec.* 4.

38. It is obvious, from the nature of those accidents or contingencies, combined with the discretion of the Executive over the appointments, that we *might* now have had, or soon *may* have, but the "*one* major general" provided for in the act of 1821, (to take that grade for an example;) and that we *now* have more than "*one* major general" is to be attributed to the happening of the first contingency above provided for by the act of 1812. The contingency, however, having occurred, the commission *by brevet* is as much the creature of law as the ordinary commission.

V. But it is thought that the 61st article of war (quoted above, No. 25) imposes disabilities on brevets, in respect to *rank or command*, in situations other than in regiments or detachments from the same regiment.

39. The article expressly declares that brevets "may take place in courts-martial and on detachments* *when composed of different corps;*" and from the whole tenor of the article, it is most obvious that it only refers to the "regiment, troop, or company" to which the particular brevet officers may "belong."

40. It is then asked, how can a *regimental*, *troop*, or *company* officer be *on duty* out of his regiment, troop, or company, or be with mixed officers or men, except only as the article supposes; that is, "in courts-martial and on detachments?" The answer is, *nowhere.* The article, therefore, gives to all such officers, at all times *when on duty*, the benefit of their brevets, except "in courts-martial and on detachments composed of their own corps."—(See paper F, interrogatory 11, and the answer.)

41. It has just been remarked (No. 39) that "*regiment*" is the largest corps mentioned in the article, and it may be added that *colonel* is the highest *regimental* rank known in our army. The following rule then excludes me from the operation of the article:

42. "A statute which treats of *things* or *persons* of an *inferior* rank cannot by any general words be extended to those of a *superior.* So a statute treating of 'deans, prebendaries, parsons, vicars and *others having spiritual promotion*' is held not to extend to *bishops, though they have spiritual promotion, deans* being the highest persons named and *bishops* being of a still higher order."—1 *Black. Com.*, 87.

43. And that the above construction given to our *borrowed* article, even in respect to *regimental* officers, is correct, I offer the following exposition of the *original* article:

44. "Brevet rank or command, for they are mutative terms, is declared (by the *British* article of which *ours is a copy*) to be effectual for every military purpose in the army at large, but of no avail in the regiment to which the officers holding it belong, unless it shall in all or in part be mixed or united for a temporary purpose with some other corps.—*Samuel's Commentary on the British Articles of War, p.* 612, *and Hough on Courts Martial, p.* 365, is to the same effect. Both books are in the Library of Congress, chap. xix.

45 Samuel speaks of being "mixed or united for a *temporary* purpose." How is it possible for *regimental* officers of *different* regiments to be mixed or united, except *temporarily?* Their habitual station is *with* their respective regiments and *in* the body of those regiments.

46. "Mutative terms" (convertible terms) applied to "brevet rank or command," by Samuel. Take this passage of *Grose's Antiquities of the British Army, vol.* 1, *p.* 50, (note,) to the same effect.

47. "*Rank*, in the military acceptation, always implies *command*, a proof of which is shown in the regulations of rank between the officers of the navy and army, wherein it was thought necessary to *except* the right of either to command out of their proper element, *which would otherwise have followed of course.*† The brevets *of any rank* granted at that time to militia colonels of a certain standing show that the officers of the army occasionally might command those of the militia; these brevets being given to prevent a very old colonel of militia from being commanded by a very young colonel of the army, the multitude of new levies having then given that rank to many young soldiers."‡

48. I have elsewhere shown that I commanded, during the late war, three major generals of the militia, and that *Brevet* Brigadier General M. Porter, of the army, commanded at Norfolk, Virginia, a brigadier general of the militia, the 98th article of war (borrowed from the British) having declared that militia officers should "take rank next immediately after all officers of the *like grade* of the said regular forces, notwithstanding the *commissions* of such militia officers may be older than the *commissions* of the officers of the regular forces of the United States."

49. These cases (and many of a similar character might be cited) and this extract show: 1. That *brevets* are *commissions.* 2. That the *brevets* confer *grades* in common with *ordinary commissions.*

50. So in the act authorizing brevets or brevet rank, (see above, Nos. 30, 32,) allusion is not only made to the *right of command and of commanding*, but the right of pay and emoluments is regulated *when* in command by those of "*officers of the* SAME GRADES."

51. "GRADE, [*Fr.*] rank, degree."—*Todd's Johnson.* (This word has been but recently introduced into the writings of good scholars in England. It has long been in general use in the United States.)

52. I have shown, then, under this general head (V) that brevet rank *is rank;* that rank and command are convertible terms when unrestricted by law, and that my rank of major general cannot fall under the restriction of the 61st article of war, nor that of the 63d, not being an *engineer* officer.

VI. Is my rank restricted or excluded by the 62d article of war?

53. "If, upon marches, guards, or in quarters, different corps of the army shall happen to join or do duty together, the officer highest in rank of the line of the army, marine corps, or militia, by commission there, on duty or in quarters, shall command the whole and give orders for what is needful to the service, unless otherwise specially directed by the President of the United States, according to the nature of the case."

54. This article, with slight additions or alterations, is copied from article 2, section xv, of the

* Detachment is the *highest* comm[illegible]d.—(See paper marked F, interrogatories 9 and 10, and answers.)

† British *General Regulations and Orders for the Army, p.* 9, (Library of Congress,) and American *General Regulations for the Army, No.* 25, (or page 18.) Both regulations contain the *exception* to which *Grose* alludes.

‡ It is evident from this that a junior major general *by ordinary* commission cannot command a senior *by brevet.*

British code, and a comparison of the two will greatly aid in the construction of ours. The comparison now satisfies me that the word "corps," used in both, and their general tenor, refer to *regiments and regimental* officers, the marine corps being an "established corps," organized like a regiment.

55. But be this as it may, what restriction does our article impose on *brevet* rank? To show that the original imposed no such restriction I shall copy the *official* exposition of it.

56. "When *corps* join, either in camp, garrison, or quarters, the eldest officer, whether *by brevet* or otherwise, is to command the whole."—British *General Regulations and Orders for the Army, p. 4, edition of* 1811 (Library of Congress.)

57. "When *regiments* or detachments are united, either in camp, garrison, or quarters, the eldest officer, whether *by brevet* or otherwise, is to command the whole."—*Same book, edition of* 1822.

58. But rejecting for the moment the construction by comparison, do the words "*by commission*," in our article, exclude *brevets?*—(See above, the general heads II, III, and IV, and Nos. 48, 49.)

59. "*Officer highest in rank*"—that is, highest in *grade*, or if of the same grade, eldest in *date*. This, from the silence of all positive legislation, can only be determined by *the practice of armies*, or "the custom of war in like cases," (Articles of War, 69,) and, according to this rule no case can be produced, either from British or American *practice*, to show that brevet commissions or brevet rank have ever been excluded, except in the body of an unmixed regiment or detachment from the same regiment, *before* May 28, 1828, (my case.)—(See paper F, interrogatory and answer 4.)

60. "*Of the line of the army*"—that is, not of the staff. My rank of brigadier general being of the line of the army, the extra rank conferred upon it must partake of the same character.

61. The distinction of "line *or* staff of the army," occurs in our 74th article of war.

62. "Promotions shall be made through the *lines* of artillerists, light artillery, dragoons, riflemen, and infantry, respectively."—*Act June* 26, 1812, *section* 5.

63. "Promotions may be made through the whole army in its *several lines* of light artilley, light dragoons, artillery, infantry, and riflemen, respectively."—*Act March* 30, 1814, *section* 12.

64. Now, as in my rank, either as brigadier or major general, neither is in the staff nor in either of the "several lines" above enumerated, it follows it must be "of the line of the army," (of "the whole army,") or a general officer of our army has no rank in that army!

65. Brevet rank is not *regimental* rank, but rank of *the line.*

66. "Captains having *brevet* rank of field officers shall do duty as *field officers of the line*, and an overslaugh shall be allowed in the general roster of captains; but they shall perform all regimental duties according to their regimental rank, agreeably to the established rules of the service."—*British General Regulations, &c., page* 4. (Library of Congress.)

67. In short, army rank, brevet rank, and rank of the line of the army, are obviously and demonstrably one and the same thing under the 61st and 62d articles of war.

"*Administration of justice.*"

68. "Art. 5. The members of all courts-martial shall, when belonging to different corps, take the same *rank* in court which they hold *in the army.* But when courts shall be composed of officers of one corps, they shall take rank according to the commissions by which they are mustered in the said corps."—*Resolution of Congress, May* 31, 1786.

69. This article was borrowed by Congress *(verbatim et literatim)* from article 6, section xvi, of the British code, (originally,) June 30, 1775, and then numbered xxxiv. It was again adopted at the general revision September 20, 1776, and numbered, article 2, section xiv; the *third* time as above quoted; and finally it was left out of the present code, (act April 10, 1806,) because, no doubt, it was considered a *repetition* of the 61st of this code. The two, as they yet stand in the British code, are declared to be "repetitions" of each other, both by *Hough*, page 370, and *Samuel*, page 619.

70. The article last quoted being thus declared a "repetition of our present 61st, it is shown that *brevet rank* is *rank in the army*, or, as we have seen, (No. 66, above,) of the line." The conclusion is too evident to require or even *to admit* clearer proof or illustration.

71. "*Unless otherwise specially directed by the President of the United States, according to the nature of the case,*" (the concluding words of the 62d article of war, No. 53, above.)

72. [*Explanation.*] By the *special directions* of the President, (in the general regulations for the army, particular orders, &c.,) the officers at West Point, at Fortress Monroe, the topographical brigades engaged in surveys, &c., the ordnance officers at arsenals, and the inspector of ordnance, are all excepted or exempted from the authority of the generals commanding the two geographical departments within which the former are, or may find themselves, on duty.

73. So, by the special directions of the President, Major General Dearborn was *withdrawn* (not arrested) from the army on the Canada frontiers in 1813, to enable junior generals (in sucession) to command on those frontiers; not to place the senior under the orders of a junior. General Dearborn was placed in a separate command. Many similar cases might be cited in explanation of the concluding words of the 62d article, whereas one has not been produced, and one cannot be produced from any army prior to my case, to show that a senior officer, either by special directions, by assignment, or otherwise, has ever been subjected or *ordered* to obey a junior officer; except only within the body of an unmixed regiment as in the case of brevet rank.* And this is in fact no exception, for brevet rank is, in that situation, placed in *abeyance* by the express terms of the 61st article.

74. The 63d article of war is to the same effect. So fully were rank and command regarded as convertible terms, that in 1805, on the happening of a dispute between an engineer and an artillery officer, as to the command of the post of West Point, it was thought necessary to declare in this article that engineer officers "are not to *assume*, nor are they *subject to be ordered on* any duty beyond the line of their immediate profession, except *by the special order of the President.*"—(See above, Nos. 46, 47, 52.)

75. But does this article authorize the President to place those officers, by his "special order," under their respective juniors? On the contrary, the article treats their rank with the greatest tenderness and respect. It permits the President to transfer an engineer officer "from one corps to another, *regard being paid to rank.*"

76. It has been shown, then, that the 62d article does not exclude or affect my claim of rank, and does not authorize the President to place a junior over a senior officer.—(See again paper F, interrogatories 4 and 5, and answers thereto.)

* See paper F, interrogatories and answers 4 and 5.

VII. But it is said that my rank of major general is not valid, the President having neglected to submit it to the advice and consent of the Senate.

77. The advice, &c., of that body was never, in any act, *expressly* required *to promotions*, whether by brevet or otherwise, *before* the act of April 16, 1818, section 2, and this relates solely to brevets. The object of the section was to *restrain* what was considered at the time an injudicious multiplication of brevet promotions. This may be gathered from the discussions in Congress relative to that subject.

78. The clause in the Constitution relied upon against me applies to *appointments* which, in respect to the army, universally mean officers' *first* commissions, those by which they, respectively, *enter* the army, in contradistinction to their subsequent *advancement*, step by step, which is as universally termed *promotion*.

79. The act of 1812, without any *express* reference to the Senate, authorized brevet commissions, or brevet rank, to be conferred on "*officers of the army*" who should "distinguish themselves," &c. I was *an officer of the army;* a brigadier general, by and with the advice and consent of the Senate, when I received the brevet commission of major general. The latter was but *promotion*.

80. So General Washington, by an act expressly requiring the consent of the Senate, was, in 1798, *appointed*, with such consent, lieutenant general. The next year, under another act, which was silent as to the Senate, he was *promoted* to the higher rank of (full) general, and his name *not* sent to the Senate. Was the latter an "inferior officer" in the meaning of the Constitution?

81. By the act of May 28, 1798, section 2, the President was authorized to appoint "a suitable number of major generals," without any express reference to the Senate, although in the same section it is said "the *field* officers to be submitted to the advice, &c., of the Senate." In the act of July 16, 1798, section 3, the act of March 3, 1799, section 10, and in the act of April 14, 1818, section 4, four major generals and four brigadier generals were authorized, and no express declaration in either act requiring the consent, &c., of the Senate to either of those appointments.

82. It is ascertained that a portion of these general officers' appointments were, nevertheless, sent to the Senate. The silence, then, of the act of 1812, (from which I derive my rank,) in respect to the Senate, did not absolve the President from the constitutional obligation to submit my *promotion* to the Senate, if that course had been deemed necessary in respect to *promotions*.

83. The official acts of the President, as well as acts of Congress, must, I apprehend, be held to be valid until judicially annulled. Neither can profit by its own wrong. Suppose that, instead of the rank of major general granted to me in strict conformity with the act of 1812, an acre of land had been given for the same services. Could the government *now*, in good faith, under the plea of unconstitutionality, resume the grant?

84. The objection which I am discussing, if it prevail, will produce this most strange result: The brevets *promised* and *granted* for services and blood paid down in the field of battle will be annulled, and those for ten years' services declared to be valid, because the latter were, by express requisition, submitted to the Senate, and the former not.

85. But my brevet *has* received the sanction of that body—by the complimentary resolution, November 3, 1814; the Army Registers, annually submitted; and by the act of March 2, 1821—all of which have passed the Senate, and in every one of which my rank and name will be found inserted and connected.

VIII. It is said that brevets are not "commissions *of appointment*." The qualification, as applied to any but *first* commissions, is wholly new to me.—(See above, No. 78.) I find, however, in act of March 3, 1813, section 9, the President was authorized to make many "*new* appointments" by brevet, and I apprehend that all the topographical engineers and supernumerary second lieutenants, though they hold rank solely by brevet, have "commissions *of appointment*."—(See above, Nos. 7 and 8.)

IX. It is also said that "in the British army *the brevet* is a form of *promotion* to office," whence it might be inferred it is not so with us.—(See Nos. 9, 51, above, the annual nominations made to the Senate, and the journals of the old Congress, in many places, particularly for September 30, 1783.) Under the latter head there will be found *a general brevet*, besides the names of three officers (in *two* resolutions) "*promoted to the rank of —— by brevet.*"

86. The foregoing refers to the letter of the Secretary of War to me, dated November 15, 1828. I will now hastily reply to some of the points in his letter to the chairman of the Military Committee of the House of Representatives, dated January 14, 1829.

87. I have not presumed to ask of Congress "the exercise of *judicial* powers" on my memorial. I had previously requested, over and over again, of the War Department, that the *professional* subject might be sent to a court of *professional* men, to be judicially settled, on charges preferred against me. My conception of a *declaratory statute* differs from that of the Secretary.—(See 1 *Blac. Com.*, 85.)

88. My memorial is but a string of propositions. The proofs and illustrations were withheld and designed for the committee, and would have been sooner offered, but that I understood a communication was expected from the War Department, which I hoped to see and to reply to. This hasty paper is offered in support of the memorial. The two letters herein referred to, from the department, exhibit the views of the Executive. Those views, I respectfully submit, are against the true construction of the statutes, the prior decision of the Executive, the practice and usages of the army.

89. It is said I have "for *some* years past" made the claim of rank in question. I have uniformly made that claim, and exercised all the rights appertaining to my rank since its date down to May, 1828.

90. The Secretary says that that claim is so destitute of foundation in our own laws that I have been forced to resort to the practice of foreign armies. I have only to appeal to the foregoing, and my correspondence with the department, to support the negative.

91. It is true I have shown that not only our institutions and positive legislation have been borrowed from the parent country, but also the practice and usage of our army. A like resort to the institutions, statutes, and elementary writers of that country, happens daily at every session of every federal and State court throughout the United States. And this mode of deducing conclusions is expressly sanctioned by our 69th article of war, which lets in as a subordinate code "the custom of war in like cases." As a further justification, I offer an authority precisely in point.

92. "The *practice* in other armies, in all cases not expressly provided for, is the best standard by which we can form our notions, and it would have obviated many difficulties if it had been better known or more attended to."—(General Washington, speaking of brevet rank—*Rogers's Biographical Dictionary*, page 323.)

93. I have only quoted *British* authorities, and in every instance, I think, to support or to explain an institution, a law, or a practice directly derived from that country.

94. The Secretary denies that rank and command are, in any respect whatever, convertible terms.—(See above, Nos. 44, 46, 47, 52, 74, &c.) He asserts that no officer can assume a command without *assignment* by a superior. This is true of an officer's entrance into the service and of his subsequent changes from one branch of duty to another; but in all other cases, I apprehend, he may assume command according to his rank, if not *prohibited* by law, as in the cases provided for in the 61st and 63d articles of war, or unless prohibited by special directions of a superior, as in Nos. 72, 73, above; or, finally, unless prohibited by order, as in my present case, in respect to General Macomb. From these illustrations I think it will appear that there must be *special prohibition*, or *rank* would give *command* of right and of course. This, however, is almost a mere dispute about words; for the Secretary admits in the same passage that "*commissioned officers* (see above, Nos. 15, 16) are *entitled* to claim commands appropriate to the *grades* (see above, No. 51) given them by their commission," with an exception as to staff officers.—(See above, No. 60.)

95. I am glad to find by these passages that the doctrine of *assignment*, as peculiarly necessary to give activity to brevets, (as was asserted, I think, in his letter of November 15, 1828, communicated to the committee,) is abandoned.—(See paper F, interrogatory and answer 8.)

96. I have *not* asserted without qualification that brevet rank uniformly gives command with ordinary rank, as the Secretary supposes. This qualification I have invariably added to my proposition, *except within the body of an unmixed regiment, or in a detachment from the same regiment.* And no case to contradict me, either from the revolutionary war, or since, in our own army, or from the British army, has been cited; whereas I have elsewhere produced numerous cases from every period of our history to support my declaration.

97. The Secretary quotes (pages 15, 16) two resolutions, the proper date of which is the 30th, *not* 20th of April, 1778. The first is merely *declaratory* of the article of war (see above, Nos. 25, 28) previously adopted, September 20, 1776. The latter, in date, like its original, obviously alludes only to *regimental* officers, and restricts their rank only within "the regiment, troop, or company to which they belong." All that I have said above of our present 61st article is therefore equally applicable to this *declaratory* resolution, except as to *pay and emoluments;* and as to *these*, see above, Nos. 30, 33.

98. In respect to the two resolutions, one making E. Stevens lieutenant colonel by brevet, and the other lieutenant colonel of artillery, the latter so far benefited him as to give him the rank *within the artillery* which he had before *in the army*, and, at the same time, *the pay and emoluments* of his rank. There is nothing in either resolution that militates, in the slightest degree, with the propositions I have maintained.—(See above, No. 5, generally, or No. 36.)

99. As to the *manner* of General Harmar's signing his name in 1789 (mentioned p. 17) I have to remark that he added *both* his grades; that he was at the moment probably only in command of his *regiment;* and that the same General Harmar is styled by the government and other superiors, subsequent to that period, *brigadier general*, without the prefix *brevet.*—(See the report of his court of inquiry, Library of Congress, ch 24, No. 440, page 218. [The book is marked *Treasury* on its back.] See also the reports of the Secretary of War, in the Journals of the Senate, about the years 1790–'92.) I *know* that he is styled in the latter *brigadier general*, although he was such by brevet.

100. *Regimental* officers who hold *higher* rank by brevet almost universally add to their signatures *major* or *colonel in the army*, according to their brevets. The Adjutant General's office will furnish innumerable instances of this.

101. I stated in my memorial that I had commanded, by virtue of my brevet, two major generals of the army who would *otherwise* have been entitled to command me. The Secretary, p. 18, presumes me to mean Major Generals Gaines and Macomb, and he is right in his conjecture. He adds that his office furnishes no evidence of the fact other than my assertion, and that those officers (each for himself) deny the fact.

102. Here is another instance of my being prejudged on testimony with which I have not been confronted before a court, and the facts involved are as material to my rights as to my honor.

103. I commanded General Macomb, on the board for the reduction of the army, in the spring of 1815, for some days before the arrival of General Brown: present, Generals Macomb and Ripley. I *ordered* the board to meet from day to day, and adjourned it in like manner, as the senior and presiding officer. The business of the board and its arrangements were propounded and regulated by me. General Macomb was then and there under my orders, and the certificates to those facts of Major Belton and Mr. Lambert, the two recorders, are on file in the War Department.—(See my letter to the Secretary of War, (printed) February 18, 1827, page 86, where the same statement is given.)

104. In respect to General Gaines, I presided at his trial as the senior officer in 1816. Before the organization of the court, I gave him, as senior, and therefore commanding officer, the instructions contained in the paper which will accompany this, marked A.

105. After the court had adjourned, I gave him, in the same capacity, the permission (to enable him to go from New York to Philadelphia) contained in an another accompanying paper, marked B.

106. It is proper to remark that neither act was done as the *president* of the court, but as the senior and commanding officer, and as commander of a geographical district or department. General Gaines obeyed, or availed himself of both permissions or indulgencies. The president of a court, out of court, cannot give an order to a senior.

107. The second of the two papers is copied from my office books of that period, which have been for many years in the Adjutant General's office at this place, and therefore under the control and within the reach of the Secretary of War.

108. To my declaration in the memorial, that the law, the construction of law, and the *settled* practice of the army down to 1828, were in favor of my claim to command General Macomb, or at least to an *exemption* from his command, (see above, Nos. 72, 75,) the Secretary opposes the controversy between General Gaines and myself on the question of relative rank. I alluded in the memorial to the *precedents* which had *actually* occurred, and still maintain, without having been contradicted, and without danger of contradiction, that not a case can be cited against me, unless it be the reported submission of General Gaines himself to the orders of his junior, General Macomb. The controversy into which I had been led with the former, so far as it respected *rank*, was wholly *prospective*, as I had never been for a moment placed under *his* command, whereas, as had just been shown, he had been under *mine*. If, then, as is believed, General Gaines has, since May 28, 1828, submitted to the orders of General Macomb, the case not only does not fall within the period given in the memorial, but ought not to be urged in argument against me; for if brevet rank be valid, the three officers stand—Scott, Gaines, Macomb; if not valid—

Macomb, Gaines, Scott. In this view, General Gaines is not interested in the question of *relative* rank or command. But, perhaps, a motive may be found in that controversy to which the Secretary alludes, (into which I have been most reluctantly drawn, and in which I have but acted on the defensive,) why General Gaines has thrown the weight of his submission to a junior into the argument against me.

109. I regret that it should be supposed, in the letter of the 14th instant, that I had presumed to charge the President "with gross and palpable abuse of authority." I certainly had supposed that he had *misconceived* the law to my prejudice, and I am of the same opinion yet; but I have been far from supposing that the error, if one, was intentional. I have believed, and still believe, the President incapable of wilful injustice. This declaration I have repeated, I think, in all my letters on this subject, and am, therefore, as much surprised as distressed to find myself so much misunderstood.

110. It might be supposed, from a passage in page 21, that, in my correspondence in the controversy with General Gaines, I had merely asserted a claim to precedence over *him*. The principles therein asserted by me in respect to rank were *general*, and not altogether *personal*.

111. In the same page it is said that, from our entrance into the army, General Macomb had been my senior. The declaration, if designed to cover the *whole* period down to his recent appointment, involves an error. According to my views he ceased to be my senior in rank from July 25, 1814, the date of my brevet; and even according to the President's views, from June, 1821. At the latter date General Macomb was cut down to the colonelcy of engineers (by *ordinary* commission) with the *brevet* rank of brigadier general, and (if he did not lose it by that arrangement) with the *brevet* rank of major general from September 11, 1814. He was then but *colonel* by ordinary commission, whereas I was a *brigadier general* by the same sort of commission; and again I was the higher in brevet rank. He was, therefore, according to the views of the President, *promoted over me* in 1828; but according to mine, he is still the junior, and therefore inferior major general. It may be asked, how came the rank of the parties to be reversed in 1814? I refer to the history of the war and the act of 1812, which held out the *promise* of the rank that was won. Is this rank, which has been submitted to, now to be put down in favor of him who has been longest in service? If so, General Macomb has himself (by ordinary commission) passed many who had been his seniors, and therefore wrongfully passed them.

112. I am charged, page 21, of having long been in "*pursuit of promotion.*" The War Department can exhibit many letters from me in defence of my *rank*—not one soliciting *promotion*. When the late appointment was determined upon I was on the western boundary of the Arkansas Territory, and therefore wholly out of the field of *solicitation*. To me the place would not have been *promotion*, though, in respect to *pay and emoluments*, it might have been advantageous.—(See above, No. 32.)

113. It is said, page 21, that I have looked "to the practice of the British army for a principle which [I] should have sought in the Constitution and laws of [my] own country." I have looked to *both*, and have shown that the former most aptly explain the latter. It is added, that, "in overlooking the institutions peculiar to the British army, with which the practice is inseparably connected, but with which we have nothing analogous in our service, [my] application of the practice [has been] to the exclusion of the principle of the British army itself," never to allow a brevet officer "permanently to displace or interrupt the promotion of any other officer."

114. The whole of this passage is founded in misconception, and is therefore as fallacious as it is plausible.

115. There is not a *principle* known to the British army, save the purchase of *regimental* commissions, which we have not copied and adopted. Our organization, grades and titles, rank in general, brevet rank, regimental rank, rules for the government of rank, connexion with the marine corps and militia, the whole of our articles of war, with the exception of the 63d, (see above, Nos. 74, 17,) all were borrowed from the parent country in the year of our independence.

116. The general declaration of the Secretary is, so far as I remember, supported by two specifications: *First*, that "in the British army the brevet is a form of *promotion* to office." This has already been noticed, head IX, above. *Secondly*, that in that army, a brevet officer is never allowed "permanently to displace or interrupt the promotion of any other officer." The first and sufficient reply to this is, that the *reverse of the proposition is equally true.* But this may require a short explanation.

117. In the artillery, engineers, and marine corps, officers succeed to ordinary commissions by seniority (as with us) up to the rank of lieutenant colonel. In all the other regiments ordinary commissions are purchased to the same grade. At the same time, brevets are conferred, throughout the whole army, for special merit and length of service, as with us; and there are no ordinary commissions higher than a lieutenant colonelcy. He, therefore, who first reaches this rank, whether by purchase or brevet, and in the latter case, whether by length of service or special merit, permanently displaces all who *before* were above or below him in all future promotion—unless he himself should be displaced or interrupted by a brevet for special merit.

118. There is one, and only one, material difference between the brevet systems of the two countries, which, of course, is not alluded to in the arguments against me. It is this: in England, brevets are granted by the will of the King, without any express provision enacted by Parliament; with us, under a kind of *proclamation*, (the act of 1812,) made by the representatives of the people to stimulate their military servants to deeds of valor in war—or in peace to cultivate the science and virtues of good soldiers, with a view to defensive war.

119. What the law has thus granted, I trust nothing but the law may be allowed to take away.

I have the honor to remain, with high respect, sir, your most obedient servant,

WINFIELD SCOTT, *Major General United States Army.*

Hon. WILLIAM DRAYTON, *&c., &c.*

Copy of a letter from General Scott to General Gaines, referred to (No. 104) in General Scott's letter to the Military Committee of the House of Representatives, January 17, 1829.

HEADQUARTERS, THIRD MILITARY DEPARTMENT, *New York, August 30, 1816.*

SIR: I have the honor to acknowledge the receipt of your letter of this date.

If you have not been formally deprived of your sword, on the charges on which you are to be tried by a general court-martial, of which I am named as the president, *nor expressly ordered* by the proper authority *to consider yourself in a state of arrest*, you will please consider yourself not in arrest until the said court shall be duly organized, when your sword can be delivered to the court.

I have the honor to be, sir, very respectfully, your obedient servant.

Brevet Major General E. P. GAINES, *United States Army.*

LOWER RED HOOK, *New York, November 17, 1827.*

I certify that the above letter is a true copy of one recorded by me in the private letter book of Major General Scott, which exhibits a correct transcript of the original letter written by General Scott and sent to General Gaines.

LOWNDES BROWN.

N. B.—Copies of letters written by the general were left purposely without signature, to be filled up by the general; those written by myself, when copied, I signed.

L. B.

NOTE.—Lieutenant Lowndes Brown was, at the date of this letter, my sole aide-de-camp.—(See the Army Register for that period.)

WINFIELD SCOTT.

B.

Order from General Scott to General Gaines, referred to (No. 105) in General Scott's letter to the Military Committee of the House of Representatives, January 17, 1829.

DEPARTMENT ORDERS.

HEADQUARTERS, *November 1, 1816.*

Major General Gaines will please consider himself at liberty to await the orders of the War Office on the proceedings of the general court-martial of which Major General Scott is president, in any part of the United States General Gaines may think proper.

By order of Major General Scott:

CHARLES J. NOURSE, *Assistant Adjutant General United States Army.*

True copy:

R. JONES, *Adjutant General.*

C.

Letter from General Harrison to General Scott, relative to two cases of brevet rank, (appended to General Scott's letter to the Military Committee of the House of Representatives, January 17, 1829.)

WASHINGTON, *May 29, 1828.*

DEAR GENERAL: In answer to your inquiries, I state that you are correct as to the kind of commission under which I acted in the commencement of the late war. I was governor of the Indiana Territory, and being in Kentucky when the news of Hull's surrender arrived, I was sent for by the then governor, (Scott,) and requested to take command of a detachment of troops which had marched a few days before, destined to reinforce Hull. The governor formed a council consisting of all the public characters who were within his reach. Among them were the governor elect, (Shelby,) and General Hopkins, a revolutionary officer. It was, I understood, the unanimous recommendation of this council that he should give me the commission of major general by brevet in the militia of Kentucky. This was done, and I received his orders to follow the detachment of troops above mentioned, which was then commanded by Brigadier General Payne, and consisted of three Kentucky regiments and a body of United States regulars under Colonel Wells. These troops were led by me to the frontiers, and formed part of the northwestern army. I received, shortly after, an appointment of brigadier in the army of the United States, which I declined. In the beginning of September I was informed by the Secretary of War that I was appointed to the command of the northwestern army. I received at that time no other commission, but continued to act under the brevet commission until some time in January, 1813, when I was appointed major general in the army of the United States. Whilst I was acting under the brevet appointment, I commanded Brigadier General Winchester, of the United States army, and five militia brigadiers, and never heard the least objection made to the efficacy of the brevet commission.

I did not join the army until after the action of the 4th November, 1791, but I joined very shortly after, and I have always understood and believed that General Butler had received the appointment of major general by brevet to give him the command of Harmar, who was a brigadier by brevet. By

looking at the law of 1791, (March, I think,) you will see that the President was authorized to appoint a major general and brigadier general. St. Clair was appointed to the first, as the records of the Senate show; but Butler was appointed to both commissions in the recess. There were numerous publications in the Philadelphia papers in the winter of 1791–'92, in which it will be seen that Butler was a major general.

Captain Jacob Slough, (an uncle of Commissary General Gibson,) of Lancaster, Pennsylvania, can give you all the information on the subject.

Yours truly,

W. H. HARRISON.

Major General Scott.

D.

Captain Slough to General Scott, relative to the brevet of Butler and Harmar, (appended to General Scott's letter to the Military Committee of the House of Representatives, January 17, 1829.)

Sir: I had the honor to receive your letter of the 4th day before yesterday, and after one day's reflection on the occurrences of more than thirty years' standing, have sat down to answer you, which I do with very great pleasure.

The first point to which you wish my answer is, "Do you recollect about what time the brevet making Butler major general was sent? Do you recollect the motive or reasons which induced General Washington to grant the brevet to Butler?" My answer is, that I have no knowledge of my own on the subject, but from conversations which took place among the field officers, at which I was present, they agreed in the opinion that General Butler was promoted that the command of the army might devolve on him in case of the death of St. Clair or his absence from the army. Those field officers were Colonels Hamtrampk, Gibson, and Darke, Majors Furgeson and Hart. I know nothing of the motives which induced General Washington to send the brevet to Butler, or the time when it was sent. Captain John Morgan, who was his aide-de-camp, may perhaps know what became of the papers; he resides at Morganza, in Washington county, Pennsylvania; or they may, perhaps, be found among Captain Edward Buller's papers, in Tennessee, or Isaac Wayne, esq., of Chester county, (son of General Wayne,) may have them. If, on reflection, anything further occurs to me, I will immediately communicate it.

With great respect, I am, sir, your obedient, humble servant,

JACOB SLOUGH.

E.

General Order, May 17, 1815, arranging the relative rank of Generals Scott, Ripley, Gaines, and Macomb, (appended to General Scott's letter to the Military Committee of the House of Representatives, January 17, 1829.)

GENERAL ORDERS.

Adjutant and Inspector General's Office, *May* 17, 1815.

Major General Brown will assume the command of the division of the north.

Major General Jackson will assume the command of the division of the south.

Major General Ripley and Major General Macomb will, for the present, act as brigadier generals in the division of the north.

Major General Scott and Major General Gaines will, for the present, act as brigadier generals in the division of the south.

The field officers retained in service will report themselves without delay to the major generals of the division to which their regiments are assigned, and the company officers will report themselves without delay to the commanding officers of their regiments. The officers of the corps of artillery, now on duty in the division of the north, will report to the commanding generals of that division, and the officers of the corps of artillery, now on duty in the division of the south, will report to the commanding generals of that division.

All officers retained in service for the military peace establishment will immediately transmit duplicate reports to this office. The generals will cause the regiments and corps within their divisions to be formed and distributed according to the system for the organization and disposition of the troops constituting the military peace establishment of the United States which has been this day announced in general orders.

The rules and regulations which are approved by the President of the United States, on the 28th of June, 1814, and all other rules and regulations which have heretofore been made by the Department of War, so far as they are applicable to the military peace establishment, are to be obeyed and enforced.

By order of the Secretary of War:

D. PARKER, *Adjutant and Inspector General.*

The foregoing order was originally written by the hand of Mr. Dallas, Acting Secretary of War, and is understood to have been discussed with the President and his Cabinet, so far as it respects the rank of the generals. The *original* I saw in the War Office four years ago. This order was *republished* by direction of the President, February 29, 1828.

In 1815 General Macomb was senior in ordinary rank to General Ripley, as General Gaines was senior to me by ordinary rank. The four generals were nevertheless, arranged according to brevet rank.

WINFIELD SCOTT.

F.

Adjutant General's answers to General Scott's interrogatories, referred to in General Scott's letter to the chairman of the Military Committee, (House of Representatives,) dated January 17, 1829.

ADJUTANT GENERAL'S OFFICE, *Washington, January* 10, 1829.

SIR: Your communication of the 5th instant, requesting answers to certain interrogatories therein enumerated, and the enclosed letter from the Secretary of War, referring to the subject, dated the 7th, were received on the 9th. I hasten, accordingly, to comply with your request.

1st interrogatory. "How many years have you been in the military service of the United States?"

2d interrogatory. "What portion of that time have you served in the staff; with what armies, and under what commanders?"

3d interrogatory. "Is your present rank in the staff by brevet, or otherwise?"

Answer to the 1st, 2d, and 3d interrogatories.

It will be twenty years in February since I first entered the military service of the United States. The 3d of July, 1812, I was transferred from the marine corps to the army, with the commission of captain of artillery; May, 1813, appointed major of brigade (Chandler's) in the army operating at, near, and above Fort George, Upper Canada, under the command of Major Generals *Dearborn, Wilkinson*, &c. After the battle of Stony creek, was assigned to duty in the staff as assistant inspector general; continued to act till a short time before the concentration of the forces on Grenadier island, when, according to my request, I returned to the head of my company. During the campaign on the St. Lawrence, and sojourn of the army at French Mills, under General Wilkinson, in the winter of 1813 and 1814, and at Sackett's Harbor, under *General Brown*, in the spring of 1814, I served with my regiment, except occasionally, when ordered to muster and inspect the troops; May, 1814, received the appointment of major in the staff, (assistant adjutant general;) joined the left division or army of Niagara, under Major *General Brown*, with which army I continued to serve in Canada throughout the campaign, and nearly at its close under Major *General Izard*, who relieved Major General Brown. I should not omit to mention that between the 25th of July and 5th of September, 1814, the left division was commanded at different periods by Brigadier Generals *Ripley, Gaines*, and *Miller*. Moved with the left division, under Brigadier General *Winder*, into winter quarters at Sackett's Harbor; remained in the general staff till the peace with Great Britain; served as aide-de-camp to Major General Brown till the close of 1815, then returned to duty and command in the line; 1818 appointed Adjutant General, with the *brevet* rank of colonel; at the reduction of 1821 reverted to the line; in 1825 again appointed in the staff, the Adjutant General, with *rank* of colonel.

4th interrogatory. "Except in the body of a regiment, in a detachment from the same regiment, or by consent of the senior, have you ever known, prior to May, 1828, a *senior* brevet officer to be under the command of a *junior* officer, whether the junior held his rank by brevet or otherwise?"

Answer to the 4th interrogatory.

I have never known a senior brevet officer, prior to May, 1828, to be under the command of a junior officer, whether the junior held his rank by brevet or otherwise, except in the body of a regiment. There was a period of Major Worth's service at the Military Academy when his brevet was senior to that of the commandant, Major Thayer, but I do not know what was the principle of *compromise** in the case.

5th interrogatory. "Under the same exceptions, and prior to 1828, have you ever known any senior officer to be placed under the command of any junior officer, whether the parties both held rank by brevet or both otherwise, or one held rank by brevet and the other otherwise?"

Answer to the 5th interrogatory.

I have never known any senior officer to be placed under the command of any junior officer, whether the parties both held rank by brevet or both otherwise, or one held rank by brevet and the other otherwise, prior to May, 1828, except in a regiment in which the parties held their commissions, and then in reference to their brevets only. It may be proper to mention that at Jefferson Barracks, in 1827, the question of rank arose between two captains and *brevet* majors† of different regiments on duty there. The controversial point was submitted for the consideration and decision of the Secretary of War, and thence referred to the general-in-chief, (the late General Brown,) who, in reference to the occasion, decided in favor of the senior brevet, and against the supremacy of the lineal rank of the senior captain. During a short interval previous to the decision herein referred to, it is possible the senior brevet may have been placed under the junior *brevet* officer.

6th interrogatory. "Do you know that brevet officers have, by the seniority of their brevet rank, commanded officers *not* by brevet, who respectively were otherwise entitled to the command?"

7th interrogatory. "If the 6th interrogatory be answered in the affirmative, are the cases known few or many?"

Answer to the 6th and 7th interrogatories.

On courts-martial it has frequently happened that brevet officers, by seniority of their brevet rank, take precedence of officers who had not been brevetted, and who but for the supremacy of such brevets would have been their seniors on such service. With respect to *military commands proper*, there have been but very few occasions, I apprehend, within the scope of the question which would serve to illustrate the efficacy of brevet rank. The only one I remember to have heard of occurred at Pensacola in 1821 and 1822, which was, I believe, decided by the then Secretary of War in favor of the senior brevet, but junior officer in the line.‡

* It was by *arrangement* between the parties themselves.—*Note by Winfield Scott.*

† Ketchum and ———.—*W. Scott.*

‡ This was the case of Colonels Fenwick and Clinch. The papers are in the War Office.—*W. Scott.*

8th interrogatory. "Are the words *assign, assignment,* as occasionally or habitually applied to the act of placing officers on duty, or changing them from one duty to another, peculiar to brevet officers, or other officers, or common to all officers?"

Answer to the 8th interrogatory.

The words *assign, assignment,* as occasionally used in orders placing officers on duty, or changing them from one duty to another, is not peculiar to brevet officers, as far as my knowledge or experience may serve; they are common in their application to any officer.

9th interrogatory. "Which is the superior command, a detachment consisting of mixed officers or troops, *or* a like number of officers or troops of an embodied regiment, whether in camp, quarters, column, or line?"

10th interrogatory. "Which is the superior command, a division detached from an army of several divisions, a brigade detached from a line of several brigades, a regiment detached from a line of several regiments, *or* the command of a corresponding body *not* detached?"

Answer to the 9th and 10th interrogatories.

The command of a *detachment* consisting of mixed officers and troops is certainly superior to a command of the like number of officers and troops not detached from a regiment, whether in camp, quarters, column, or line. In like manner the command of a division, or a brigade, or a regiment, *detached* from an army, division, or brigade, must be considered a superior command to any corresponding body *not* so detached.

11th interrogatory. "Can a regimental officer *have* a command, or be *in* a command, with officers or troops of another regiment without being on detached service, or on *detachment?*"

Answer to the 11th interrogatory.

If a regimental officer have a command, or be in a command which is composed of officers and troops of another regiment, he would be deemed to be on *detachment;* so would be any number of companies, I imagine, absent from the colors, relatively considered. When an officer is on *detached service,* however, he is understood to be on some duty unconnected with his regiment, as, for example, ordnance duty, topographical duty, or duty in the Adjutant General's office, &c.

12th interrogatory. Have you known any officer, many or few officers, who held rank in the army only by brevet, detailed as members of general or regimental courts-martial, or as members of both?"

Answer to the 12th interrogatory.

I have on several occasions known officers to be detailed and to sit as members of general courts-martial who held rank in the army only by brevet. I do not remember the occasion of such officers serving on regimental courts-martial.

I have thus briefly responded to your several interrogatories as promptly as was practicable, or consistent with other duties; and, indeed, that an answer might not longer be delayed, I have employed at home the hours which during the day were unavoidably denied me at the office.

I remain, general, with the highest respect and regard, your obedient servant,

R. JONES, *Adjutant General United States Army.*

Major General SCOTT, *United States Army, Washington.*

THE PRESIDENT OF THE UNITED STATES OF AMERICA,

To all who shall see these presents, greeting:

Know ye that, reposing special trust and confidence in the patriotism, valor, fidelity, and abilities of Winfield Scott, I have nominated, and by and with the advice and consent of the Senate do appoint, him a brigadier general in the service of the United States, to rank as such from the ninth day of March, eighteen hundred and fourteen. He is, therefore, carefully and diligently to discharge the duty of brigadier general by doing and performing all manner of things thereunto belonging. And I do strictly charge and require all officers and soldiers under his command to be obedient to his orders as brigadier general. And he is to observe and follow such orders and directions from time to time as he shall receive from me, or the future President of the United States of America, or the general or other superior officers set over him, according to the rules and discipline of war. This commission to continue in force during the pleasure of the President of the United States for the time being.

Given under my hand, at Washington, this nineteenth day of December, in the year of our Lord one [L. S.] thousand eight hundred and fourteen, and in the thirty-ninth year of the independence of the United States.

JAMES MADISON.

By command of the President of the United States of America:

JAMES MONROE.

THE PRESIDENT OF THE UNITED STATES OF AMERICA,

To all who shall see these presents, greeting:

Know ye that I do hereby confer on Brigadier General Winfield Scott, of the army of the United States, the rank of major general by brevet in said army, to rank as such from the twenty-fifth day of July, in the year of our Lord one thousand eight hundred and fourteen, for his distinguished services in

the successive conflicts of Chippewa and Niagara, and for his uniform gallantry and good conduct as an officer in said army. And I do strictly charge and require all officers and soldiers under his command to obey and respect him accordingly. And he is to observe and follow such orders and directions from time to time as he shall receive from me, or the future President of the United States of America, and other officers set over him, according to law and the rules and discipline of war. This commission to continue in force during the pleasure of the President of the United States for the time being.

Given under my hand, at the city of Washington, this fourth day of September, in the year of our Lord [L. S.] one thousand eight hundred and fourteen, and in the thirty-ninth year of the independence of the United States.

JAMES MADISON.

By the President:
JAMES MONROE, *Acting Secretary of War.*

20TH CONGRESS.] No. 397. [2D SESSION.

APPLICATION FOR AN INCREASE OF PAY OF THE SURGEONS AND ASSISTANT SURGEONS OF THE ARMY.

COMMUNICATED TO THE SENATE JANUARY 29, 1829.

To the Senate and House of Representatives of the United States:

The undersigned, officers of the United States army, respectfully petition that the act of Congress regulating the pay of the medical department of the army be so amended as to grant to the surgeons and assistant surgeons of the army additional compensation for their services. And your petitioners, as in duty bound, will ever pray.

JAMES HOUSE, *Colonel 1st Artillery.*
J. B. WALBACH, *Brevet Lieutenant Colonel 1st Artillery.*
A. S. BROOKS, *Major 1st Artillery.*
F. WHITING, *Captain 1st Artillery.*
H. SAUNDERS, *Captain 1st Artillery.*
R. M. KIRBY, *Captain 1st Artillery.*
GEO. W. CORPREW, *Lieutenant 3d regiment Artillery.*
H. W. FITZHUGH, *1st Lieutenant U. S. A.*
TIMOTHY GREEN, *1st Lieutenant U. S. A.*
H. W. GRISWOLD, *1st Lieutenant Artillery.*
CHARLES DIMMOCK, *1st Lieutenant 1st Artillery.*
D. D. TOMPKINS, *Lieutenant 1st Artillery.*
WILLIAM H. BELL, *Lieutenant 4th Artillery.*
JAMES A. J. BRADFORD, *Lieutenant 3d Artillery.*
J. DIMICK, *1st Lieutenant 1st regiment Artillery.*
JOHN L'ENGLE, *1st Lieutenant 3d Artillery.*
EDWARD B. WHITE, *2d Lieutenant 3d Artillery.*
WALTER SMITH, *1st Lieutenant 1st Artillery.*

SURGEON GENERAL'S OFFICE, *December* 18, 1828.

SIR: In compliance with your request to report my views upon a resolution of the Senate of the 11th instant, I beg leave respectfully to refer to the enclosed extract from a report which will be found among the documents from the War Department submitted to Congress with the President's message at the commencement of the session.

In relation to the propriety of graduating the pay of the surgeons and assistants in proportion to the length of time they may have been in service, I beg leave to state, that of the fifty-three surgeons and assistant surgeons forty-five are of the latter class, and of course can receive only the lowest grade of pay at any period and under any circumstances. The eight surgeons receive but $5 per month and one ration per day more than the assistants, which therefore constitutes the only difference between the oldest surgeon and the youngest assistant; while the oldest assistant, who has been nearly twenty-three years in service, and is among the oldest officers in the army, receives the same pay that he did on his first appointment in 1806. In the year 1816 an additional ration was allowed to every subaltern officer in the army except the surgeons; and by a subsequent law a second ration was given to all lieutenants, $10 per month and an additional ration per day to all captains on duty with their companies. A similar increase has been made to the pay of the lieutenants, surgeons, and surgeons' mates in the navy, so that the surgeons of the army are the only subordinate officers in either service whose compensation has not been increased.

Exclusive of the allowance for forage, the youngest second lieutenant from West Point now receives but $3 per month less than the oldest assistant surgeon; and the youngest captain receives $11 per month more than the oldest surgeon who has been in commission nearly fourteen years.

But four of the surgeons have been appointed within the last ten years; while in the same period fifteen captains have been promoted to majorities, and nineteen colonels and lieutenant colonels appointed

in the respective grades; most, if not all, of whom have received the benefits of brevet commissions previous to their regular promotion; while the senior surgeon and assistant surgeon received precisely the same pay as they did at their appointment—the one fourteen and the other nearly twenty-three years ago.

The compensation asked for by the surgeons, after a given period, say twenty-five years of service, is that of the subordinate officers of other departments; of a quartermaster, for example. If they were allowed an addition of $10 per month and one ration per day for every five years of service, with the same to the surgeon on his promotion, and limiting the increase to each to $20 per month and two rations per day, the highest rate to which the assistant surgeons, constituting at present nearly six-sevenths of the whole, could arrive, would be $28 per month *less* than the quartermaster on his first appointment.

The surgeon who shall have served five years in that grade, and upon an average twenty-five years in the whole, would receive $4 50 per month *more* than the quartermaster, and those who shall remain in service thirty years, on an average, would receive about $20 per month more.

Should a law to this effect be passed this session, but eleven of the assistant surgeons would arrive at the highest rate before the year 1830; seventeen would be at the second, and seventeen at the lowest, which would render the increase to them equivalent to $8 per month and one ration per day to the whole, and would be $2 less per month than has been allowed to *all* captains. Should the number of surgeons be increased to twelve, there could be only ten assistants at the highest rate before June, 1831, and only six surgeons before August, 1836, should they all remain in service.

The increase to the surgeon would of course be greater; but the number is few, and the length of service required more than double in ordinary cases; for if the eleven senior assistants should be promoted to surgeons in the same ratio with the last ten years, the youngest will have been twenty-five years in service on his appointment, and thirty-five on his arrival at the highest rate of pay. On an average it would probably require twenty-five years of service to reach the compensation of a quartermaster, and thirty years to reach the highest rate allowed, while the assistants, at their highest rate, receive, as above stated, $28 per month *less* than a quartermaster; so that while the proposed plan of gradual increase would be far more acceptable to the officers and beneficial to the service, it would, in point of fact, amount to no more than a moderate increase to the whole.

The enclosed calculations will show that, by the increase proposed, the pay and rations of the whole surgeons and assistants will, *on an average*, be no more than that of a captain of the army, while they are less than those of the surgeons of the navy when on duty at sea; and, also, that there is but a trifling difference in point of expense between an increase of $5 per month every three years, as has been proposed, and one of $10 per month every five years, as is desired by the surgeons themselves.

It is believed that, by thus graduating the pay, the department would be rendered more permanent and efficient. I would, therefore, suggest the propriety of authorizing the Secretary of War to appoint an army medical board, whenever it may be deemed expedient, for the examination of candidates for appointment, and of the assistant surgeons in commission This is not required in all cases, as satisfactory evidence of qualification can often be obtained; and it would be exceedingly inconvenient in many, and in point of fact confine the appointments in a great measure to the States near the place where the board might assemble, as few would come from a distance when they may not receive an appointment for several years, if they do at all.

Very respectfully, your obedient servant,

JOS. LOVELL, *Surgeon General.*

Hon. THOS. H. BENTON, *Chairman Senate Committee on Military Affairs.*

SURGEON GENERAL'S OFFICE, *December* 28, 1828.

SIR: In reply to the inquiry whether it be expedient to graduate the pay of the surgeons and assistant surgeons of the army in proportion to the length of time they may have been in service, I beg leave to remark that forty-five, or very nearly nine-tenths of the whole number, are of the latter class, and, of course, can receive only the lowest grade of pay at any period and under any circumstances. The eight surgeons receive but five dollars per month and one ration per day more than the assistants, which, therefore, constitutes the only difference between the oldest surgeon and the youngest assistant, while the senior assistant, who has been upwards of twenty years in service, and is among the oldest officers in the army, receives the same pay that he did on his first appointment in 1806, although an additional ration has, within a few years, been allowed to every other subaltern officer. It is believed this principle is adopted in relation to the medical department in every other service except our own, and it is manifestly applicable to it in a special manner, because in no other profession is personal experience of such vital importance. When a senior officer of the general staff or of the line is removed, his place is immediately supplied by one who is nearly, if not quite, his equal; and the case is the same in the several promotions that take place down to the cadet who fills the last vacancy, and whose duties are adapted to his years; but the medical graduate who succeeds the experienced surgeon must at once assume all his duties and responsibilities and have the sole care of the health and lives of the corps or garrison to which he may be attached, and the charge is often a serious one to those stationed beyond the reach of all other medical advice.

Upwards of three-fourths of the present assistant surgeons have been appointed within the last eight years, besides many others who have from time to time resigned during that period; and as the prospect of a moderate increase of pay would no doubt retain in the army much of the experience purchased at its expense, it would not only be fair and just towards those by whom this experience is possessed, but it is believed a full equivalent would be received by the public; for the actual expense of recruiting, transporting to most of the military posts, and preparing one or two men to supply the places of those who may have been lost from unskillful treatment, is fully equal to the additional pay of the experienced surgeon, who has been compelled to retire to private practice in consequence of being unable to meet his growing expenses. The reasonableness of this increase will further appear if the surgeon be compared with other officers whose pay is about the same. The captain, for example, receives fifty-eight dollars per month, and the assistant surgeon fifty-two dollars; they have each one servant, and the same allowance of fuel, quarters, &c.; and the latter, if he actually keep horses in service, is also allowed eight dollars per month in lieu of forage, which is generally not more than sufficient to meet the additional

expense; so that, in point of fact, the captain receives six dollars per month more than the assistant surgeon, and but five dollars per month less than the full surgeon, towards defraying his necessary and personal expenses. It is, moreover, perfectly well known that even a subaltern officer can, and actually does, in almost every case, live more conveniently and comfortably than the surgeon, in consequence of the various little offices performed by his men when off duty, all of which are a direct charge upon the latter. But the important difference between the captain and the surgeon is, that the pay of the latter is invariably the same, while the former is constantly advancing to promotion in rank and emolument. The commission of the oldest captain (who, however, is adjutant general with the pay of a colonel) is of July, 1812, and that of the oldest assistant surgeon of March, 1806, a difference of six years. But four assistant surgeons have been promoted in ten years, with the additional pay of only eleven dollars per month, without the possibility of a further increase, while in the same period thirteen captains have been promoted to be majors, and nineteen lieutenant colonels and colonels in their respective grades. Nor has regular promotion been considered sufficient for the officers of the general staff and of the line, and therefore they receive brevet commissions for every ten years of service, and are often entitled to all the advantages of these commissions previous to their promotion. They are, moreover, entitled to double rations when on separate command, and are frequently on staff and other duties, by which their compensation is materially increased, while the surgeon can in no case receive any additional allowance either on account of his situation, the extent or importance of his duties, or his length of service.

The surgeons are not only confined to their original pay, whatever may be the necessary increase of their expenses as they advance in life, but they are more constantly on duty than any other officer in service; for the number being barely sufficient to supply the several posts, they are seldom permitted to leave their stations, as no one else can perform their duties, and they are thus sometimes compelled, in urgent cases, to hire a substitute at their own expense, while at most of the interior posts even this is impracticable, and hence some have been on daily duty for ten years; whereas an officer of the line can at once be relieved by the next in command, or his place be supplied by one of the same grade. This is a consideration of no inconsiderable importance, not only comparatively in relation to others, but positively in relation to the surgeon himself; for cases have occurred where all the officers of a post have been repeatedly changed on account of their ill health, while the surgeon has been compelled to remain at the sacrifice, not only of his health, but in more than one instance of his life; and a standing order has even been issued that he shall in no case be so far from the garrison that he could not be called on in case of accident.

The present compensation, especially of the assistant surgeons, is obviously incompetent to the comfortable support of those who are somewhat advanced in life, although quite sufficient on their first appointment. They are allowed but one servant and one room, with the necessary fuel, and hence they are often under the necessity of applying a considerable portion of their pay to those objects, leaving but four hundred or five hundred dollars for all the other expenses of their families, out of which they are compelled to meet considerable additional expenses incident to their commissions, which are, of course, never incurred by a retired and economical private individual.

To these considerations it may be proper to add that the surgeon is required to be a regular medical graduate in order to become a candidate for appointment, and that all the expenses of a liberal education generally, including both a collegiate and a medical course, are paid by himself, while the cadet is prepared for service at the public expense; and, therefore, while the latter is in some measure refunding an advance, the former ought to receive a reasonable consideration on account of his own investment.

Extract of a report to the Secretary of War, dated November 8, 1828.

"As several posts have for some time been, and still are, without a surgeon, I beg leave to remark that on the reduction of the army in 1821 the surgeons and assistant surgeons allowed by law were just sufficient to supply the several posts and stations then established and occupied. Since that period the number has been considerably increased, so that it is now impracticable to furnish one surgeon to a station, even if they should be all on duty. By the subjoined list it appears that 54 medical officers are required to supply one to each post, while the whole number allowed by law is 53, of which seven are off duty, as above stated, and two are on the march with detachments, leaving but 44 surgeons to 54 stations. At the larger and more sickly posts, however, there should be at least one surgeon and one assistant, and especially at the remote ones on the Arkansas, Missouri, Upper Mississippi, the lakes, and in Florida, where, in case of the death or sickness of the surgeon, medical attendance cannot be obtained on any terms for many months, as was the case not long since. Agreeably to the statement herewith submitted, it appears that the smallest number by which the necessary medical attendance can be furnished is 12 surgeons and 55 assistants, making no allowance for those who may be sick, accompanying detachments, or for the several recruiting stations, except New York and New Orleans. I have therefore respectfully to request that application may be made to Congress at the approaching session for an additional number of medical officers, not less than four surgeons and 10 assistants, in addition to the 8 surgeons and 45 assistants now allowed by law."

	552		590
			552
		Difference in favor of the navy surgeon	38

It should be noted that there are 40 navy surgeons to 40 assistants, and in the army but 8 surgeons to 45 assistants, so that at the *same rate* the former would always receive on an average much more than the latter, as one-half of them would be at the rate of full surgeons, whereas in the army the surgeons constitute but about one-seventh of the whole number.

20TH CONGRESS.] No. 398. [2D SESSION.

ON THE DISCHARGE OF A MECHANIC FROM THE ARMORY AT HARPER'S FERRY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 31, 1829.

Mr. DRAYTON, from the Committee on Military Affairs, to whom was referred the memorial of Thomas Copeland, reported:

That the memorialist sets forth that, being a mechanic at the United States armory at Harper's Ferry, and witnessing there various acts of misconduct, ignorance, negligence, and fraud on the part of Mr. James Stubblefield, the superintendent of the armory, he conceived it to be his duty to communicate them to the Ordnance department, and accordingly did so; that "he holds in his possession the most explicit and flattering testimonials of his good character, capacity, and assiduity;" that nevertheless, on the 13th of May, 1827, he was dismissed from the public service; that, being utterly at a loss to account for his dismissal, he applied for redress to the Secretary of War and the President; but being unsuccessful in these applications, he therefore appeals to Congress, trusting "that it will cause such an inquiry to be made as in its judgment justice so loudly calls for and his present situation claims."

It appears that, in consequence of the above charges against Mr. Stubblefield, a court of inquiry was ordered on the 5th of April, 1827, consisting of Brevet Brigadier General Wool, Brevet Lieutenant Colonel Bankhead, and Captain C. H. Thurston, of the 1st regiment of artillery; that the court was directed "to examine and inquire into all matters of accusation which may be laid before it touching the official acts of the accused," James Stubblefield. The court, after a protracted session, and the minute and laborious examination of numerous witnesses, one of whom was the memorialist, pronounced its sentence on the 3d of May, 1827, from which the following extract is submitted:

"From the responsible situation of the accused, and the serious complexion of the charges, the court has endeavored to have as much and as respectable testimony as could be adduced; nor has it confided the investigation to the usual means of evidence alone, but has added, in the cases which would admit of it, that of personal observation. The result of that investigation is, that Mr Stubblefield has discharged his duties as superintendent with fidelity and integrity for twenty years; and that if, in the progress of this trial, some few instances of neglect of minor importance shall have been exposed, they are to be attributed to the state of things at the time, and to the necessity, in the multifarious duties of a superintendent, of confiding some things to the discretion and fidelity of subordinate agents."

In consequence of this decision of the court, the superintendent, by an order of the Secretary of War of the 8th of May, 1827, resumed the charge of the armory at Harper's Ferry, the Secretary at the same time directing "that the persons employed in the public service who have disseminated false and malicious reports or charges to the prejudice of that order and subordination which is necessary at so important an establishment be discharged." Under this order the memorialist was dismissed.

As Mr. Stubblefield has been acquitted of the charges preferred against him by a tribunal organized according to the Constitution and laws, the committee can discover no motive or reason for the interference of this House. It therefore recommends the adoption of the following resolution:

Resolved, That there is nothing contained in the memorial of Thomas Copeland which requires the interposition of Congress.

20TH CONGRESS.] No. 399. [2D SESSION.

ARMY REGISTER FOR THE YEAR 1829.

COMMUNICATED TO THE SENATE FEBRUARY 2, 1829.

DEPARTMENT OF WAR, *January* 29, 1829.

SIR: In conformity to a resolution of the Senate of the 15th December, 1815, I have the honor to transmit herewith fifty copies of the Army Register for 1829 for the use of the Senate of the United States.

I have the honor to be your obedient servant,

P. B. PORTER.

MILITARY ACADEMY, WEST POINT, NEW YORK.

INSPECTOR.

Colonel Charles Gratiot, chief of the corps of engineers.

SUPERINTENDENT AND COMMANDANT.

Brevet Lieutenant Colonel S. Thayer, corps of engineers.

ACADEMIC STAFF.

PROFESSOR OF ENGINEERING.

David B. Douglass, A. M.

ASSISTANT PROFESSORS.

Brevet Second Lieutenant William H. C. Bartlett, corps of engineers.
Second Lieutenant William Bryant, third artillery.

PROFESSOR OF MATHEMATICS.

Charles Davies, A. M.

ASSISTANT PROFESSORS.

First Lieutenant Edward C. Ross, fourth artillery.
Second Lieutenant L. B. Webster, first artillery.
Second Lieutenant Thomas J. Cram, fourth artillery.
Second Lieutenant Albert E. Church, third artillery
Brevet Second Lieutenant Robert E. Temple, third artillery.
Brevet Second Lieutenant John F. Lane, fourth artillery.
Cadet Charles Mason, first class.

CHAPLAIN AND PROFESSOR OF GEOGRAPHY, HISTORY, AND ETHICS.

Thomas Warner.

ASSISTANT PROFESSOR.

Second Lieutenant B. H. Henderson, third artillery.

PROFESSOR OF PHILOSOPHY.

Edward H. Courtenay.

ASSISTANT PROFESSORS.

Second Lieutenant Robert P. Parrot, third artillery
Second Lieutenant George W. Long, fourth artillery.

FIRST TEACHER OF THE FRENCH LANGUAGE.

Claudius Berard.

SECOND TEACHER.

Joseph Du Commun.

ASSISTANT TEACHER.

Second Lieutenant George Nauman, first artillery.

TEACHER OF DRAWING.

Thomas Gimbrede.

ASSISTANT TEACHER.

Second Lieutenant Theophilus B. Brown, fourth artillery.

INSTRUCTOR OF INFANTRY TACTICS.

Captain Ethan A. Hitchcock, first infantry.

ASSISTANT INSTRUCTORS.

Second Lieutenant William A. Thornton, fourth artillery.
Brevet Second Lieutenant William Palmer, first artillery.

INSTRUCTOR OF ARTILLERY.

First Lieutenant Z. J. D. Kinsley, third artillery.

ACTING PROFESSOR OF CHEMISTRY AND MINERALOGY.

Second Lieutenant William F. Hopkins, fourth artillery.

ASSISTANT PROFESSOR.

Second Lieutenant N. Tillinghast, seventh infantry.

SWORD MASTER.

Louis S. Simon.

MILITARY STAFF.

QUARTERMASTER.

Captain Æneas Mackay, third artillery.

SURGEON.

Dr. W. V. Wheaton.

PAYMASTER AND TREASURER.

First Lieutenant Thomas J. Leslie, corps of engineers.

ADJUTANT.

First Lieutenant F. L. Griffith, second artillery.

"ARTILLERY SCHOOL OF PRACTICE," FORTRESS MONROE, VIRGINIA.

Commandant, Colonel James House, first artillery.
Director, Lieutenant Colonel J. B. Walbach, first artillery.
Major, William J. Worth, first artillery.

Arsenal near Richmond	Virginia	Bellona	Brevet Major A. S. Brooks.
Arsenal, Augusta	Georgia	Augusta	Brevet Major A. C. W. Fanning.
Arsenal, Baton Rouge	Louisiana	Baton Rouge	Lieutenant I. A. Adams.

The functions of the officers of the staff, like those of the engineers, being generally confined to objects of a peculiarly important character, they are not to assume, nor are they to be ordered on, any service beyond the line of their immediate duty, except by the special directions of the War Department, or the orders of the general commanding the army. This rule is not to extend to regimental staff officers or assistant commissaries of subsistance, who are to conform to the practice as now settled with regard to their duties. The officers of the staff are to receive every mark of respect to which their rank in the army would entitle them respectively.

The western department comprises all west of a line drawn from the southernmost point of East Florida to the northwest extremity of Lake Superior, taking in the whole of Tennessee and Kentucky; and the eastern department all east of such line.

The headquarters of the general-in-chief is in the District of Columbia.

The headquarters of the commanding general of the western department is at Jefferson Barracks, Missouri; and the headquarters of the commanding general of the eastern department is in the city of New York.

Graduates of the Military Academy acting as supernumerary officers of the army, by virtue of their brevets, shall be promoted to vacancies in the regiment or corps to which they are attached respectively.

Those officers whose stations are changed by transfers and promotions will report for duty accordingly.

By order:

R. JONES, *Adjutant General.*

Component parts of regiments and companies.

	Colonel.	Lieutenant colonel.	Major.	Adjutant.	Captains.	First lieutenants.	Second lieutenants.	Sergeant major.	Quartermaster's sergeant.	Sergeants.	Corporals.	Principal musicians.	Musicians.	Artificers.	Privates.	Total commissioned.	Total non-commissioned officers, musicians, and privates.	Aggregate.

The adjutant, being taken from subalterns of the line, is not included in the aggregate.

20TH CONGRESS.] No. 400. [2D SESSION.

ON THE APPLICATION OF AN OFFICER OF THE ARMY TO BE RESTORED TO HIS RANK AFTER BEING DISMISSED BY A COURT-MARTIAL ILLEGALLY CONSTITUTED.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 3, 1829.

Mr. BUCK, from the Committee on Military Affairs, to whom was referred the petition of James D. Cobb, reported:

That the petitioner sets forth in his petition, and has substantiated by evidence to the satisfaction of the committee, the following statement of facts, to wit: That on the 21st of July, 1813, the petitioner was a first lieutenant in the regiment of light artillery, and stationed at Greenbush, in the State of New York. By an order of Colonel S. Larned, then commanding the cantonment at that place, a military tribunal, denominated a general court-martial, was assembled for the trial of such prisoners as should be brought before it. Before this court the petitioner was arraigned upon certain charges preferred against him by Colonel Larned, tried, condemned, and sentenced to be cashiered. This sentence was approved by the officer ordering the court, and ordered to be carried into execution.

On the 29th January, 1814, a letter was addressed by the Adjutant General, J. B. Walbach, by direction of the Secretary of War, to Colonel Larned, informing him that the proceedings of the court-martial above mentioned were illegal, as he, Colonel Larned, had no authority, at that time, to institute general courts-martial; and that he was authorized by said letter to order a general court-martial for the trial of Lieutenant Cobb, the proceedings of which should be transmitted to the Secretary of War for his decision.

On the 3d of February, 1814, an order was issued from the Adjutant General's office to Lieutenant Cobb, commanding him to repair, without delay, to Albany, New York, and report himself to Colonel Simeon Larned, and informing him that that officer had orders to institute a court-martial in his, Lieutenant Cobb's, case.

By letter under date of the 9th of March, 1814, the Adjutant General informed Colonel Larned, by order of the Secretary of War, that the President had decided that Greenbush be considered a separate command, so far as relates to courts-martial held previous thereto; that such decision was to be con-

sidered a confirmation of the several sentences of general courts-martial held under orders from Colonel Larned, and would render unnecessary any further proceedings in the case of Lieutenant Cobb.

A letter from the Adjutant General's office, under date of 28th May, 1814, addressed to Lieutenant Cobb, informed him that the President having approved the sentence of the general court-martial which dismissed him from the service, he was not considered as belonging to the army of the United States.

From the foregoing statement it will be seen that the only question to be decided in the petitioner's case is, whether the approval of the President of the sentence of the court, illegally constituted, and void of jurisdiction, can give to that sentence any effect. Your committee are unanimously of opinion that it could not; but that, on the contrary, the petitioner continued to be entitled to all the privileges of a first lieutenant in the regiment of light artillery, notwithstanding said sentence and approval, until the period of its incorporation with the artillery. Your committee, therefore, report a bill for the relief of the petitioner.

Although it has constituted no part of the inquiry of the committee, in their examination of this case, to ascertain the nature of the charges preferred against the petitioner, as they are immaterial to this investigation, yet they have necessarily become in some measure acquainted with them. The committee are gratified in being able to say that those charges appear to have been trivial in their nature, and of doubtful construction; and, from the evidence produced before them, it appears that the petitioner was a valuable officer and a correct disciplinarian.

20TH CONGRESS.] **No. 401.** [2D SESSION.

ON THE EXPEDIENCY AND EFFECT OF THE USE OF ARDENT SPIRITS IN THE ARMY

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 3, 1829.

DEPARTMENT OF WAR, *January* 31, 1829.

SIR: In answer to a resolution of the House of Representatives, directing the Secretary of War to inform the House "what beneficial effects, if any, have arisen, or are likely to arise, from the daily use of spirituous liquors by the army, and whether the consequences of that practice have not been, and will not be, injurious; and particularly of its influence upon the health, morals, and discipline, of the soldiers," I have the honor to transmit herewith reports from the major general of the army, the Surgeon General, and the Commissary General of Subsistence, to whom, severally, the resolution of the House has been referred for their opinions; and to state, that although the opinions of these officers, as will be perceived, are not exactly concurrent on all the several points submitted, yet their practical views on the whole subject are not essentially variant. From these opinions, as well as from other sources of information, the following propositions may be deduced:

1st. That the habitual use of ardent spirits, even in moderate quantities, is unfavorable to health; and that the chances for health, vigor, and protracted life, in favor of an individual who finds it convenient wholly to abstain from them, are generally greater than of him who indulges.

2d. That the use of so small a quantity as one gill a day, taken at proper times, will not seriously impair the constitution or diminish the health of a man who pursues laborious or active employments.

3d. That a sudden and total abandonment of the practice by one who has been long accustomed to the free use of ardent spirits will diminish his vigor, and probably injure rather than improve his health and constitution; and,

4th. That the evils of intemperance in our army arise not so much from the moderate allowance of spirits made to the soldiers by the government and its officers, as from the excessive quantities procured by other means.

The practice of indulging in the use of spirituous liquors is so general in this country that there is not, it is believed, one man in four among the laboring classes who does not drink, daily, more than one gill; and it is from these classes that our army is recruited. To subject, therefore, persons of such habits at once to a total deprivation of a beverage to the free use of which they have long been habituated, would not only impair their health, but would probably induce them to resort to means for gratifying their propensity which a moderate indulgence of it by the government might prevent. If ardent spirits are nowhere necessary, the use of them is at least as excusable in soldiers as by most persons engaged in civil occupations, inasmuch as their usual food is dry and solid, consisting principally of bread and meat, while the laborers of the country have the advantages of milk and vegetables, which do not require the same aid of stimulants in the process of digestion.

The President of the United States is authorized to prescribe the component parts of a soldier's ration, and it will be in his power, with perhaps some small additional legislative aids, to correct in a great measure the evils complained of. A law or regulation allowing to a soldier who will abstain from the use of spirits a sum in money as a commutation for that part of the ration, equal to, or perhaps, by way of encouragement, somewhat greater than its actual cost to the government, might be advantageously adopted. Other experiments may, and probably will, be introduced by the Executive with a view to the desired reform. But the legislative aid, if any, which is most wanted at this time, is such as will prevent soldiers from procuring a greater quantity of spirits than is allowed by the regulations of the army; and to this end, the separate legislation of the respective States would be required. A soldier who purchases liquor without permission is severely punished, while the citizen who sells it to him, and who, in a moral point of view, is equally censurable, is not by the present laws of most of the States obnoxious to the slightest punishment. It is for Congress to decide upon the expediency of recommending, by a resolution, to the legislatures of the several States and Territories the passage of laws which shall prohibit their respective citizens, under proper penalties, from selling intoxicating liquors to any soldier of the army

without the written permission of the surgeon or commanding officer of the post or corps to which he belongs. Such laws might afford great facilities to the Executive in reforming the moral habits of the soldiers.

It is not perceived that the moderate use of spirituous liquors permitted by the present regulations will have any deleterious influence either on the morals or the discipline of the soldiers.

It is doubtless true that there is at present in the ranks of the army a larger proportion of individuals addicted to the excessive use of spirituous liquors than will be found in most other walks of life. This fact, however, is not the result of a defective economy, either in the supplies or the government of the troops, but is the consequence of a practice heretofore too much indulged, of enlisting confirmed drunkards. The mass of the army, however, is not composed of men of this description. On the contrary, a great proportion even among the rank and file, and including most of those who have been born and educated in the army, exhibits examples of as pure integrity, as correct habits, as ardent love of their country, and zeal for its defence, as are to be found among the higher grades of society; and it should be the policy of the government to cherish these elevated principles and sentiments in a class of men to whom the defence of its laws and liberties is intrusted. To interdict such men the use of that which, if not a necessary, is deemed one of the comforts of life, and which is forbidden to no other persons but convicts, would be stamping them with a mark of degradation more injurious, it is believed, and debasing to their moral sense, than would follow from the most unrestrained license for its use.

To render an army efficient, a rigor of discipline which is not required in the management of civil concerns becomes indispensable. Soldiers are aware of this, and cheerfully submit to it from its acknowledged necessity. But absolutely to deprive a citizen, because he is a soldier, of the necessaries, or even comforts, which should belong equally to all, under the power to regulate their use, is not more justifiable in military than it would be in civil life. While it is impossible not to commend the objects of those who would legislate from soldiers the use of ardent spirits, it is confidently believed that the subject should rest where it now is; leaving a broad discretion to the Executive, aided by the information which he is constantly receiving from the officers of the army, who best know the habits and wants of this class of men.

Reforms in morals as well as in religion, in order to be useful and lasting, should be voluntary, and have their origin, growth, and fixture in the sound sense and conscientious feelings of those who are the subjects of them; and it is greatly to be doubted whether most of the numerous projects, though originating in pure motives and directed to praiseworthy ends, which have been got up of late with a view to *coerce* men by legal penalties and public denunciations into certain moral observances and professions, are not unwise, unjust, and at war with the genius of our free institutions. The evils of intolerance are not confined to religion alone. Freedom and independence of thought and action are the boast of the people of this republic, and are as indispensable to the purity, and even existence of moral virtue, as they are to undefiled religion. Both of these great subjects are worthy of the best labors of the philanthropist and the divine; but there are circumstances connected equally with each, and which, too, have the most important bearings on the order and well-being of society, that are too delicate for the rough hand of penal law; and it is to be apprehended that any attempt to fashion the private and moral deportment of our citizens by legal enforcements and interdictions would lead to all the disastrous consequences which have uniformly been found to flow from the same sort of discipline when applied to religious conduct and opinions.

I have the honor to be your obedient servant,

P. B. PORTER.

Hon. Andrew Stevenson, *Speaker of the House of Representatives.*

Headquarters of the Army, *Washington, January* 27, 1829.

Sir: In compliance with your request, I have the honor to give herewith my opinion on the subject-matter of the resolution of the House of Representatives of the 14th of January, 1829, as to "what beneficial effects, if any, have arisen, or are likely to arise, from the daily use of spirituous liquors by the army, and whether the consequences of that practice have not been, and will not be, injurious; and particularly of its influence upon the health, morals, and discipline of the soldiers."

It is now a long time since ardent spirits have been issued to the soldiers of the American army as a component part of the ration; and perhaps, as it regards the moderate use of it by men of a certain age, no evil or injurious consequences can result therefrom to them. I have for a long time back been of the opinion that ardent spirits, as a component part of the ration, allowed to the soldiers, might be dispensed with, and some other article substituted as an equivalent—as rice, vegetables. This opinion has been confirmed by many intelligent and observing officers; and the reason is this: the habitual use of ardent spirits, although allowed only in the proportion of a gill to each man, induces a taste for it in those who were never before accustomed to its use; and the habit once acquired and confirmed creates, by degrees, a thirst for a still greater quantity than that allowed to the ration, until finally the habit becomes excessive, and the consequences are the undermining of the constitution of the soldier, the destruction of his moral and physical powers, and all the evils that interrupt the discipline of the army. While I am decidedly for abolishing ardent spirits from the ration, I would not go so far as to prohibit the use of it to those who have been accustomed to it as a part of their daily subsistence. It would be cruel to deprive them of it altogether. I would therefore allow it to be sold by the sutlers in moderate quantities to the soldiers; but by banishing it from the ration the pernicious influence which it has produced on the youth who enter the service will likely be avoided, and thus, by degrees, its immoderate use will perhaps decrease. It is certainly competent to the Executive, under the existing laws, to discontinue the issue of ardent spirits as a part of the ration, and I most earnestly recommend the experiment to be made. I would, nevertheless, allow a certain portion of ardent spirits to be kept on hand, in the commissary's supplies, subject to the orders of the commanding officer, to be issued to the troops on extraordinary occasions, when they may be exposed to labor in places of extreme moisture, when an issue of ardent spirits may be deemed essential to the health of the soldier.

I have the honor to be, very respectfully, sir, your obedient servant,

ALEXANDER MACOMB, *Major General U. S. A.*

Hon. Peter B. Porter, *Secretary of War.*

SURGEON GENERAL'S OFFICE, *January* 26, 1829.

SIR: I have to acknowledge the receipt of a copy of a resolution of the House of Representatives of the 14th instant, directing the Secretary of War to inform the House what "beneficial effects, if any, have arisen, or are likely to arise, from the daily use of spirituous liquors by the army, and whether the consequences of that practice have not been, and will not be, injurious; and particularly of its influence upon the health, morals, and discipline of the soldiers." By reference to the several reports from this office in relation to the health of the army, it will be seen that this subject has been repeatedly brought to the notice of the department, and, in fact, scarcely a quarter passes without receiving some pointed communication in relation to it from one or more of the surgeons, while it has always been a source of no small interest to the officers of the line. In a report of November 16, 1818, on the component parts of the ration, the propriety of furnishing a substitute for the whiskey was suggested, and the policy and practicability of such a change were for a long time under consideration; the President of the United States having been authorized by the act of April 14, 1818, to determine the several articles of which the ration shall consist. Without entering into the details of the inquiries made or of the information received at that time, it may be sufficient to state that, after consulting many of the most experienced and practical officers, and especially the company officers and surgeons, who are best acquainted with the customs, wants, and mode of living of the soldiers, the conclusion arrived at was, that with the usual habits of that class of persons in this country, who, in time of peace at least, always have and always must constitute the great majority of enlisted soldiers, the project would be both impolitic and inefficient; inasmuch as it would either be a grievous privation to those who had all their lives been accustomed to a moderate use of ardent spirits, or operate as a tax upon them by compelling them to purchase it out of their monthly pay, while a single gill would be a trifling deduction from the daily potations of the intemperate, which are procured at any risk and purchased at any rate; and hence, while it would produce dissatisfaction, amounting often to mutiny, it would have no material effect towards preventing habitual intemperance in those who are disposed to it.

Under the present excellent regulations of the sutling department, the soldier can obtain ardent spirits in but three ways: from his ration; from the sutler, on the written permission of his commanding officer; and from the innumerable host of hucksters who infest almost every military post, and who always constitute the advance of a detachment of the army, though pushed ever so far beyond the limits of civilization. That the intemperate habits of the soldier are sometimes commenced, and always confirmed, by the agency of those traders in iniquity, is notorious to every one connected with the army; and the records of our civil courts will furnish evidence of the lengths to which the officers have often carried their exertions to protect their men from this desolating evil.

It may be remarked, however, that there appears to be a material error in reference to this subject, and, in point of fact, that a large portion of the sin of intemperance which is laid at the door of the army belongs in truth to the community from which it is taken. As one proof of this, I give the following extract from the report received a few days since from an intelligent, practical, and experienced surgeon, whose connexion with one of our largest recruiting rendezvous has given him ample means of speaking from actual observation:

"Permit me to call your attention to a serious mischief which has long existed in our army. I do not wish it to be understood that I censure any one; my sole motive is to endeavor to arrest a most pernicious practice. I allude to the constant habit of re-enlisting known drunkards. I am often required to perfect the enlistment of such men, and have always entreated to be excused from the performance of such reprehensible acts; but generally I have pleaded in vain. It has occurred so frequently at this post within the last year (not less than five times) that a longer silence on my part would be a dereliction of duty. The officers gravely tell me that we might as well disband the army as to exclude these men. I am not disposed at present to argue so strange a doctrine, nor will I deny that intemperate men may often be made to do duty in the ranks. I will, however, contend that it would be far better to have a *few* good men for an army in peace than a multitude of such as I am now declaiming against."

Out of 3,000 patients prescribed for by this surgeon, 28 have died, of whom 22 were intemperate and 19 confirmed drunkards; and most of those had been permitted to re-enlist. He has given 56 certificates of discharge, of which the proportion for intemperance was as 9 to 2. Of the 15 deaths at his present station, six were drowned in a state of intoxication, and five were from intemperance and its immediate consequences.

Whatever, then, may have been the original habits of our race, it is notorious that the common drink of those who usually enlist is ardent spirits in some form or other; so that few enter our army, at the present day, who have not been accustomed to this stimulus from youth, if not from infancy; and without a minute knowledge of the laws which govern the process of digestion, common observation teaches us that the sudden and total removal of it is in all cases attended with difficulties, both moral and physical, which, if not insuperable, are, under the most favorable circumstances, exceedingly formidable.

A physician who attempts to effect such a change, even when life, health, and reputation are at stake, will, for the most part, find himself compelled either to make a corresponding alteration in the entire habits and diet of his patient, or to substitute some less offensive and less dangerous excitant of a torpid and inactive stomach. If such difficulties present themselves with those who have the benefits of the moral stimulus of business and amusement, and of the civil connexions and social ties of life, they must necessarily be much greater under the monotonous listlessness of the life of a soldier, whose poverty or misfortunes, if not his vices, rather than his will, have consented to his enlistment.

I am therefore of opinion that, under existing circumstances, the moderate use of ardent spirits, as obtained by the soldier from his ration, and from the sutler under proper regulations, is not injurious to his morals or his health, or to the discipline of the army.

Having stated what are believed to be the chief causes of intemperance in the army, I beg leave respectfully to suggest that some more efficient measures be taken to prevent the enlistment of those of intemperate habits, and also to remark that, by the existing laws of one of the States, its citizens are prohibited, under severe penalties, from selling ardent spirits to any soldier stationed within its limits; and that the officers in command have thus been enabled materially to check, and even entirely to prevent, the intoxication of their men. I would therefore further respectfully suggest that application be made to the proper authorities in the respective States for the passage of similar acts, with such penalties and with such provisions as may enable the officer to obtain redress through the proper magistrate with as

much certainty and despatch as may be consistent with the interests of the State and the rights and privileges of its citizens.

Very respectfully, your obedient servant,

JOS. LOVELL, *Surgeon General.*

Hon. PETER B. PORTER, *Secretary of War.*

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, January* 20, 1829.

SIR: Upon consideration of the resolution offered in the House of Representatives, 14th instant, requesting information as to "what beneficial effects, if any, have arisen, or are likely to arise, from the daily use of spirituous liquors by the army, and whether the consequences of that practice have not been, and will not be, injurious; and particularly upon the health, morals, and discipline of the soldiers," I have the honor to state that I do not know of any beneficial effects from such issue, nor do I believe any are likely to arise; neither am I aware that any great evil can ensue from the daily issue of *one* gill to the troops generally, or of *one and a half* gill to men on fatigue duty.

The most unhappy and pernicious effects of spirituous liquors to the army result from its being clandestinely supplied by citizens; nor can this be totally prevented, but might be in a very great measure arrested by inducing the States to enact laws prohibiting persons selling ardent spirits to soldiers, under the penalty of heavy fines, recoverable before a justice of the peace; one half of said fines to be applied to the use of the State and the other half to the person giving the information, and making the informant in all cases a competent witness. Could this be efficiently done, there is no doubt that the deleterious effects of the use of spirituous liquors by the army would cease, as regards the health, morals, and discipline of the soldiers.

Very respectfully, your most obedient servant,

GEO. GIBSON, *Com. Gen. of Subsistence.*

Hon. P. B. PORTER, *Secretary of War.*

20TH CONGRESS.] **No. 402.** [2D SESSION.

ON THE ORGANIZATION OF THE MILITIA OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 4, 1829.

Mr. THOMPSON, of Georgia, from the Committee on the Militia, to whom was referred so much of the President's message as relates to the organization and discipline of the militia of the United States, reported:

Influenced by a deep conviction that a well-organized and efficient national militia is not only the most appropriate and legitimate defence of a free, high-minded, and enlightened people, but that it would therefore form the greatest military ornament and safeguard of these United States, the committee, in the discharge of the duty assigned them, have, with unwearied diligence, sought to avail themselves of all the light shed upon the important subject by the expressed opinions of experienced and distinguished military men, and reports of intelligent committees of both houses of Congress. In the progress of their investigation of this very important subject the committee have had to encounter much difficulty from the great variety and contrariety of projects and opinions reported upon and expressed in reference to the subject. The division of constitutional powers, too, which was made by the framers of our great national compact, under the influence of a provident jealousy of the people's rights, was not without its embarrassing effects. In the enumeration of powers granted by the Constitution to the Congress of the United States, in reference to the militia, with the power "to provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions," the "power to provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States," as well as the power to prescribe the system of discipline to be observed and practiced by the militia, is clearly included, reserving to the States respectively the right to govern the militia, (except such part of them as may at any time be in the service of the United States,) with the power to appoint the officers, and to train the militia according to the discipline prescribed by Congress. Studiously avoiding any innovation upon the rights so clearly reserved to the States by the Constitution, the committee have anxiously labored to give effect to the powers which are as clearly granted to Congress by that instrument. The first important branch of the general subject which engaged the attention and reflection of the committee is the suggested necessity of an officer to serve as a point of concentration of all reports, exhibits, returns, and other useful information relating to the whole militia of the United States. Satisfied of the indispensable necessity of such an officer, the committee respectfully recommend its creation.

In relation to an efficient organization of the militia, so much desired because it is so essential to the safety of this great and growing republic, the committee are of opinion that the system which is least complex in its general character and machinery, the most simple in its details, and with which the mind can become with the greatest ease most habitually familiar, should be preferred, because it would generally be most effective in its operations. In the arrangement of such a system, the committee propose to hold subject to militia duty able-bodied free white male persons between the age of twenty-one and forty years only. Adopting twenty-one years of age as the commencement of liability to enrolment, and forty years of age as the termination of service, will not only reduce the number of the militia of the United States, already embarrassingly numerous, but will leave undisturbed the relation which legally exists between master and apprentice, guardian and ward, and parent and child—a relation which ought not to be disturbed on any but occasions of pressing emergency. Nor ought any person be held to the performance of service to the government but such as are admitted to a full participation of all its benefits and immunities. Intimately connected with such a system of organization, should be considered a classification of the

militia, which, by its operation, would annually exhibit, detailed for actual service, portions of the militia competent in number to meet probable exigencies, and whose service in the field would be most efficient, while their absence from the bosom of society and from the pursuits of husbandry would be least injurious to their immediate relations and their country in general. As harmony of action and uniformity of practice among the several corps which form an army is alike essential to its security in the presence of an enemy and its success on the field of battle, the plan or system of organization which may be adopted should therefore be applicable to the Territories as well as to the States of the Union. The District of Columbia, which is an anomaly in our form of government, may be permitted to maintain its unique character, by the application to its militia of a mode or plan of organization adapted to its peculiarities, and therefore necessarily somewhat variant from the system of organization properly applicable to the States and Territories. An indispensable requisite in forming an efficient militia is a knowledge of the correct theory and practice of the use of fire-arms, as well as the certain means of acquiring them. The committee, however, respectfully protest against the policy of compelling individuals enrolled for militia service to furnish arms, as such compulsion would, in effect, amount to a capitation tax; unequal, and often extremely oppressive in its operation, it would be unconstitutional. They suggest that a number of arms, equal to the whole number of the militia of the United States, between twenty-one and twenty-eight years of age, (of which the first or junior class is proposed to be composed,) should be furnished by the United States for the use of that class as early as practicable, leaving the expediency of so furnishing the other or senior class to the decision of time and future experience. An increase of the annual appropriation for arming the militia is, therefore, respectfully recommended. To carry into successful effect the grant of constitutional power which authorizes Congress to provide for disciplining the militia, the committee propose to hold out inducements to the several States and Territories of the Union to authorize and require, by legislative enactments of the legislatures of the States and Territories, respectively, an annual convocation of commissioned and non-commissioned officers and musicians, to be encamped in their respective States and Territories a specified length of time, for the purpose of being trained by proper instructors, with a view to prepare them to impart military knowledge and instruction to the militia under their command, when training them under the directions of the legislatures of their respective States and Territories. Uniformity of practice and of action among the several corps of which an army is formed, so universally acknowledged by military men to be essential to effective military operations, can be attained alone by a strict observance and a diligent practice of the same system of tactics. The committee are therefore of opinion that, in all militia exercises and trainings, an implicit observance and practice of the system of tactics prescribed by Congress for the use of the militia of the United States should be imperatively required.

In the course of experiments made upon the interesting and important subject submitted for the consideration of this committee, a disastrous and withering parsimony seems to have characterized the action of the national legislature. While countless millions have been lavished upon the army, the navy, fortifications, and objects of internal improvement, the militia, which should be made the strong arm of defence of this great republic, and considered the most essential to the preservation of the rights and liberties of the American people, are left to degenerate into inefficiency and insignificance, or to be sustained by, and derive character from, the exertions of public-spirited military men, occasional and partial contributions of patriotic States, or other accidental circumstances. To prepare an army for actual service and for effective operation in the field, the military chest must be thrown open to supply its wants. The object of an organization of the militia of the United States should be to make each individual thereof liable to enrolment—a citizen soldier, and to give to the whole the character and efficiency of an army. To accomplish this great object, liberal disbursements must be made from the treasury of the United States. That the system proposed is but an experiment to test which will cost the United States a million and a half or two millions of dollars is an argument which ought not to be permitted to countervail its proposed adoption, especially if the system proposed shall seem to promise success. The committee ask that it may be permitted to take its course with the tide of experiments now in progress, and proposed to be made, by the United States on other and less important projects. The present period, with its attendant circumstances, seems peculiarly propitious to the proposed organization. Already have propositions, novel and experimental in their character, to dispose of an anticipated burdensome surplus in the treasury of the United States, been presented to Congress for consideration. If such anticipations are well founded, the claim of the militia of the United States to a liberal share of such surplus is irresistible. Should the results prove those anticipations to have been fallacious and speculative in their character, it would abate nothing of the force of the claim of the militia on the patronage of the treasury of the United States, which would still remain unimpaired and imperious. With the view to give to the proposed organization of the militia of the United States the test of experience, the committee herewith report a bill.

20TH CONGRESS.] No 403. [2D SESSION.

ANNUAL RETURNS OF THE MILITIA OF THE SEVERAL STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 5, 1829.

DEPARTMENT OF WAR, *February* 4, 1829.

SIR: Pursuant to the provisions of the act of Congress of the 2d of March, 1803, entitled "An act in addition to an act entitled An act more effectually to provide for the national defence by establishing an uniform militia throughout the United States," I transmit herewith an abstract of the general annual returns of the militia of the United States, and their arms, accoutrements, and ammunition, by States and Territories, from the latest returns received at this department.

I have the honor to be your obedient servant,

P. B. PORTER.

HON. ANDREW STEVENSON, *Speaker of the House of Representatives*

Abstract of the general annual returns of the militia of the United States, by States and Territories, according to the act of March, 1803.

States and Territories.	Returns.		Infantry, grenadiers, light infantry, and riflemen.							Cavalry.					Artillery.					Aggregate.	Remarks.
	For what year received.	Date.	No. of divisions.	No. of brigades.	No. of regiments.	No. of companies.	Commiss'd officers, including general, division, brigade staff, &c. R. JONES, *Adjutant General United States Army.*

ADJUTANT GENERAL'S OFFICE, *February* 2, 1829.

20TH CONGRESS.] No. 404. [2D SESSION.

ON THE EXPEDIENCY OF ABOLISHING THE OFFICE OF MAJOR GENERAL, OF APPOINTING THREE BRIGADIER GENERALS, AND ABOLISHING BREVET RANK IN TIME OF PEACE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 12, 1829.

Extract of a letter from the Secretary of War to the chairman of the Committee on Military Affairs, upon the subject of generals of the army of the United States.

DEPARTMENT OF WAR, *January* 14, 1829.

SIR: I have had the honor to receive your letter of the 2d instant enclosing a resolution of the House of Representatives of the 31st ultimo, directing the Committee on Military Affairs "to inquire into the expediency of abolishing the office of major general, and of providing for three brigadier generals, who shall be, respectively, brigadier general of engineers, brigadier general of artillery, and brigadier general of infantry, and of abolishing the power of conferring brevet rank except in time of actual war," and requesting, in behalf of the committee, the views and opinions of this department on the several subjects thus referred.

The various topics presented in these papers, namely, the expediency of abolishing the office of major general, the policy of substituting in place of the two brigadiers now authorized by law three officers of that grade, who shall respectively command the engineer, the artillery, and the infantry corps; the propriety of annulling the power to confer brevet rank except in time of actual war; the validity of the pretensions put forth by General Scott in his memorial, and the reasonableness of the request with which it concludes, are subjects of great interest to the army and nation, and the discussion of them, from their personal bearing, involves considerations of more than ordinary delicacy. Whatever individual sympathies I may feel for either or all of the officers who may be affected by any of the proposed measures—and my former as well as present connexion with them has been calculated to create such feelings—they will not, I trust, be permitted to influence the views which, by your request, I am about to submit, and which, from the pressure of my other official avocations, will necessarily be circumscribed.

As neither of the propositions which you have submitted looks either to an augmentation or diminution of the present numerical force of the army, I shall assume it as granted that no change in this respect is contemplated.

In regard to the first proposition, which is to abolish the office of major general, I beg leave to observe that although the purposes for which an army is designed have reference almost exclusively to a state of public war, yet our government has concurred with all others in the policy of keeping up a military force in time of peace—partly for the purpose of securing the regular execution of the laws, but principally with a view to the acquisition and preservation of the military art, to be put in requisition whenever the country may be forced into war. To attain the full benefits of the last-mentioned objects the military force to be maintained in time of peace should, if possible, be an exact epitome in all its parts of the one which is intended to be employed in time of war; so that, on the transition from the former to the latter state, its size and strength may be expanded without any alteration of its faculties. The period of peace, indeed, affords much greater facilities for acquiring the theoretic science, preparing the necessary equipments, and perfecting the systems of war, than are to be found in the bustle and confusion which attend its actual existence.

In the organization as well as discipline of an army, the leading objects should be to impart to it the qualities of unity, celerity, and efficiency of action; and the great secret of conferring on a body of men the highest capacity for physical execution will be found to consist in the integrity of its organization, and the unity of purpose with which its operations are conducted. Every part of an army, although destined to perform its own separate and peculiar functions, should be connected with every other part through some common head or chief, who will give animation, impulse, and individuality to the whole. From this head or chief of the army all general orders for its government should emanate, and to him everything which relates to its movements and discipline should be referable. My opinion, therefore, is, that there should be at the head of the army of the United States, whether its numbers continue as at present, or whether they be enlarged or diminished, an individual higher in rank than any other officer, and who should have immediate command of the whole; that he should be stationed, in time of peace at least, at the seat of government, where he can most readily receive the advice and orders of the President, and where he can hold the most direct and expeditious communication with every part of his command.

The present organization of the army being in conformity with the preceding views, it will readily be perceived that my opinion is against the expediency of abolishing the office of major general.

If it be said that the office of major general being abolished, the army will still have a head in the President or the Secretary of War, by whom his military functions are discharged, the answer is, that the Department of War does not form an integral part of the military machine. The numerous civil avocations of the Secretary of War would put it wholly out of his power to attend to the daily orders and complicated routine of duties which appertain to the command and discipline of an army; and the effect of a simple abolition of the office of major general would, in the present state of the army, be to divide it into two separate, independent, and probably conflicting commands under the two brigadiers, unless they should be connected through the instrumentality of the adjutant general or some other subordinate officer, stationed at the seat of government under the Secretary of War, and who would, in fact, perform the appropriate duties of the chief of the army.

But if Congress should determine so to change the organization of the army as to retain more than one officer of the highest grade authorized by law, whether attached to separate corps or not, it is earnestly recommended that they be not made independent of each other, but that they should hold the same relations of rank, and occupy the same places in the line of subordination, as they would do if attached to and serving in the same corps.

In reply to the inquiry whether it be expedient to appoint three brigadier generals who shall respectively command the engineer, the artillery, and the infantry corps, I have the honor to state that it would not, in the opinion of the department, be expedient, especially in the reduced state of our military force,

to extend, by law, the denomination of corps to general officers; but that it is better to leave their commissions at large, in order that the executive may occasionally exchange their commands, and afford them an opportunity of becoming practically acquainted, as every general officer ought to be, with every branch of the service.

Whether it be expedient to *assign* the general officers to the command of distinct corps, instead of continuing the present geographical commands, each of which embraces troops of every description, is a different and more difficult question to answer.

Such an arrangement would not require legislative sanction, and the department has had under consideration for several months past the expediency of adopting it; but so great a diversity of opinion has been found to exist, even among military men, on the subject, that nothing has yet been done.

The artillery is stationed almost exclusively along the seaboard, and the infantry along our inland frontier; and nothing would be lost to either by the change, in point of local convenience and compactness of command, as each of the present geographical departments extend from the Gulf of Mexico to Lake Superior. By this arrangement, too, the integrity of the respective branches of the army would be better preserved, their administration rendered less difficult and complete, and their command more efficient.

On the other hand, there are important advantages to be gained, even in time of peace, by having united under one command the same combination of troops that will be necessary in time of war. It familiarizes the troops of each corps with the operations of the others with whom they will be obliged to act in time of war. By the frequent transfer, not only of the commanding general, but of different portions of the respective commands from one department to the other, those jealousies which are likely to arise between different corps, and which are stronger in proportion as they are kept more distinct, will in a great measure be prevented.

If the two commands were actually in the field, or the different parts of each in the habit of meeting for the purposes of practice and improvement, there is no doubt that the present arrangement of mixed corps is the best; and even in their present stationary and detached situations, the opinion of the department on the whole is, that the proposed change is not advisable at present.

If, however, it be the will of Congress to identify, by law, the several brigadiers with the corps which they are respectively to command, there would seem to be a propriety in annexing that grade to the corps of engineers. But if the commissions remain general, leaving it to the discretion of the President to assign these officers to their appropriate commands and occasionally to change them, as has heretofore been practiced, there does not appear to be any immediate necessity for creating that office, as the chief of that corps now stands in the same line of promotion to the grade of brigadier general as is occupied by the colonels of artillery and infantry. A large share of the duties of the corps of engineers is of a civil nature, and many even of their military duties partake of the civil character. Most of their labors are employed in the performance of the specific duties imposed on the War Department by successive acts of Congress, rather than in aiding it in the military administration of the army. For this reason the chief of the corps is located at the War Department, where he can have constant and direct communication with, and receive the orders and instructions of, the Secretary of War. In consideration, however, of the high qualifications which this officer is presumed to possess, and of the great labor and responsibility constantly imposed on him, I would recommend that he receive the brevet rank and the emoluments of a brigadier general.

In relation to the proposition for annulling the power to confer brevet rank, except in time of actual war, much may be said on both sides of the question. The two principal inducements to the introduction of this species of rank seem to have been to reward gallant and meritorious service on the one hand, and on the other, to avail the country of its best talents in time of war, without a direct violation of the rights of lineal succession to command. The principle of honor and the love of distinction are amongst the most powerful incentives to great and useful military actions; and it is the policy of the government to cherish these sentiments. To take a subordinate officer from the line of the army and place him again in the line over the heads of those whom he has been accustomed to obey, is a direct degradation of those who are thus superseded, and is calculated to destroy their ambition and usefulness. To adhere, on the other hand, implicitly to the principle of regular succession, might place the army or an important branch of it, on the most critical occasions, in the hands of an officer wholly incompetent or unfitted for its command. The brevet is a specious and, at the same time, useful device to avoid such a dilemma, and to save the point of honor by doing that indirectly and for temporary purposes which the temper of military men would not permit to be done directly and permanently. The practice of rewarding gallant and meritorious conduct by brevets is too alluring not to meet the approbation of military officers, whose objects are rank and fame; and all are willing to take the chances of reaping its benefits. Even those who fail to acquire this distinction have little reason to complain, for if they have been overlooked by the government it is probably only because fortune has overlooked them. The brevets of others reflect no disgrace on them, and but rarely displace or incommode them in their regular commands in the army. By conferring on meritorious officers brevet rank, corresponding with the various grades in the line of the army, a corps of officers of rare and diversified talent is placed at the disposal of the commander-in-chief, from which he may select with great advantage to the service those whom he may wish to employ for great or peculiar occasions.

It will readily be perceived that, so far as the interests of the government are concerned, the right to confer brevets is by no means so important in time of peace as in time of war, when the range of selection which it affords is much the most valuable. Still, however, the occasional and prudent exercise of the power in rewarding highly deserving conduct during the period of peace may be attended with happy consequences to the public service. But as regards the officers themselves, the practice of conferring brevets is more important in time of peace than of war, by as much as promotions in the line of the army are more tardy during the former period. In the event of a long-continued peace, a cadet educated at the Military Academy may be deemed fortunate if, even with the present advantage of a brevet for every ten years' service, he finds himself at the age of fifty in possession of a majority, encumbered perhaps with the expenses of a numerous family. On looking, therefore, to the various considerations which the subject presents, I am of opinion that it would be better to submit to the expenditure of some $30,000 or $40,000 which is annually disbursed to satisfy the claims of brevet rank, than to deprive these officers of this moderate but, in most cases, hard earned pittance.

20TH CONGRESS.] No. 405. [2D SESSION.

ON THE COMPLAINT OF AN OFFICER OF THE ARMY FOR BEING TRANSFERRED FROM AN ARTILLERY TO AN INFANTRY REGIMENT, &c.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 25, 1829.

Mr. DRAYTON, from the Committee on Military Affairs, to whom was referred the memorial of Greenlief Dearborn, reported:

That nothing is set forth by the memorialist which requires the interposition of Congress; they therefore recommend the adoption of the following resolution: *Resolved*, That the memorialist have leave to withdraw his memorial.

DEPARTMENT OF WAR, *January* 27, 1829.

SIR: The enclosed report from Major General Macomb will furnish the information requested by your letter of the 9th instant in relation to the matters set forth in Captain Dearborn's memorial, which is herewith returned.

I have the honor to be your obedient servant,

P. B. PORTER.

Hon. WM. DRAYTON, *Chairman of the Military Committee, House of Representatives.*

Report in the case of Captain G. Dearborn, second regiment infantry.

After fully examining into the case of Captain Dearborn, I find that the facts stated in his memorial are correct. The President was required by the act of Congress passed the 2d of March, 1821, entitled "An act to reduce and fix the military peace establishment of the United States," section 12, "to cause to be arranged the officers of the several corps, now in the service of the United States, in such manner as to form and complete, out of the same, the form authorized by" that "act." The corps in service which were subject to this law were the regiment of light artillery, the corps of artillery, the corps of ordnance, the eight regiments of infantry, and the regiment of riflemen, which were to be reduced to form four regiments of artillery and seven regiments of infantry. In fulfilling the intentions of the law, the whole of the officers in service attached to the regiments and corps then existing were considered without respect to the *arms* to which they then belonged, subject to the operation of the law; and the President accordingly directed a board of officers to make the selection of those to be retained, and to arrange them, according to their respective talents and merits, into the several corps which were to compose the new peace establishment, to be submitted to the Executive for his approval. It is evident, in performing this duty, the officers were to be regarded as a whole mass, from which to select without regard to the arms, respectively, to which they belonged; so that it happened, in few instances, artillery officers were put in the infantry, infantry officers in the artillery, and rifle and ordnance officers, in like manner, arranged to some corps, according to the opinion of the board they were best qualified; otherwise all light artillery and rifle officers would have been excluded.

It was a painful and difficult task which the board had assigned to it, it must be allowed, and it appears to me to be now too late to challenge the views of the board or of the War Department, as the whole of the proceedings were submitted to the Senate in an Army Register, published 17th May, 1821. With repect to Captain Nourse, it is thus explained: Captain Nourse was an assistant adjutant general, and as he had never resigned his place in the line, he claimed his rank on the reduction; and further, as the law of the 26th of April, 1816, entitled "An act for organizing the staff and making further provision for the army of the United States," provided, in the 9th section, "*that the several officers of the staff shall, respectively, retain all the privileges secured to the staff of the army by the act of the 3d of March*, 1813;" which last act, entitled "An act for the better organization of the staff of the United States," declares, in the 4th section thereof, "*that the officers taken from the line and transferred to the staff, their transfer shall be without prejudice to their rank and promotion in the line*," &c. There were many meritorious and gallant officers who suffered in the reduction of 1821, and the previous reduction in 1815. It was the inevitable consequence of the diminution of the military establishment; and although Captain Dearborn was transferred from the artillery to the infantry in the new organization of the army, and suffered in his military pride, yet, considering all things, he ought to yield to circumstances with a becoming acquiescence, as there is now no remedy left for his case.

Respectfully submitted. H. E. MACOMB, *Major General, Commanding the Army.*

HEADQUARTERS OF THE ARMY, *Washington, July* 26, 1829.

Hon. P. B. PORTER, *Secretary of War.*

Memorial of Captain Greenlief Dearborn.

This memorial of Captain Greenlief Dearborn, of the United States army, respectfully represents to the honorable Senate and House of Representatives of the United States in Congress assembled, that he was transferred, in the year A. D. 1821, from the artillery, in which he had served from the commencement of the late war to that time, to the infantry, and this to the prejudice of his rank, to the outrage and torture of his military feelings, and against his strong remonstrance. While he served in the artillery

the promotion had been so much more rapid in the infantry that most, if not all, the subalterns in the infantry who entered the army at the same time and with the same rank as himself, besides many others, whom he ranked as subalterns by years of service, had been promoted to the rank of captains; and the only circumstance which could reconcile such a situation to the feelings of a soldier was removed when he was transferred from the artillery to the infantry, and an infantry officer, who had had the benefits of the rapid promotions in the infantry corps, put in your memorialist's place in the artillery. This arrangement placed your memorialist immediately under some of those officers whom he had ranked as subalterns. Your memorialist would further represent that the person now next above him in the second infantry was promoted before a vacancy of captaincy had actually occurred; and if he had not been thus promoted, he would have stood on the Army Register where the next one below your memorialist now stands in the second infantry. The next above your memorialist was promoted to fill a *supposed* vacancy occasioned by the appointment of Captain Nourse to a staff appointment; but as after it was decided by the War Department that Captain Nourse had *not* vacated his place as a captain in the second regiment of infantry, and retained him as such, the next officer immediately above your memorialist could not have been legally promoted till the next vacancy, which did not take place till some time after your memorialist was promoted to a captaincy. By law a regiment of infantry could contain but ten captains; hence Captain Nourse and Captain Huffman (who was promoted to fill Captain Nourse's vacancy) could not both be captains at the same time, though they were both borne on the Army Register as such, as will appear by the inspection thereof for the years of A. D. 1819, 1820, and 1821. Still this Register shows there were *eleven* captains in this regiment, (2d infantry,) and this could not legally be, as the legal establishment was but *ten* captains. To redress the grievances herein complained of, your memorialist humbly and strongly invokes the interposition of Congress, and that he may be retransferred to the artillery, from which he conceives he was wrongfully transferred.

GREENLIEF DEARBORN, *Captain United States Army.*

PORTLAND, *Maine, December* 28, 1828.

20TH CONGRESS.] **No. 406.** [2D SESSION.

ON THE EXPEDIENCY OF ESTABLISHING A FUND FOR AN ARMY ASYLUM.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 27, 1829.

Mr. ORR, from the Committee on Military Affairs, to whom was referred the resolution relative to an army asylum, reported:

That the committee have taken into consideration the resolution submitted to them, directing an inquiry into the expediency of establishing a fund, to be called the army asylum fund, for the support of aged, disabled, and infirm soldiers, and have collected the views of several highly intelligent and experienced officers of the army, and such other information as was within their reach relative to the subject.

The committee conclude that it would be rather premature at present to make any definite resolution on the subject, and refrain from expressing an opinion as to the expediency or inexpediency of establishing a national army asylum, and therefore forbear to report to the House in detail, but they annex to this report letters of several officers of the army on the subject; and as the proposed fund to be raised is principally to be created by abstractions from the emoluments of the army, that it is fit and proper that a more general expression of its views and feelings should be had on the subject. It is also believed that next Congress can, in all respects, act more advantageously, as in the meantime public attention will be attracted to the proposed measure, and, from the expression of public opinion, may guide to the surest mode of accomplishing the best results, therefore have come to the conclusion expressed in the following resolution:

Resolved, That the Secretary of War be requested to collect and report to the next Congress the views of the army on this subject; and that the letters of the several officers, which accompany this report, be printed.

HEADQUARTERS OF THE ARMY, *Washington, January* 26, 1829.

SIR: I was duly honored with your communication of the 16th of last month, asking my opinion, in detail, upon the project embraced by a resolution introduced into the House of Representatives by the honorable Mr. Ramsay, of Pennsylvania, directing the Military Committee to inquire into the expediency of reporting a bill making provision for erecting and supporting an army asylum, by retaining from each officer, non-commissioned officer, and private in the army of the United States a certain portion of their monthly pay for the purpose of creating a fund to be called the "Army Asylum Fund," for the support of all aged, infirm, poor, and disabled soldiers who have served in the army of the United States since the American revolution.

To erect and support an asylum for the soldiers who have served in the army of the United States since the revolutionary war, who may be aged, infirm, poor, and disabled, I am clearly of opinion that no deduction from the pay of the officers, non-commissioned officers, and soldiers of the present peace establishment, that could be reasonably made, would be adequate to the purpose; yet I believe that it would be both highly provident and advantageous that a stoppage of ten cents on every five dollars of the pay of the officers, non-commissioned officers, artificers, musicians, and privates, might be made monthly, without

being much felt by the army, for the support of the destitute superannuated veteran and the invalid. But before a fund so created could be of sufficient magnitude to afford any relief, the soldiers mentioned in the resolution, in all probability, would cease to exist, or but few of them left to enjoy the benefit of the fund. The gross amount of the pay of the army is about seven hundred and fifty thousand dollars, which would yield, in the proposed stoppage of ten cents on every five dollars, fifteen thousand dollars a year. The plan which seems to me both fair and equitable is this: that the site and buildings necessary to constitute the asylum should, in the first place, be provided at the expense of the nation, and funds for its maintenance should also be advanced by such annual appropriations as might be found requisite, and the nation to be reimbursed by the stoppage, as herein proposed, on the pay of the army, as far as the amount so stopped may go to that end. If it should be determined to erect an asylum, it appears to me that the asylum ought to be for the benefit of the officers as well as the men, especially as the officers will contribute in proportion to the pay which will be allowed them respectively. If the present military establishment should be rendered permanent, a sum of fifteen thousand dollars a year could be raised from the pay of its members, as proposed; and if that sum were permitted to accumulate for ten years, a fund would be created of about two hundred thousand dollars, which, at an interest of five per cent., would yield ten thousand dollars; which, added to the annual contribution or stoppage from the pay of the army, would afford an annual revenue of twenty-five thousand dollars for the support of the asylum.

The question now occurs, how many invalids will this revenue support? It will not be too high to put the annual expense of each invalid at one hundred dollars; and if that sum is sufficient, we shall be enabled to take into the asylum two hundred and fifty invalids. But we must deduct something for the expenses of the establishment, such as repairs of the buildings, &c., &c., say one thousand dollars per annum; we shall then provide for two hundred and forty invalids. Now let us see what will be the probable number of invalids to be provided for according to the present state of the military establishment. It is found, from information received from the adjutant general, that one hundred and seventy-one is the number of men who are discharged annually on account of inability from disease to perform the duties of a soldier. Of this number, about thirty-five or one-fifth may be considered proper subjects for the asylum; so that in ten years the asylum would be full from the peace establishment, taking into consideration the number of those who enter it may die during the period of ten years; otherwise, it would be full in the seventh year. But we must take into consideration the augmentation of the fund, so long as the asylum is not full, accruing from the unexpended income; as, for instance, if we begin with thirty-five invalids, when the fund shall furnish twenty-five thousand dollars income; thirty-five invalids, costing only three thousand five hundred dollars, and the expenses of the establishment only one thousand, making in all four thousand five hundred dollars per annum, we shall have, to be added to the fund, the first year, the remaining part of the annual income unexpended, amounting to twenty thousand five hundred dollars; so that, instead of the whole of the annual revenue being consumed by the invalids in ten years, we may prolong the period to, perhaps, twenty years.

Inasmuch as the establishment will be exclusively for the military, I presume it will be placed under the direction of the War Department. All the officers and intendants necessary for the institution might be obtained from the army from among those who might not be fit for active service, and women, as nurses, from the wives of the invalids.

If such an establishment should be carried into effect, the District of Columbia appears to me to afford the best location, for these reasons: 1st. All the invalids and military pensioners come usually to the seat of government to apply for relief. 2d. The War Department, being possessed of the documents on which the claims to relief are usually founded, would be the natural place at which the decision as to the claim of the person applying for relief would be made; and if a favorable decision should take place, the persons to be relieved could be immediately sent to the asylum. 3d. The proximity to the national legislature would enable Congress to give such attention to the asylum as it might think proper, and by personal inspection of the establishment judge of its utility and of its management, and also enact such rules and regulations for its government as might by Congress be deemed proper. 4th. The mildness and healthiness of the climate are also worthy of consideration, as well as the central position of the District, as it regards the Union. At this time a site may be furnished at a very low rate, and the edifice erected with as little expense as probably at any other time. 5th. I would propose that the sum of one hundred thousand dollars should be appropriated to purchase a site and to erect the buildings, after a plan should be laid before Congress for its adoption. It is to be presumed that the edifices should be such as would be worthy of the nation; and while they should afford an asylum to the veteran and the invalid, they would stand a monument of the state of the arts and of the national munificence. 6th. The ground on which the establishment should stand should be of considerable extent, having advantages of wood and water, and not nearer than two miles to the city.

The subject is one in which we have no means of obtaining aid from books or statements in this country, and what is here proposed arises solely from my own views after much reflection.

With great respect, I have the honor to be, sir, your most obedient servant,

ALEX. MACOMB, *Major General commanding the Army.*

Hon. William Drayton, *Chairman of the Military Committee of the House of Representatives.*

Adjutant General's Office, *January* 12, 1829.

Sir: I have received your communication of the 16th of December, and should with pleasure have devoted earlier attention to the request of the committee if unremitted official vocation, especially toward the close of the year, had not imposed other obligations which could not very well be deferred.

The resolution submitted by Mr. Ramsey, of Pennsylvania, and to which my attention has been invited, refers to a subject that has always been regarded as touching deeply the honor and best interest of the service. I do not believe it to be practicable, however, by any *just* assessment on the present pay of the officers of the peace establishment to create an "asylum fund" adequate "for the support of aged, infirm, poor, and disabled soldiers" of any period of our military history *anterior* to the date of the creation of such fund. In pursuing a brief analysis of so important a project, I will first respectfully direct your attention to the annexed tabular exhibits, A and B, which it will be perceived develop some important

results to be considered in the contemplation of the scheme of an "army asylum fund," and which, as I conceive, when raised can only be applied prospectively.

The annual number of discharges on surgeons' certificates of disability may be regarded as the prolific class from which would issue the greatest number of pensioners on the fund proposed; but the number annually *admitted* from this class into the asylum would be far less, it is supposed, than the number of invalids so discharged from the army, for it is known that some who are discharged on account of disease or infirmity are restored to health, and it is believed that many are discharged who would have no possible claim to the bounty of an army asylum.

The increased vigilance of recruiting officers in the selection of recruits, and the enforcement of the penalties of the law whenever they accept any but "able-bodied men," have naturally tended to improve the quality of those who enter the service, and therefore to diminish the number of discharges on "surgeons' certificates." Further improvements in reference to the recruiting service, and in the reduction of the ratio of invalids, may be anticipated.

I have furnished the paymaster general and surgeon general with some useful official data which will have enabled each, respectively, to form estimates and make calculations in whatever refers to the ratio of assessment for the creation of the proposed fund, or to the classification of the number and character of subjects who may be supposed to have a claim to its bounty. These two divisions of the subject will no doubt be more minutely and satisfactorily examined by the chiefs of the two departments referred to, since the peculiar functions of the one have direct relation to *pay* and *estimates*, and those of the other are in immediate affinity to disease and disability incident to the soldiers of the army.

It may be useful to inquire, however, what period of service and what infirmity should entitle a discharged soldier to the benefits of the proposed army asylum fund.

I All *aged* or *infirm* and *disabled* soldiers who have received *honorable* discharges after serving ten years, provided they make application for admission to the asylum within two years after such discharge, or within one year after a third discharge from the service. 2d. Such disabled or infirm soldiers as may be honorably discharged on "surgeons' certificates of disability," and who may have been disabled or become infirm from *cases originated* after enlistment, and who shall have served in the army not less than two years.

These limitations of *time* as to *service*, &c., and the interval between a discharge and application for admission to the asylum, deserves consideration; for, if a soldier should be in health and strength at the time of his discharge, and subsequently, as a *citizen*, become infirm and unable to provide for himself from causes not originating in the service—in such a case ought he to be a charge on the bounty of the army asylum fund or to the civil institutions of the country?

II. When shall the dispensation of the bounty commence?

To commence twelve months after the period of the first assessment, and to be available to all who may have been discharged at and from the date of the first assessment, and who may be entitled to its benefits.

III. Where shall the asylum be established, and how governed and regulated?

The President of the United States be authorized to make the selection, appoint trustees, establish rules and regulations, &c.

It is probable that any plan which may be consummated would, in the progress of experiment, develop error and suggest improvement; but a great object is achieved in advancing a single step in legislation towards establishing an army asylum after the manner proposed by the resolution; leaving it to time to improve and perfect a scheme, the consummation of which is alike prompted by State policy and national benevolence. The moral effect of such an institution, especially in time of war, would be advantageously felt throughout the land. The aged parent, with better grace, would send forth his sons to the field of battle; the patriot citizen, with better hope of success, would exhort the youth of his neighborhood to repair to the colors of his country; he could then tell them, "If you survive fatigue and danger, and have no longer strength to procure your livelihood by labor, you will have no misery of poverty to apprehend, for none of you will be forgotten; you will pass an honorable old age with a moderate competence, which, without new privations, will continue the frugality of your military life. Your last days, passed in peace, will crown with the enjoyments of repose and security a career in which danger and activity in your country's service were the only charms."

I remain, sir, with high respect and consideration, your obedient servant,

R. JONES, *Adjutant General.*

Col. WM. DRAYTON, *Chairman of the Committee on Military Affairs, Ho. Reps.*

A.

Statement showing the annual number of discharges on account of expiration of service and on surgeons' certificates of disability from the 4th regiment of artillery for six years ending December 31, 1827.

Years-	DISCHARGES.		
	Expiration of service.	Disability.	Total.
1822	239	53	292
1823	301	52	353
1824	241	61	302
1825	226	93	319
1826	66	49	115
1827	210	65	275
Aggregate	1,283	373	1,656

NOTE.—It appears that the average number of discharges from the 4th regiment of artillery for six years on account of disability is 93, and for expiration of service, 321. If this ratio be applied to the regiments of infantry, the whole number of discharges from the army for six years for expiration of service and for disability will be 4,555; of which number the annual average number for the same period for disability is 171, and for expiration of service is 588. R. J.

B.

Statement showing the number of soldiers discharged from the army for the three years ending December 31, 1828, *on account of disease or infirmity, on surgeons' certificates of disability.*

	1826.	1827.	1828	Total.
Number of discharges on surgeons' certificates of disability.....	217	162	196	575

NOTE.—Of the above 575 discharges on account of disability, 10 were habitual drunkards, and 76 were recruits. R. J.

QUARTERMASTER GENERAL'S OFFICE, *Washington, January* 10, 1829.

COLONEL: Circumstances not within my control have prevented me from attending at an earlier period than the present to your letter of the 16th ultimo, and the resolution which it enclosed; and so much time having elapsed, I have thought it now unnecessary to attempt a detailed discussion of the subject; the more so, as the Paymaster General has, in a memoir which I understand he has presented to the committee, embodied all the data connected with the subject, and as I concur with him in the opinion that the project is impracticable unless the treasury furnish the greater part of the means.

But I have no doubt that the service would be rendered more efficient if some permanent provision were made for such indigent officers and soldiers as, having spent the better part of their lives in the public service, shall have become unfit for the performance of their duties, and consequently unable to support themselves in civil life; but I think it very questionable whether the project embraced by the resolution be the best means of attaining that desirable end. It occurs to me that the object would be much more readily accomplished by a slight extension of our pension system; the expense, at least, of founding an asylum, with that of collecting the subjects for it, would be saved. If we recur to our statute book we will find that all the officers and all the indigent soldiers who served in the revolutionary war, as well as all who have been disabled in service since, are already provided for. All who remain, with even an equitable claim upon the country for support, are those who, either from length of service or from diseases contracted in service, have lost the means and the capacity of obtaining a support for themselves; for I take it for granted that no free people can recognize the principle that the mere circumstance of a man's name having been borne for a short period upon the army list can give him a claim over any other citizen upon the public charity. If the committee agree with me that the class I have alluded to is the only one that remains to be provided for, it will readily occur to them that a far greater sum would be required to collect and support in an asylum the individuals composing it, than would be necessary to secure comfort to them at their homes, in the midst of their connexions and friends.

Many objections occur to my mind against the proposed system. Some of its most objectionable tendencies will be: 1st. To erect the military into a distinct class from the body of the citizens, by prolonging the military character beyond the period of service.

2d. To render idle and useless an entire class of men who, if allowed to remain in the bosom of society, might contribute something by their labors, however feeble, to their own support and the wealth of the community.

3d. To sever all social ties; for families being necessarily excluded from an asylum, and the subjects for it being collected from every part of a widely extended territory, the greater number of those admitted would be compelled to pass their lives among strangers, separated from those most interested in their welfare, and without the consolation of sharing their pittance with them.

It would, besides, be the commencement of a system which, though but little burdensome in the earlier stages, would grow with our growth, fasten itself upon our institutions, and perhaps become ultimately so extremely onerous to the State as, by uniting the public voice against it, to compel the government to abandon it, and thus render the situation of those whom it was intended to benefit worse than if the bounty of the public had never been extended to them.

An argument in favor of a naval asylum, which by no means applies to the army, will be found in the difference of pursuits and habits of the sailor and soldier.

The pursuits of the former cut him off from society and weaken, if not destroy, the ties which bind him to it, so that by the time he requires the assistance of others he has little regard for any one not of his own profession, and perhaps no one cares for him; and his improvident habits are such as to render it necessary that a guardian should have the control of his means; the asylum would therefore seem to me to be better adapted to his peculiar character and circumstances than any other mode of relief that could be devised.

The soldier, on the contrary, never loses sight of his connexion with society, but constantly looks forward to the time when he shall resume his place as one of its members; if he should become disabled, it seems conclusive to my mind that a small regular stipend would contribute more to his happiness, because he could share it with his family, and add more to his comfort than double the sum expended on his account in an asylum.

I may be wrong, but the more I consider the subject the more objectionable does the proposed system appear to me. But should the legislature, in its wisdom, think proper to adopt it or to extend the pension system and tax the army for a part of the means necessary, I can only add, that as an individual I shall cheerfully contribute to the fund whatsoever may be considered just and proper.

I have the honor to be, sir, your most obedient servant,

TH. S. JESUP.

Hon. WILLIAM DRAYTON, *Chairman Committee on Military Affairs, House of Representatives.*

SURGEON GENERAL'S OFFICE, *January* 7, 1829.

SIR: In compliance with the request contained in your letter of the 16th ultimo, I beg leave to state that by the enclosed return marked A, it appears that the average number discharged from the army on surgeons' certificates of disability during 1826, 1827, and 1828, is 190 per annum. From the return marked C, it appears that of the 192 discharged during the past year about 150 were disabled in the service, and would of course be entitled to the benefits of the proposed army asylum. From the return marked B, it further appears that the average number discharged per annum, in consequence of the expiration of their term of service, from one regiment of artillery and one of infantry, during a period of five years, is about 55, giving an average of 603 per annum from the whole army. Of these it may be estimated that about one-fourth, or 150, would also become subjects for the asylum from "age, infirmity, or poverty." If we suppose that 500, or one-third of these, should die in five years or fail to apply for admission, it would leave 1,000 at the expiration of that period, which number would be rather increased than diminished thereafter, out of the 300 subjects of the asylum annually discharged from the army.

It is understood that the navy pension, equal on an average to $72 per annum, will about support those who enter the navy asylum now erecting, at which rate the amount required per annum for that proposed for the army would be $72,000. It may be estimated that on an average four hospital wards would be occupied, requiring twelve nurses, at $3,000 per annum. The expense for instruments, medicines, hospital stores, bedding, furniture, &c., may be stated at $3 per man, equal to $3,000 per annum; and one surgeon, and one steward, and one wardmaster, at $2,500; making a total of $80,500 per annum.

The aggregate of the present army is 6,000, and it would therefore require a stoppage of about $1 12½ per month, or $13 50 per annum, from each officer, non-commissioned officer, musician, and private to meet the current expenses.

Admitting, however, that the number has been overestimated one-third, it would of course require a stoppage of 75 cents per month from each, being 275 per cent. more than that authorized by the acts of July 16, 1798, and March 2, 1799, "for the relief of sick and disabled seamen," which acts require a stoppage of 25 cents per month from each person in the naval and merchant service of the United States. For the purpose of carrying the plan into operation, should a stoppage of 25 cents per month be made from each officer and soldier, it would yield on an average $16,500, as the aggregate of the army actually in service is about 5,500.

According to the above estimates there would be, at the lowest calculation, about 350 on the pension list agreeably to existing laws, the average of whose pension would be $60 per annum; and if this amount of $21,000 per annum be also appropriated to the support of the asylum, it would leave a deficit of $42,500 per annum for the current expenses if the number be 1,000, or of $10,500 if the number should be but 600.

On the first estimate it would require an accumulation of the fund of $16,500 for 50 years to yield this amount, at an interest of five per cent., and for 13 years on the second estimate, before the proposed plan could be carried into effect.

These calculations are made with reference to the existing military establishment alone, as no data are known from which to estimate the number that would be entitled to the benefits of the asylum if extended to "all aged, infirm, poor, and disabled soldiers who have served in the army of the United States since the American revolution." The establishment during the late war was equal to about 53 regiments, and though perhaps not half full in any one time, would no doubt furnish more subjects for this charity than could possibly be supported by any reasonable deduction from the pay of the army.

In respect to a suitable building for the purpose proposed, it is believed that in erecting the navy asylum referred to, every possible arrangement has been adopted by the chief of that department to insure its completion on the most economical terms, consistent with the importance and permanency of the institution.

Judging from this, therefore, it may be stated that an army asylum to accommodate 600 men would cost about $130,000, and one for 1,000 about $175,000, which would require the further accumulation of the army asylum fund of from eight to ten years, if the means of erecting the building are to be raised from this source and no greater deduction of the pay be made than is above estimated.

If, however, the several sums to be raised in this manner be from time to time invested in stocks or other productive property, it would, of course, require a shorter period to raise the amount above mentioned.

Very respectfully, your obedient servant,

JOS. LOVELL, *Surgeon General.*

Hon. W. DRAYTON, *Chairman of Committee on Military Affairs.*

A.

Statement showing the number of men ordered to be discharged from the army on surgeons' certificates of disability in the years 1826, 1827, *and* 1828.

1826	217
1827	163
1828	192
Total	572
Average per annum	190

B.

Return of the number of men discharged from one regiment of infantry and one of artillery on surgeons' certificates, and from the expiration of their term of service, during the years 1823, 1824, 1825, 1826, *and* 1827.

Years.	Expiration of service.	For disability.
1823	138	25

Not entitled to benefits of the asylum	45
	147

The recruit is inspected by a surgeon on his enlistment, and again on his joining his corps or regiment. The second examination usually takes place within from three to nine months after enlistment, and as those discharged within this period are for the most part disabled before entering the service, they, as well as habitual drunkards, &c., are not considered entitled to the benefits of the proposed asylum; such are marked * on the above list, and amount to 45; leaving 147 per annum disabled in service.

PAYMASTER GENERAL'S OFFICE, *City of Washington, January* 3, 1829.

SIR: In compliance with the request contained in your letter of the 16th ultimo, I have the honor to submit the following remarks on Mr. Ramsey's resolution: "That the Committee on Military Affairs be instructed to inquire into the expediency of reporting a bill making provision for erecting and supporting an army asylum, by retaining from each officer, non-commissioned officer, and private in the army of the United States, a certain portion of their monthly pay, for the purpose of creating a fund, to be called 'The Army Asylum Fund,' for the support of all aged, infirm, poor, and disabled soldiers who have served in the army of the United States since the American revolution."

An asylum for "aged, infirm, poor, and disabled soldiers" has long and earnestly been desired, not only by those who may possibly require its benefits, but by all who have witnessed the sufferings of that meritorious class of public servants; and several attempts have been made by the officers to get up something of the kind by voluntary contribution, all of which have been abandoned, under a belief that the amount they could afford to contribute would not be sufficient to accomplish the object.

In other services—the British for example—the pay of the army is graduated with a view to deducting for all necessary supplies, which the government furnishes at fixed prices, and with a view also to the support of an institution similar to the one proposed by the resolution, the expenses of which are principally paid out of the poundage of the army; but in our service no such deduction was contemplated in graduating the compensation. It follows, therefore, that unless Congress erred in apportioning the pay to the necessary current expenses of its members, it cannot bear to be heavily taxed for other purposes. I am of opinion the deductions should not exceed two per cent. from the pay of officers, and twenty-five cents per month from the pay of non-commissioned officers and privates, which would produce annually, supposing the establishment to be full, twenty-one thousand nine hundred and forty dollars and twenty-four cents.

It is difficult to calculate with confidence the cost of an institution that would afford the proposed relief to the extent contemplated by the resolution; but I apprehend, with much deference to the opinion of the mover, that it will far exceed his estimate. The greater part of the rank and file of the army who have been disbanded or discharged since the revolution have no other means of support than their daily labor, which in health is not more than sufficient to defray current expenses, and quite inadequate to make provision for old age and infirmity. I am therefore of opinion that the number of this class who are entirely destitute, and who would be entitled to support under the resolution, would amount to some thousands, and that the pay of the army could not sustain a deduction that would be equal to the cost. But, apart from the impossibility of supporting them out of the limited fund above stated, would it be just to tax the present army with what, considered in the light of charity or as a debt of gratitude, should be paid by the nation?

Assuming, therefore, that none will be admitted but such as contribute to pay the cost, the inquiry is, what will be its probable amount?

If Congress permit the public barracks at Carlisle or Sackett's Harbor to be used, one great item of expense may be saved by establishing the asylum at one of these places.

The data for estimating the probable number of invalids of the present army is very imperfect; much, therefore, must depend on conjecture. The average number of rank and file annually discharged by expiration of service is over 600, and on surgeons' certificates 190; about 150 of the latter in consequence of disability contracted in service, and certified by the surgeons to be incapable of performing military duty, all of whom will be subjects for the asylum. To these are to be added such as are not invalids at the time of discharge, but subsequently become so The number to be admitted annually will probably be about two hundred; of these perhaps one-half will require support for life, and the remainder, on an average, one year. If this be taken as a basis, it follows that the number to be provided for will increase annually in the proportion of the number of incurables. It is difficult to say when it would arrive at the maximum; but assuming that all discharged invalids will be between the ages of twenty-one and forty-five years, that the average continuance of life in such cases will be one-half the term of that of

persons in ordinary health, and taking the calculation of the Pennsylvania Life Insurance Company as a guide, the maximum would be attained in about ten years, and would be something more than one thousand; but for convenience I will assume the round number.

It is believed that at Carlisle or Sackett's Harbor food, clothing, fuel, bedding, medical attendance, and a small allowance for tobacco may be furnished at a cost of sixty-five dollars each per annum; making the annual expense of the assumed number $65,000; to which is to be added the amount required for officers, all of whom, except such as may be selected to manage the institution, will be more agreeably situated as *out* pensioners. If we take the United States pension list as data for calculation, the rate of officers' pensions will be $240 per annum; and the proportion of officers to non-commissioned officers and privates on that list being as one to twenty, the annual cost of the officers will be $12,000 and of the institution $77,000; exceeding the amount to be deducted from the pay of the army, as stated above, $55,059 76. It is believed the excess can only be provided for out of the funds of the government; and if the committee shall be of the same opinion, and disposed to recommend such provision, I beg leave respectfully to submit the following suggestions for consideration:

1st. That three months' pay be withheld from all recruits after the passage of the law until the expiration of their service, which shall not be subject to any deductions on account of the government nor to the payment of sutlers' claims, but in cases of desertion shall go to the asylum fund. This, according to the Adjutant General's report on the desertions for four years ending with 1826, would produce near eleven thousand dollars.

2d. That all fines and forfeitures of pay by sentence of courts-martial shall be carried to the credit of the fund; which, judging from the data I have been able to collect, will produce about eight thousand dollars per annum.

3d. There will still be an excess of thirty-six thousand dollars to be provided for. This may be done by the formation of invalid companies from such as are capable of doing garrison duty, and taking care of public property; and it is respectfully submitted to the committee whether it will not be good policy to create such companies. The Secretary of War has stated in his report that the present force is insufficient to protect the frontier and garrison the military posts without interfering with the schools of practice.

It is a common opinion with military men that skill in their profession is not to be retained, much less acquired, by an army serving in small detachments. The preparation of military material in the workshops and laboratory, the operations necessary in conducting sieges, and the intricate movements of an army in time of war, are not to be practically learned by small detachments that find full employment in guarding public property, doing garrison police, and practicing the "manuals of the artillery and infantry;" and if not by these, surely not by such as are employed "in developing the capacities of the country for internal improvement, and in building up of works which belong exclusively to the department of political economy."

By creating invalid companies to garrison military posts one regiment may be relieved, and, I think, profitably employed in appropriate professional duty, the acquirement of military knowledge. If the last suggestion should not be thought advisable, it will be necessary, in order to bring the expense within the means stated in the others, to limit admission, in the cases of applicants discharged on surgeons' certificates, to entire disability, and in other cases to such as have served faithfully three or four terms of enlistment.

If the committee think it advisable to recommend the passage of a law, it will perhaps be better to leave the internal government and police of the institution to the regulation of a board of managers to be named by the President or Secretary of War. The compensation of the governor or manager and assistants should be fixed by law, and a treasurer designated. All funds obtained from either of the sources named should be carried to the credit of the asylum on the books of the Treasury Department, and should be drawn out on recommendation of the treasurer for payment of bills by warrant of the Secretary of War, which will prevent any improper application of the funds.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

Hon. WM. DRAYTON, *Chairman of the Committee on Military Affairs.*

20TH CONGRESS.] **No. 407.** [2D SESSION.

REPORT OF A GENERAL INSPECTION OF THE MILITARY POSTS OF THE WESTERN DEPARTMENT, AND REMARKS CONCERNING THE MILITIA OF THE UNITED STATES, BY BREVET MAJOR GENERAL EDMUND P. GAINES.

COMMUNICATED TO THE SENATE FEBRUARY 27, 1829.

To the Senate of the United States:

In compliance with a resolution of the Senate of the 20th instant, I transmit herewith a report from the Secretary of War, with the inspection reports of Brevet Major General Gaines for the years 1826 and 1827, relating to the organization of the army and militia of the United States, with the request that the original documents may be returned to the department of War at the convenience of the Senate.

JOHN QUINCY ADAMS.

WASHINGTON, *February* 26, 1829.

DEPARTMENT OF WAR, *February* 25, 1829.

SIR: I have the honor of transmitting herewith the inspection reports of Major General Gaines for the years 1826 and 1827, together with the remarks of that officer concerning the militia of the United States, dated December 2, 1826, and addressed by him to the late Major General Brown.

These being original documents, it is respectfully requested that they may be returned to this department after the object of the resolution of the Senate of the 20th instant has been attained.

I am, with great respect, your most obedient servant,

P. B. PORTER.

The PRESIDENT *of the United States.*

Report of a tour of inspection commenced on the 11th December, 1826, and completed in April, 1827, by Edmund P. Gaines, major general by brevet in the army of the United States.

THE MISSISSIPPI RIVER.

In my report of December, 1823, I stated the causes by which the navigation of this river was obstructed, and gave it as my opinion that most of the obstructions could be removed at a moderate expense.

The efforts which have since been made (contrary to my suggestions) having completely failed to effect this important object, I think it my duty to refer to my former report, and to submit some additional views resulting from my recent inspection of this mighty river.

1st. It is a fact worthy of notice, and necessary to be borne in mind, that the destructive excavations of the low grounds of this river commence, in almost every case, not upon the *surface* of the adjacent *timbered land*, but below the summit of the river banks, by which they are constantly undermined, and by which great quantities of trees are frequently precipitated into the boat channel, whereby the obstructions called *planters* and *sawyers* are invariably formed.

The fact is well worthy of notice, to show the primary cause of the obstructions, and that the clearing of the low grounds, by the entire removal of the timber therefrom, will tend not in the least to increase the destruction of the banks or adjacent low grounds, (as might be apprehended upon most other rivers where the excavations commence upon the surface,) but will in time effectually remove the cause of every obstruction dangerous to the navigation, and will, moreover, tend to retard the encroachments of the river upon the banks and low grounds, for the weight of the timber upon the banks evidently hastens their destruction whenever their base is invaded by the undermining current.

2d. There are one hundred and fifty boats upon the Mississippi and its dependent streams, including such as are serviceable, with such as are on the stocks, and in part undergoing repairs. Those at present fit for service are estimated at one hundred and ten. Many of these consume twenty-four cords of wood per day; others from twelve to twenty cords; altogether averaging near twenty cords each; making 2,200 cords per day. This consumption of fuel, to continue as it usually does, would amount to 462,000 cords in seven months; and when to this is added the quantity consumed by twenty-five small boats that usually run from ten to eleven months in every year, it will be found that more than half a million of cords of wood are consumed by these steamboats in one year. It is therefore confidently believed that this supply of timber for fuel annually will insure the entire removal of all the timber on the banks of the river in the course of a few years more, provided the wood-cutters are allowed the use of the public land for a reasonable term, (say for twenty years,) on condition that they shall cut off all the timber within a given distance of the river in the first year of their lease, and keep it cut beyond the encroachments of the river during the residue of the lease. This condition will be necessary to induce them to cut all sorts of timber, much of the largest of which is now left standing; such as cottonwood, sweet gum, and elm, which do not make good fuel, but which make the most dangerous of sawyers and planters.

TO CLEAR OUT THE OBSTRUCTIONS OF THE RIVER.

Should the plan heretofore proposed of employing steamboats with their commanders and crews by the month for this purpose be deemed objectionable, as I apprehend it is so considered, I beg leave now to offer the best substitute in place of that plan which, upon further inquiry and reflection, has suggested itself as most likely to effect the desired object.

1st. Let the river be first carefully explored and surveyed by such experienced engineers as may have had an opportunity of becoming acquainted with its general character, and let it be laid off in sections of from 30 to 50 miles each.

2d. Let each section be contracted for, *to be cleared out only by steamboat commanders and pilots,* under the direction of the engineers by whom the river shall have been explored and surveyed.

3d. Let no one be interested in a contract, or accepted as security for the faithful performance of any such contract, but such men as are well known to be either owners, commanders, or pilots of steamboats. These are not only more favorably and deeply interested than any others, but they have had the best means of being acquainted with the really dangerous obstructions, and will be the most likely to remove them and to accomplish the work in the shortest possible time, and in the best possible manner.

The dangerous obstructions may in this manner be cleared out in the course of two or three years, (principally in the months of October, November, December, and January,) without an expense of more than *four hundred thousand dollars;* a sum scarcely sufficient to make a good road for one hundred miles, or to build a second rate fortification; a sum which would not much surpass, even in a *pecuniary point of view,* (to say nothing of other estimates of value,) a first rate steamboat with her cargo, consisting of a battalion of men, with a year's supply of pay, clothing, subsistence, ordnance, and ordnance stores for an active campaign, most if not all of which might be carried on board of a steamboat of 800 tons burden, and all of which might be lost by being pierced by a single planter or sawyer in the middle of the river for want of the improvements which a proper application of this sum would effect. For such is the ever turbid and ever changing nature of the Mississippi river, that no heavy articles of cargo that have once been engulfed to the bottom of its channel have ever been recovered.

Our fisheries have been justly esteemed by us as a valued nursery for our seamen. We have with equal propriety viewed the ocean itself as the common highway of nations; and we have, upon principles of natural law, claimed, fought for, and triumphantly defended this inalienable right, this inestimable privilege, tending to the benefit of every citizen, and to the aggrandizement of many of those of our Atlantic cities.

The Mississippi river, since its current has been conquered by steam, has become something more than a *nursery* for American seamen, and more than a common highway of nations to the people of the western States—it is the only outlet, and therefore an indispensable outlet, for the productions of near half the United States; and it has become a *great* nursery and a school for seamen and soldiers—a school in which there are already many able professors and thousands of scholars—a school in which hundreds of native citizens of the west have already become able and exemplary commanders, mates, civil engineers, artificers, sailors, and firemen. These steamboat officers and men, from the necessary habitual vigilance and attention which their duties by day and by night demand, directing the overwhelming power of steam against a current hitherto unsubdued, are in the daily attainment and practical exercise of various and essential military duties, with the exact discipline which the land and naval service alike require during a period of war, preparatory to actual combat. This steady discipline is improving in the course of every voyage. It is by no means confined in its operation and salutary effects to the officers and crews of steam boats; but it is imparted, in no small degree, to the passengers, and particularly so to the deck passengers of every boat. These, often amounting from 350 to 400 men on board of one boat, voluntarily yield to the control of the commander, and profit by the vigilance and efficiency of his command.

The consequence is, that in the course of a voyage many of the passengers acquire sufficient knowledge of the duties of officers and men to render valuable service in various situations on board; and what is equally worthy of notice is, that in the course of four voyages, where there were many deck passengers, I have witnessed less of riot and intemperance during the whole of those voyages than I have often witnessed among the crews of a few flat bottoms or barges, prior to the introduction of steambots, in a single hour. Thus it is that knowledge, order, and subordination are steadily flowing from the great western school, of which the Mississippi river forms the theatre and basis, and the steamboats the edifices. Their great cost and incalculable utility, in peace and in war, call aloud for their protection against *planters* and *sawyers*.

FLOATING BATTERIES AND STEAMBOATS.

The great revolution which the application of *steam* to ships and other large vessels has already produced in the commercial intercourse of our States and neighboring nations, and the still greater revolution which this mighty power is obviously destined to produce in military operations upon land and water, and particularly so in whatever regards the *attack and defence of seaports*, and of every description of military works upon and in the vicinity of rivers and bays, admonish us of the necessity of being prepared for the great and inevitable change. For this purpose I beg leave to refer to my report of December, 1823, in relation to the defence of New Orleans, and to that of December, 1824, in reference to the harbors of New York and Boston, recommending the construction of floating batteries to be moved by ordinary steamboats, and to add the result of my subsequent inquiry and reflection upon the subject.

1st. It is believed that a first-rate steam engine will, without wind or current, propel a seventy-four-gun ship at the rate of more than one mile in six minutes, or three hundred yards in one minute; and that, with the most approved sea-coast carriages, a heavy gun, say a 32, 24, or 18 pounder, cannot, after the first fire, be loaded, pointed, and fired at such an object with effect in much less than one minute. Such a vessel could not be expected to remain within the effective range of any one battery more than for about twelve minutes, nor within the point-blank range for more than six minutes; and, therefore, but twelve, or at most thirteen shots could be fired from any one gun with any chance of success, or other than random, even if the gun were placed upon a salient angle of the fort or battery, and but few could be so placed, where it could be brought to bear upon the ship during her continuance within a mile and a quarter of the fort or battery. But as the firing of heavy guns at an object moving with such extraordinary celerity must always be attended with great uncertainty, it can scarcely be expected that more than three-tenths of those shot would hit the hull or rigging, nor that more than one-tenth of these would be likely to penetrate a vital part of the ship.

2d. It is believed that a first-rate steam engine will propel a seventy-four-gun ship up the Mississippi river, from the Balize to New Orleans, at the rate of one mile in eight minutes, or 217½ yards in one minute.

3d. It is therefore deemed to be impracticable, with all the fortifications designed and constructed for the protection of the large seaport towns of the United States, to secure any one of them from assault and capture by a respectable enemy, provided with a strong naval force aided by steam, without several floating batteries on our part towed or propelled also by steam.

4th. And consequently that New Orleans, with every other large seaport town in the United States, will require for its security, in addition to the fortifications designed and constructed, from two to four large floating batteries to carry from 80 to 160 heavy guns each, and to be towed or propelled by common steamboats.

These floating batteries should be built under the guns of our fortifications, and retained on the stocks under cover and in readiness to be launched on the first appearance of an enemy. With the aid of two or three ship-carpenters employed at each post a floating battery could be built at each, principally by the troops, under the direction of our scientific officers, with but little expense beyond the price of the requisite timber and iron.

The construction of the proposed floating batteries will be found to be so simple that any desirable number of them, it is believed, whenever approved models are furnished, will be obtained by contract for not much more than double the current value of the timber for their construction. But it will take several months to provide the necessary timber, season it, and put it together; and should this work be delayed till the approach of war, our richest seaport towns and our best fortifications may be in the hands of the enemy, for want of these floating batteries, before they are in readiness for service. I am deeply impressed with a belief that there is no means of defence that will be found so formidable, and at the same time so simple in its construction and application, and altogether so economical, as these batteries when constructed, as I presume no practical man will doubt that they should be constructed, with a view to be propelled only by *steamboats not permanently attached to the batteries, but to be temporarily attached to and at*

any moment separated from them as occasion may require. In this case, by far the most expensive part of this species of defence, the *steam engine*, will be employed in the transportation of merchandise and of munitions of war until the actual approach of an enemy renders it necessary to wield these batteries against him; and even then the engines by which they are wielded will be kept principally out of the range of the enemy's shot; for, in approaching an enemy, the steamboats by which the batteries are propelled being in the rear of them, and each battery being, as I presume it will be, near ten times as large as a steamboat, the latter will be completely protected by the former from the enemy's shot in approaching him; and after being disengaged from the batteries, the steamboats would take a position in the rear, where by suitable cables they would, without any risk, manœuvre the batteries to the right and left and to the rear.

Without such batteries it is very doubtful whether the strong and beautiful *Fort Jackson*, with a similar one such as I had the honor in December, 1823, to recommend on the opposite bank of the river, at or near Fort St. Philip, will be sufficient to prevent a strong naval flotilla, propelled by steam, from passing with a force sufficient to capture the city of New Orleans. But these forts, aided by two floating batteries such as I have recommended, are deemed to be sufficient to prevent the passage of any such force without its probable loss of more than half its flotilla. The same may be said of the harbors of New York, Philadelphia, Boston, Norfolk, Wilmington, N. C., Charleston, S. C., Savannah, Ga., Pensacola, and Mobile.

It is confidently believed that no experienced officer of the navy or army of the United States, after a careful investigation of our means of defence, with those likely to be employed against us in the attack aided by steam, would venture to pronounce either of those important posts *secure*, or even in a very respectable state of defence, without at least two or more large steam frigates or other floating batteries; and that such as I have recommended will be found to be more efficient, and not more than one-tenth of the expense of steam frigates.

With these impressions, founded indeed upon limited experience, but up to careful inquiry and the best of my judgment, I shall, I am sure, be pardoned for the earnestness with which I have reiterated my views in regard to this most essential means of defence. If I am wrong, I am more than willing to receive the punishment which an officer of my age and rank must necessarily incur when his propositions are proven to be unreasonable or visionary. But if, as I confidently believe, I am right, or even if my propositions are deemed to be but partially doubtful, then I am justified in the conclusion that no time will be lost in the adoption of measures necessary at least to test the *expense* and *utility* of the proposed means of defence.

CONSTRUCTION OF TEMPORARY WORKS BY THE TROOPS.

We have at this time but few officers in the army who are not qualified (many of them indeed highly qualified) in theory, and some in practice, to plan and to superintend the construction of field fortifications, or of any such temporary works of defence, as in a state of war it often becomes the duty of officers of every arm and of every grade to plan and construct for the purpose of immediate protection against an enemy of superior strength. Whenever a regiment, a guard, or a detachment, is unexpectedly menaced by such an enemy when distant from the main army, and in the absence of any officer of the corps of engineers, which has often been and must often be the case, then this duty necessarily devolves on the immediate commandant there present, whether of cavalry, artillery, infantry, or riflemen. This is an indispensable duty which there is no possible means of obviating, and which grows out of the circumstances and casualties of a campaign near an enterprising enemy.

It is a duty of frequent occurrence in the course of perhaps every campaign. It is therefore deemed to be as necessary to prepare in time of peace for the efficient discharge of this duty as of any other. Of all the temporary works of defence, as I have endeavored to show, none will become more essential to the security of our great seaports than floating batteries. These may be constructed at every fortification by the officers and men of artillery and infantry, aided by a few ship-carpenters; and one of these batteries, at least, for each port may be completed within one year after the receipt of the requisite timber and other materials for the purpose. And this important work may be accomplished not only without impairing the discipline of the troops, but it will tend rather to improve their discipline and enhance their moral worth.

I am well aware of the opposition which has been made by some very respectable but inexperienced officers to the employment of soldiers to work upon roads, or in the cultivation of corn-fields at military posts, even though it be only such as happen to be located in the midst of the wilderness, far distant from the essential resources of civilized settlements. The real evil, however, results not from the *labor* to which some have objected, *nor from the application of this labor to the cultivation of corn-fields*, or roads, or in making hay for the subsistence of the public cattle and horses required to be kept at those distant posts; but this frightful evil is to be found in the remoteness of those positions, and in the continued location of the same corps at those posts for several years in succession without change or relief. To this I may add another and a more powerful objection to the continuance of *infantry* or *artillery* at any of those dreary posts, viz: *They are too far distant from the posts or places at which there is even a remote probability of our ever seeing an enemy other than the Indians, to meet whom in war another description of force*, namely, *mounted gunmen, must be employed* to supply the place of infantry or artillery; and these, corps will necessarily be placed, where they should now be placed, on the maritime or northern frontiers, where we are most likely to be assailed by the *regular troops* of a civilized nation. "In peace prepare for war!" This is a maxim to which we cannot conform so long as a great part of our regular force is stationed from 300 to 1,200 miles distant from any place at which there is the least probability of their meeting with an enemy consisting of regular troops. And should war be suddenly commenced against us by any foreign power late in autumn, then it may rage for five or six months upon the sea-coast or northern frontier before the regiments at some of those wilderness posts could possibly be relieved and drawn to the theatre of war. Under these circumstances, I cannot report the troops of my command as I should have it in my power to report them, (if posted as they should be,) *always ready for action.*

The infantry, as well as the artillery, should be stationed at or in the vicinity of the great seaports, where they should be instructed in whatever regards the attack and defence of such places, where they should occasionally assist in the construction of every sort of works of defence; and it will be found to be no very inconsiderable acquisition to these corps to have received a full measure of instruction upon the very spot where the greatest trial of their prowess may soon become necessary. I should then, ere

long, have the pleasure of reporting the whole of my command *ready for action*. Occasional labor, even in the cultivation of corn-fields or in making roads, I contend, will not impair the discipline or efficiency of the troops, unless the labor is permitted to continue for more than one-third of their time, or more than ten days in every month; for when troops have been well instructed in their duties *under arms*, fifteen days' drill in every month is amply sufficient to perfect and continue them in a very high state of discipline; much less probable is it, then, that their efficiency would be impaired by ten days' labor per month on works of defence—works from which officers and men would derive constant instruction, and that of the most useful kind, preparatory to actual war. Fighting is an important duty, and it is that upon which the mind's eye should constantly rest, as the great end and aim to which all our instruction and all our efforts must be directed. But limited in the extreme must be that man's knowledge of the *great art and practical business of war* who permits himself to imagine that *fighting* is all a soldier has to do in his country's defence, or that he has nothing to learn but the use of his legs and of his fire-arms. Experience proves the contrary. Experience proves that during the whole of an active campaign, in the presence of a powerful enemy, the soldier of a well instructed army has generally to encounter at least ten days of hard labor for every one day, if not for every hour, of actual fighting. Fighting is very properly considered to be the least burdensome and the most acceptable duty a soldier has to perform in the course of a campaign; even the idle and licentious soldier, who is often reproved and punished for neglecting to keep his arms and equipments in order for action, is frequently found among the first to push into the hottest of a battle, and among the last to retire, for he will fight when he has lost the moral worth to discharge with fidelity his other duties. But if an army consisted principally of such soldiers, its transition from civilization to barbarism would be speedy and inevitable. The savage warrior spurns at the *labor* of *preparation* other than that which his physical *daring* and his ever-cherished desperate purpose of vengeance and of conquest afford him. With the instructed soldier fighting is the most acceptable, because it is the most novel, of his duties, and because it may be considered as forming the closing scene of the military drama. They embrace it with cheerfulness, whilst the *commonplace drudgery* of every day for many months, and often of every hour for many days and nights in succession, in the work of *preparation*, is less supportable and more constantly trying to every faculty upon which fortitude and moral courage are based. And it is just as necessary to instruct officers and men in the proposed duty, and to habituate them to the *labor* of preparation for the sublime and often long-continued and agonizing struggles of a siege, as in the more fashionable and more courtly exercises, for the oftentimes equally important but more simple and brief scenes of a field fight.

January 11, 1827.—Commenced the inspection of the military posts in the vicinity of Pensacola, consisting of Fort Carlos, at the Barrancas, (at present occupied by the navy,) and Cantonment Clinch, garrisoned by five companies of the *first*, and one company with a small detachment of the *fourth*, regiment of infantry, commanded by Colonel Duncan L. Clinch. Continued my inspection at these places until the 13th of January, resumed it on the 11th of February, and continued it until the 15th of that month.

POSITION OF CANTONMENT CLINCH.

Upon the brow of the first ridge of table land seen in a northerly direction from the middle of the bay, three miles west of the city of Pensacola, near Galvas spring. It is surrounded by an extensive body of very poor, dry, sandy land, rising gradually, at an elevation of from three to five degrees from the horizontal plain, bordering the bay to the cantonment, where it is near sixty feet higher than at the bay. From the north side of the cantonment the table land presents a handsome plain for a quarter of a mile, beyond which is a succession of sand hills and vales of gentle elevations and depressions, producing little or no other timber than pines, in part of a dwarfish appearance, with some scattering black-jack.

Galvas spring affords for the troops a very ample and convenient supply of excellent water. From this spring a navigable creek meanders between the cantonment and bay, distance about two thousand yards, affording a sufficient depth of water at flood tide for the smaller class of coasting vessels. These advantages, added to a fine view of the bay, with a full exposure of the cantonment to the sea air, render this position unquestionably healthy, and more desirable than any other in West Florida for the location of a corps of reserve for the protection of Pensacola, for an hospital, and for a safe retreat from disease in war and in peace. For these purposes it would require good brick barracks, with a few small castles or block-houses, or some other works of defence, for its security in time of war. But inasmuch as the Barrancas and the western end of St. Rose island form the natural theatre at which the defence of Pensacola must, if possible, begin and end, and as with good barracks there can be but little doubt that a position at the Barrancas will be nearly as healthy as at Cantonment Clinch, it may at least be advisable to make a fair experiment to determine its real character in respect to health before permanent barracks are erected at either place. Some few cases of yellow fever occurred at the Barrancas in the summer of 1822, but this may have been owing to causes in nowise connected with the localities of the place. It had been before reputed to be healthy, as indeed Pensacola had been. But one season of yellow fever has been known at either place in the last fifty years. At Cantonment Clinch, on the contrary, it is believed that no case of yellow fever ever occurred, although several persons attacked in Pensacola in 1822, and afterwards conveyed to the cantonment, recovered, and others died, after suffering for many days at a temporary hospital which was daily attended by their messmates and others, not one of whom ever took the fever at this cantonment. It is reported that few cases of bilious fever ever occurred at this place; nor has this disease been common, or often marked with its most dangerous type, at the Barrancas.

Inspected the battalion of the first infantry, consisting of five companies, commanded by Major D. E. Twiggs, which I found to be, in most respects, equal, but in no respect superior, to the battalion under Brevet Major Kerney, as inspected by me at Bellefontaine, Missouri, June, 1826, viz:

Police.—Excellent, particularly so in messing, and in the condition of the barracks, and of the clothing, arms, and equipments generally in use. The excellence of the police of this battalion was, moreover, finally exhibited in the officer-like and soldierly appearance of the troops under arms, on drill, and on guard, and other duties. The sick of the battalion appeared to have been treated with care and skill by Assistant Surgeon Randolph.

The old books were found to be incomplete; new books have been obtained, but the opening of them is suspended, in the expectation of obtaining from the Adjutant General a proper form. The general regulations upon the subject of company books are radically defective. The number of books required

is more than double the number that is necessary or proper. The old form, in use previous to the late war, is much more concise, and, in all respects, more perfect than the present; but the single fact that scarcely any two regiments in service construe the regulations alike in reference to one of these books, is equal to volumes of testimony to prove that the regulations in this particular are extremely imperfect. Regulations that admit of such misconstruction are something worse than useless; but imperfect as they are, if forms are furnished, there can be no doubt but they will be faithfully complied with.

Instruction, in theory and in practice, conformable to the late prescribed systems. This was very satisfactorily exemplified in the striking regularity and systematic accuracy with which every duty witnessed by me was discharged, particularly on drill and on guard, by officers and men. The battalion was ably exercised by Major Twiggs, and after him by each one of the captains present, as well as by several of the lieutenants, in a manner which evinced a degree of practical knowledge that nothing short of well-disciplined habits of attention could effect. These remarks are intended to apply to *every duty under arms as infantry, preparatory to meeting an enemy in battle.* As artillery, this battalion has not extended its practical knowledge beyond the common uses of the *field-piece*, which I am assured the officers and most of the men can exercise, load, and fire with ease and accuracy. Lieutenant J. J. Abercrombie, adjutant, discharged his duty with ability. The following named company officers were seen on drill, each of whom proved himself to be well acquainted with his duty, and most of them highly qualified to impart to their commands the results of their experience. In the relative qualifications of these officers there appeared to be some shades of difference, but not so striking in the drill as to justify any particlar notice, until another inspection shall afford more conclusive evidence of their respective merits, viz:

Captain W. V. Cobbs, commanding company C.
Captain G. Loomis, commanding company F.
Captain William H. Ker, commanding company D.
First Lieutenant W. R. Jouett, commanding company G.
First Lieutenant John M'Kenzie, commanding company E.
Second Lieutenant William Reynolds, of company D.
Second Lieutenant T. Paige, of company F.
Second Lieutenant Nathaniel C. Macrae, of company E.

Discipline.—The excellence of *police* and the accuracy of *instruction* prove that the discipline of this battalion is of a very high character.

FOURTH REGIMENT OF INFANTRY.

Company "A," commanded by Captain P. Wager.
Detachment commanded by Captain W. Lear.

Police.—Excellent. The condition of the temporary barrack rooms, arms, clothing, camp equipage, and mess furniture equal to any in service. The regimental and company books, as far as appeared necessary to examine them, exhibited evidence of great neatness and accuracy, particularly those of the regiment in charge of Adjutant Martin.

The hospital bore satisfactory proof of skill and diligence on the part of Assistant Surgeon Macomb, in whose charge it had for some time been placed.

Instructions very good, as light infantry, but otherwise somewhat defective in the drill of the company as infantry. The defect, however, was very slight, and appeared more the result of a want of habitual attention to the drill than any other cause. And this is too obviously to be attributed to the employment of most of the officers and men of this regiment, for two or three years past, in small detached parties in the wilderness, and at hard labor upon roads and bridges, where it was seldom possible to pay that scrupulous attention to the drill which is always necessary to the attainment of accurate practical knowledge of company and battalion tactics. But the officers and men of the 4th, at this place, have nothing of infantry duty under arms to learn which may not be acquired perfectly in the course of two or three weeks under their experienced officers, whose commands I had hitherto found well instructed, particularly so in the early part of the year 1822, and often prior to that period.

Discipline.—In accordance with the "police" and "instruction."

The melancholy death of Major Donoho, an officer of high moral character, legal and military mind, calm, discriminating and just, who was shot on parade at tattoo, by a sergeant, some months past, is supposed to afford proof of a defect in the discipline of the corps; but, after a careful investigation of the facts connected with that afflictive event, (for the detailed account of which see the record of the general court-martial by which the offender was tried,) I am convinced that this unexampled outrage cannot be attributed to a defective discipline, except on the part of the hardened offender who had been guilty of a neglect of duty, with partial intoxication, and who, it is believed, in consequence of a mild rebuke from the major, acted upon the first diabolical impulse of savage feeling without any previous concert or sober reflection. His character had previously been deemed to be that of a faithful non-commissioned officer. He is under sentence of death, and is doubtless a fit subject for this exemplary punishment.

TOWN OF PENSACOLA.

Of the old forts and block-houses constructed by the British in 1763, and those subsequently built by the Spaniards for the protection of Pensacola, nothing now remains but the foundations, with the more than half-razed and ruined ramparts, ditch and glacis, of the former, with the decayed and tottering bodies and frames of the latter. However formidable the two former of these works (forts *Barnard* and *Charlotte*, alias St. Michael) may have been to an approaching foe by *land*, they could afford no security whatever against an attack by *water*—their location being on the hill northwest of the town, and a mile from any part of the bay where vessels of war can approach. Such vessels may take a position from one and a half to three miles distant from these works, and yet the town, standing in the intermediate space, would be exposed to their fire, whilst they would keep out of the reach of the guns of both. It cannot, therefore, be necessary to rebuild either of these works, nor is it deemed necessary to repair any of the block-houses.

BARRANCAS AND ST. ROSE.

Our defence of the town of Pensacola, as I have before remarked, must, if possible, begin, be confined to, and terminate, at the entrance of the bay between the Barrancas and Fort St. Rose. Suitable fortifications at these places will effectually command the intervening entrance of the bay, where the channel is so narrow as to expose every vessel attempting to pass, in or out, to the range of a *point-blank shot* from the heavy guns of each work, and to an effective cross-fire from each for the space of two miles along the ship channel in the entrance of the bay. The two forts would be nearly 2,500 yards apart. The one at the old Spanish *fort Carlos*, at the Barrancas, and the other at the old British fort St. Rose, near the western end of St. Rose island.

Fort Carlos stands on the western margin of the sand-beach, west of the bay and 300 yards therefrom, at the base of the bank or hill, on the brow of which is a temporary work erected by the Spaniards and connected with Fort Carlos. The lower part of this consists of a small but strong semi-circular work of masonry, with a bomb-proof magazine, &c. The front of the battery *enbarbet*, looking towards the channel, the flanks with embrazures opening upon the coast to the east and west.

The upper part of this position commands the surrounding country for two miles, except in one direction, south southwest, where there are some small sand hills behind which General Jackson approached the place in 1818.

Fort St. Rose exhibits only a ruin half covered with sand drifted by the wind. The proposed work at this position, as well as that at the old fort Carlos, will afford direct and efficient protection to the navy yard recently established about 2,000 yards up the bay, on the western shore, and nearly equidistant from each fort.

ORDNANCE AND ORDNANCE STORES AT FORT CARLOS.

The powder magazine, though originally well built, bomb-proof, and the arch work covered with cement, together with a composition, of which tar appears to have been the principal material, is so much decayed as to receive considerable quantities of water from every heavy rain; by which the whole building in wet weather becomes saturated, often dripping with water and always damp, insomuch as to destroy much of the powder which has been there deposited in bad casks, and greatly to injure that contained in the best of the casks; none of which are constructed, as I have repeatedly urged that our powder casks should be, *with copper hoops.*

On a cursory inspection of the ordnance and stores at this place, on the 13th of January, I found them so much *without order or classification* as not to admit of minute inspection without being first overhauled and arranged. For this purpose an officer and twelve men were detailed, pursuant to my orders, No. 2, of that date.

This work was accomplished during my visit to East Florida, prior to the 15th of February, at which time I found the whole as well arranged as the decayed state of the buildings and many of the stores would admit of.

But, with the exception of two long brass 24-pounders, (the finest looking pieces of ordnance I have ever seen,) with two 8-inch howitzers, and two 10-inch mortars, all of brass, together with eight large pieces of iron ordnance which appeared sound and good, most of the other ordnance and the principal part of the stores were much damaged by long exposure to the weather and by rust and use.

From that excellent officer, Quartermaster Burch, (who was absent on my first inspection in January last,) I learned that most of this property was that which the Spaniards left at this post when delivered to the United States; that much of it was reported to be damaged at that time; and that it is held ready for transportation to whatever depot the Ordnance department may designate for its reception. It will be seen by the inventory ordered to be transmitted to the Adjutant General's office that the number of dismounted guns, with the quantity of round and grape shot, is very considerable; and that the value of this property is too great to justify its condemnation *as damaged and unfit for service*, without a more rigid inspection than can be made until a few carriages are furnished, with other means for actual experiment in the trial of each piece, and of the powder and the other stores. The metal of the brass ordnance is alone deemed to be worth ten thousand dollars, and the metal of the iron ordnance, shot and shells, estimated at 80 tons, is deemed to be worth six thousand dollars, making a total of sixteen thousand dollars. But it is confidently believed that all the brass and many of the iron guns are serviceable. A little rust and rough exterior are too apt to hasten the condemnation of such guns, without the deliberate and scrupulous inspection and trial which should always be resorted to before they are reported unfit for service.

Inspector generals and all other officers should be prohibited from reporting ordnance unfit for service without previous *trial* by actual firing. But in cases where there may be no means of immediate *trial*, then it should be made the duty of such officers to report such ordnance as they deem unserviceable for "*trial and proof.*"

ADMINISTRATION.

Pay.—Received from Paymaster Wright, as often as it is deemed to be desirable for the good of the service.

Subsistence.—Of good quality, sufficient in quantity, carefully preserved, and regularly issued by Lieutenant A. W. Thornton, of the 4th infantry.

Quartermaster's department.—Captain D. E. Burch, of the 7th infantry, quartermaster, an officer of great efficiency and worth. He discharges his duty, as far as I had an opportunity of ascertaining, in conformity with the regulations, which are adapted only in many respects to a period of peace. Captain Burch is, however, a first-rate executive officer in a state of war.

[*For my inspection of the troops at Tampa Bay and other places in East Florida, see Appendix A.*]

February 19, 1827.—Inspected the post of Petite Coquilles, with the new fort at the Rigolets, under the command of Captain L. Whiting, company F, 4th regiment of artillery. The company was principally at Petite Coquilles.

POSITION.

The fort is located in an island at the "new site" selected by the board of engineers, upon the margin of and designed to command the Pass Rigolets, within a mile of its junction with Lake Pont-

chartrain. With the exception of two or three acres of dry land at Petite Coquilles, with a road ditched and raised as a turnpike, from thence to the fort there is scarcely a square perch of dry land for an enemy to stand upon within cannon shot of the fort. It is believed that all but a few acres of this island—and, indeed, most of the land in every direction within five miles of the fort—consists of salt marsh, extremely soft, boggy, and subject to inundation by every high tide, or at least by every unusual swell of the adjacent sea and lake. This marsh cannot be traversed by an individual without great labor and care in stepping upon the marsh grass; nevertheless, a very good road has been made over part of it, and covered with shells.

This fort, with a complete armament, for which it is now in readiness, (and which it should receive as soon as practicable,) with a suitable garrison, aided by a floating battery of eighty heavy guns, would effectually secure this pass against any flotilla of small vessels that would be likely to approach it. Large vessels can never approach it, the depth of water being sufficient only to admit gunboats and small coasting vessels.

Police, instruction, discipline.—The health and appearance of the company under arms, the condition of the clothing, arms, and equipments in use, the company exercise, with guard and other duties, all indicated an excellent police, and as high a degree of instruction (artillery and infantry) as could reasonably be required of a single company, stationed at any post in this climate, and laboring, as this company has for some years labored, under the inconveniences of a heavy police, with old and but temporary and ill-constructed barracks, requiring frequent repairs, pending the construction of the new work recently finished, but not yet occupied by the company. Many of the small arms and accoutrements in use were found to be unfit for service. The mess arrangements, and the condition of the barracks and bunks, though not altogether as perfect as under more favorable circumstances they should be, were quite as good as could reasonably be expected in these wretched barracks.

The barracks in the fort, which the troops will occupy in the course of a few days, are calculated to render them very comfortable during the spring, autumn, and winter; but it is more than probable that they will be sickly in summer, unless but few are allowed to quarter in the same room. The rooms are, perhaps, as large and as airy as the size and nature of the fort will admit, but not as much so as this climate requires during a season of much disease.

Hospital.—In charge of Assistant Surgeon Kerr, whose duties appear to have been discharged with skill and assiduity. The building occupied as a hospital is altogether unsuitable except for mere temporary purposes, when, as on the day of inspection, there are but one or two on the sick report, and they but slightly indisposed. A good building for a hospital at Petite Coquilles is much wanted It would contribute, doubtless, much to the comfort and accommodation of the sick of this post, and in seasons of unusual disease it would afford to the sick of most of the neighboring posts a safer retreat than any other spot upon the island of Orleans, and it would be next in Lower Louisiana to the Pass Christian, which is unquestionably the healthiest place within one hundred and fifty miles of the city of New Orleans.

Dr. Kerr's report contains so much valuable information, and is for the most part so much in accordance with my own views in reference to the health and to the casual diseases of Petite Coquilles, that I have deemed it proper to submit it with my report.—(See Appendix B.)

ORDNANCE AND ORDNANCE STORES.

Arranged and classed pursuant to my orders (No. 2) of the present year. None of the cannon was mounted except two iron 6-pounders, and the carriages and limbers of these were in a state of decay, and not fit for efficient service. It is very desirable that the guns at a post like this should be mounted and kept ready for action, and that the fort should at least have so much of its complete armament as to insure its safety from the sudden approach of pirates, if not from the gunboats of a few ships-of-war, from whose possible assaults the place cannot now be considered as at all secure.

The powder magazine in the fort is too damp for the preservation of powder; it appears, however, to be well constructed, and may become dry when the work is thoroughly seasoned.

Pay —The company has been paid up to the 31st of December last.

Subsistence.—In charge of Lieutenant Pickel; appeared to be sufficient in quantity, of good quality, and regularly issued.

February 23, 1827.—Inspected the troops stationed at the old barracks, in the city of New Orleans, consisting of two companies, under the command of Lieutenant Colonel Z. Taylor, viz: company I, of the 1st infantry, under Captain W. S. Harvey, and company K, of the 4th infantry, commanded by Captain Henry Wilson.

Police.—Excellent

Instruction.—As nearly perfect as it seems practicable to be rendered, where there are but two companies, and where these have been long separated from larger bodies of troops.

Discipline.—Exemplary.

Notwithstanding the barracks are very indifferent, the police of these companies is unexceptionable, and in all respects equal to any other companies inspected by me in the army.

That of Captain Harvey is quite equal, if not in some respects superior, to some of the companies of the 1st regiment. There is, however, but a slight shade of difference, if any, in the police of all those companies. The company of the 4th, under Captain Wilson, is fully equal in its police to either of the companies of the 1st, and in all respects equally instructed; it is, consequently, somewhat superior to any other company of the 4th infantry. The excellence of the police, and the admirable instruction of the officers and men of these companies, would alone be amply sufficient to prove their discipline to be of the very first order. But, in addition to these striking testimonials of efficiency, I gladly avail myself of this occasion to record a fact, alike honorable to the officers and men, and demonstrative of their exemplary discipline: that there is not a non-commissioned officer nor scarcely a man of either company who has not at different times, whenever occasionally indulged with leave of absence from duty, *spent the time of his absence amidst the numerous attractions and temptations of this great city without having been guilty of the slightest disorder or impropriety.* This fact was stated to me by one of the officers who had been for some time previously on duty in New Orleans, and it was supported by the concurrent testimony of the distinguished mayor of the city and several other highly respectable citizens.

To those who insist upon the necessity of a revival of the old law, authorizing the infliction of stripes and lashes, I may well appeal to say whether that punishment has ever contributed to furnish in New

Orleans, or in any other large city, so decided a proof of a high moral discipline in any part of the army of the United States as that which I have just now recorded.

If officers of corps or companies were disposed to abuse the trust reposed in them, abandon their men for the pleasures of a gaming-table or a bacchanalian party, then *stripes and lashes* might become necessary, or at least very convenient, to punish men rendered vicious by neglect and the abandonment of the officers honored with their care and government.

Happily, however, there are but few, if any, such officers known to me, and to such officers I can never knowingly address myself with any expectation of *their* contributing to *improve* or *preserve* the discipline of the army. But to meritorious men, who conscientiously believe that the discipline of the army could be improved by *stripes and lashes*, it is my duty to say that the results of my experience, and of the inspections to which I have referred in terms of highest approbation, convince me that this degrading punishment should never be resorted to but for the purpose of being inflicted on men rendered infamous by *desertion*, *mutiny*, or *cowardice*.

The great secret by which the officers of the 1st and 4th infantry have accomplished the exemplary discipline to which I refer is, *that they see* their men frequently, govern them strictly, but calmly, kindly, and justly; see that they obtain regularly and apply properly the supplies allowed them by law; require them to discharge every duty correctly, and be always *ready for action;* restrain the disorderly, extend to the obedient and meritorious tokens of approbation and occasional indulgence, but allow none to be absent but such as have proven by their good conduct that they will not abuse the trust reposed in them. Then will they all, sooner or later, prove themselves worthy of confidence, influenced as they must be by the conviction that obedience, with honesty, is the best policy. For when they are convinced that solitary confinement is the inevitable consequence of bad conduct, and that approbation and indulgence will be the reward of faithful service, but few men, and none but the incorrigible, will hesitate long to choose the latter, especially if they are commanded with the care and vigilance which faithful officers never fail to bestow.

The hospital.—In as good order as the small and unsuitable house applied to this purpose will admit of. It is in charge of an able surgeon, Doctor Macmahon, whose duties I have uniformly found to be discharged with manifest skill and fidelity. It is much to be lamented that this distinguished surgeon, after being inured to the southern climate, and thoroughly acquainted with the peculiarities of the diseases of this climate, with the practice best adapted to overcome them, should now be ordered to a healthy northern post, (Fort Snelling,) where his great experience will be comparatively of little value to the service.

The well-established military principle, that the *post of greatest danger* is *the post of honor*, and that the most experienced veterans should generally be selected for the defence of such posts, is deemed to be applicable to the medical staff, particularly when the enemy by which they are menaced is but *disease*. This principle has been departed from by the Surgeon General in the removal of Surgeon Macmahon from Louisiana to Fort Snelling, and in placing junior and comparatively inexperienced assistant surgeons, however respectable and promising they may be, with their limited experience, at this city and in the island of Orleans.

The able and efficient control of the medical department has been so extensively and satisfactorily exhibited to me, in the course of my inspections for five years past, as to obviate the necessity of any strong objection or animadversion, such as it now becomes my duty to submit in this case.

Other cases in point have occurred, but I should not deem it necessary to make a few such cases of error the subject of a protest in my report, but for the assurance that the Surgeon General has announced it as a rule of his department that the most uncomfortable, or, in other words, that *the least desirable of the southern posts, such, for example, as Fort St. Philip, should be attended by the junior surgeons.* This is the substance of a letter from the Surgeon General to Assistant Surgeon Minis, dated December 21, 1826. His rule of detail should be directly reversed.

It is a fact, admitted by the ablest medical men of the southern States with whom I have conversed—a fact which had not escaped my own observation, in reference to the peculiarities of our northern and southern climates, with their various effects upon diseases—that the most successful practitioner in the northern climate will, on his arrival on the southern border, find it necessary to change his course of treatment very materially before he is able to establish a successful practice, particularly at or in the vicinity of New Orleans.

If this and other southern posts are objected to upon the ground of their being very uncomfortable or not desirable, this is perhaps more to be ascribed to the wretched barracks at some of these posts (and there being no barracks at places where they are most wanted) than to the climate, which is indeed very objectionable. In this case the Surgeon General should unite with me in urging the propriety of having good barracks and hospitals constructed, such as will in a great measure remove these objections; for I am very sure that if the barracks and hospitals required in this quarter were constructed without any more delay, and made as large and as airy as the houses of the respectable neighboring planters, or even equal to the barracks at most of the arsenals in the interior of the eastern or northern States, as they certainly should be, then few medical men, or others, would object to being stationed at either of these posts, though they might often be sickly, but not by any means as much so as our troops here have often been, without barracks, or with their bad barracks.

There will, indeed, be tolerable barracks at each of the forts now constructing on this frontier, but no military man, acquainted with the climate, will, I presume, venture to say that these barracks can be relied on during the sickly season for the safe reception of more than four or five men in a room; nor could the health of these be considered as at all safe in a season of unusual disease, excepting those at the Rigolets, where it is believed they would be more healthy than at either of the other fortifications in Louisiana.

With such barracks at or near the battle ground in the vicinity of this city, at the Pass Christian, and at Fort St. Philip, as I had the honor to recommend in December, 1823, and in March and November, 1826, I have not a doubt that the health of the troops upon this frontier (where it is more essentially necessary to keep a considerable force at all times ready for action than at any other place in the United States) will be as well preserved as at any other section of our frontier south of Wilmington, North Carolina, and this would be effected without the entire abandonment of so important a post as this, or that of Fort St. Philip; for with such barracks six or seven tenths of the troops necessary for the security of this place and the neighboring frontier, *in peace and in war*, might, during the sickly season, occupy the proposed healthy position at the Pass Christian, within six hours run, with steam, of New Orleans, (a

position at which dangerous disease has never been known to originate,) whilst the remaining three or four tenths would be sufficient, except upon extraordinary occasions, to guard the posts located within the sickly region. In times of unusual disease it must be admitted that these interior guards, if furnished by regular details, and composed, as they would be in that case, of men from the northeast and middle States, would encounter the risk of a forlorn hope; but native-born officers, and men of Louisiana and other southern States, will soon be found in the army in sufficient numbers for this duty, and they will meet it cheerfully, and at least enjoy as much health as the neighboring planters, who deem the climate to be a delightful one, and who, it is believed, enjoy as much health as our southeastern planters, between the Delaware and Florida, inclusively. But a more numerous garrison at these posts, composed of men from the northeast and middle States, would but seldom fail, throughout every sickly season, to suffer the scourge of mortal disease.

February 27, 1827.—Inspected the posts of Fort St. Philip, with one company (C) of the fourth regiment of artillery, under the command of Lieutenant W. W. Morris.

Position.—On the left bank of the Mississippi river, at the upper turn of Plaquemine Bend, the new Fort Jackson being nearly opposite, on the right bank of the river.—*(See Appendix C.)*

In referring to this work, it is proper to remark that at the date of my former inspection of this place, (January, 1822,) the site selected for Fort Jackson was reported to be near the lower turn of Plaquemine Bend. Whether the new site is or is not equal to the first is very unquestionable.

Police, instruction, discipline.—Taking into view the want of barracks and the dilapidated state of the shells of buildings now occupied, and making reasonable allowance for the incessant labor in which most of the men have for some time past been engaged, building barracks, preserving from the *rain* and *mud* the public property, greatly exposed for want of safe storehouses, artillery sheds, &c., added to the daily police and other duties of the garrison, it is due to the officers and men of this company to say that their police is as good as can be expected or required under existing circumstances, and that their instruction and discipline are respectable as artillery and as infantry.

Subsistence.—In charge of Lieutenant G. W. Long, who appears to have performed his duty correctly. The supply is of good quality, regularly received from New Orleans, and regularly issued, with the exception of the beef part of the ration. For this he pays seven and one-half cents per pound, and obtains it with some difficulty and at irregular periods, the butcher furnishing it having, by some extraordinary neglect or mismanagement, failed to receive his pay for last year's supply. This neglect is ascribed by Lieutenant Long to his "*predecessors in office.*"

FORTIFICATIONS.

Fort Jackson.—Though not intended to be completed in less than three working seasons, including the present, this beautiful and most important work is in a state of forwardness which would enable us, in the event of war, to prepare it in one month for two-thirds of its armament; more than two-thirds of the work having been constructed, and a great quantity of materials delivered in advance.

The Fort of Chef Menteur is so nearly completed as to be ready to receive its armament complete at the close of the present working season, or, if necessary, in a week from the time of inspection.

The new fort at Mobile Point.—This work is something more than half constructed, and, like that of Fort Jackson, might be converted to the purposes of an efficient defence in the course of a month or two if necessary.

The new fort at the Rigolets.—This work is completed, ready for its armament and garrison, the latter of which it will have received in the course of a few days from the time of inspection on the 19th of February. Each of these fortifications exhibit in their *location, projection,* and *construction,* the most conclusive evidence of superior talents on the part of the engineers to whom these duties were confided, as well as a high degree of skill and fidelity in the mechanical execution of the work.

The immediate superintendent, Captain Chase, who has sustained most admirably, for several years in succession, the arduous labors and important duties confided to him in these perilous marshes, under circumstances of exposure to disease and other obstacles, merits a degree of approbation not less than that to which he would be entitled in a state of war under the frequent fire of an enemy. Great praise is also due to Lieutenant Delafield, now on duty at Fort Jackson, Lieutenant Ogden, at Mobile Point, and other officers of the corps of engineers that have been engaged on this service; a very promising one of whom, Lieutenant Bowman, I found in charge of the work at Bayou Bienvenue. Much praise is likewise due to the contractors, Messrs. Underhill & Strong, who possessing the advantages of a military education, and apparently feeling the same zeal for the interests of the service as if they were still members of the corps in which they formerly served, give them advantages over every other description of contractors, of which the public service cannot fail to profit.

The work at Bayou Bienvenue will be completed in the present year. It is but a small work, but such is the character of the surrounding country, a *trembling salt marsh,* where an enemy will find scarcely a foot of ground to stand upon within three miles of the work, and where this famous bayou is but twenty-five or thirty feet wide; it is deemed to be amply sufficient to defend this pass, to which some importance has been attached, in consequence of its being the one selected by General Packenham, and by which he approached in December, 1814, the place of his defeat, and of the great triumph of the western militia under our beloved Jackson.

THE POSITION OF BATON ROUGE.

Baton Rouge stands on the left bank of the Mississippi river, upon the first bluff or high land above the Balize, from which it is distant 210 miles, and from the city of New Orleans 120 miles. This position in point of health differs but slightly, if at all, from most other places that have been occupied by our troops between New Orleans and the mouth of the Ohio. Its elevation above high-water mark (about 24 feet) is supposed to give to it some advantages as a cantonment, and as a depot over the country below, which for near 200 miles has been subject to inundation during the highest freshets, from which no part of the valuable lands lying between the Iberville and Balize can be preserved by artificial embankments. Bilious remittent and intermittent fevers, such as have usually infested New Orleans, Mobile, and the low fresh water lands of Georgia and South Carolina, are, in like manner, prevalent at Baton Rouge during the summer and autumn of every year.

The troops at Fort St. Philip, Petite Coquille, and those heretofore stationed at the bay of St. Louis,

though not uniformly healthy, have for several years in succession enjoyed better health than those at this post. Judging then from these facts, added to those which the late sickly season has furnished, I cannot but apprehend that this place will prove to be as unhealthy as any other on the river or in the United States. Without the advantages of *health*, I deem Baton Rouge to be wholly destitute of any valuable property to recommend it as a military position. As an arsenal or depot, it possesses only the advantage of being upon high ground, and on a stream always navigable leading to New Orleans, the vital point of defence; but on the other hand, it labors under a disadvantage which I deem to be conclusive against it, independently of its want of health. It is too far distant from New Orleans to furnish supplies to the troops there for immediate purposes of defence, and it is too near to that city and to the sea-coast, and too much within the reach of an enemy for a great permanent depot, unless it were capable of being strongly fortified and defended at one-tenth of the expense, and with one-tenth of the force that would, under existing circumstances, be requisite to prepare it for an efficient defence against a powerful force such as would probably assail it, as a preparatory step to the capture of New Orleans. This position (Baton Rouge) *should not be fortified*, because it is not within reach of any one of the several passes or routes by which an enemy must necessarily approach, or would be likely to approach the city of New Orleans. An army landing, for instance, at Dauphin island, with a view to operate by land against New Orleans, would not be likely to approach within less than ten miles of Baton Rouge in the event of this position being strongly fortified. Hence, the fortification and its garrison would be rendered useless, except for the purpose of defending a depot, a depot, too, from which no supplies could, while it or New Orleans were invested, be forwarded to the army occupied in the defence of that city, without being exposed to the great hazard of falling into the hands of the intermediate foe, who would not fail to provide himself with every means in his power to cut off our communication by the river. An enemy *may* be induced to visit Baton Rouge with the view to profit by, or to destroy our depot; but I am unable to conjecture any other probable ground to apprehend such a visit. An invading foe approaching from the sea-coast of Florida, or of the State of Mississippi or Alabama, across the Amite and Iberville, or from the Opelousas, by the way of La Fourche, should be checked by a well fortified position on the river below La Fourche; say from 20 to 50 miles above New Orleans; because the enemy, in approaching by either of the last-mentioned routes, would be compelled to pass within reach of the guns of that position.

It has been apprehended that, in the absence of a strong post at or near to Baton Rouge, the enemy would seize upon this position, fortify it on each bank of the river, and thus cut off our supplies destined for New Orleans. But a slight view of the topography of the country around, and that through which the enemy must necessarily approach it, added to the great risk and difficulty of a European army severing itself for any considerable length of time from its fleet and its supplies of heavy ordnance, &c., and marching from 150 to 250 miles through a country of sterile hills and boggy plains, with rivers often impassable, will show that there is little reason to apprehend an operation so fraught with difficulty and peril without an object of a more certain and decisive character than that of the vain attempt to lock up or command the river at a point where it cannot be so commanded as to prevent the prompt and certain movement of our troops and supplies to New Orleans. For an army landed at Dauphin island, one of the most probable places of disembarkation east of the bay of St. Louis, would be compelled to march from 200 to 250 miles over a country intersected with rivers and numerous creeks and swamps, through which it is not possible to make a road that will at all times admit of the passage of an army with heavy cannon, particularly during a season of rain and such high freshets as usually occur in the rainy seasons of the winter and spring of almost every year. But admitting the possibility—nay, even the probability—that these obstacles will be encountered by an enterprising enemy having a train of heavy artillery, and that they may be overcome during such intervals of dry weather as do sometimes occur in the winter and spring, yet there is not, in my mind, a shadow of ground to apprehend that he will ever take, or for a single day attempt to occupy, a position on the Mississippi river within ten miles of Baton Rouge. Such a position would be to him (as it would be to us) worse than useless, because it could afford him no certain or direct means of preventing our troops and supplies from proceeding to New Orleans by descending the Atchafalaya to the mouth of the Bayou Plaquemines, and up that bayou to the Mississippi river; or, should the enemy render this impracticable, we could continue down the Atchafalaya to the bayou leading up to the La Fourche, through which we could proceed to the Mississippi river at Donaldsonville. There is, indeed, at this time a raft in the Atchafalaya which obstructs for about ten miles the navigation of that outlet, but it is confidently believed that this obstruction may be removed at an expense of $20,000, and it is essentially necessary that it should be removed, not only for the purposes above suggested, but likewise to enable us to send forces down that pass for the protection of Attakapas, and to counteract the enemy in his probable attempt to approach New Orleans by the way of that important and rapidly improving section of western Louisiana. But should we fail to open the navigation of the Atchafalaya, our reinforcements destined for New Orleans may land above Baton Rouge, (if it be occupied by the enemy,) and we may march from two to ten miles around to the rear of that place, and thence to the efflux of the Iberville, where we may proceed down the Mississippi river, either by water or by an excellent road, to New Orleans. In this case the armed boats with the heavy guns and stores would avail themselves of a dark, foggy night, and would pass with but little probability of any serious loss. Should an enemy ever attempt to establish a position on the river above New Orleans, there can be no doubt that it will be below the Iberville, if not below La Fourche. But whether above or below the last-mentioned place, we have the satisfaction to be assured, from every military view that can be taken of the topography of the whole country, that he will constantly, while on that route of approach against New Orleans, labor under the imminent hazard of a *forlorn hope*, in which the loss of a battle will inevitably eventuate in the loss of his whole force engaged upon this perilous route. To us as well as to him, therefore, the position in question would be worse than useless; because the men and means employed for its defence would be left out of the range of efficient operations, and could be considered only as a dead loss to the service during the whole of the campaign. Should the city of New Orleans fall into the hands of the enemy, then, indeed, it may be possible that a strong post at Baton Rouge would become useful. The supplies deposited there would doubtless, in this case, be acceptable and really valuable to us if in any considerable quantity. But the force capable of carrying New Orleans would easily capture Baton Rouge, and this place is too near to the great theatre of operations, and yet too much out of the line of defence, to justify the expectation that it will ever become the depository of a large supply. Besides, the loss of the city of New Orleans could never reduce our forces from the western States so low as to justify or excuse the entire abandonment of the whole island of Orleans; but we should in that evil event meet with sufficient reinforcements to enable us to take a position at or below the efflux of the

Iberville, where the river is in all respects more susceptible of defence from its adjacent low grounds and embankments, with its extensive neighboring marshes and swamps, than from a bluff, bordered with a great body of upland, like that at Baton Rouge.

March 9, 1827.—Inspected the post of Cantonment Jesup, garrisoned by three companies of the 7th regiment of infantry, under the command of Lieutenant Colonel James B. Many.

POSITION.

Cantonment Jesup stands on the top of the ridge which divides the waters of Red river from those of the Sabine twenty-five miles to the westward of Natchitoches, upon the road leading from that city to Nacogdoches. It is one of the most elevated and healthful positions of the interior of Louisiana, amply supplied with pure water, with an abundance of timber for fuel and building. The adjacent land is principally deemed to be public property, and though generally too poor for several miles around to attract the attention of speculators, it affords tolerable gardens and fields for corn and pasturage. A position near the Sabine river, from twenty to twenty-five miles further westward, if equally healthy, would be better adapted to the immediate charge of the western frontier bordering on Texas; but it is believed that no part of that frontier has proven to be so healthy as the position now occupied.

Police.—Very good, generally, and in some respects exemplary; barracks not as airy as I deem to be desirable in this climate for the summer, and though originally well built with logs in the ordinary way, their roofs are now beginning to decay and leak, and they cannot be fit for use more than for a year or two longer without extensive repairs. Should it be deemed proper to establish a permanent post in this quarter, and this seems to be advisable, much good to the service would result from the erection of substantial brick barracks, with such flank defences as an exposed and feeble frontier demand for the security of the troops and public stores, and for the protection of the inhabitants in the event of a sudden rupture with our red or white neighbors. It cannot be doubted that such a work will be found ultimately to cost less, taking into view the economy of health, and of life, and the security of public property, than temporary wooden buildings.

The hospital exhibits satisfactory evidence of skill and fidelity on the part of the medical officer at this post, Doctor Delavan.

Instruction.—Respectable as *infantry*, and particularly so as *light infantry*, though these companies are but little acquainted with artillery duty, beyond the exercise of the field-piece. The companies were exercised in part separately, and in battalion, viz: company A, commanded by Captain Young; company B, commanded by Brevet Major Birch; company F, commanded by Captain Berryman. The battalion was alternately exercised by each of these officers. In this duty Captain Young excelled, as in the company exercise, and particularly as light infantry, Captain Young, with his company, evinced considerable proficiency.

Subsistence.—Abundant in quantity, and of good quality. This supply has been for some time past under the charge of Lieutenant Lee, who was recently appointed quartermaster, and who appears to have discharged his duties in conformity with the general regulations.

The contractor, Mr. Glenn, having failed to deliver the supply of subsistence due about this time, Lieutenant Morton has obtained a supply upon terms but little above the contract price of the ration. I have acordingly deemed it to be my duty to approve the measure, which was conducted by Lieutenant Morton in a manner which proves him to be a young officer of business, and of sound discretion. I subjoin a copy of his report, as follows:

"NATCHITOCHES, *Louisiana, March* 9, 1827.

"SIR: I am compelled to report to you the entire failure of Mr. Hugh Glenn, the contractor for subsistence supplies for this depot for the present year.

"The 1st instant, the day of delivery, having passed without Mr. Glenn's appearance, I was compelled to make a small purchase of flour to supply the immediate wants of the garrison at Cantonment Jesup, at an advance of $1 above contract price.

"On the 6th instant, a Mr. A. Moore, of the house of Barr, Lodwick & Co., of Cincinnati, arrived in the steamboat Beaver, and delivered me a letter from Mr. Glenn to the assistant commissary here, informing me that he could *not* comply with his contract, but that the above-named house had agreed to furnish at prices which they had offered in their bid to the commissary general, and which *he* stated to have been next to his own in point of price. Not considering Mr. Glenn's letter at all as controlling me in my measures for obtaining supplies, however I might regard it as an acknowledgment of a complete failure on his part, my only course was to refer to and be guided by the regulations of the subsistence department in such cases, which binds me to consult, if possible, its interests, and those of the contractor at the same time.

"Upon comparing the prices of the market at this place, and of that of New Orleans, with those of Mr. Moore, it was at once evident that it would be *greatly* consulting the interest of the contractor, without compromising those of the department or the comfort of the troops, to make a purchase at once of the whole delivery of him; but, independent of any other consideration, Fort Towson being dependent on this depot for its supplies, and the time of their departure having arrived, forbid my pursuing any other course than that of securing, at least, *its* supply, which amounted to about one-half of the delivery due. I could not possibly have obtained in this place a sufficient quantity of provisions for that purpose, and was therefore *compelled* to purchase of Mr. Moore as the one who offered on the most favorable terms; and from the scarcity of stores at this place would have been compelled to have done so had his prices been a hundred per cent. in advance of the contract price, as I could not for a moment allow the comfort of the troops to be sacrificed to the benefit of an individual who had violated his pledge to the government, and forfeited every claim to its indulgence.

"Again, it was Mr. Moore's interest to dispose of part of his stores at this place, and ship the remainder to New Orleans market, in preference to allowing me to select particular articles in certain quantities; and he consulted his interest, accordingly, by refusing me any part, unless I would purchase the amount of the whole delivery; thus compelling me to pursue the course I finally adopted, as I have already shown the absolute necessity of my procuring from him a supply for Fort Towson.

"The *soap* part of the ration I could not, on any terms, receive, as the quality was not such as the contract required, and having on hand nearly sufficient for the supply of the upper garrison, the call upon us was not so imperative, as the small deficiency might be supplied by purchase at this place; the remainder for the use of Cantonment Jesup I have been compelled to send for to New Orleans, as well as

the whole amount of beans required. None of the latter article is required for Fort Towson, as it is expected they will cultivate for themselves a sufficient quantity.

"I have the honor, sir, agreeable to your directions, to accompany this report with a statement of the stores *required, purchased,* and the difference of cost in each article.

"A. H. MORTON, *Lieut. and Acting Asst. Com. Sub.*

"Major General GAINES, *United States Army.*"

Amount of subsistence stores required to be delivered at the depot at Natchitoches, Louisiana, by Mr. Hugh Glenn, United States army contractor.

166 barrels pork, at $10 per barrel; 466 barrels flour, at $5 or $5 37½, fine and superfine; 3,320 gallons whiskey, at 25 cents per gallon; 112 bushels beans, at $2 per bushel; 4,000 pounds soap, at 5 cents per pound; 2,000 pounds candles, at 10 cents per pound; 66 bushels salt, at $1 per bushel; 800 gallons vinegar, at 10 cents per gallon.

Mr. Glenn having failed to deliver the above-named supplies, the following were purchased of the house of Messrs. Barr, Lodwick & Co., at the accompanying prices:

166 barrels pork, at $10 per barrel; 466 barrels flour, at $5 37½ per barrel; 3,285½ gallons whiskey, at 35 cents per gallon; 1,598½ pounds candles, at 12½ cents per pound; 59 bushels salt, at $2 per bushel; 786½ gallons vinegar, at 22 cents per gallon.

The difference of prices on said articles purchased are as follow:

Pork	None.
Flour	None.
Whiskey, 10 cents per gallon	$328 55
Candles, 2½ cents per pound	39 96½
Salt, $1 per bushel	59 00
Vinegar, 12 cents per gallon	94 38
Making a total difference of	521 89½

The difference in the beans and soap yet to be purchased will, I apprehend, be much greater; but having sent to New Orleans, as the most favorable market for purchasing, I am not yet aware of its amount.

It may not be improper to state that had I been compelled to purchase the article of whiskey at the market price of this place, 50 cents, the amount of loss on this single article would have amounted to $821 25, on the same quantity already purchased of Mr. Moore, exceeding the difference on all the articles purchased, $299 35½.

A. H. MORTON, *Lieut. and A. A. C. S.*

Major General GAINES, *United States Army.*

All which is respectfully submitted.

EDMUND P. GAINES, *Maj. Gen. by Bvt., commanding.*

Major General JACOB BROWN, *General-in-Chief, Washington, D. C.*

APPENDIX A.

HEADQUARTERS WESTERN DEPARTMENT, *Fort Duval, January* 30, 1827.

SIR: I have the honor to report to the general-in-chief my arrival at this place, after having completed my inspection of the troops at Cantonmont Clinch, on the 12th of this month; at Fort Brooke, Tampa Bay, on the 20th; at Camp McIntosh, near Alochaway, on the 27th; and at this place this day.

The troops at Pensacola, consisting of five companies of the 1st and two companies of the 4th regiment of infantry, exhibit a very high state of *interior police,* with a degree of *instruction,* in company and battalion exercise but little inferior, if at all inferior, to the best drilled battalions in service. The companies of the 1st, under Major Twiggs, are most highly improved. The condition of the whole of Colonel Clinch's immediate command, at Cantonment Clinch, is very respectable, and for the most part merits the highest approbation, with the exception of the ordnance and ordnance stores at the Barrancas, which, from the late transfer of the position to the Navy Department, and the consequent anticipated movement of the *army ordnance and ordnance stores,* reported to be in charge of the Quartermaster's department, for that purpose, are left in a disordered state. The enclosed orders (No. 2) contain such admonitory notice of this, and of similar errors, neglects, and omissions, and points out the steps which I have deemed necessary for their correction.

The *interior police* at Fort Brooke was very good, particularly so in everything regarding the health, comfort and efficiency of the troops. The *instruction* appeared to have been somewhat deficient in the company movements. It is, however, due the officers and men that I should remind the general-in-chief that most of them have been occupied for nearly a year past in opening the military road from Tampa Bay to Alachua and St. Affee.

The airy position and judicious construction of the barracks, with the vigilant attention paid to every branch of police, upon which the health of the troops depend, contribute to render Fort Brooke one of the most healthful posts south of New York. The defects observed in the company exercise were pointed out to Colonel Brooke by me, and they were such as two or three weeks drill would remove, and I have no doubt that they will very soon be removed.

The subsistence and medical department at each of the posts in Florida exhibit all that can be desired to insure the health and comfort of the troops in whatever regards these departments. The quar-

termaster, Captain Clark, appears to have discharged his duty at the post conformably to regulations. The road selected by him affords the most satisfactory evidence of his assiduity and sound judgment, in the selection of the route, as well as skill and industry on the part of the officers and men in the execution of the work, and particularly in the construction of the bridges.

The troops at Camp McIntosh are in good order, and being recently from Fort Brooke, exhibit a similar police and discipline, with a slight defect in the drill, but which every day's practice tends to correct; a defect which is fairly attributable to their labors in opening the road; labors which have tended rather to affect their *appearance* than their *efficiency*.

The two companies under Major Glassell, at this place, are well instructed, and particularly so as light infantry. They are in excellent health.

I am endeavoring to collect such accurate information as will enable me to report the cause and character of the late acts of hostility on the part of the Florida Indians, near the Oscilla, in this territory. I am at present under the impression that not more than ten Indians (and these without influence or respectability) took any part in those hostilities, or had any knowledge of the designs of the offenders until after the murders were committed.

The principal chiefs, with whom I have conversed upon the subject, express deep regret at the outrage, and promise to aid in the arrest and deliver up the offenders. Parties of the friendly Indians are now out in search of those offenders. Until their arrest is effected, I think it advisable to occupy this border of country with the troops at Alachua, with those under Major Glassell. Many of the ill-fated Indians are so entirely destitute of corn, and, indeed, of every other means of subsistence, excepting the scanty supply which the sterile forests of the country assigned to them afford, that they already present the *skeleton figure* of abject poverty and extreme wretchedness. To relieve the most helpless and miserable among them, I could not hesitate to issue the inclosed special order, (No. 3,) allowing them four rations of bread or flour and meat per week, which, I trust, will be approved.

Respectfully, I have the honor to be,

EDMUND P. GAINES, *Maj. Gen. by Bvt., commanding.*

ADJUTANT GENERAL, *United States Army.*

HEADQUARTERS WESTERN DEPARTMENT, *New Orleans, February* 24, 1827.

GENERAL: In my letter of the 30th of last month to the Adjutant General, I stated that I was endeavoring to collect such accurate information as would enable me to report to you the cause and character of the late acts of hostility on the part of the Florida Indians.

I have since the date of that letter conversed with his excellency Governor Duvall, Major Glassell, Captain Burch, and other intelligent officers, with many respectable citizens of Florida, most of whom concur in the opinion which I then expressed, that the principal act of hostility committed by the Indians had its origin in the hunger and distressed condition of a small party, and their consequent depredations upon the cattle and corn of the white inhabitants, among whom was the principal sufferer, a Mr. Carr, who had indiscreetly and without the sanction of law flogged some of the party; that this irregularity was followed by the savage massacre of the children of Carr; that there is no reason to apprehend that any chief or other Indian of the nation was privy to this act of hostility; that the Florida Indians are, for the most part, desirous to preserve peace; and that their promise to arrest the five surviving offenders may be confidently relied on by us.

I have received a copy of your letter of instruction to Colonel Clinch, of the 5th of last month, which embraces the subject so fully and accords so entirely with my own views of the precautionary steps to be taken to prevent further disturbance that I have not deemed it necessary to add anything for the government of that officer, in whose discretion, sense of justice, and knowledge of the character of the Indians and their neighbors I place great reliance.

These Indians have been urged by me, and they will continue to be urged by the officers of my command, and they will be *forced* to confine themselves to the section of the peninsula assigned to them. Their abject poverty and the extreme sterility of the land which they will there occupy are evils for which they will find no remedy but in the philanthropy of the United States. These evils, however, great as they may be in themselves, may have the good effect of shielding the wretched natives from the still greater evil of lawless encroachments upon them by such of their white neighbors as are wont to "feel power and forget right;" for the country is too poor to excite the cupidity or tempt the avarice of the greedy land-jobber.

That some irregularities on the part of the contractor have occurred in the distribution of certain articles of subsistence granted to the Florida Indians, and that these irregularities have tended in some cases to distress the Indians and to thwart the benevolent views of the United States in granting the supply, there was great reason to apprehend. The beef part of the ration, for example, was in part *furnished in droves on foot;* and the Indians permitted to go to the droves in the woods and kill one or more whenever they wanted.

To say nothing of the utter impossibility of ascertaining the actual *quantity* of meat thus butchered, it must be evident to every one at all acquainted with the improvident habits of the Indians that this mode of supply would not fail to produce waste and hunger on the part of the Indians; for when food is thus placed in their power, their custom is to "slay and eat," *and waste for the day, regardless of provision* for the morrow. But it is a fact which has borne the test of long experience, that but little benefit to the Indians results from supplying them with beef, even at short intervals of time, compared with that of a *regular supply of corn.*

This is the supply to which they have been most accustomed, and I am satisfied that two rations (two quarts) of corn per week, delivered weekly, will subsist an Indian better than thirty rations of beef per month, delivered monthly.

I have therefore urged the propriety of future supplies being made to consist of Indian corn. This will insure to them a constant supply of *bread*, or at least the best possible substitute for bread. As regards the *meat* part of the ration, it is perhaps an expense that need not be incurred, as the rivers, lakes, ponds and forests, barren as they are, will still afford to the active hunter a scanty supply of fish, fowl, or other meat. I shall complete my inspection at this place and the neighboring forts in the course of a few

days, when I shall embark for Baton Rouge and Sabine ridge. The two companies at this city are surpassed by no two companies in service in their police and discipline.

From Texas I learn that some disorderly citizens, principally from our side of the line, calling themselves "Fredonians," have attempted to revolutionize that section of Mexico, and have invited the Cherokee and other Indian tribes on that border to join them.

Should the Indians really assemble in that quarter, I think it will be proper to add a few companies from Pensacola and Fort Gibson to Lieutenant Colonel Many's command to disperse them. I shall instruct Lieutenant Colonel Taylor to take care of this quarter of Louisiana.

I am, with great respect, your obedient servant,

EDMUND P. GAINES, *Major General by Brevet, commanding.*

Major General JACOB BROWN, *General-in-Chief.*

CAMP KING, *near the Florida Agency, June* 1, 1827.

SIR: In compliance with your request, I shall venture a few remarks on the climate of East Florida, give you my views in regard to the medical topography of this station, connected with such facts as I shall state relative to the general aspect of the country, and offer some reflections which may partially explain the operation of the climate on the human system.

The kind of service to which I have been attached since my arrival in East Florida has precluded the possibility of minute observation; this, however, will not be material, as the returns from permanent hospitals have exhibited an accurate diary of the weather, and moreover, I presume, sir, that when you did me the honor to desire my opinions on the subject of the present communication your principal object was to obtain especially such views as might be applicable to this particular section of country. The instability and inconvenience of a camping life will, I trust, be a sufficient apology for imperfections that must necessarily appear in a report founded on temporary and passing observation. East Florida is interspersed with innumerable lakes and ponds. The borders of the lakes in many instances present to the view hillocks of white sand, giving to them the appearance of the sea-shore. The variety of shells found on the surface of the earth, the undulating and occasionally broken appearance of the country, the absence of primitive rocks, and the great abundance of carbonate of lime in a decayed state, combined with siliceous particles, give undoubted evidence that the country we inhabit is of alluvial formation.

All of East Florida is visited during the summer and early part of autumn with remittent and intermittent fevers, the latter of which is most prevalent. The maladies occur in the vicinities of the lakes and ponds, but are much more common near the ponds. The most of these, late in the spring and early in the summer seasons, become partially or wholly dry, leaving in deposition much vegetable matter, and consequently involving considerable quantities of miasmatic effluvia. The neighborhood of the large savannahs are not distinguished for ill-health whenever they continue generally well supplied with water. It is ascertained that health is maintained even where vegetation is most exuberant, provided that the plentiful growth, so obvious on the surface of the ponds, is supplied with as much water as is necessary to prevent its decay. It is worthy of notice that the lakes, but particularly the ponds of East Florida, present a most luxuriant surface of blooming vegetation where the depth of water is from twenty to thirty feet; their transparency is attributable to a sandy bottom and subterraneous springs, which serve not only to purify these immense standing pools, but also to supply the loss produced by evaporation. It can readily be inferred from what has been stated that no violent disease will be likely to visit or abide in East Florida; for it is an established principle that vegetable matter is innoxious when it does not undergo decomposition, otherwise health would not obtain in any degree in so southern a latitude.

The settlement of Alachua (within twenty miles of this station) is visited during the summer and fall with remittent and intermittent fevers; the latter prevails most in the tertian form of disease. Two causes, I think, (independently of the partial drying of the ponds,) are indisputably operative in increasing those effects. First, the water in use is almost exclusively obtained from wells, and as it has already been stated that decayed carbonate of lime formed the basis of the rocky substances on the surface, it should also be mentioned that this pervading combination is met with in the *deepest wells*, imparting to the water a magnesian and calcareous taste. Experience has demonstrated the hurtful tendencies of such a beverage, and reason does not hesitate to assign this cause as an unfriendly adjuvant in the dissemination of intermittent fevers. Secondly, the dense foliage of the hammocks, by transmitting much carbonic acid gas to the surrounding atmosphere, renders it less respirable than it is in the pine woods. On entering these shady and fragrant groves a heavy atmosphere is immediately experienced, which is produced by an evolution of the gas in question from districts so fertile. The usual refreshing winds from the northeast and southeast are obstructed in the passage from the Gulf of Mexico, and consequently these heavy fogs, which remain suspended over low situations, are not as quickly dissipated as they would be by an uninterrupted breeze. From such a state of things it must follow that the atmosphere being less elastic, the fogs of longer duration, and the refreshing winds intercepted, the existing marsh effluvia is rendered more deleterious in its effects, whilst the system, being lowered in its vitality, cannot so effectually resist the intrusion of inimical agents. Every section of East Florida is happily saved from aggravated bilious disease by the torrents of rain (accompanied with vivid lightning) which fall at intervals in the months of July, August, and September, refreshing the highlands and literally inundating the low. This is most fortunate; for under an opposite order of nature, in the months just mentioned, disease would ravage the country and carry to the inhabitants desolation and death. The system, in the months aforesaid, is peculiarly obnoxious to disease, having been previously debilitated and rendered excitable by its exposure to protracted vernal and summer heats. As every respectable theory in medicine admits the doctrine of predisposition to be correct, I can the more unhesitatingly repose confidence in my conclusion. It should be observed that although heat and moisture, in their usual alternations, produce and propagate the various types of endemic and epidemic diseases, yet an excess of the latter agent will so dilute the miasmatic poison as to divest it of its destructive qualities. This takes place when the rainy season is marked by plentiful showers.

Camp King is situated within one mile of the Indian agency. The location and its vicinity is elevated and airy; there are neither lakes, ponds, nor lagoons near it. It is in the pine woods. The water which supplies the troops at this post is light, clear, and digestible. It appears to be free from any

combination with mineral or earthly substances, and is running. Having no thermometer, I cannot speak precisely of its temperature, but I can say, from experience, that it is salubrious, although I have not had the means of testing it chemically.

Nothing can be more injurious in this climate than exposure to the sun; for whilst we run the risk of (what the French call) a *coup de soleil*, we may consecutively receive the *coup de grace!* But to treat the subject more seriously I would remark, that as the prevailing winds in the spring and summer come cool from the Gulf, it is not unusual to experience a sensation of chilliness the very moment debility is felt from the sun's ardent rays. The freshness of the nights in this latitude was, no doubt, designed by nature to indemnify us for the ardor of the day. It is pleasant and invigorating, but an exposure to the heavy dews must ever be productive of pernicious consequences. The skin is a highly sensitive and important organ, and if its action and excitement be suddenly impaired by the sedative effects of cold, particularly when combined with moisture, it is not difficult for the medical philosopher to conceive how other organs, by consentaneous association, may be impaired in their functions. Such an infraction of the laws governing the whole animal economy would most probably direct its greatest injury to the liver and lungs, producing an inflammatory pectoral disease, intermittent or remittent fevers, and possibly both, in combination with the first affection. Predisposition, the season of the year, a peculiar constitution, with other circumstances, would determine the nature of the attack. It has been asserted by some theorist that heat in itself is inadequate to the production of a regular fever, and by most persons that no bilious fever could exist without marsh effluvia. Be these questions decided as they may, it is very certain that a rapid transition from heat to cold, and *vice versa*, is capable of inducing baneful consequences.

Though the facts I have stated have been lightly considered and feebly elucidated, it may from them be fairly deduced that the climate of East Florida is generally healthful. If the doctrine of *ex-principiis nascitur probabilitas, ex-factis vere veritas* be a just one, I am, perhaps, in my conjectures, not far removed from the line of the truth. At all events, sir, if I have afforded you, in any degree, the information you contemplated in your request, I shall be more than compensated for the development of my thoughts, and greatly flattered by the favorable reception which you may condescend to give to this communication, and can add, that although *felix qui potuit rerum conquesure casus* will probably never be applied to me, yet do I believe that a very inferior light thrown on so interesting a subject as climate and its influences on the human system often serves to awaken human knowledge.

ALFRED ELWES, *Assistant Surgeon, United States Army.*

Major General E. P. Gaines, *Commanding Western Department.*

P. S. The present communication has been deferred with a view to obtain experimental knowledge of this location. In connexion, therefore, with the remarks relative to the topography of Camp King, the following may be inserted after the word *airy*. The country for many miles in the vicinity is high and free from the causes of disease which I have enumerated; and since our arrival here in the early part of March, there have been but a few cases of very mild intermittent fever, which were probably not produced by anything offensive in the climate. The troops have enjoyed remarkable health, and I think there exists no cause which should produce the anticipation of sickness.

Camp King, *Florida, June* 20, 1827.

Sir: The Ocklawaha river, before its junction with the Spring Run, is not more than ten yards in width, and contains about one-third as much as the latter, which is nearly of the same breadth. The river seems not to be much enlarged by this accession of water, but receiving its character from the Spring Run, which is very deep and clear, is seldom less than eight feet, and frequently fifteen or twenty in depth, this depth continuing for some miles, as well as its transparency. The bottom is, however, very irregular. The guide twice directed to take what I conceived to be not the main channel. Upon inquiry, he informed me that the larger streams dissipated themselves in the swamps. This I did not then credit; however, I followed his direction whilst descending, resolving to ascend the largest stream. This I did, but was obliged, ultimately, to make use of two very narrow and shallow passes; and although I carefully examined the shore, which was between me and the larger body of water, I could not discover any stream which I supposed was the one I was in search of. Small streams are continually running into and out of the channel, so that within a few miles it may vary from ten to twenty or thirty yards in width, and from two feet to six or eight in depth, and conversely.

The water in the narrow passes was less than two feet; frequently the boats, which drew less than a foot, got fast in the mud or sand, as it might happen. One of the places through which I was compelled to pass is not more than nine or ten feet wide, and two deep; it is a mere cut-off, perhaps twenty yards in length; a longer passage is close by this, but at present there are not more than five or six inches of water in it. For half a mile above, and some distance below, the stream is very narrow and quite shallow, and here and elsewhere the river is very difficult to navigate, even with canoes, from the short and frequent bends, and the rapidity of its current, sometimes running directly (perpendicularly) upon the bank, and with such velocity that the boats, with no little difficulty, are kept off the shore with poles, oars being here useless. Generally there is too great a depth of water or of mud to use setting poles.

The highest water-marks I saw were a little more than three feet; but the more distinct, and where the water appears to continue the longest time, are about two feet above the present level.

J. D. SEARIGHT, *Lieutenant 4th Infantry.*

Captain J. M. Glassell, *Commanding Camp King.*

P. S. A passage for boats has been made from the St. John's to the landing place, three miles from Camp King.

J. D. S.

APPENDIX B.

PETITES COQUILLES, *February* 20, 1827.

In reporting the state of the hospital department, and the nature of the prevalent diseases at this post, agreeably to your order, verbally delivered on the nineteenth of the present month, it is with pleasure I am enabled to represent the station as having been exempt from the usual diseases incidental to this climate. No portion of this State, or indeed section of country, has, in a greater degree, enjoyed the blessing of health, not alone during the last past season, but its general character entitles it to the permanent reputation of as healthful and salubrious a position as this latitude affords. The summer of 1824 constitutes the only season which can be adduced in opposition; and throughout the country at that period those places which had been, and still continue to be, remarkable for salubrity suffered by visitation of diseases, whilst the usually afflicted sections enjoyed a perfect or partial exemption. So far, then, from the circumstance of the summer of 1824 being sickly, militating injuriously to the healthfulness of this position, its tendency is directly to confirm it. Since the first of July, 1826, the day on which I entered upon duties at this place, the average daily number of cases in hospital did not exceed three, and at no period did my morning's report to the commanding officer contain more than six. On several occasions during my attendance here, the hospital has been without a solitary patient, as was the case even in the month of August, as also on your visit to this place in your tour of inspection, there being only two instances of indisposition at that time, and of so unimportant a nature as to have been allowed to remain in quarters. But one death has occurred in the company since my vocation here, which was of a private, who died with rheumatism of the stomach. The greater proportion of the cases that occurred are not, however, chargeable as being incidental to the post, but owed their origin to different causes than are necessarily connected with the climate. Those diseases that are individually most frequent in occurrence, and originate as consequences of this locality, are intermittent and remittent bilious fevers and dysentery, but the instances of these which have fallen under my care, so far from manifesting any inveteracy of form or malignancy of type, were mild in nature and of easy management, yielding, with perfect readiness, to the proper course of practice. Surrounded, as we are, by so great a quantity of vegetable production, the miasmate, whose decay is so prolific in engendering disease, it is only matter of surprise that we have escaped with the milder shades of fever. Attention to the post and its immediate vicinity, in a preventive point of view, may do much in diminishing the sources of infectious effluvia, and it is unquestionably to that, in a very great degree, we are indebted for exemption from fevers of a malignant type. No sooner than the abundant vegetation will allow, and ere decay begins to diffuse its noxious miasms, it is fired and consumed, and we are at once freed from what is principally to be apprehended. Although by this precautionary mean this post has hitherto been so fortunate as to have escaped the more eventuate forms of fever, still so extensive in the generating vicinity, that it is only practicable to prevent a concentration of deleterious atmosphere. As to the more disseminating exhalations arising here and there from occasional decompositions, it is impossible to prevent, and hence the milder forms of intermittent and remittent bilious fevers, to which this place will as long be subject as vegetation is so luxuriantly abundant.

When I succeeded to the charge of the hospital stores and medicines they were not only in the utmost confusion, but deficient in quantity and indifferent in quality. Many of the articles had been for a long time on hand, and were damaged by incautious exposure. They, at present, are regularly assorted, and, from confusion, reduced to order. It is too late, however, to redeem or be of benefit to many, and I only await the reception of a new supply to condemn those articles without active properties. Already have I relieved the store-room of many that were perfectly inert, but refrained from more extensive condemnation till the arrival of supplies. I was unwilling, unless necessity had imperiously demanded it, to supply the deficiencies otherwise than through the apothecary's department and the prescribed time, and in customary manner. The state of the post being so salubrious allowed this temporizing plan, and on the first of January, of the present year, I forwarded to the surgeon general, in conformity with the army regulations, my annual requisition for medicines and hospital stores.

The time is near at hand when, by reasonable calculation, they may be expected to arrive; and, when they shall be received, all deficiencies which at present exist will be supplied, and the medical arm of the service at this post, so far as regards medicines and stores, will be in perfect order. The surgeon's instruments are in unity with the stores, defective in number and in bad repair, which, in like manner, will be remedied by an arrival from the apothecary's department. Although, sir, I do not intend to assume the liberty of suggesting any improvement to the arrangement at present in effect for supplying the military posts with hospital stores, I cannot refrain from remarking the singular incongruity in the necessity under which surgeons in this State particularly lie in obtaining from New York sugar, rice, coffee, molasses, &c., which are the staple articles of Louisiana.

Owing to some repairs which are making in the barracks at the new fort, it became necessary that this hospital be surrendered to the occupation of the company, and the mess-room has since afforded a convenient receptacle for the sick. But this arrangement must be of short duration, inasmuch as the repairs are nearly finished. It will then be, in course, that the hospital will again return to its own proper use. The dilapidated condition of the building renders it totally unfit for the purpose for which it is intended. Its ruinous state precludes the propriety of repair, and the only remedy will be found in the erection of a new hospital. With this view, an estimate of the expense has been prepared by Captain Chase, of the corps of engineers, and either forwarded to Washington or is retained until called for. The convenience and comfort of the sick call loudly for a new building.

I have thus, sir, as circumstantially as you desired, represented the present condition of the medical arm of the service of this post, together with the nature of diseases.

I am, sir, your obedient servant,

R. E. KERR, *Assistant Surgeon U. S. A.*

Major General GAINES, *Commanding Western Department.*

APPENDIX C.

NEW ORLEANS.

The city of New Orleans, destined soon to become the great emporium of more than a moiety of the population and wealth of the United States, has already assumed a commercial and political aspect which renders the subject of its defence in the highest degree important not only to the western States, but equally so to the whole Union. A plan for the permanent defence of this city, with the maritime frontier of Louisiana, having been regularly prepared by the board of engineers, and approved by the President of the United States, and the construction of the requisite works commenced, one of them indeed nearly completed, it might not be deemed proper, under present circumstances, for me to suggest any material change; and indeed, when it is recollected that three out of four of the principal sites embraced in this plan are designed for the defence of three out of four of the principal passes designated by me in my communication to the Department of War, dated at Pittsburg, December 24, 1814, by which I, at that time, as I have long previous, and subsequent to that time, considered the city of New Orleans to be most assailable, it will be seen that the engineers have but confirmed me in my opinion, as far as it relates to the defence of those passes. The fourth site is likewise well selected, and I am convinced that the country affords no positions better adapted to the permanent defence and security of the city than each of those selected.

The position of New Orleans is, in some respects, stronger, and by nature more secure from external danger, than any one of the great Atlantic cities.

1st. Because it is impossible for a naval force, with ships of the line, or even frigates, to co-operate with an invading army, or to take and maintain a position within co-operating distance, or within less than sixty miles of the city

2d. Because no such naval force could find a safe harbor where they could land an army under cover of their fire short of Dauphin island, or Pensacola, near 200 miles distant.

3d. Because the enemy's force, after its disembarkation, would be compelled to approach the city by one, two, or three, of five different passes, upon all but one of which he would be exposed to the hazard of passing by land (independent of the powerful works about to be constructed) some narrow defiles, formed principally by impassable morasses, creeks, and lagoons, where any given number of sharp-shooters, with a few field-pieces, a temporary battery and breastwork, would check the approach of and overpower more than double their numbers.

I think it my duty, however, to suggest the propriety of an additional work of at least eighty heavy guns, to be erected at the upper end of Plaquemine bend, at or near the site where Fort St. Philip now stands. Fort St. Philip, though the most efficient of the old defences of Louisiana, is in a state of dilapidation, and not susceptible of such improvement by repairs as to sustain itself with the largest garrison that could be put into it against any respectable land and naval assailant resolved at all hazards to ascend the river.

The importance of this position can be correctly estimated only by taking into view the practicable and probable change which the application of steam to vessels, comprehending a military and naval flotilla, must produce in a river navigation, and particularly so in ascending the rapid current of the Mississippi. Without a strong work at this position, I am of opinion that 200 steamboats, (armed and fortified as they may be, in such a manner as to give great security to their machinery and cargo,) carrying the requisite supply of ordnance and stores, with an army of 75,000 men, might, by selecting a dark night or foggy morning, pass the intended work on the right bank of the river in the course of two hours without sustaining a loss of more than one-tenth of their number. But with the proposed work, within less than 2,000 yards of that on the right, the hazard of such an attempt on the part of the enemy I should estimate at not less than *four-tenths* of their number. And it is not to be apprehended that any experienced commander would be likely to engage, voluntarily, in an enterprise where the passage of the first barrier, sixty miles distant from the main point of attack, must, in all human probability, cost him near four-tenths of his force, more especially when it is recollected that he must calculate upon considerable annoyance from the temporary batteries and light artillery, after effecting this perilous passage, at every step in the last forty miles of his intended movement; for this purpose the *levees*, already formed on each bank of the river for the most part of the last-mentioned distance, form complete breastworks and parapets. This formidable species of annoyance, added to the difficulty of ascending the rapid current of the river, might have been relied on as the principal means of defence prior to the application of steam to river navigation. But it is not to be forgotten that irresistible as the current has heretofore been without the aid of wind, steamboats are now known to ascend the river with more celerity than an army, not mounted, can possibly move by land. Hence it is apprehended that the city cannot be rendered secure from the approach of an enemy by this channel until we are prepared to give him the *deadly blow* at St. Philip.

The steam flotilla having once passed this position would in twelve hours' time land its forces at or near New Orleans, and, by taking advantage of a dark night, would, in a great measure, baffle the efforts of any force that would be likely to have charge of the temporary defence of the river between St. Philip and the city.

By examining the chart of the river, in connexion with the positions in question, it will be found that such is the character of the Plaquemine bend, near to and between the two positions, that vessels passing the one on the right are compelled to ascend a distance of near a mile in an almost direct line towards that on the left. A flotilla would, therefore, be exposed to a most destructive *raking* from the latter during a great part of the time it would occupy in passing the bend. But the great means of utility in the two works would consist in the destruction and appalling effect of their combined *cross fire*. Hence it is that two works thus situated are deemed to be more efficient in defending a pass of this description than four of equal magnitude not in supporting distance of each other.

It may be doubted whether the great number of steamboats necessary to form such a flotilla could be brought to any one point on our coast, particularly to the Balize, and there prepared for action without our being apprised of their destination in time to provide ample temporary means of defence between the city and Plaquemine bend for their destruction. I admit that *timely notice* of the place of rendezvous and the real route or pass of approach would enable us to detach force and prepare such temporary works of defence as would secure that particular pass. But it is well known that no vessels can be moved with more facility, even by sea, than steamboats; that they may be built and receive their armament and stores

on the Mexican or South American coast, or one of the West India islands, and guarded by a strong fleet, may be in the Mississippi before we are apprised of their movement or even of their existence. They may rendezvous in that river near the Balize, make a point in our positions at Plaquemine Bend, and as soon as they find that our principal force from the city shall have been detached down the river to meet them, they may in eighteen hours move round by the Pass Rigolet, and arrive at Fort St. John's before the detachments sent down the Mississippi would be likely to receive information of the departure of the flotilla from the Balize. From Fort St. John's to the city is about six miles by way of the bayou and canal, both narrow, shallow, and boggy. There is a small road along the margin of the bayou, but which is bordered on each side by deep cypress swamps, covered with bushy woods, vines, and briers, through which I have found it extremely difficult to pass on foot without being swamped in the mud above the tops of my boots. The native hunters of the city and its vicinity occasionally wade through this morass in pursuit of wild fowl and other animals, with which it abounds; but some of these hunters have assured me that they found it a work of great labor and difficulty to pass in half a day from Lake Pontchartrain, directly through the swamp, to the dry or cultivable land on the Mississippi river, near to New Orleans, which, on a direct line, is estimated at something more than three miles. I am well aware that an army consisting of light troops ought to effect a passage over any swamp that could be traversed by a single individual; this, I am convinced, would be effected by United States light infantry and riflemen, because they would consist principally of expert woodsmen and hunters. But without underrating the character of European troops, whose bravery and enterprise I cannot doubt, it may well be questioned whether they would, under any circumstances, attempt to pass a swamp which must necessarily separate their light troops (who alone could possibly effect the passage) from the main body of their force, with all their ordnance and military stores. Taking into view the apparent facility with which the pass by St. John's may be defended, as also that by land from Chef Menteur, and that by Grand Terre, as well as that by which the British army advanced in December, 1814, added to the great risk and difficulty that must always attend any attempt on the part of an invading foe to penetrate the swamps bordering on each of these routes, and lying everywhere between the lake and the river, I should think the probability of an attack by either of these routes extremely remote, were it not that the known absence of a competent force from the city should prompt the enemy to attempt a *coup de main*, as, without a great deficiency in our force and preparations, he could not calculate on anything less than the loss of a moiety of his force, with the greater part of his artillery, ammunition, and other military stores, in an attack by either of the four last-mentioned routes, leaving everything in this case to depend ultimately on the hazardous issue of a conflict between the shattered remnant of his army and our fresh reserve near the city, where a moment's recollection of the scenes of the 23d December, 1814, and 8th January, 1815, would sufficiently indicate the result, and hasten the fatal catastrophe to which the invading foe should be doomed.

Had the British commander, in 1814, entered the Mississippi with his army, transports, and such naval force as the river would admit, and thus possessed himself of the means of ascending, and of landing his troops at and above St. Philip, he might then, without the aid of steamboats, have moved up with nearly double the moral and physical power of assault that he had on the 8th January, 1815. His naval force would have given him the advantage of choosing whichever road and levee he had seen fit, on which to place his army in their approach and co-operation towards the city; for it will be recollected that at that time there was a road and levee on each bank of the river for nearly thirty miles immediately below the city. These have since been greatly improved, and extended still lower down. The enemy's great superiority in naval force, as well as in artillery, would, at that time, have given him such complete command of the river that he could not only have thrown his army across from levee to levee, at any place within a few hours, and with but little risk, but could moreover have rendered it extremely difficult, if not absolutely impossible, for our detachments to cross in time and in sufficient force to keep him in check. Had he adopted this plan it can hardly be doubted that he would have taken Fort St. Philip by assault, without much delay or loss; that his next and only conflict would have been at or near the city; and that nothing short of an army on each bank of the river, equal in strength to that under Major General Jackson on the left, could have preserved the city; and without extending this view of the subject to the utmost verge of probability, I may add that, even with such equal means of defence on each bank, seven miles below the city, a strong favorable wind, with the aid of a dark night, might have wafted the enemy's flotilla to the city, without the probability of such a loss as would have discouraged the enterprise. But an army under these circumstances, aided with a flotilla of steamboats, would pass such positions in the dark with very little risk. The intended work on the right of Plaquemine Bend will, it is believed, be able, from its number and calibre of guns, to give to a passing flotilla more than six times as much annoyance as the whole of General Jackson's artillery on the 8th January, 1815, could have given; yet, without the proposed work on the left of the bend at St. Philip, I cannot but apprehend that this pass will be the one by which New Orleans will be most likely to be assailed. The proposed position at St. Philip should therefore be strongly fortified. We should, then, aided by our flotilla, secure, to a mortal certainty, the command of this important key to the city of New Orleans. In this event, should the city fall into the hands of an enemy approaching it by any other route, his success would avail him little or nothing so long as we should retain the complete command of the river, which these two positions, strongly fortified, would give us, if not for years, at least for months, until the requisite forces of the western States, irresistible as the mighty stream on whose tributaries they dwell, and on whose bosom they would be wafted to the scene of action, would assemble and sweep from its shores the invading foe.

The route by Attakapas appears to merit more attention than I have been able to devote to it An enemy landing on that coast, or in Texas, would be able to sustain himself longer, as he could obtain a better supply of fresh provisions, horses, oxen, forage, &c., and could more effectually command the passes through which our troops must approach him than at any place within our limits on the Gulf or Bay of Mexico; hence he could effect an important diversion, divide our forces, and at the same time co-operate powerfully with that part of his army that might be employed against the city by either of the other routes.

To prepare Louisiana for a state of war, I deem it proper to suggest the propriety of constructing substantial brick barracks for the accommodation of one thousand men, at the battle-ground, seven miles below, or from ten to twenty miles above the city of New Orleans, with spacious quartermaster, subsistence, and ordnance stores, and that similar barracks be constructed at the Pass Christian.

The first-mentioned barracks are deemed to be essentially necessary for the health and comfort of such corps, as the probable disorders of a bad population may from time to time require to be near the

city; and on the appearance of war these barracks would be ready for the reception of a part of the corps of reserve (and for the sick and wounded of the army) which, during the season of military operations at that place—from the 15th November to the 15th June—should be held ready for action in the immediate defence of the city. As it is not likely that the enemy's force would have the temerity to commence an attack during the sickly season, between June and November, it cannot be necessary, nor will it be safe during that period, to station any considerable number of our troops near the city, or in the interior of the State. It is very desirable that safe summer positions should be found for the preservation from disease of the disposable force during the sickly season, at or near the principal posts on the sea-coast and at Plaquemine Bend; and, indeed, judging from the usual health of the company posted at Fort St. Philip, and of that which was for some time at Petite Coquille, whose health has usually been tolerably good, I find much reason to calculate on each of those positions becoming more healthy, by the immediately adjacent swamp being reclaimed, than any part of the interior of Louisiana. But until these improvements can be made, and permanent barracks constructed at one of those places, I am decidedly of opinion that the Pass Christian should be alone relied on as a retreat from the diseases of summer and autumn, because it has been proven to be, beyond all doubt, the most healthy position in Louisiana. The only solid objection to this position is, that by land, such as is suitable for good roads, it is too distant from the city. But this objection must give way to the fact that the intervening marsh, bordering on the Rigolets, heretofore deemed to be impracticable, will admit of a good road, which may be made by the troops at a very moderate expense. By this road, which would pass the forts at the Rigolets and Chef Menteur, I feel assured that an army would, at any season of the year, march from the Pass Christian to New Orleans in 36 hours, the distance by crossing the bay at the town of St. Louis being estimated at 60 miles, viz:

To the town, bay of St. Louis	6	miles.
Thence to the fort at the Rigolets	30	"
Thence to the fort at Chef Menteur	7	"
Thence to New Orleans, (by a good road)	17	"
Total	60	"

The troops at the Pass Christian would arrive in twelve hours' march at the new fort at the Rigolets, within the line of defence. By the aid of steamboats the force at the pass would at all times, except in very stormy weather, arrive at New Orleans in from eight to ten hours after their embarcation. In time of war, however, it might be deemed unsafe to rely on steamboats, or any unarmed craft being sent beyond the Rigolets; and hence the necessity of a safe route by land from the pass to the Rigolets at least, if not from thence to the city. There is, indeed, a tolerably good wagon road the greater part of the last-mentioned distance. But if we can safely calculate on the received opinion that no European force will venture to approach New Orleans, except during the healthy season, the distance ceases to form any serious objection to the Pass Christian as a retreat from disease during the usual period of its existence at New Orleans, at the termination of which the troops would resume their positions within the line of defence. The corps of artillery must necessarily continue at all seasons at or near the fortifications to which they may be assigned, as well in that quarter as elsewhere.

I know of no argument by which I could possibly urge the necessity of this precautionary measure *to preserve the health of the troops* that could be more forcible than the simple fact that in every description of our forces during the whole of the war, (excepting only Major General Brown's division, in the year 1814, while on the Niagara, and at Fort Erie,) our actual loss by death was everywhere greater from sickness than from the shot of the enemy. And situated as New Orleans was during the late war, without capacious barracks and hospitals, the suffering of the sick and wounded, and their ultimate loss of life, for want of those comforts which no temporary means likely to be adopted amidst the incessant labors of active military operations would procure, would not fail to form a more faithful source of anxious *solicitude*, if not of *panic*, to the suffering army, than any evils which the field of battle would ordinarily present.

Report of an inspection of the right wing of the western department, by Edmund P. Gaines, major general by brevet in the army of the United States, for the half year ending December 31, 1827.

FORT SNELLING.

October 2, 1827.—The *position* selected for this work is the best the country affords, as it regards the Indians, its convenience to the upper navigation of the Mississippi, its connexion with the river St. Peter's, its health, fine scenery, rich land, excellent water, beautiful lakes and rivulets, with as good *water-power* for mills, iron works, &c., as any in the United States. Surrounded with these advantages, Fort Snelling would be a very desirable position for a settlement, or for the location of troops, but for the extreme severity and long continuance of cold and frosty weather and the scarcity of fuel; a great proportion of the surrounding country consisting of *prairie*, but thinly skirted with small patches of timber, mostly of a dwarfish kind. The country is generally hilly, but in many places considerably intersected with small lakes, ponds, and bogs. These last afford great quantities of *turf* or *peat*, similar, it is believed, to that which is obtained on the boggy lands of Ireland. It makes tolerable fuel. The fort stands upon the point of high land which terminates in an almost perpendicular cliff, on the right bank of the Mississippi river, within musket shot of the mouth of the St. Peter's, which is below the fort and on the same side of the Mississippi, and nearly seven miles below the Falls of St. Anthony. The fort is somewhat larger than it should be were it designed never to have a garrison of less than a battalion. Its plan is defective. The main points of *defence against an enemy* appear to have been in some respects sacrificed in the effort to secure the comfort and convenience of the troops in peace. These are important considerations; but at an exposed frontier post the primary object must be *security against the attack of an enemy*. Health and comfort come next. The buildings are too large, too numerous, and extending over a space entirely too great; enclosing a uselessly large parade, five times greater than is at all desirable in that climate. The buildings are however, for the most part, well constructed, of good stone, and other materials, and they combine

every desirable convenience, comfort, and security as barracks and storehouses. The work may be rendered very strong, and adapted to a garrison of two hundred men, by removing one-half the buildings, and, with the materials of which they are constructed, building a tower sufficiently high to command the hill and undulating plain between the Mississippi and St. Peter's, and by a block-house on the extreme point or brow of the cliff, near the commandant's quarters, to secure more effectually the banks of the river, the boats, and the landing. Much credit is due to Colonel Snelling, his officers and men, for the *immense labor and excellent workmanship exhibited in the construction of these barracks and storehouses.* But this has been effected too much at the expense of the discipline of the regiment.

To obviate a future waste of labor by building upon erroneous plans, it is very proper to forbid the erection of any such permanent buildings, without previous instruction as to the *plan* and the *materials* to be employed. In these views I am far from intending to intimate that any serious evil results from a *moderate* share of labor being performed by the troops at all times when not necessarily employed on drill or on guard, or other duty under arms. On the contrary, I am convinced that officers and men employed one-third of their time in building fortifications and barracks would be found to be more useful and efficient in war than those upon whom no sort of labor is imposed; for the history of every active campaign in the United States will be found to be a history of *incessant labor*, and he who becomes familiarized to such labor in *peace* will be so much the better qualified to sustain it in war; besides, nothing tends so much to counteract the encroachments of vice in every class of men, but more particularly in the ranks of an army, as *habitual employment in healthful and useful occupations;* and if they are *laborious* occupations, experience authorizes me to say that they are none the worse for being laborious. It is well for him who commands to know from actual experience what the men confided to his care are capable of doing; how far they should be required to persevere in their labors, and when they should be indulged with repose.

Fort Snelling is garrisoned by four companies of the 5th regiment of infantry, under the command of Colonel Snelling.

Police.—Very respectable in quarters, in the neatness of the rooms, bedding and messing utensils, but somewhat defective in the arrangement of the ordnance stores.

Tactics.—As infantry and as light infantry, tolerable. The officers and non-commissioned officers appeared to be very well acquainted with their duties in theory, but in the exercises there appeared to be something of that defect which proceeds from a want of habitual attention to the drill—something of the rust and awkwardness of men too much habituated to ordinary labor; nevertheless, it is due to the officers and men of those companies to say that a few weeks of steady drill would, I have no doubt, render them as perfect in their evolutions as they are now in personal vigor, for their extraordinary *labor* in building the barracks and other works, though it has tended to detract from their appearance on duty under arms, and from the elegance and accuracy of their movements, yet they are left in possession of as great if not a greater share of muscular and personal prowess than less of labor and more of the peace establishment duties of soldiers would have produced. They have, however, as I have before intimated, labored much more than was necessary or proper.

Discipline.—In accordance with the foregoing views which have been taken of the knowledge attained by these companies of their *police duties* and of *tactics*, it may be proper here to add that a defect in the discipline of this regiment has appeared in the character of certain personal controversies between the colonel and several of his young officers, the particulars of which I forbear now to enter into, assured, as I am, that they will be developed in the proceedings of a general court-martial ordered for the trial of Lieutenant Hunter and other officers at Jefferson Barracks. From a conversation with the colonel, I can have no doubt that he has erred in the course pursued by him in reference to some of those controversies, inasmuch as he has intimated to his officers his willingness to sanction, in certain cases, and even to participate in *personal conflicts*, contrary to the twenty-fifth article of war. He will, of course, be held responsible for any such irregularity which the pending trials may disclose.

In adverting to this subject, I take this occasion to say, that inasmuch as public opinion is supposed to have contributed to render the twenty-fifth article of war a *dead letter*, the interests and honor of the service require that this opinion should be fairly tested, and that if indeed the article in question is not to be enforced, I am convinced that it should be repealed, and under these circumstances I recommend its repeal. By its repeal, officers who feel bound to respect it as a part of the law which they are pledged to comply with will be placed on an equal footing with those who shelter themselves behind it by disregarding it when they know that others will not disregard it. It is at present supposed to favor those most who permit themselves to regard no law but that which accords with their own unbridled prejudices and passions; if it has this effect, it certainly should be repealed. A public officer cannot but be placed in a position of great peril and difficulty when, upon the one hand, his reputation is assailed, and, in public opinion, jeopardized by his submitting to a law which public opinion may condemn; while, on the other hand, so far from his being permitted to view the law in question as a *dead letter*, he is aware that he cannot violate it without violating his oath, nor without subjecting himself to inevitable degradation. Besides, is it not a dangerous policy to suffer a public officer to take for granted that any article of war can with impunity be viewed as a dead letter? Is it not more in accordance with our boasted *government of laws* that public functionaries should feel bound to obey whatever they find recorded in the statute book? A different policy, it is believed, would ultimately lead officers to consult their own convenience in the selection of articles of law to be obeyed or disregarded, and in place of searching the statute book for their rule of conduct, they may merely keep an eye to public opinion, and cases may occur in which public opinion may *seem* to indicate the propriety of *other* and *more important provisions of law being disregarded.* Believing, as I do, that in time of peace it is not possible for an officer to afford more unerring evidence of his fitness to fight the battles of his country than by his *daring to do his duty according to law*, even *in defiance of popular prejudice*, I have no hesitation in repeating that if the twenty-fifth article of war is virtually a *dead letter*, then I request that it may be recommended to be repealed.

FORT CRAWFORD, PRAIRIE DU CHIEN.

Commenced the inspection of this post and its vicinity on the 28th of September, and completed it on the 4th of October, 1827.

Fort Crawford, consisting of block-houses and huts, all of wood, is, as heretofore reported, so much decayed as to be uninhabitable without extensive repairs, and even with repairs the barracks cannot be rendered sufficiently comfortable to secure the health of the troops. The floors and lower timbers are

decayed in part by frequent overflowing of the river, which has left the wood soaked and filled with damp sediment. Orders have been given to Major Fowle, the commanding officer, to repair the barracks in the best manner the means under his control will permit. Ten thousand feet of plank was brought from Fort Snelling, and an additional supply ordered to be furnished for the purpose, with the requisite tools. With these supplies it is believed that the mechanics of Major Fowle's command will be able to render the troops tolerably comfortable until the next spring, when it is apprehended that the usual freshets in the river will again overflow the place. These freshets have often brought the high water into the barracks to the depth of four feet for several days in succession. This has sometimes occurred in the months of June and July. When this is the case bilious diseases are sure to follow.

From a careful inquiry it is ascertained, beyond all doubt, that not only the present position of Fort Crawford, but every other part of the prairie hitherto inhabited by white people or half breeds, has proven to be unhealthy in the latter part of summer and during the months of September and October. I think it will be found by referring to the monthly returns of this post for several summers and autumns past, that the troops stationed here have been more unhealthy than at any other post in the same parallel of latitude, or north thereof. The number of sick at the time of inspection was one officer and *forty-four* enlisted men; although the aggregate force was but one hundred and seventy-seven officers and men By which it will appear that more than one-fourth of the garrison was sick, besides several women and children.

The following report was received from Major Fowle, enclosing one from the assistant surgeon, Coleman, which is likewise inserted:

"FORT CRAWFORD, *October* 3, 1827.

"SIR: Agreeably to your directions, I have required from Doctor Colemam, the assistant surgeon of this post, a statement of the prevalent diseases of this place, which report I have the honor to enclose for your information. Having been stationed at this garrison from July, 1819, to May, 1822, I can confirm what the doctor states as respects the sickliness of the place. There has been generally many of the men sick in the months of May and June. The months of August, September, and October have generally been particularly so during my residence at this place. But whether the health of the garrison would be improved by its removal to the opposite shore I am not able to say, but am of opinion that it would be; and there is no place that will answer for a site for a post so well as Pike's Hill. You are able to decide on the propriety of the present garrison being removed.

"I am, with respect, yours, &c.,

"JOHN FOWLE, *Brevet Major 5th Infantry, Commanding.*

"Major General E. P. GAINES, *Commanding Western Department.*"

"FORT CRAWFORD, *October* 2, 1827.

"SIR: Agreeably to your request, I have the honor to report that this place is decidedly unhealthy, not only the garrison, but the villagers and Indians in the vicinities. Remittent and intermittent fevers, dysenteries, and diarrhœas are the prevalent diseases; the causes of which can, I think, be abundantly found in the immediate vicinity.

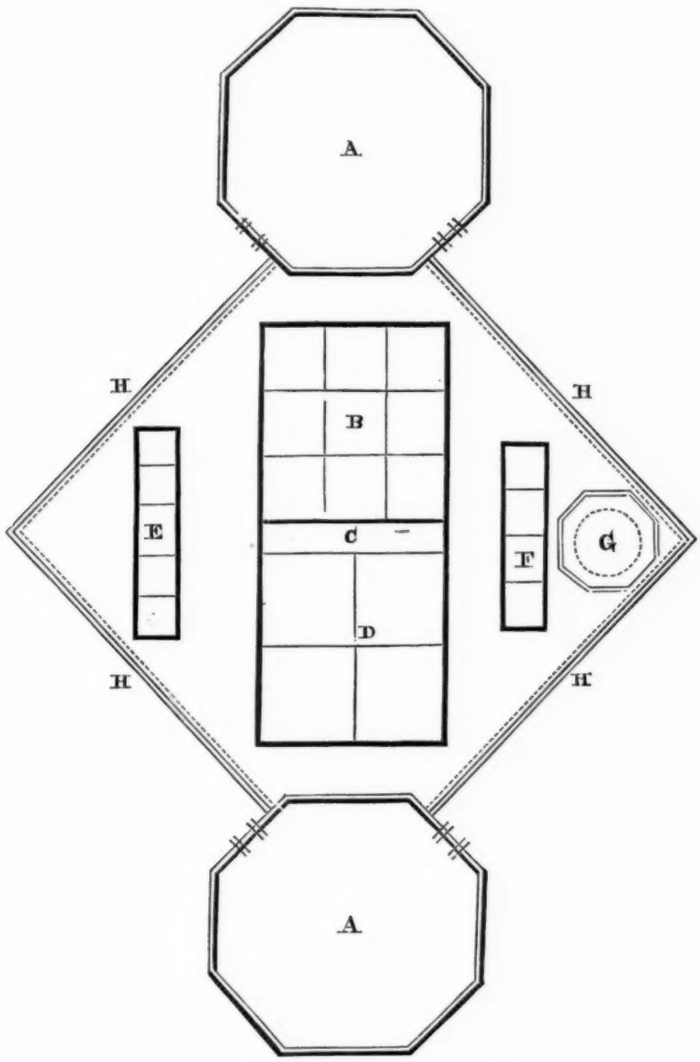
"I am not sufficiently well acquainted with the general character of the place to authorize a decided opinion as to it healthiness; but am informed by the old inhabitants that it is usually unhealthy I apprehend that any place on this side of the river, in this neighborhood, would be liable to all the causes of disease which this is, and would recommend a position on the opposite side of the river as decidedly more healthy than this post.

"I am, &c.,

"R. M. COLEMAN, *Assistant Surgeon.*

"Major FOWLE, *Commanding Fort Crawford.*"

These reports show clearly, that if there existed no other objection to Prairie du Chien, its *unhealthiness* affords a decided objection to its occupancy as a permanent military post. But there is another objection which is almost as conclusive against this place as that of its unhealthiness: it is, that there is no spot *on the prairie* which is not claimed by private individuals, except the few acres where the fort now stands. This circumstance cannot fail to subject the troops to the great evils of tippling shops being erected very near them.



To obviate all these evils, I have no hesitation in recommending the site upon *Pike's Hill*, on the right bank of the Mississippi, nearly opposite to the mouth of the Wisconsin, about four miles from Fort Crawford, and in full view of the fort and neighboring village.

The principal inconvenience that can attend the military occupancy of Pike's Hill is that it does not afford *immediate* protection to the little village of Prairie du Chien; and its height, being upwards of four hundred feet above the river, will subject the troops to some expense of transportation beyond what would be incurred at Fort Crawford. This expense will, however, be counterbalanced by the manifest advantages of health, and a supply of timber for building and fuel, which the hill and highlands adjoining it afford. A good wagon road may be made by ten men, in the course of a week, from the landing, near a mile below the hill, to the proposed site, on the summit of the hill, without an ascent of more than about six or seven degrees.

The highland upon Pike's Hill at the site recommended for a small fort consists of about five acres of table-land, as nearly level as could be desired. This is quite sufficient for the fort and the requisite space for company and battalion exercise. The distance from this spot to the nearest point upon the river is about three hundred yards; the intervening space consequently consists of a steep hill-side, a part of which is a rocky precipice, nearly perpendicular. In a deep hollow of this hill is a spring of excellent water, but little more than one hundred and fifty yards from the proposed site. The proposed road is intended to avoid the steep part of the hill, and hence it will unite with the river at a good landing near a mile from the top of the hill. The road to the spring will be in part too steep for a carriage of any kind, but practicable on foot.

From the top of the hill (the site recommended) the land is sufficiently rich and nearly level for more than half a mile at right angles from the river in the rear of the site. This body of land is well adapted to all the purposes of *cultivation*, as far as this should occupy the attention of the troops, viz: for gardening, grass lots, and pasturage.

Ground plan of a fort for one hundred and twenty-five officers and men, recommended to be erected on Pike's Hill, near Prairie du Chien. To be constructed with a view to defence against small arms only.

A —Stone towers, 30 or 40 feet in diameter, two stories high.
B.—Barracks, two stories high.
C —A passage 12 feet wide.
D.—Officers' quarters, two stories high.
E —Kitchens.
F.—Storehouses.
G.—Magazine
H.—Stone wall and ditch.

NOTE.—The stone wall need not be more than 2 feet thick. The ditch 4 feet deep, and 8 feet wide; 2 six-pounders, and 2 five-inch howitzers to be put into each tower.

The work to be constructed should consist of two small stone towers or castles placed 120 feet apart, with the intermediate space filled up with a block of stone barracks. These to be enclosed by a wall with a ditch, terminating at each castle, and so constructed as to receive the support of a flank fire from each castle. This work should not be larger than to accommodate a garrison of five officers, with one hundred and twenty non-commissioned officers, artificers, and privates, together with storage for their supplies. Upon this principle, I think it my duty to recommend the erection of all works that may in future be necessary upon our inland frontier. One hundred men well supplied with field pieces, and howitzers, and rifles, would defend a work of this description a whole year; or if amply supplied with provisions and water, for seven years, against one thousand of the best troops in the world destitute of artillery. It is believed that a stone or brick work of this description would not cost more than 50 per cent. beyond the expense of a wooden work for the same number of troops, and it would be ten times more durable, and much more secure than a wooden work could possibly be rendered.

The garrison of Fort Crawford consists of four companies of the 5th regiment of infantry, commanded by Brevet Major Fowle.

Police, tactics, and *discipline* equal, in every respect, in quarters and on duty, under arms, to that part of the regiment now at Fort Snelling, notwithstanding the rough, dirty, and decaying barracks, without bunks, render it impossible to keep the clothing, bedding, arms, &c., in as good order, with equal or even increased attention, as at Fort Snelling. The police duties quite as well understood, and as well attended to *in fact*, though not in *appearance*, as in any other part of the regiment. The tactics appear to be well understood, and quite as accurately attended to in battalion and company movements, as infantry

and as light infantry, as at Fort Snelling; a defect similar to that noticed at Fort Snelling on drill was perceived among the troops at Fort Crawford, a defect apparently resulting from the troops having been less habituated to the drill than to the use of the axe and spade, the trowel and hammer, the oar and setting pole.

The sick at Fort Crawford appeared to be well attended to by Assistant Surgeon Coleman, of whose skill I have hitherto had opportunities of finding many proofs.

The rooms, however, occupied as a hospital were indifferent and inconvenient in the extreme; most of the sick (consisting, as I have before stated, of more than one-fourth of the troops) were principally afflicted with agues and fevers, and but few appeared to be dangerously ill.

The Indian prisoners confined at Fort Crawford appeared more miserable and despondent at the prospect of being kept in prison than of being hanged. Their friends are reported to be extremely impatient at their confinement. Such of the chiefs as assisted in procuring their surrender have great reason to apprehend serious evils should they be suffered to escape punishment, as they will be likely in this case to seek revenge for their confinement among those who urged their surrender. They should be speedily tried and executed, or they should be liberated. The wound inflicted on their tribes by *confining them* will not be healed, but will probably grow deeper and deeper until they are tried and punished or liberated.

FORT ARMSTRONG, ROCK ISLAND.

The garrison of this post consists of two companies of the fifth regiment of infantry, commanded by Major Vose.

Commenced the inspection of this post on 24th September and completed it the 5th of October, 1827.

The position is a beautiful one, and uniformly more healthy than most other places on the river between Fort Snelling and St. Louis.

Police, tactics, and *discipline* quite equal, and in some respects superior, to the other companies of the regiment.

Medical department well attended to.

Subsistence good, and regularly supplied.

JEFFERSON BARRACKS.

Commenced my inspection at this post on the 10th of September and completed it on the 12th of October, 1827.

The barracks are up, covered, and so nearly completed that it is confidently believed that the whole of the corps of instruction may move into them by the commencement of winter, or at least before the middle of December next. These barracks are built of good stone, and exhibit satisfactory evidence of very substantial workmanship. For the details of this work I refer to the report of that excellent officer, Quartermaster Clark, for September last.

FIRST REGIMENT OF INFANTRY.

Of this regiment there are six companies in tents near Jefferson Barracks, under the immediate command of Brevet Major Kearney.

Police, tactics, and *discipline,* unexceptionable and exemplary.

Each of the companies was found to be in all respects equal to those inspected by me at Pensacola and New Orleans, in January and February last, as *infantry,* and as *light infantry* decidedly superior to any ever inspected by me. As artillery they have had but little instruction. But they are so completely disciplined as *infantry* and *light infantry,* (and consequently well acquainted with the movements of rifle corps,) and the officers generally are so capable as practical instructors, and so well acquainted with the theory of every other *arm,* that I would vouch for their being rendered excellent practical artillerists, dragoons, and riflemen in the course of six months' instruction; and this would be effected without deteriorating in the least from the high character which I have given them of the first-rate infantry, and the best light infantry I have ever seen.

I know of no officer of the regiment who is not possessed of some peculiar fitness for his station—few or none below and most of them much above mediocrity, and many of them are first-rate officers, according to their opportunities and experience. The regiment is greatly indebted to the talents and steady vigilance of Major Twiggs and Major Kearney for the present excellence of its character. The colonel, McNeil, and lieutenant colonel, Taylor, meritorious as they are known to be, have not for some time past been much with the main body of the regiment, the colonel being on furlough, and the lieutenant colonel in command in Louisiana, where there has been but few companies. They are, however, as perfectly instructed in their police, tactics, and discipline, *as infantry,* as any other part of the regiment.

Having pronounced the first regiment to be *unexceptionable* and *exemplary* in its *police, tactics,* and *discipline,* as *infantry* and as *light infantry,* it is deemed to be unnecessary to enter into details, under either of those heads. And I should report it to be in all respects prepared to be withdrawn from the *infantry corps of instruction,* but for the belief that its *example* will render it more useful here than at any other post, by the spirit of emulation which its present condition and character must excite among the other regiments, and that its continuance with the corps of instruction will enable it the sooner to acquire practical knowledge of artillery and dragoon duties, should horses, arms, and equipments be furnished; and I avail myself of this occasion to recommend that a supply of ordnance and ordnance stores, with fifty horses and the requisite equipments be furnished the corps of instruction for this purpose.

The medical department appeared to be supplied with every article necessary to the comfort and speedy restoration of the sick, who exhibited the most satisfactory evidence of attention and skilful treatment on the part of the medical officers. The sick of this and of each other corps at this post were principally in the hospital, in charge of Surgeons Gale and Nicol, officers of long-tried skill and fidelity.

The sutlers were supplied with all the articles necessary for the accommodation of the troops, at prices which were, for the most part, deemed to be moderate.

THIRD REGIMENT OF INFANTRY.

Of this regiment there were six companies at this post. They appeared in battalion under the immediate command of Brevet Major Greene.

Police, tactics, and *discipline,* respectable; certainly not equal to the first regiment, but in a state of improvement. The police, so far as it is discoverable in the important particulars of neatness and order in messing, and in whatever relates to the interior of very indifferent barracks or huts, is very good; nor is it in any respect defective to an extent which would warrant animadversion. The officers and men appear well instructed in their police duties generally. Their instruction in tactics is not quite sufficient, but it has arrived at that point of improvement from which it is easy to perceive that a few weeks of steady drill will render these companies equal, or nearly equal, to those of the first in *infantry* tactics; as light infantry they have not as yet had much practical instruction, nor have they much practical knowledge of artillery or dragoon exercise.

Of the officers of this regiment, most of them are highly qualified for the stations they occupy, many of them above mediocrity, and all but one (possibly two) exemplary in their conduct and deportment. The only one known to be otherwise is in arrest, and will be brought before a general court-martial in the course of a few days. Lieutenant Cowan is the officer alluded to. Lieutenant Harrison has been charged with some irregularities, but a belief that he has embraced a resolution of reform, and that the accusations against him appearing somewhat prejudicial and personal, they were not acted on.

SIXTH REGIMENT OF INFANTRY.

All the companies of this regiment were present at inspection, under the immediate command of Major Ketchum, in tents.

Police, tactics, and *discipline* equal, or nearly equal, in most respects, to the *third*—sufficiently instructed in most of the duties of interior police, without enjoying or exhibiting as many of the *advantages* of it as could be desired, for want of good tents or barracks. As *infantry* the *sixth* is very nearly equal, if not quite equal, to the third; and as light infantry it is better. Both these regiments, however, exhibit the remains of that *rust,* or want of critical exactness in tactics, which the best of corps will experience by being too long located in the bosom of the wilderness. A few weeks' close instruction, however, will doubtless correct this evil. The present discipline of these corps is sufficiently respectable to render them nearly as serviceable, if not quite as serviceable, on an active campaign and in battle, as the best of infantry in any service. The principle of every duty appears to be well understood, but in the execution of some of the evolutions slight defect was perceived, resulting, manifestly, from a want of that *exact* and *habitual attention to the drill* without which perfection is not attainable.

The officers of this regiment are, for the most part, highly qualified and exemplary in their conduct and deportment. There is much reason to believe that a few months' instruction will render the officers and men of the third and sixth regiments, in most respects, equal to those of the first.

MEDICAL DEPARTMENT.

It is due to the surgeons and assistant surgeons now in service, without exception, to say that, wherever my inspections have called me, their duties have been discharged with a degree of untiring zeal, persevering assiduity, ability, and fidelity, unsurpassed by any officers in this or any other branch of the public service ever known to me. It has been my duty, in the course of every inspection during the last five years, to speak of most of these officers in terms of high approbation, because I could not, without injustice, speak of them otherwise. Aware that *indiscriminate* approbation is generally valueless, I should apprehend that my reports in favor of the medical department would be viewed in this light, were I not apprised of the fact that most of the principal officers of the army, and many of the most intelligent citizens, who occasionally visit our hospitals, concur with me in opinion. I think myself within the limits of a *reasonable estimate* when I state that the increased vigilance and improvements gradually introduced into the medical department during the last twenty-five years, principally since the war, and to a great extent since the year 1821, have produced in the ranks of the army a saving of life and health that may be fairly estimated at from 20 to 25 per cent., without any proportionate increase of expense, taking into view the number of troops and of military posts within the United States at different periods of the time.

The value of such a medical staff to an army, on the approach of war, and consequently in peace while preparing for war, can be conceived only by those who have carefully watched the progress of contagious and other diseases in camps, or at unhealthy places occupied by large bodies of men, unattended by experienced surgeons. Nothing tends so much altogether to prostrate the strength and spirit of an army as the prevalence of such a disease, without the talents necessary to check its ravages; and, on the other hand, nothing tends so much to establish the physical and moral energy of an army as a high state of health, added to that perfect habitual *discipline* which is attainable only by men in the enjoyment of health.

These views and reflections have suggested to me the propriety of inquiring whether the officers of this indispensable branch of the staff, so distinguished for their usefulness and science, are adequately provided for, and justly compensated for the valuable services they render. The result of this inquiry is, that there is scarcely any description of public officers, civil or military, who have been more inadequately paid than the officers of the medical staff. Their education is necessarily a more expensive one than that of most other officers; an expense, too, which is incurred by themselves or their friends, and in no case sustained by the public, as in the case of most other officers of the army. Their prospects of promotion are limited in the extreme; their responsibilities are always great, often greater than those of many other branches of the general staff, and their pay should be equal to that of any other.

I take this occasion to recommend a slight change in the organization and pay of the medical department, viz:

1. The Surgeon General to have the pay and emoluments of a brigadier general.

2. Surgeons who have served fifteen years to be denominated senior surgeons, to have the pay, &c., of colonels of cavalry.

3. All other surgeons to be denominated junior surgeons, and to have the pay, &c., of lieutenant colonels of cavalry.

4. All assistant surgeons who shall have served ten years to be denominated senior assistant surgeons, to have the pay, &c., of majors of cavalry.

5. All other assistant surgeons to have the pay, &c., of captains of cavalry.

I have hitherto (in my report of December, 1826) suggested the propriety of the head of the subsistence, ordnance, and pay departments each having the rank, pay, and emoluments of brigadier general.

The subsistence at every post was found to be of good quality, without any exception worthy of notice. The subsistence officers discharged their duty correctly.

The sutlers at each of the posts referred to in the foregoing remarks, appeared to be supplied with ample assortments of goods, suitable to the stations they occupy; and, for the most part, at prices which were reasonable.

NOTE.—The following remarks in reference to Baton Rouge arsenal were, it is believed, accidentally omitted to be sent with my report for the first half of the year 1827. It was but recently that I discovered the supposed error. In looking over my notes of my last winter and spring's inspection, I found among them a copy which I think is the one prepared to be sent to the general-in-chief; hence it is inserted in this report.

BATON ROUGE.

March 4, 1827.—Inspected Baton Rouge arsenal, under the command of Lieutenant Isaac A. Adams, of the 4th regiment of artillery.

Police excellent; ordnance and ordnance stores correctly inventoried and arranged in very good order for preservation, for use, for issue, and for inspection.

The powder magazine.—The powder in good casks piled upon frames, so that no cask appeared to be subject to any such pressure as to endanger it or the magazine. In this particular, and in its neatness and methodical arrangement throughout, it is, I think, in better order than any that I have ever inspected. I am, however, decidedly of the opinion that as no powder magazine can be considered as at all times secure from accidents that may, with the greatest possible care, result from the receipt and the issue of powder, and from the occasional removal and ventilation necessary in this climate to preserve its strength and quality—to say nothing of the danger of lightning—a rampart or large traverse should be thrown up around this and every other magazine placed, as this is, in the immediate vicinity of other valuable buildings; for it is pretty evident that an explosion of this magazine, containing as it does near two thousand pounds of powder, would destroy the principal arsenal, together with the barracks, the value of which may be estimated at $140,000. The enclosure which I propose would not cost more than $3,000, which would, in the event of an explosion, preserve those buildings except the window glass, with, perhaps, a part of the roofs nearest the magazine. Thus a premium of but little more than two and a half per cent. upon the value of this property would secure it against the risk of an explosion of the magazine; and when to this is added the probable security of the lives of valuable officers and men, (such as are usually at this post,) I cannot but hope that this plan, which I have some years past proposed of securing our magazines by traverses around them, may be adopted. If, however, I am supposed to be in error as to the actual effect of such traverses, walls, or embankments, then let an experiment be made, that my theory may be tested. I contend that the *potential* and destructive elements of an explosion of powder proceed directly from the point at which the powder is deposited in *right lines* through the open space, or the enclosure of least resistance from that point of explosion; and, consequently, that if the point of explosion is surrounded by a large traverse, the destructive force will direct itself *against* and through the open space *above* the traverse. *The concussion* which such an explosion would produce upon the surrounding atmosphere would doubtless be considerable—sufficient, perhaps, to overthrow or unroof a feeble building and break window sashes out of the direct lines of explosion, but not to destroy or materially to injure, when covered by a traverse, substantial brick buildings such as the barracks of Baton Rouge are.

ORDNANCE YARD.

The ordnance yard is well enclosed, levelled, and bordered with sod. The yard contains near fifty light pieces of iron and brass cannon dismounted, with brass howitzers, all handsomely arranged on skids, with the muzzles and vents stopped and sealed, agreeably to orders. The ordnance yard likewise contains near thirty thousand round shot, with some shells. These, with iron cannon, were well lacquered.

The artillery shed contains five good travelling gun-carriages, with iron 18-pounders, spare limbers and equipments, with fixed ammunition and other stores, all well arranged.

The arsenal, a large three-story brick building, badly built; the lower side, next to the river, has settled into an imperfect foundation, so as to have given the upper part of the wall of the building a tendency towards the river of several inches. This building, though partially secured by strong timbers, put in since the work was finished, is unsafe, and cannot be trusted with more than one-fifth part of the stores it should otherwise contain. The stores in this building are very correctly and handsomely arranged and classed.

The armorers' shops.—These are not as large as are desirable in this climate, but the tools are conveniently arranged, and generally in fine order. The materials and everything about these shops exhibit care, industry, and method.

Teams, *carriages*, and *stables* in good order.

To conclude: the arsenal at Baton Rouge, with everything belonging to it, is strikingly marked with the impress of *activity*, *method*, and *talents* of a highly respectable order on the part of the commanding officer, who is surpassed by few young officers of the army known to me for the variety and usefulness of his attainments, united with a degree of practical efficiency equalled by very few, particularly for ordnance and artillery duties; and I think it due to his talents and worth to say that if I were required to select officers for the different departments of an army destined for an active campaign, I know of but few company officers in the army who I would prefer to Lieutenant Adams to take charge of the ordnance department of such an army during the campaign; and they would be preferred only in consequence of their having had a wider range of experience than has yet been in his power to enjoy; for I repeat that I have found no arsenal better attended to, and but few equal to this.

INDIAN DEPARTMENT.

A desire to confine myself to my own proper sphere of service, and to abstain from entering into that of others but partially connected with, and apparently designed by law to be independent of, military authority, has hitherto induced me to limit myself, in respect to the Indian department, principally to such local or special views and circumstances as appeared to be embraced in the letter of the law and of the instructions which I have received, from time to time, from the Department of War. But, inasmuch as the most important duties that ever occur in our Indian relations necessarily devolve, either directly or indirectly, upon the army, and inasmuch as many of the most lamentable of our collisions with the Indians are believed to have been owing to a defective system of intercourse with them, I avail myself of the present occasion to remark more freely upon this subject than I have heretofore done, assured, as I am, that my remarks will pass for no more than they are worth I content myself with the hope that they may be duly weighed and considered as the deliberate and impartial result of long observation, careful inquiry, and intense reflection.

Viewing the present system as radically defective throughout, I propose to state concisely what I understand to be the primary objects of any system of intercourse with our Indian neighbors, and then proceed to sketch out the principal features of an improved system.

1. Acknowledged principles of natural law make it the duty of civilized individuals possessed of ample means to afford immediate shelter, food, and clothing to the helpless infant found at their door, destitute of parent, guardian, or other protector. The same law makes it the duty of civilized communities to lend a helping hand to any such uninstructed or uncivilized tribes of the human family as happen to be found suffering near them. The obligation to discharge this duty with cheerfulness and good faith cannot but be enhanced by the circumstance of the country in whose bosom such suffering tribes are found, is, and was from time immemorial, *their own country*.

2. The faithful discharge of this duty by the United States will not only tend to elevate their character for *justice* and *humanity*, but will, in all human probability, eventuate in providing for the national defence an auxiliary force worth more, during a period of war, than double the amount of money and labor that will be found requisite to carry into complete effect the long-desired but hitherto imperfect system of civilization.

3. An efficient system of civilization will tend to insure to the United States the future friendliness if not the lasting gratitude of the Indians. Without such a system we cannot reasonably calculate on avoiding the hitherto afflictive evils of often having our helpless and unoffending frontier citizens, of both sexes and all ages, killed and scalped, and in a future war of finding thousands of the most vigorous native-born sons of the American forest arrayed in the ranks of our enemy against us.

4. The Indians already possess striking traits of several of the cardinal virtues: truth, unobtrusive kindness, and good will towards their friends and one another in peace; bravery and vigilance in war; promptitude and alacrity in encountering the most difficult enterprises and laborious marches, amidst the most trying privations of food, of clothing, and of rest. In many of these characteristic traits our neighboring Indians are equalled by few, and surpassed by none of the human family of whose history I have any knowledge. It will be well for us to improve these valuable traits of the native American character.

5 Experience proves the fruitlessness of any known system of civilization but that which is based on *literary and moral instruction*, and that no means of instruction can be relied on but that which commences with *children*, and which combines a *knowledge of letters* and *agricultural* and *mechanic arts with early habits of industry*. These will insure to the students a *certain supply of food* and *raiment*, without which literature and science would perish, or at best tend but to render the horrors of want more visible and frightful to the child of nature whilst groping his way from barbarism to civilization.

Under these impressions I hold it to be the duty of every citizen of the United States to raise his voice, however feeble, in favor of the instruction and actual civilization of these Indians, and against their being driven from their *homes*—which, for the most part, possess the charm of being the places of their birth, a charm not less dear to them than to their civilized neighbors. If we put them afloat, and push them into the wide expanse of western prairie, we thereby assume the responsibility of feeding and protecting them, or of contributing perhaps to their annihilation, by subjecting them to the tomahawks of each other and to famine, or of finding those who escape these evils more than ever confirmed in their attachment to savage warfare and savage habits of life. Their present homes or villages, miserable as they are, are the places where the elements of civilization will with the greatest certainty and at the least possible expense be imparted to them.

In the expression of these opinions, I am certainly no more disposed to treat with disrespect the opinions of those numerous and distinguished statesmen and patriots who have entertained different views, than Robert Fulton was to condemn the numerous philosophers who had for centuries failed to discover the now apparently simple, but pre-eminently valuable fact that *steam* can be advantageously applied to ships as the most efficient propelling power known to man. Without laying claim to a hundredth part of the merit to which that distinguished citizen was entitled, I may venture to say that Fulton was never better satisfied of the value of steam to the commerce of America than I am of the practicability of effectually civilizing the American Indians upon the plan which I have here to propose—a plan which I by no means lay claim to as exclusively my own; the able, disinterested, and indefatigable missionaries, with their teachers, are entitled to the principal credit of the discovery.

I have witnessed the operation of the *principle* upon which it depends, only indeed upon a small scale, but to a sufficient extent to have seen its utility demonstrated.

I have seen among the Cherokees, Chickasaws, and Choctaws, boys and girls who learned to read and write, and occasionally to perform many of the laborious and useful occupations incident to civilized life with a degree of cheerfulness and a facility of attainment unsurpassed by the children of their white neighbors; and I have known several of these persons since they have arrived at the years of maturity who are industrious, amiable, and exemplary in their deportment, and who appear to be as much devoted to our institutions as any good citizens of any color need be. Those who have succeeded best are principally those who were instructed in their own villages. There the process of instruction has a powerful influence decidedly favorable to the cause of civilization upon all who reside at and in the vicinity of the places of instruction; there the occasional daily labor of the children contributes to the aid and comfort of their parents, who, if opposed to books, as many of them are, will not fail to learn something of agriculture and other useful occupations; and there the Indians have generally begun to profit by practical con-

ceptions of *individual right of property.* Every family is in the possession of some little property, such as a house or tent to live in, a horse, a cow, or at least some hogs and poultry; many of them possess cleared land in sufficient quantities to afford them a supply of bread; whereas if they break up and go to the west they will be driven by necessity to part with most of these conveniences, and fall into their ancient habits of holding what property they happen to have as a common stock, subject to the *use and waste of all.*

One of the reasons which appears to be relied on for removing the Indians to the westward is, that the great evil of their access to spirituous liquors will be more likely to visit them in their present towns and villages than it would be at the place of their destination in the west. A moment's reflection, however, combined with a knowledge of the enterprising character of our merchants and traders, will convince every man of reflection that wherever the Indians go traders are sure to follow them; and that so long as the Indians have a dollar, or a skin, or a blanket, they who love *whiskey* will buy and drink it; and that every measure on our part to restrain them in the use of it tends but to increase their fondness for it, their sacrifices to obtain it, and consequently to favor the pecuniary interests of those who, in defiance of every legal restraint, persevere in supplying them. Thus it is that our restrictive laws, prohibiting the supply of spirituous liquors to Indians, tend to favor those only who are regardless of all law, and seriously to injure not only the Indians generally, but the honest traders who take the law for their guide. Hence, I am decidedly of the opinion that no such restriction should exist. The laws should allow every licensed trader to sell spirituous liquors and every other commodity which the Indians themselves, in council, may authorize, *to all who shall have money or skins to pay for it, but to no other person.* This measure would, I am convinced, tend sooner to restrain the intemperate habits of the Indians than any prohibitory laws that we could possibly enforce. An efficient system of instruction will very soon place the moral and municipal power of the Indians in the hands of educated men of their own tribes. In the meantime no such evils are to be apprehended from the proposed free trade as those which now exist. Now, it is well known that the lawless traders will sell whiskey at enormous prices for whatever the Indian has to give them—his blanket, his gun, the kettle, with the corn and meat on which his wife and children depend for their subsistence; their all is often given for a few kegs of poisonous whiskey, without regard to price; and it cannot be doubted that the fact of its being *smuggled* into their country, *secretly sold* and *secretly* purchased, adds much to the high estimation in which they hold it, and to the keenness of their desire to indulge in the use of it. They (or at least many of them) call it the "*milk* of their white friends," and they know it to be the only article of trade which their "great fathers at Washington" have forbidden them to touch; and we all know that "forbidden fruit," when secretly recommended by a *serpent,* holds forth to man, in a state of nature, irresistible attractions.

The adult Indians are, perhaps, for the most part, irreclaimable, or, at best, not likely to receive sufficient instruction to render their civilization complete. But their condition will be greatly improved by the instruction and usefulness of their children. Nor do I consider it by any means so likely that the children of habitual drunkards should, in this respect, follow the evil examples of their parents, as that they should, while favored with the lights of instruction, weep over and endeavor to restrain the vices of such parents, and forever after carefully guard themselves against such vices. Who among us, I would ask, has not witnessed such results among the mortified and distressed children of many of our own white drunkards?

If ancient or modern history may be credited—if, in short, the events of our own country, with those of other nations known to us during the last fifty years, may be relied on as evidence of what may again occur, they prove clearly that, inasmuch as most of those nations owe their very existence, and whatever independence they possess, next to the intervention of a kind Providence, to a vigorous development of the moral and physical prowess of all such of their citizens or subjects as were deemed to be able and willing to fight their battles, we cannot doubt that we may have occasion for the services of Indians as well as white men; and we should therefore lend some aid in giving instruction, military as well as civil instruction, to all such as may be disposed to receive it.

The more we advance in these efforts, the more safe and durable will be our republic, and the better shall we be prepared for the great trial of war, let it come when it may—a trial which has annihilated many *apparently* powerful nations, shaken others to their centre, and often left the best of them, even the victors, crippled, deeply in debt, and in mourning for sacked cities, fallen patriots, and suffering widows and orphans. This has been, in part, our lot; and we should never forget that many of the most distressing evils of the war of 1812, 1813, and 1814, evidently proceeded principally from a want of preparation, and from the number of Indians opposed to us. The only possible means of avoiding a recurrence of some of the worst of those evils is to instruct, civilize, and thus secure to ourselves the friendliness and future services of these numerous tribes.

The virtuous and the wise of every State and of every country cannot but yield to the conclusion that it is *necessary,* and *just,* and *right* that we should avail ourselves of every *hand* and every *heart* capable of being advantageously turned to the national defence. Our wars should, if possible, be forever limited to the purposes of self-defence; but for these purposes a slight glance at the character and overwhelming military and naval resources of several of the European powers likely to be our enemies must convince us that our preparations, to be complete, should extend to every class of Americans capable of vigorous service. Such a state of preparation for war will insure to us a continuance of peace; or, if under such circumstances war should be forced upon us, we shall then be prepared to fix its greatest evils upon the aggressor.

Under this view of the subject, believing that no nation can furnish better light troops than most of these Indians with the aid of instruction, and believing that in every war of long continuance near them they will be found in the ranks of our adversary, if not previously secured to us by the lights of instruction, I cannot but believe that our efforts to instruct and civilize them will be more than remunerated by the service they will render us in the course of any future war in which the powers of Europe may involve us.

I am aware that it has been apprehended by those who have not closely investigated the subject that our instruction, and particularly our *military instruction,* bestowed on the Indian children, may possibly tend to create among them a formidable enemy to us. This apprehension, I am convinced, is destitute of any reasonable foundation. I contend that their advancement in knowledge will, at every step, attach them more and more to us and to our institutions, and will make them feel that the United States is *their* country as it is *our* country. Every light which literature and science can impart must tend to convince them, as it has convinced the numerous Europeans settled among us, and as it has convinced the people of Mexico and South America, that their best interests prompt them to espouse our institutions, and to

shun as their deadliest enemy every sort of political connexion with any of the powers of Europe. Let us civilize and instruct the youth of these tribes, and they will become faithful and valuable citizens of the United States. In support of these views, I take pleasure in stating a well-ascertained fact, that during the war in 1813 and 1814 there was no instance known to me of an Indian, or part Indian, that had received instruction and uniform kind treatment from the citizens of the United States, who ever joined our enemy. Such Indians, though but very partially instructed, have proved themselves to be our steadfast friends, and have in many cases entered our service as volunteers, and heartily united with us in meeting and beating our common enemy. The rolls in the public offices at Washington will exhibit the names of many, I may say hundreds of Indians of this description. Many of them were personally known to me, and I am sure there are several members of Congress from New York, Ohio, Tennessee, Mississippi, Georgia, and Alabama, who will concur with me in the opinion that many of those Indians manifested as much zeal and devotion to our service as most of our own citizens of similar limited education usually manifested. They did not perhaps do us as much good, because we forbid their fighting in the manner best known to them, viz: *as savages* are in the habit of fighting.

No statesman who will investigate the subject, and recall to mind the untoward disasters which marked the character of the late war with England, can doubt that the most destructive and distressing of those disasters proceeded from our red enemies. Should a doubt exist upon this subject, a glance at the details of the war at Detroit, River Raisin, Miami in the northwest, and Fort Mimms, in the south, cannot but remove such doubt. It may have been excusable, if not sound policy, during the continuance of the war, to charge the evils of those disasters exclusively to England, or, in part, to the inefficiency of one of our unfortunate commanders. But since peace is restored, let us do justice to all concerned, but especially to ourselves. Let us admit that the premature invasion of Upper Canada furnished to England an excuse, if not a justification, for the alliance she formed with her old friends and our enemies, the northwestern Indians. Let us admit that our unfortunate General Hull found, not until it was too late to profit by the discovery, that he was not only unprepared to sustain himself in the enemy's country, but even to remain at Detroit, or return to Ohio, without subjecting to Indian massacre the inhabitants of Michigan Territory, with a considerable portion of his inexperienced and undisciplined army. When we have admitted this much, reluctantly as we may admit it, then, and not until then, shall we be prepared to admit the full measure of destructive power which the northwestern nations of Indians sent into the field against us. They knew but little of us; many of them, it is believed, had but seldom heard of us, or thought of us but as their enemies. Under these circumstances their alliance may have been voluntary; at any rate, there is no evidence of their having been *coerced* into that alliance by England. They fought as savages are accustomed to fight. For this England is accountable.

I have no means of ascertaining with tolerable certainty our actual losses of men and money which resulted from the great number of Indians that took the field against us. But I am under the impression that much the greater part of our losses in the northwest, as well as in the southwest, previous to the invasion of New Orleans in December, 1814, may justly be attributed to the enterprise and *vexatious prowess* of the Indian forces opposed to us.

It is, I believe, admitted by our own and British officers, who have had the best means of judging, that there never was at any one time a regular British force on land of more than one thousand men opposed to any part of the northwestern army; and that the number of Indians opposed to us in that quarter often exceeded 4,000 warriors. If this estimate be correct, then it may be reasonably inferred that the Indians (whose enterprise and prowess were at least equal to those of their white allies) must have occasioned four-fifths of the disasters which we incurred on land in the northwest prior to and during the command of General Harrison. In the south and west the whole of our losses up to the latter end of the year 1814 were produced by our red enemy, excepting only a few men who fell at Mobile Point and Pensacola.

If I am nearly right in the foregoing estimates, I am unquestionably correct in the conclusion at which I aim, that the *Indians* opposed to us in 1812, 1813, and 1814, were found to possess sufficient enterprise and prowess to thin our ranks, *destroy our frontier inhabitants, and force us to drain our treasury to an amount of nearly one-fourth of the whole of our losses on land during the war*, notwithstanding their actual numbers are believed not to have amounted to more than *one-tenth of the land forces employed by England against us.*

I am warranted by the opinions of some of the most respectable officers and citizens of the United States, those who have had experience in conducting military operations against Indians as well as against the most distinguished British regulars, in saying that in the forests, such as are everywhere to be found upon our inland frontier, an Indian force of from 1,000 to 4,000 warriors is, in fact, a more formidable enemy than an equal number of British regulars. I would cheerfully submit this question to the decision of Generals Jackson and Harrison, whose conflicts with the Indians have been more frequent and considerable than those of any other officers or citizens of the United States, and who have each met and beaten British regulars, whether they would not at any time have deemed it a favorable circumstance to have found a British force of equal numbers in place of any Indian force that ever assailed them.

However much we may be opposed to accept the aid of Indians without civilization in defending our country against European invaders, yet when the alternative presents itself of having them *with us* or *opposed to us*, we could not in that case hesitate to avail ourselves of their aid; but when we shall have civilized them, there can then be no possible objection to our accepting their services, and consideri ng them as a respectable part of the national forces.

Among the few correct laws which our neighboring Indians possess, and which have for more than twenty centuries past received the approbation of the greater part of the civilized world, there is one which our undue forbearance may induce them to neglect: It is, that "*life shall be taken for life;*" or, in other words, that he who kills a human being, (except in a state of open war, or in obedience to law, or in self-defence,) shall lose his own life.

There is not to be found in any code of law a single provision more essential to the welfare and civilization of our neighboring Indians; and they should be encouraged in the strict observance of this law; and we should enforce it among them whenever they take the life of a citizen of the United States. Nothing can tend so much to the security of our frontier inhabitants (short of the annihilation of the Indians) as the rigid enforcement of this law until the proposed system of civilization shall have had the desired effect.

I have now to submit the outline which I propose as a substitute for the present Indian department, viz:

1. One general superintendent, to be stationed near the War Office, to discharge such duties relating to Indian affairs as may be confided to him by the Secretary of War; for example, to conduct the fiscal concerns of the Indian department; to distribute to superintendents and teachers all laws, regulations, and orders connected with Indian affairs; to receive, record, and consolidate, or make abstracts of, all returns and reports from superintendents and teachers to be laid before the Department of War, the President, or Congress.

2. Six superintendents, viz: one to be stationed on the eastern border of the Chickasaw nation for the southern Indians east of the Mississippi river; one to be stationed at Fort Towson for the Indians of the country bordering on Red river; one to be stationed at Fort Gibson for the Indians of the country bordering on Arkansas and White rivers; one to be stationed at Fort Leavenworth for the Indians of the Missouri river and its dependent streams; one to be stationed at Fort Crawford for the Indians of the Upper Mississippi river and the adjacent country; and one to be stationed at Green Bay for the Indians of the upper lakes and their dependent streams on our side of the national boundary.

These superintendents should be charged with all duties of a national or military character, whether between the United States and Indian nations embraced in their districts, respectively, or between the different nations or tribes within or adjacent to such districts; and generally to discharge such other duties as may be confided to them by the Department of War.

For example: To keep the peace between the Indians and our frontier inhabitants, and between the Indians of different tribes; to take seasonable measures to inquire into and settle all controversies or disturbances calculated to lead to hostilities; to protect and urge the Indians to protect and encourage the public teachers; to make annual visits of inspection to every tribe, principal town, and school within their districts; to report to the head of the department the result of such inspections; and to assist at all Indian treaties in their respective districts.

These superintendents should have the military rank, pay, and emoluments of majors of cavalry, and should each have placed under his immediate command a company of mounted riflemen, to consist of a captain, four subalterns, five sergeants, four corporals, four artificers, with one hundred private soldiers. The principal part of the company of each district should generally accompany the superintendent on his tours of inspection and in attending treaties; and in case of hostilities being committed or apprehended on any part of the frontiers, the superintendents, with each of the companies near the supposed theatre of hostilities, (excepting a small guard to be left in charge of their posts,) should be required to march promptly to the spot and settle the disturbance, and, if necessary, try and punish the offenders.

3. One principal teacher for each nation, with an assistant teacher for every hundred families of each nation. To these should be confined the all-important detailed duties of *all kinds of instruction necessary for the purposes of civilization*, and to render such aid as the Indians may need or accept in their local, civil, and municipal concerns; to settle all such civil and criminal controversies, not amounting to capital offences, as may occur within the limits assigned them, and which may be referred to them by the chiefs or council of the nation, or by the parties concerned, either among the Indians or traders, and such as may occur between Indians and traders; with power to regulate the sale of spirituous liquors, and so far to regulate the Indian trade generally, under the control of the superintendent of the district, as to protect the Indians from imposition by exorbitant prices or by sales on credit of spirituous liquors, or other articles not actually *necessaries of life;* to prohibit all traders from purchasing of the Indians their blankets, agricultural or mechanical tools, and such other articles as are absolutely necessary to the health and comfort of their families.

A candid inquiry, I am convinced, will result in proving that the Indians have, in the last ten years, derived ten times more advantage towards their civilization from the schools established among them by missionaries, and principally at the expense of private individuals, than from all the agencies and other means employed by the United States since the establishment of our government.

The expense of the agencies, it is believed, has exceeded that which the proposed system will require annually for twenty years. After which the whole expense of the proposed system will, it is believed, cease; for in twenty years' time so great a proportion of the youth of each nation will have received the benefits of instruction that they will by that time be prepared to accomplish their own civilization, and to discharge the ordinary duties of citizens of the States and Territories within whose limits they may happen to be placed.

Upon the subject of conferring upon the superintendents of the Indian department *military authority*, and placing under each of them a company of mounted riflemen, I have to add that this feature of the proposed system is essential to give effect to any system that can possibly insure success.

I have been told by some of the most experienced officers of the Indian department that the presence of military force was essential to the prompt adjustment of controversies with them; that little or nothing beyond what the Indians felt an immediate interest in could be effected without such aid; and I have myself witnessed repeated evidence of the existence of a disposition on the part of the southern and western Indians to yield with more apparent cheerfulness to the wishes of the United States, when those wishes were communicated in the presence of an efficient force, and by persons authorized to wield that force, than by any other men without such force or authority. It is not, however, to be inferred from this fact that the presence of a military force necessarily operates upon the fears of the Indians. On the contrary, the peculiarity of the Indian character, to which I allude, may, with more reason, be attributed to a chivalric spirit, added to the defective views of the Indians on such subjects, and to their general want of information.

Most of the nations of Europe, in their emergence from barbarism to civilization, and for centuries since, have been in the habit of treating with more marked deference the *request* of a neighboring nation or individual possessing the present means of enforcing that request, than the humble *prayer* or *demand* of one not in the immediate possession of any such means. Even the most fashionable votaries of *modern* chivalry are often found to be more *courteous* and more *just* to an armed neighbor of inflexible temper than to those who take *reason* and *justice*, without force, for their guide and their shield. Such chivalry, it must be confessed, has a tincture of cowardice in its composition. It is, nevertheless, that legitimate chivalry to which men of *honor* (in the chivalric sense of the word) have for centuries past paid homage throughout the most enlightened nations of the world. It is not, indeed, that chivalry which is based upon high moral courage, which prompts man to do right without fear, and without a hope of reward other than that which must ultimately flow from habitual rectitude of conduct.

The Indians naturally confide most in those whom they deem to be least disposed to deceive them. They have been very often deceived by individuals going among them falsely representing themselves to

be in the confidence of the government, showing them papers, seals, &c., to confirm their statements. The Indians, being mostly unable to read, fail to detect the imposition. They are thus so often deceived that they cannot place such implicit confidence in any one or two private individuals as in those who are accompanied by military force. In this case they see the *men*, the *arms*, and the *uniform* such as they have seen only under the control of United States officers, and such as have usually gone among them, not for the purposes of *trade* or *traffic*, not to bribe or cheat them, *but to discharge public duties according to law and orders*, and in place of taking from them the little they have, of feeding the hungry and often of clothing the naked. Hence their confidence in the United States troops and those who accompany them, and hence the necessity of the superintendents or agents being clothed with military authority and supplied with mounted men, which is the only description of force that can always be efficiently employed against hostile parties. Such, indeed, is the respect which the Indians entertain towards this description of force, that I have no doubt but a single company stationed at either of the posts above designated would contribute more to the security of the frontier inhabitants than a battalion of the best infantry in our service, which I believe to be equal to any infantry in the world. Without the aid of horses any of the western can, with the greatest ease, keep out of the way of infantry, and they have more than once ventured in small parties to commit depredations within a few miles of considerable bodies of infantry, without the possibility of their being overtaken or punished. They can march with ease from forty to forty-five miles in a day, or twelve hours; our troops cannot march more than from thirty to thirty-five miles in the same space of time.

The foregoing views, I trust, will sustain me in a conclusion to which I attach a degree of importance second only, in a military point of light, to the entire civilization of the Indians. It is, that the United States infantry stationed upon the west and northwestern frontier should be relieved by the proposed corps of mounted riflemen and be posted at or in the vicinity of the most vital points of the maritime and northern frontier, at which the services of disciplined infantry will be most likely to be required on the approach of war with any of the European powers. These positions I will here enumerate in the order of their relative importance in a state of war: 1. New York; 2. New Orleans; 3. Philadelphia; 4. Charleston, South Carolina; 5. Plattsburg; 6. Boston; 7. Baltimore; 8. Savannah; 9. Norfolk; 10. Mobile; 11. Newport; 12. Wilmington, North Carolina; 13. Portland; 14. New London; 15. Eastport. For the defence of the city of New York and New Orleans there should never be less, even in time of peace, than a regiment of artillery and two regiments of infantry for each place; for Philadelphia, Charleston, S. C. Plattsburg, and Boston, there should be a regiment of infantry and a battalion of artillery at each place, and for each of the other positions there should never be less than a company of artillery and a battalion of infantry. This measure is necessary now because it will be necessary on the approach of war, and the change from peace to war may be sudden. The regular forces, limited as they are in number, should be located exclusively with a view to immediate preparation for repelling the first onset of a disciplined enemy, protecting such places as he would be likely to pounce upon at the commencement of the war, before we are supposed to be in readiness for a vigorous defence, and, what is of equal importance in the early part of a war, to receive the first onset with a degree of skill and efficiency calculated to inspire confidence among our untried troops and citizens, and at the same time to secure the respect of our adversary and compel him to approach us with due circumspection. The first conflicts that have usually occurred between our troops and a European enemy have generally produced a panic in the ranks of the unsuccessful party; this never fails to increase the confidence and moral prowess of the victor. This interesting principle has, perhaps, never been more demonstratively exemplified than by the defence of New Orleans. There the brilliant attack of the night of the 23d of December, on the part of General Jackson with the whole of his force, evidently produced a panic in the ranks of General Packenham which prepared him for defeat and our troops for the most extraordinary victory ever achieved.

I could add many other reasons in favor of recalling our infantry regiments from the wilderness and posting them at or in the vicinity of the most probable theatre of their future conflicts with an European enemy, but I deem it to be sufficient to say that there is not one of the posts which I have enumerated, excepting New Orleans and Norfolk, that has a garrison within supporting distance sufficient to resist the sudden attack of an enemy consisting of two battalions, with six frigates or even six sloops-of-war. Nor could we at this season of the year avail ourselves of the second and fifth infantry in less than five or six months' time. The maxim that "*every military measure during a period of peace to be right must be adapted to a state of war*," is deemed to be strictly applicable to the subject of the foregoing remarks.

In reference to the *organization* of the companies of mounted riflemen, it may be proper to explain why a greater number of officers and men are proposed for those companies than has been usual in our service. It is because I deem this organization to be the most convenient and efficient for every corps in service as well as for the militia, and it may be recollected that in my report of December, 1826, I recommended a similar organization for every corps of the army and militia of the United States.

Four subalterns are necessary for each company, consisting of one hundred privates, and more particularly so when such companies are to be placed at separate posts where there must always be one or two staff officers to consist of subalterns of the company. These staff officers may with perfect convenience attend to the fiscal concerns of the Indian department in each district, and, with the aid of the teachers, receive and distribute annuities, &c., &c.

I have been assured by many officers of very high respectability who have had commands in the vicinity of Indian tribes that if required to discharge every duty devolving on the Indian department with such tribes, their attention would not thereby be more frequently turned to Indian affairs than it usually has been upon every occasion of disturbance or complaint among them or between them and our citizens. Upon all such occasions the commandants are appealed to, and their intervention would doubtless be much more effective by having the entire control of Indian affairs, which they would cheerfully attend to without any additional allowance beyond the extra expense that would attend this service. The fifth sergeant is deemed necessary to do the duties of company clerk and quartermaster sergeant. The four artificers are necessary to every company of every corps. All of which is respectfully submitted.

EDMUND P. GAINES, *Major General by brevet, Commanding.*

Major General JACOB BROWN, *General-in-chief United States Army, Washington, D. C.*

General remarks concerning the militia of the United States.

HEADQUARTERS WESTERN DEPARTMENT, *Cincinnati, Ohio, December* 2, 1826.

That the militia forms the basis of the *defensive* and *protecting power* of the republic, the history of our independence, and of two successive and triumphant wars, with one of the strongest powers of Europe, affords the most irrefragable evidence. Our consequent unexampled growth and prosperity proves the inestimable value of this power, and the means of enhancing it. But it is not to be concealed that this acknowledged bulwark of our liberty and national existence has been suffered to remain for fifty years, in a great measure, without the order or uniform organization essential to its efficiency.

Such an organization I cannot but consider to be one among the first important measures necessary to enable us "to form a more perfect union, establish justice, insure domestic tranquillity, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity." Every measure that can be devised in regard to the militia, as well as to other branches of the national defence, to be perfect, or in the highest degree useful and efficient, must be based upon the supposition that war between the United States and some two or more of the strong powers of Europe, (for no one of them will be likely alone to trouble us,) is possibly not far distant. To act or to think correctly upon military subjects, it is proper that the mind's eye should be steadily fixed upon a state of actual war. Were it not for the strong probability (which indeed approaches to absolute certainty) that war will occur, sooner or later, every step towards perfecting ourselves in a system of national defence, would be felt as a heavy burden. A military system, designed only for a state of peace, would be as impolitic and as useless as an expensive fleet of ships of the line placed on the top of a mountain. It would be necessary, in either case, on the approach of war, to undo whatever had been erroneously done, and then to commence anew the whole work. Were I called upon to suggest the necessary measures to put the militia and the nation in a posture of defence, preparatory to war, I should proceed upon the principles embraced in the following propositions, which the test of time and experience prove to be self-evident truths.

1. Preparation for war, while powerful neighboring nations stand ready for aggression, is an inherent right and a solemn duty to which the governments of independent nations should promptly attend.

2. Preparation for war is necessary to prevent war, or if it must come, to lessen its attendant evils.

3. In peace is the proper time to prepare for war.

4. Every military principle, and every measure of preparation in peace, should be strictly applicable to a state of war.

5. Every measure of military preparation in peace, not strictly applicable to a state of war, should be held as radically wrong, useless, or mischievous.

6. "Good order and subordination, so useful in all places, are nowhere so essential as in an army. The government ought precisely to determine the functions, duties, and rights of all military men—soldiers, officers, chiefs of corps, generals."

Organization.—This, to be in the highest degree convenient and useful, should be the same in the militia throughout the United States, as in the regular army. But here it should be first simplified and rendered uniform as to the rank of officers for each branch of the general staff, and the number and rank for each regiment.

The chief of each branch of the general staff of the army should be a general officer; and to the bureau of each there should be attached one principal assistant for discharging duties relating exclusively to the militia, preparatory to their being called into the service of the United States.

For example: The principal assistant adjutant general for the militia should correspond with the adjutant generals of States and Territories, receive from them and consolidate, annual and semi-annual returns of each corps of the militia of each State, distribute laws, regulations, and orders for their instruction, furnish details for service, and perform such other duties as the laws and the President of the United States may direct, in reference to the classification and instruction of the militia, preparatory to their entering the service of the United States.

The principal assistant inspector general, the principal assistant quartermaster general, the principal assistant commissary general of subsistence, the principal assistant commissary general of ordnance, the principal assistant paymaster general, and the principal assistant surgeon general for the militia, would each find ample employment, and render very important services in their respective departments, even during a period of peace, by actively communicating with, and obtaining from, the State authorities, from time to time, accurate reports and returns, embracing all subjects of deficiency and of the means of supply in each department tending to the full development of the military resources, whether *local* or *disposable*, of every section of each State. The information thus collected would, on the sudden approach of war, enable the War Department to comprehend at one view, *and in one hour*, the actual force and means of supply directly applicable to the defence of any and of every assailable and vital part of the national frontier; and the head of that department, with such information, aided by the experienced general-in-chief, would, I have no doubt, in one day, prepare a better plan of defence than could possibly be prepared in six months under existing circumstances; and with such information, added to a rational and practical organization and an efficient control of the militia, such as is guaranteed by the Constitution of the United States, an army of from *one to eighteen hundred thousand* freemen might be assembled in the respective States under arms, and in march to their several posts, within forty days after the date of our declaration of war, ready to meet and beat the invading foe; and when it is added, as it may be truly added, that the whole expense of the proposed improved organization of the general staff will not be more than many a merchant of our country pays, annually, to the clerks of one single mercantile establishment, I cannot but hope that this part of my proposition may be found to merit the approbation of the proper authorities.

In addition to the principal assistant proposed to be added to each branch of the general staff for the purpose of discharging duties relating exclusively to the militia, preparatory to a state of war, the laws should provide that on the approach of war there should be appointed an assistant of each branch of the general staff for every division, and for every brigade called into the service of the United States. These staff officers to have fixed relative rank and pay for each grade; those for a division to have the rank, pay, &c., of lieutenant colonels; and those for a brigade the rank, pay, &c., of majors; the pay, &c., of each officer of any one grade being first made equal throughout the army. All officers of the general staff, above the rank of captain, should be selected from the field officers and captains of the line of the army,

provided they shall have served from three to five years at the head of a company. But no officer should be placed at the head of either branch of the general staff, or appointed principal assistant to either, (the medical department excepted,) without having commanded a company for at least five years in the actual service of the United States. All other officers of each branch of the general staff, (other than those of the pay and medical departments,) such as assistant quartermasters, assistant commissaries of subsistence, and assistant commissaries of ordnance, should be selected from the lieutenants of the army, and allowed extra pay, but no staff rank above that of captain.

A regiment (whether of cavalry, artillery, infantry, or riflemen) should consist of—

Field and staff.—One colonel, one lieutenant colonel, two majors, one adjutant, one quartermaster, one sergeant major, one quartermaster sergeant, one chief artificer, and one chief musician.

Ten captains, twenty first lieutenants, twenty second lieutenants, fifty sergeants, forty corporals, forty artificers, twenty musicians, and one thousand private soldiers.

A company should consequently consist of one captain, two first and two second lieutenants, five sergeants, four corporals, two musicians, four artificers, and one hundred private soldiers. The extra sergeant to be clerk and quartermaster to the company.

Two such regiments, or twenty companies, (of any one or more arms,) should constitute a brigade, two brigades a division, and two divisions an army corps.

That my proposition for each regiment of every arm, and of every description of force, to have an equal number of officers, artificers, and men, will excite the amazement of those who believe in the infallibility of British and French organization I am well prepared to expect; nor do I presume to calculate on being sustained in this proposition by any man who has either directly or indirectly contributed to the apparently whimsical changes to which a good part of our military system has been the victim.

But if any solid advantage does really attend the varied organization of other countries, or that of our own, I am constrained, by a sense of duty, and from twenty-six years of careful observation and experience, to say that I have been unable to discover any such advantage; on the contrary, I have witnessed many inconveniences and some serious injuries to the service, resulting from our past varied and irregular organization. I have known no army prepared to meet, or that have met and beaten any considerable body of British troops, but such a one as necessarily consisted of artillery, infantry, cavalry or dragoons, and riflemen, either regular, volunteer, or militia; and I doubt whether there is an officer of experience in the army or militia of the United States who, if required to make an estimate of force for any great enterprise against the regular troops of any civilized power, would not embrace in his estimate parts of every arm or corps just now mentioned. Occasions may often occur in the course of an active campaign where artillery and dragoons would be required to serve as infantry, and where infantry and riflemen should be mounted or employed as artillerists. All should therefore occasionally study and practice the use of each arm and the movements of each corps. If it were otherwise, detachments composed of different arms (which so frequently and so necessarily occur in the neighborhood of an enemy) would often be inefficient or useless, for want of a commander acquainted with the duties of each corps. It has been said by certain theorists that the riflemen need only to understand the use of his rifle and the *use of his legs;* that he has no need of a knowledge of infantry tactics, or of the use of artillery, or of a horse.

To such theorists a serious reply would be an useless waste of time. We have long evinced a disposition to make our artillery regiments perfectly acquainted with infantry tactics. They are required to be regularly instructed as infantry; our dismounted dragoons were likewise so instructed. But in these measures we have but confirmed the principle for which I contend without extending its operation throughout the several corps of the army. The general regulations requiring the artillery to be instructed as infantry have omitted to require infantry, dragoons, and riflemen to be instructed as artillery. Several corps of volunteer infantry have served during the late war with great reputation and effect as cavalry, or, to use the more popular phrase, "*mounted gunmen.*"

A battle won by heterogeneous corps of this description, headed by such *military chieftains* as we have had, and possibly such as we now have, will count for as much in public estimation as an equal conquest, where "generals of *horse*," "generals of foot," and "generals of artillery," with their several separate and distinct corps of different organization, ignorant of the duties of each other, had all figured in the conflict, and all contributed to the achievement.

If it be admitted that occasions do sometimes occur to justify a temporary change in the use of the various arms of the different corps, and this cannot be denied, then it must be admitted that each corps ought to be in all respects alike organized. If they must sometimes participate in the evolutions of the line, then should their organization be similar; their officers and men of equal rank and of equal numbers.

According to the proposed organization, a regiment would embrace an aggregate strength of twelve hundred and ten. This number (making allowance for ordinary casualties, those in battle excepted,) would give an aggregate *for duty* of one thousand officers and men. This organization, I have not a doubt, will bear the test of time and trial in the militia as well as in the regular service. It will, I trust, be approved for the utility and simplicity which it combines. It professes but little novelty, other than its proposed fitness for every description of force. The number of subaltern officers will be objected to only, I am persuaded, by those who have never witnessed the numerous calls for this valuable class of officers, when actively employed near an enemy. In these situations I have never seen half as many company officers as I have had occasion for. The number of sergeants to a company is the second feature that may be deemed objectionable. But this is a grade of non-commissioned officers of which we have but seldom had a sufficient number. Four is admitted to be absolutely necessary for company duties, independent of the clerk. It is to insure to each company a good clerk and quartermaster sergeant to keep the company books and accounts, under the immediate direction of the captain, and to have charge of the public property of the company, that I have added one to the usual number of sergeants. The third and last feature in the foregoing proposition to which any objection can be offered upon the ground of its *novelty*, is the chief artificer of the regiment, with four artificers to each company. Of these I am fully persuaded that every officer who has commanded a company or regiment on active service will concur with me in the opinion that every company should have a blacksmith and carpenter, with such other artificers as the peculiar duties of the corps should require. A regiment of cavalry, for example, should have a saddler and shoemaker for each company, with a farrier; and, strange as it may appear to the advocates of French and British, as well as of our former organization, it is not the less true that every artillery, infantry, and rifle officer of experience, with whose opinions I am acquainted, concur with me in the opinion that each of these corps have frequent and almost daily occa-

sion for artificers during a period of war. Where there are forty artificers to a regiment, it will be admitted that there should be a chief to superintend and direct their labors. Blacksmiths and shoemakers are necessarily occupied daily in quarters, and at every temporary encampment in the course of a campaign, in the repairs of arms and of carriages, shoeing horses, &c.; whilst all the carpenters and other mechanics of a regiment are often employed in the construction of bridges, platforms for batteries, temporary block-houses, magazines, and stockades, to which I may add gun-carriages, wagons, &c.; and even in time of peace, a proper application of the labors of the regimental artificers would contribute much to the economical, prompt, and comfortable quartering of the troops, and to their consequent health and efficiency. I may be told of artificers belonging to the corps of engineers and those employed by the Quartermaster General's department. To this I may reply, verily they have their own peculiar duties to perform, and the peculiar interests and self-aggrandizement of their own corps to promote. Let a regiment on the extreme flanks of an army, or in the advance, arrive at a point near the enemy where a bridge or a temporary work of defence might be necessary to be constructed without delay. The Chief Engineer or Quartermaster General is applied to for artificers; these, as I have often found, were engaged or destined for *other service*, which, in the opinion of such chief, called for immediate attention. But even if such artificers should happen to be unemployed, their commencement of the work would often be delayed until sufficient time would have elapsed for its completion by the artificers of the regiment, such as I propose for each. These would ever be influenced by a zeal and spirit pervading the corps, which would render them considerably more efficient, under such circumstances, than artificers more properly belonging to, and with difficulty obtained from, the general staff of the army. The demand for artificers is always more or less pressing.

The proposed organization is, in all respects, applicable to a state of war. It is equally applicable to a period of peace. But for this I am aware that the number of men to a company will be objected to as being too great. To remedy this supposed evil, the act of Congress embracing this organization would authorize the President to suspend the recruiting service, and reduce the companies to fifty, or even to forty men, during a time of peace, with authority to complete the companies according to the proposed organization on the approach of war. Be this as it may, it is all-important to the army and the militia that the organization, whatever may be its details, should be the same in the militia as in the regular army; that it should be the same in every corps and in every description of force; and that when once established, it should be subject to no change whatever, or if ever subject to change, it should be only once in four, eight, or ten years, and then only when two-thirds of both houses of Congress should concur in the measure. For until the organization is fixed on a firm basis, the whole subject of our military law and instruction must remain imperfect and afloat, subject to the evils of intrigue and intolerable quackery.

The British Army Register exhibits near five hundred general officers, including those in the receipt of full pay and such as receive but half pay. It is very questionable whether such an *army of generals* could possibly have been palmed upon even the good people of Great Britain but for the quackery of creating a long train of general officers under various pretexts and for each arm of the service: such as generals, with many lieutenant generals and major generals, of *artillery;* generals, lieutenant generals, and numerous major generals, of *foot;* generals, lieutenant generals, and several major generals, of *horse*, &c. By this species of legerdemain the British Army Register a few years past (for I have not seen a late one) exhibited, to the best of my recollection, 8 field marshals, 84 generals, 160 lieutenant generals, and 240 major generals, making a total of 492 general officers. Let us abstain from such abuses; and, whilst we profit by the good example of our neighbors, let us carefully guard against their evil. But if we *must* have generals of each arm, and if the regiments of each *must* direct their attention exclusively to the limited duties of THEIR OWN ARM, then let this description of generals be limited to the grade of *brigadier, and let the major generals of the army retain that elevated relation to every corps which ought to secure towards all feelings of perfect impartiality and mutual confidence.* When this characteristic trait of an able *general officer* ceases to exist, as it must cease to exist in our army—whenever our generals are confined to one arm of the service, then anarchy or imbecility may be predicted as an unavoidable consequence. Where there are two or more companies on duty together, all experienced men concur in the opinion that the service would always be benefited by having a field officer, rather than a captain of equal talents, placed at the head of such a corps or detachment; for such is the deep interest felt, and which should be felt, by the captain in all that concerns the men of his company, with whom his first and constant cheering prospect of professional distinction is intimately associated, and on whom it often in a great measure depends, that he cannot at once divest himself so entirely of this natural and essential feeling of partiality to the company to whom he is thus wedded as to feel equally attached to and secure the confidence of other companies, and particularly so when they may have long cherished a laudable spirit of rivalry towards each other. The same principle applies to the command of regiments, when more than one or two happen to be on duty together. Such a force, to be in the highest degree efficient, should be confided to the command of a general officer. And until we are favored with a class of men, divested of the imperfections of human nature, to command our brigades, and divisions, and armies, there can be no doubt that our general of cavalry, our general of artillery, our general of infantry, and our general of riflemen, if such be created by law, will contract feelings of partiality towards their own corps, respectively, similar to those so naturally contracted by the captain towards his company. With these feelings the general officer of any one arm or corps would be but illy qualified to command, with effect, an army or a division consisting of other *corps*. But when detached from, or not acting in concert with either of the other corps, he might indeed contribute to render his own just as efficient, but not more so than it would be under the present or the proposed organization, where the general is presumed to be alike allied to and confided in by each, because all are equally entitled to his regard and attention; and he is equally dependent on all for their united exertions in promoting the public service and in the consequent enhancement of their fame with his own. I repeat, that the general of a separate arm or corps, even when detached from every other, could not be expected to contribute to render his own more efficient than it would be under the proposed organization; for it is an important fact, not sufficiently attended to, but one that cannot be controverted, that the *efficiency of an army mainly depends upon the character and qualifications of the captains of companies and commandants of regiments.* Without these are highly talented, the most renowned generals of modern times could effect but little at the head of an army against the veteran troops of civilized nations. But with companies and regiments ably commanded, much may be effected without the towering genius of a Frederick or a Napoleon at the head of the brigade, the division, or the army.

In recording my testimony upon this occasion, I am well aware that I have ventured to assume positions that have never been sanctioned by governments, or men who believe in the *infallibility of kings*

and "*feudal barons*" of the old world or their servile followers in republican America; nor am I unmindful of the opposition that awaits me either openly or secretly and insidiously. The officer who, scorning the dull drudgery of remaining in camp amidst the sultry swamps of Louisiana or the snows of St. Lawrence and Ontario, to instruct and watch over the interests of the men confided to his command, could be capable of abandoning them to insure to himself the comforts of a city residence, and on the approach of comfortable weather could return but to profit by the untiring vigilance of those who had remained at their posts, and to filch from them the credit of their faithful efforts in the important but too often despised labor of *preparation* for battle—the officer capable of such conduct in war, and who could, at the close of a successful campaign, assume to himself, though in a subordinate station and never intrusted with the chief command of an army or division near the enemy—such an officer, if such there should happen to be, where these remarks become the subject of discussion, he will not fail to array himself against my asseveration, that the efficiency of an army principally depends on and results from experienced and highly qualified captains of companies and commandants of regiments.

An army with this description of officers habitually attentive to the instruction of their respective commands is thus rendered efficient in its component parts, because it is thus made acquainted with the principle of every movement and of every duty in brigade and division.

That the general, of whatever grade, should be thoroughly acquainted with the duties of every officer and of every corps under his command is obvious and undeniable; and that he should be capable of transforming, in a reasonable time, uninstructed masses of young men into well disciplined companies and regiments is equally true; but this work could never be effected or preserved until able commandants of companies and regiments are formed and assigned to their proper stations.

The requisite elementary instruction for these purposes is at present obtained, and I trust it will continue to be obtained at the Military Academy, from whence able generals will in due time make their way through the companies and regiments to the brigades and divisions of the army.

It is a fact known to every intelligent and military man in the United States that a great part of our country, and particularly that on the northern and Atlantic frontier, abounds in natural obstructions, such as deep waters, craggy cliffs, hills and mountains, bogs and thick woods, presenting innumerable narrow passes where a single regiment of riflemen, ably commanded by another Morgan, such as the revolution and the late war exhibited, would check the approach or overthrow ten times their number of cavalry or artillery, unable to act as riflemen or infantry. There are other places, consisting of extensive open plains, where a regiment of cavalry would overthrow two regiments of riflemen unacquainted with infantry tactics or not supplied in part, at least, with bayonets. In all our views and estimates, however, touching the natural properties of the sections of our country likely to become the theatre of war, we should deceive ourselves much if we lost sight of the fact that our enterprising antagonist would not fail to understand and often profit by those obstructions and defiles to which I refer, but from which we may reasonably anticipate many advantages, provided our organization and instruction are such as to enable us to avail ourselves effectually of these natural advantages. For this purpose every corps should be instructed in the duties of every *arm*, and every general should be attached equally to the *army*, but not to any one *arm* of the service. But is it practicable, it may be asked, for an officer to find time for these various attainments? To this I am convinced that every man qualified to answer correctly will answer in the affirmative. The officer qualified to command a company or battalion of infantry or artillery may, in six months time, be equally qualified to command a company or battalion of cavalry or riflemen. And when the commandants of companies and battalions are thus qualified for the duties of their own and other arms, three months' more rigid instruction will be sufficient to qualify their non-commissioned officers and privates for those duties, provided they shall have been previously rendered perfect in those of their own arm. The service will be greatly benefited by the proposed plan of occasionally occupying the troops of every arm in the exercises of all. It will elevate their character and enhance their moral and physical power, by increasing their knowledge and giving them fixed habits of *industry*, and consequent health, individual usefulness and professional distinction.

The engineers.—The officers of engineers should be organized in accordance with the foregoing views, with the exceptions which follow, viz: The officers should have equal rank and equal chances of promotion, with all the privileges of service, (when not on the special duty of engineers,) common to every other corps. The officers should compose three battalions. The first battalion to comprehend the Military Academy, to be commanded by a brigadier general, with one colonel, one lieutenant colonel, two majors, ten captains, twenty first and twenty second lieutenants, with five hundred cadets; the professors to be field and company officers. The second battalion to consist of *the engineers*, for fortifications, and the third battalion of topographical engineers; the two latter to have the same number of field and company officers, and of equal rank with the first; the two battalions to form a brigade and be commanded by a brigadier general; the whole to be commanded by a major general. Such officers of the first battalion as may not be needed for the purpose of instruction to be placed on duty with the second and third battalion. Should the proposed augmentation of engineers and cadets be objected to as being more numerous or having more rank than the present and approaching apparent demand for that description of officers would seem to indicate, I can but refer to the recent pressing requisitions from several parts of the Union, with the prospect of numerous additional calls, that the prevailing laudable spirit of internal improvement in every State present for engineers of every description, to show the expediency of increasing their numbers. Each of these officers, as well as each cadet, though educated under the authority of the general government and destined for the service of all the States, is, nevertheless, emphatically a citizen of the particular State of his birth or adoption, and to which he will have the privilege at any time to return whenever his State requires his services.

Thus will it be found that by the proposed augmentation of engineers and of cadets every State may, in due time, be furnished with able engineers for every essential purpose, civil and military. Topographical surveys, turnpike roads, canals, arsenals, and every other public measure of value tending to improve, enrich, and embellish the State, as well as to secure it against foreign aggression, will thus be projected and executed by the qualified citizens of each State; and from these and other scientific men the militia of each State will imperceptibly and inevitably receive the instruction necessary to their strength and usefulness.

The whole body of the militia of the United States possessing the *privilege*, and entitled to the *honor*, of participating in the national defence, may be considered as either *local* or *disposable* militia.

1. *Local militia.*—Local is a term which I have here chosen in contradistinction to *disposable* or *itinerant*, and in preference to *sedentary*, (English,) or *sedentaire*, (French,) to designate those sections of the

militia of our country which from their contiguity to the sea-coast or inland frontier cannot, consistently with any wise plan of defence, be considered as disposable, or subject to general distribution for the common defence, but which should be reserved for the protection of their own firesides and the neighboring frontier. The precise territorial limits which should comprehend this part of the militia cannot, perhaps, be very accurately defined. I am persuaded, however, that the most experienced officers of the United States, regular and militia, will concur, with me in the opinion that during a period of war all married men above the age of twenty-six, with all heads of families, if not every freeman residing within one hundred miles of the assailable parts of the sea-coast and northern frontier, should possess the privilege of remaining at home for the support and protection of his family until his own or an adjoining State is threatened by an enemy; and even then the policy of subjecting this local militia to calls for any other than very short tours of service, and in the immediate vicinity of their residence, is very questionable. Even with this privilege, their exposed position will subject them to heavier burdens of service and greater perils than their interior neighbors would be likely to encounter. To obviate every ground of doubt or difficulty in respect to limits, I propose to consider as *local militia* not only such as reside within one hundred miles, but likewise all within the several small States bordering on the sea-coast and those upon the northern frontier east of Lake Erie; leaving the enterprising young men of the interior, and particularly the bold and vigorous mountaineers of all the Atlantic States, the privilege of rendering themselves disposable by volunteering to serve during the war whenever called on, and whenever an enemy shall present himself.

2. *Disposable militia.*—Disposable is a term which is deemed to be applicable to the great body of the militia of the interior and western sections of the larger Atlantic States bordering on the central mountains, and eastward thereof, comprehending near three-fourths of the militia of such States to the whole of the militia of Tennessee, Kentucky, Ohio, and Indiana, and to more than four-fifths of that of Pennsylvania, Illinois, and Missouri. The four former of these States are all in the Union, whose interior position is so much altogether out of the reach of a foreign enemy as to leave the whole of their efficient militia *entirely disposable*, as neither of these States presents a frontier that can in any national plan of defence be considered as within the reach of an enemy any more than Albany, in New York, or Pittsburg, in Pennsylvania, can be so considered. It may be proper here to remark, in reference to a future plan of defence upon which my present views are based, that one of the most essential points in any such plan will be for us to occupy Lower Canada, from Montreal to Quebec, with a force sufficient to cut off all communication between a European enemy and Upper Canada; and thus to secure our extensive northern frontier, and never again should we suffer such an enemy to approach or gain an ascendency on Lake Erie or Ontario. But to return to the subject of our *disposable militia.* Illinois and Missouri have at this time a slender frontier, exposed to neighboring Indian tribes, requiring one-fourth of the militia of each for its defence; leaving, however, at least three-fourths of their force disposable. But the whole of the militia of these States will in the course of a few years more, like that of the four great interior western States, be disposable. The gradual improvement of the Indians in civilization, which is constantly resulting from the humane and judicious efforts of missionaries, added to the measures of the general government, that must inevitably follow in aid of this successful progress of improvement, tending to secure to the educated Indians the organization and privileges, and exacting from them the duties of freemen and of citizens, will very soon obviate the necessity of reserving any part of this western border militia for mere local duties. I am convinced that at this time a battalion of civilized Cherokee, Chickasaw, and Choctaw Indians, could be formed which, with the aid of well instructed officers at its head and in each company, would in one or two years be found as efficient as any rifle corps that we could in the same time form out of the mass of our own citizens; and in the fidelity of such a corps I should have great reliance. The small States, and such as from their limited or scattered population and exposed frontier require the whole of their militia to be reserved for their own defence, are Louisiana, Mississippi, Maryland, Delaware, New Jersey, Connecticut, Rhode Island, New Hampshire, Vermont, and Maine; with the Territories of Arkansas, Michigan, and Florida. Maryland, Connecticut, Vermont, and Maine, may be supposed to have a population, and the two latter an extent of territory, which should exempt them from being estimated as among the small States; but when it is recollected that of the two former there is but a small section of either, extending more than one hundred miles from the bay or sea-coast, which presents safe harbors for every description of naval force, and that this exposed sea-coast borders on and would be likely to be approached by forces destined against the most vital parts of the republic, viz: New York, Philadelphia, Baltimore, and Washington city; and when to this view of the subject it is added that Vermont will occupy the principal point of approach from Lower Canada until we obtain the control of the St. Lawrence; and moreover, that near three-fourths of the whole boundary of the State of Maine is embraced in the great northeast salient angle of our national frontier—it cannot but be conceded, that however much the militia of each of these States have been distinguished for their bravery and patriotism—however willing they have proven themselves to be to seek occasions to meet the invading foe, whether in their own or in a sister State, it would be imprudent to leave such extensive, important, and exposed sections of the frontier without a local force of the whole number of their militia, with a due proportion of stationary regulars.

These forces may not, at all times, be adequate to the defence of places approached by large armies, such as we may calculate on assailing us in the course of another war. But in such emergencies we may safely look to the disposable force of the interior of the Atlantic States, and more particularly to the great western States, for prompt and powerful succor.

The militia of the United States in the year 1820 exceeded 1,540,000, to which may now be added the probable increase in the succeeding six years, estimated at 256,000, making a grand total at the end of the present year of more than *eighteen hundred thousand* men. Of this immense force it will be seen, by the foregoing estimate, that not less than one million may be considered as the *disposable force* of the republic. But should the principle upon which this estimate is based be questioned, and the difference of age rather than of geographical limits be preferred as the governing principle, we may, for this purpose, divide the militia into two sections and adopt *twenty-six* as the maximum age of the junior section, and we should still find our disposable force to consist of but little short of one million, viz: about 900,000 between the ages of 16 and 26, to which we may add all *young bachelors* between the ages of 26 and 45, estimated at 75,000 effectives. This valuable description of the national militia doubtless merit and would duly appreciate the honorary distinction of being placed in the junior section of their country's defenders, where they would enjoy the privilege of being foremost in meeting and repelling the invading foe. The proposed *local force* would, in either case, consist of upwards of 800,000 men.

The whole body of the militia of the United States, being organized pursuant to the foregoing views, should be classed for service. The companies, regiments, brigades, and divisions should each have certain geographical limits prescribed by law, and every free man capable of bearing arms, between the ages of 16 and 45, within such limits, should be enrolled and required to discharge *in person* every tour of militia duty for which he may be regularly designated. Each company and each regiment to assemble for the purposes of inspection and classification once a year, except on extraordinary occasions, for which the Constitution already provides. Let men of every profession and occupation, men of every grade of talent, from the divine to the day laborer, and from the politician to the printer's devil, participate in the national defence; then will the invidious distinctions and qualms of conscience that may possibly exist for or against the unavoidable *business of war* and the *necessary evil of an army* be removed. If war necessarily tends to bring many men together, and if these assemblages so really tend to propagate vice and immorality, then who can deny the propriety of requiring a full share of the *talents* and *virtue* of the country to be assembled for the purpose of counteracting the supposed evil? Let all co-operate in our country's defence; let all enjoy the benefit or participate in the odium of whatever service the public interest may require; then none may complain of or combine against any particular profession or occupation.

Classification.—The whole of the militia of each State and of each company should be divided into two sections, as I have before suggested, the first to consist of all between the ages of 16 and 26, inclusively, to be designated the junior section and be first for duty; the second section to consist of all between the ages 26 and 45, to be called the senior section and to be the last for duty. The men of each section should then be separately classed by lottery, commencing with the junior section, and having five classes in each; for example, the company to consist of one hundred men; the junior section may be supposed to consist of 53 men; there would in this case be 53 tickets, eleven of which would be numbered one, eleven numbered two, eleven numbered three, ten numbered four, and ten numbered five. The men drawing these numbers would thus constitute the different classes of this section; the first class of the junior section consisting of eleven men, having drawn number one, to be held ready for the first tour of service, and so on in regular progression to No. 5 of the junior section; and this should be followed by No. 1, comprehending the first class of the senior section; and so on, in like manner, to No. 5, or fifth class of the senior section, and from this to return to the first class of the junior section, keeping in view the equitable principal of detail, *the longest off duty to be the first on duty.* The men of each class to be numbered and the tour of each to be fixed by lottery, so that if less or more than the men of any one class should be called for at one and the same time, it will be thus determined who will be the first for such tour of service. The officers of each regiment or division to be classed in a manner corresponding with the proposed classification of the non-commissioned officers and soldiers; for this purpose a division of militia (not in actual service) should consist of ten regiments.

INSTRUCTION OF THE MILITIA.

The officers and men embracing the first class of the junior section, or such part thereof as may be required by law, should be formed into companies and regiments and required to assemble at such military posts, arsenals, or other places as may be designated in their respective States, for not less than three nor (in time of peace) more than four months in the space of two years, for the purpose of instruction, during which time they should be encamped, supplied with camp equipage, medical and hospital stores, rations and pay, with one suit of clothing, and be governed and instructed with the same scrupulous exactness as if a powerful enemy was known to be near at hand and a battle daily expected. At the end of two years (whether in peace or in war) the class thus detailed for duty should be relieved by the next class for duty, and the class thus relieved should not be subject to another tour of duty until each of the other classes shall have been called into service.

Each regiment, when encamped for instruction, should be furnished with a capable instructor, whose qualifications should be tested and vouched by the assistant inspector general, whose duty it should be to visit and inspect each regiment previous to the termination of their course of instruction at their respective encampments.

It is deemed unnecessary, even on the approach or during a period of war, to make any provision for the instruction of more than one or two classes at a time, for where there is, in actual service, any given number of men properly instructed, an equal number of uninstructed recruits or levies may be added to each corps and be able to do duty effectively in the course of a few days drill. None should be eligible to the appointment of inspector or assistant inspector general who should not have commanded a company in the actual service of the United States for five years, excepting graduates from the Military Academy, who should have commanded a company for at least three years before they should be eligible to the office of inspector or assistant inspector general.

Volunteers.—The many valuable officers and soldiers that have at different times made their way through volunteer companies and battalions to stations of great utility and distinction in the public service during the revolutionary and late war, demonstrate the propriety of some permanent and encouraging provision being made by law for this description of force. Volunteer companies often consist of the most enterprising and gallant young men of the learned professions, planters, merchants, and intelligent mechanics. These might, for the most part, find it extremely prejudicial to their various pursuits and interests to be compelled to leave home for three or four months in succession, in time of peace, for the purpose of instruction; and yet they would cheerfully devote that much of their time every two years to a course of instruction, within the immediate vicinity of their own town or settlement, (and in war they would still more cheerfully serve in the field for a year or two;) it may, therefore, be deemed advisable to provide for the enrolment and instruction of volunteer corps, upon principles different from those suggested in respect to the classed militia. An officer or soldier, of whatever class, desirous of forming a volunteer company should be permitted to confer with, obtain the consent of, and enrol such other officers and soldiers of his own or other neighboring companies as may be so disposed, and when the number shall amount to one full company according to the established organization, officers should be appointed, and the company recognized as a volunteer company, and as such attached to a volunteer battalion which should form a part of the disposable force of the United States, and stand pledged for one or two years' service; and such volunteer companies as may prefer remaining in or near their own town or settlement during the regular course of instruction should be allowed this privilege, on condition that they should adhere strictly to the full course of instruction, without the pay to be allowed to the classed militia. But in lieu of this allowance, every volunteer company found upon inspection well

instructed in the various duties of the arm which it may have chosen, should receive the inspector general's certificate to that effect, and thereupon be entitled to a complete suit of uniform clothing, with such small arms and equipments from the United States as may be suited to the arm of service to which such company may belong; provided, such arms and equipments should not exceed, in the first cost, the pay of such company during the authorized period of instruction. These small arms and equipments to consist of rifles, pistols, swords, dragoon saddles, bridles, &c., &c.

In rendering my testimony in favor of this description of force I take this occasion to repeat what I have more than once stated, that some of the most efficient companies and battalions, and one of the best instructed brigades I have seen in service during the late war, consisted of volunteers; and if I do not greatly overrate the spirit and patriotism of my young countrymen, the time must come, and it may be near at hand, when every young man capable of bearing arms will seek an occasion to tender himself to his country for a tour of military service for at least two years—a time when to omit having made such a tender, previous to the thirtieth year of his age, will become just cause of reproach towards the delinquents and operate as a disqualification for any office of honor or profit under the State or the United States government. When this sentiment is found to prevade every enlightened class of citizens —and it must sooner or later be felt and admitted by all men capable of self-government—then may we calculate confidently on having secured that independence so dearly bought by our fathers, and so justly prized by every philanthropist and every lover of national liberty—then, and not until then, can we assume the attitude of real fearless independence and proud defiance towards the common enemy of republics, and prove to the human family of every clime that man is indeed capable of self-government —that self-government is an essential right and a solemn duty, to neglect which is a crime, which should be held as *treason against the great law of nature*, at least, until we shall find *angels* to govern us.

The number of men to be instructed in the manner which I have suggested should be sufficient, when in co-operation with the regular army, to meet and check the first onset of an invading foe, for much must always depend on the enemy's first reception; if checked, he often receives a panic which will enfeeble him while it redoubles our strength and enterprise.

The defence of New Orleans afforded the finest possible demonstration of this principle; and it was this which must forever secure to him who planned and executed the first brilliant and triumphant movement in that memorable defence unrivalled and imperishable fame. The veterans of Wellington, with their great superiority of numbers and of supposed practical military science and experience, never recovered from the effects of the first blow given them on the night of the 23d December, 1814, because it was directed by a head capable of discovering the vital part of his adversary and executed by men who had, for the most part, received some instruction, but not more than will result from the system of instruction which I here propose.

The number to be instructed might be limited to one-tenth part of the disposable force of the United States in every two years. This would occasion an expense of about *three millions of dollars per annum*, beyond the expense of arms, &c., which would be better preserved in the camp of instruction when in use, and in the adjacent arsenals at all other times, than they generally are under existing circumstances. Enormous as this sum appears to be, it is very doubtful whether it amounts to as much as is annually expended by the militia of the United States under the present defective system, taking into view the value of their time lost and expenses incurred in attending *musters*, *trainings*, *courts-martial*, &c., &c.; expenses which are, for the most part, incurred without the attainment of any useful knowledge in return, but often with the loss of health and morals, which would not fail to be improved by the rigid and systematic course of instruction here recommended. This view of the subject may appear incredible to those who have been habituated to the persuasion that the life of a soldier is a life of licentiousness. But the reverse is the fact; and I have not a doubt but that every man acquainted with the subject will concur with me in the opinion that there was less of vice and immorality in any tolerably instructed corps of volunteers or militia during the latter part of the late war, and far less at West Point, since the establishment of the Military Academy at that place, than in any city, town, or district in the United States, of equal numbers and equal education.

The same remark might, without much risk, be applied to most of the regular troops now in service, deserters always excepted; and upon this great vice it may be remarked that the proposed system would tend greatly to lessen its frequent recurrence. Great as the expense of instruction must be, it is nevertheless a legitimate object of expense, and one that will secure an amount of property and money (to say nothing of national honor) in the course of another war which, in a retrospect of the disasters of 1812, '13 and '14 cannot but prove favorable to the proposed measure. The requisite expense will fall upon the rich *bankers*, *manufacturers*, *planters*, and *merchants*, to whom the money will speedily return, after supplying the moderate wants of the volunteers and militia, whilst preparing effectively to conquer the foe who dares to invade or disturb us. But to the statesman, who may view the expense as an insuperable objection, let me submit an inquiry, to which the public records at Washington must render a conclusive solution. What was the actual expense of the late war, on land, prior to the 1st of May, 1814? What part of this expense is justly attributed to our want of preparation and instruction? A moiety, at least, of that expense must, I apprehend, be the melancholy answer. The proposed course of instruction will not, of itself, be sufficient to perfect the officers or men in a knowledge of every movement and of the use of every arm, but it will disclose to them the basis and the elementary principles upon which every duty depends; and it will enable them to apply at their own firesides, and at their leisure, these principles to all the practical duties of the *soldier*, the *squad*, the *company*, and the *battalion*—they will, under good officers, with able instructors, learn at the camp of instruction the various important duties comprehended in the terms *police* and *discipline*—tending essentially to preserve the health and promote the physical prowess and moral power of the troops, by the regular and methodical attainment of knowledge, and habitual vigilance and promptitude in its application, much of which can be acquired only *in camp* and upon marches, where every principle of military law is strictly enforced.

A few years' attention to such a course of instruction would not fail to enable us to calculate, confidently, on having the whole of the disposable force of every State, consisting of one million of brave men, enrolled and instructed as volunteer corps, pledged for two years' or more than two years service, and at a moment's warning held ready for battle.

Our disposable force would then partake of the high character and follow the noble example of the veteran corps who fought and triumphed in the revolutionary and late war, from *Bunker's* Hill to King's Mountain and Little York, and from the Thames and the peninsula of Upper Canada to the plains of Orleans.

MILITARY ROADS AND CANALS.

Having endeavored to show the practicability of improving the character of the militia, and by a simple uniform organization, with a limited but regular system of instruction, rendering them, in fact, what nothing short of such organization and instruction can make them, the *sword* and *shield of the republic*, and its surest safeguard in the day of trial, it remains for me to add a respectful suggestion in reference to the measures necessary to enable the proper authorities to wield this powerful force with the facility and *economy of time and money* which the exigencies of a state of war may demand. For this purpose I cannot but consider *turnpike roads and canals*, leading from the western, the central, and other interior parts of the States to the Atlantic and Mexican sea-coast, more essential to the great work of preparation for the national defence than fortifications designed for the immediate protection of our seaports; as without good roads and canals the consequent tardy movements of our force and supplies would enable the invader to take our fortifications, and turn our guns against us, before we could reinforce them.

In war nothing can be more precious than time, and particularly time gained by means of increased celerity in the movement of troops acting on the defensive—*thus time is power*. Our numerous militia, with most of our military resources of every kind, however abundant, are spread over too great an extent of country to admit of the possibility of prompt concentration at any one, or at any ten, or twenty-four different points, without much previous attention to the improvement of roads, rivers, and the construction of canals.

It is believed that the expense of transportation, ordnance and quartermaster's stores and subsistence, upon the northern and northwestern border of the United States, during the late war, (including the expenses of the fleets of Ontario and Erie,) amounted to a sum sufficient to pay the expense of every canal and road since opened in the State of New York, with those recently planned, and in part opened in the State of Ohio and Pennsylvania. In Ohio, particularly, armies have, I am persuaded, sustained greater losses of health, if not of life, from the impracticable state of the roads, and the want of canals, than would have been sustained in the capture of the whole of Upper Canada, with the proposed improvement of the militia, and of the means of transportation.

Of the habitable and most productive agricultural sections of the national domain east of the Rocky mountains, the actual *centre* is deemed to be nearly a direct line between Cincinnati, Ohio, and Nashville, Tennessee, not far from Louisville, Kentucky. The strong and rapid growth of the western States and territories during the last thirty-five years—since the national executive arm has been put forth for their protection against foreign incendiaries operating among the Indians—warrant the conclusion that the time is not far distant when Louisville, Kentucky, will become the centre of the whole population of the United States. That thousands of our junior citizens now grown will live to see this prediction verified I confidently believe. These great and growing States, (Ohio, Kentucky, Tennessee, and Indiana,) as I have before intimated, are already prepared to render the whole of their militia disposable, and with the aid of two canals, and three or four good roads, similar to that between Wheeling and Baltimore, these States would be able to furnish, in less than forty days after the completion of the proposed organization, an army of *three hundred thousand men*, together with ample subsistence, and every other supply; and to send it to any part of the frontier, from Detroit to Passamaquoddy—to any seaport in the Atlantic States, from Maine to Florida, inclusively, to New Orleans and to Texas. The whole, or any part of this force, may, when duly organized, be assembled at Louisville within forty days after the date of the President's requisitions on the governors of States for this purpose; and I am convinced that one-third of this number may be obtained as *volunteers* upon the principle here proposed; and, moreover, that this force, consisting of one hundred thousand men, might, at any time between the months of January and June, be embarked on board steamboats (with two barges attached to each) and conveyed to the city of New Orleans in ten days after their assemblage at Louisville. And this might, generally, be effected without any other means of transportation than could be collected together by an active quartermaster, in the time that would be necessary for assembling such a corps—that is, within forty days from the date of the President's requisitions. When the canal now constructing in Ohio is completed, a similar force may be assembled at Cincinnati, and transported from thence to the cities of New York, Plattsburg, Boston, or Philadelphia, in eighteen days from the time of its embarkation upon canal boats at Cincinnati. With a canal from the northeast corner of Kentucky to the navigable waters of the Chesapeake a similar force, with every necessary supply, may be conveyed from Ohio or Kentucky to Richmond, Virginia, Washington city, or Baltimore, in less than fourteen days; and with a good turnpike road from Jonesborough, East Tennessee, to Morgantown, Fayetteville, and Newbern, North Carolina, a similar force may be marched to East Tennessee, to either of the two last-mentioned cities, in eighteen days; with such a road from Knoxville, Tennessee, to Greenville, South Carolina, and thence to Augusta and Savannah, Georgia, and to Charleston, South Carolina, a similar army may be marched to either of the three last-mentioned cities, in less than eighteen days; and, finally, with such a road, a similar force may be marched from Nashville, Tennessee, to Pensacola or New Orleans in eighteen days.

To these views, in reference to the defence of the country, it may be added that even in the possible event of our being able at all times to avoid war, the canal and roads here recommended will never fail to be worth, for the ordinary purposes of commerce, as much, if not more, than the amount necessary for their original construction. The reverse of this is doubtless true, as regards our expensive fortifications. They are of little or no value but for the purpose of war. For this purpose, however, they are eminently valuable and indispensable, but not more so than the canals and roads here recommended.

Fortification and *ships-of-war* are essential means of security and protection to the citizens of seaport towns and settlements; *roads* and *canals* are equally essential means of security to the citizens of the interior, enabling them to give prompt and effective aid in the protection of their frontier brethren and of their commonwealth; the extremities of the body politic doubtless require constant care for their preservation and protection; but the body itself, the noble chest, embracing the vital parts, cannot, without great imprudence, be neglected.

All which is respectfully submitted.

EDMUND P. GAINES, *Major General by Brevet, commanding.*

Major General BROWN, *General-in-Chief, Washington City.*

ADJUTANT GENERAL'S OFFICE, *January* 31, 1829.

True copy.

NOTE.—This document was found in the office of the late Major General Brown, in March, 1828, and then placed on the files of this office.

R. JONES, *Adjutant General.*

20TH CONGRESS.] No. 408. [2D SESSION.

ON THE CONDITION AND OCCUPANCY OF THE LAND BELONGING TO THE UNITED STATES AT THE ARMORY AT HARPER'S FERRY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 2, 1829.

DEPARTMENT OF WAR, *February* 28, 1829.

SIR: I have the honor of transmitting herewith a report from the officer at the head of the Ordnance department, with the accompanying documents, in obedience to a resolution of the House of Representatives of the 14th ultimo, calling for information as to the "number of buildings" which have been "erected by private individuals on the government lands at Harper's Ferry; when erected; by whom and what authority they have been purchased; how many are yet in possession, and subject to the claims of the builders, and what is the amount demanded for each; what is the amount of rent annually received since the first of January, 1823, for each of said buildings, as also for any others owned by the government at that place, and from whom received."

I have the honor to be your obedient servant,

P. B. PORTER.

Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

ORDNANCE DEPARTMENT, *Washington, February* 27, 1829.

SIR: In compliance with the resolution of the House of Representatives of the 14th ultimo, requiring information concerning the buildings on the government lands at Harper's Ferry, which you referred to this office, I have the honor to report:

That all the particulars required not being recorded in the books of this office, the resolution was referred to the superintendent of the armory at Harper's Ferry, and I have now the honor to submit copies of his reports which contain the information required by the resolution.

I have the honor to be, respectfully, sir, your obedient servant,

GEO. BOMFORD, *Brevet Colonel on Ordnance service.*

Hon. P. B. PORTER, *Secretary of War.*

UNITED STATES ARMORY, *Harper's Ferry, Virginia, February* 23, 1829.

SIR: In answer to your letter of the 16th ultimo, transmitting a resolution from the House of Representatives upon the subject of private buildings erected on the United States lands at this place, I herewith enclose the reports therein required.

There are three or four buildings erected on the hill between the two rivers not included in the report; one of them occupied by a Mrs. Beston as a female school establishment; three other small huts, occupied by free blacks, named as follows, viz: William Prim, Adam Jones, and Jack Wood, who perform the duties of sextons and grave-diggers; also two churches; all of which are located on a lot of four acres, reserved in the will of Robert Harper, deceased, the original proprietor, and under whom John Wager, who sold to the United States their lands at this place, derived his title, for the purpose of erecting a graveyard, church, &c.; an extract from which I enclose herewith, from which it will be seen that even had not the four-acre lot been appropriated to the purposes contemplated in Harper's will, the government could not legally have any control over it. There are also several dwellings situated on the lands of which the government own the right of perpetual wood cutting, the owners of which purchased the fee simple right. These houses are numbered in the statement furnished by Colonel Lee from No. 199 to 207.

In regard to the authority for purchasing buildings, improvements, &c., I have to observe that it has always been considered the duty of the superintendent to provide suitable accommodations for the workmen employed in the armory. This could only be done by building new buildings, or purchasing improvements already made. The latter of these alternatives was, in many instances, the more expedient, from death, removal, change of circumstances of the persons who made the improvements, or other similar causes. It frequently occurs, when good workmen, having married, or from other causes need dwellings, or additions to those previously occupied, that the armory funds will not, at the time, admit of expenditures being made for such purposes. They are, therefore, permitted, when able to do so, to make the improvements at their own charge, with the understanding that afterwards, when convenient to the armory, they shall be paid for the same, according to fair valuation.

The passing of such accounts from time to time, for many years past, by the accounting officers, has also been considered as approving the course pursued in this respect.

It will be seen that no rents have been yet collected upon the lots built on and occupied by private individuals not connected with the armory. This has resulted from the following state of things, viz: In some of the cases the leases have not yet been executed, and in none have the amounts of ground rent to be charged been ascertained. Diversity of opinion has occurred on this subject; and, on account of the uncertainty of the superintendent's power in such cases, it has not been considered advisable to agitate the question in what manner and how far the superintendent can coerce the settlement of claims to the United States on account of this armory, until the question was settled by advice of counsel, or otherwise, as the case might require; for, had the attempt been made, and failed, a vast deal of trouble and difficulty would have been encountered, which, in consequence of the course pursued, has been avoided.

In accordance with your letter of the 23d of last July, requiring me to obtain legal advice on this and other subjects, the questions of difficulty were immediately submitted to Moses T. Hunter, esq., the counsel usually employed in behalf of this armory, whose opinion was enclosed to you on the 14th of November last. By reference to that opinion, it will be seen that the subject is attended with very considerable difficulty, and the most advisable course to be pursued not yet clearly ascertained; when, however, such course is determined upon, there will be no difficulty in collecting the rents in arrears, as the parties from

whom they are due are entirely solvent. It may be well to remark that each of the grants or permissions given to the individuals mentioned under the head of persons not connected with the armory to build on the public lands are decidedly advantageous to the interests of the armory, and required for the convenience and accommodation of the workmen therein employed, so much so that it is believed the United States have derived from them benefits equivalent to several thousand dollars, by thus destroying, in some measure, the imposition and oppressive monopoly which before prevailed, and which grew out of the fact that all of the real property at this place, except that of the United States, belonged to a single family, who exacted exorbitant rents from shopkeepers, mechanics, &c., even sometimes restricting them to particular kinds of business, who were thus, in their turn, compelled to charge the workmen employed in the armory corresponding rates for the ordinary means of subsistence, and thereby, in the end, rendering it necessary for the government to pay for work at prices higher than those for which it might otherwise have been done.

On a former occasion Mr. Calhoun, during the period that he was at the head of the War Department, and to whom this subject was referred, was clearly of opinion that the original purchase of the lands occupied by this armory, from John Wager, left it entirely discretionary with the government whether or not to permit merchants, shopkeepers, mechanics, and tradesmen of every description whatsoever, to erect buildings and pursue their different modes of business, on the public lands here, to any extent that the interests of the armory and the convenience of workmen therein employed might require.

Respectfully, your obedient servant,

JAMES STUBBLEFIELD.

Col. GEO. BOMFORD.

Extract from the last will and testament of Robert B. Harper, deceased, executed on the 1st day of October, 1782.

"It is further my last will, that four acres of land, most convenient round my graveyard, shall be laid off by my executors, and be entirely appropriated to the use of a graveyard; and all my debts, due by bond, note, and book account, and all the rents now due from my ferry, be by my executor disposed of in the best manner towards erecting a graveyard and building a church on said four acres of land, and having a head and foot stone for my wife's grave, and likewise for my own."

A copy—teste,

A. HUNTER, *Clerk.*

STATEMENT—Continued.—*Persons not connected with the armory.*

Buildings erected by private individuals.				Buildings yet in the possession of the builders and their assigns.	
Description of buildings.	In what year erected.	By whom erected.	By what authority erected.	Number.	Estimated value.
Stone storehouse and dwelling, brick dwelling and boarding house, and wooden warehouse.	1812	Potomac Navigation Co.	By agreement with the War Department, of which there is no document in this office.	1	$5,000 00
Wooden storehouse and dwelling	1816	Colonel Jamieson	Grant from the President of United States—no document in this office.	2	800 00
Stone, rough-cast, used as a dwelling-house, boarding-house, and butchery.	1826	Philip and David Coons.	From the Ordnance department to P. Coons, April 6, 1825.	3	2,500 00
Stone, rough-cast, used as dwelling and storehouse.	1826	John G. Wilson	On the faith of a letter from the Ordnance department to J. G. Wilson, March 23, 1825.	4	2,500 00
Frame house plastered outside, built for a dwelling house and printing office.	1826	John S. Gallagher.....	By permission of the superintendent.	5	600 00
Frame storehouse and rough-cast dwelling-house.	1826	Michael Garry.....	Grant from Ordnance department to superintendent, June 20, 1825.	6	2,500 00
Small temporary frame storehouse	1826	Michael K. Waitman..	By permission of the superintendent.	7	175 00

NOTES.

1. In regard to the omissions that occur in the column designated to show the dates at which the several buildings, improvements, repairs, &c., were made, I observe that many were made from time to time, as required by the convenience of the workmen, previous to 1823, at which time the first notice of them was taken; some were made at several different times; so that it is impracticable to ascertain the precise dates at which all of them were made.

2. Nos 16, 70, and 111, are widows of workmen formerly employed in the armory.

3. Lot No. 1, under the head of persons not connected with the armory, is situated on Shenandoah street, running back to the Shenandoah river. In front is a two-story stone dwelling-house and store, and in the rear a large two-story brick boarding-house, and on the river a large frame warehouse, formerly used by the Potomac Company for storing flour.

4. Lot No. 2, under same head, was granted by the President of the United States in 1815 to Colonel Jamieson, an officer of the United States army during the late war, to build upon it a store and dwelling-house, and is at present so used.

5. Lot No. 3, under same head, is situated on the Shenandoah river near the United States ferry. The house built upon it is a large stone building used as a boarding-house for the public workmen. One of the occupants is employed as a watchman at the armory; the other is an enterprising butcher, who furnishes much the greater part of the meat consumed by the armory workmen.

6. Lot No. 4, under same head, is situated on Shenandoah street. The house built upon it is a large stone building; the site was formerly occupied by a large rock, in the side of the hill, which required a large expenditure of money to remove it.

7. Lot No. 5, under same head, is situated on Shenandoah street. The building erected upon it was built for the purpose and, until lately, occupied as a printing office, and, as such, considered highly important, jobs of printing being frequently required for armory purposes.

8. Lot No. 6, under same head, is situated on the street leading up the hill towards Charlestown.

9. Lot No. 7, under same head, is situated on the hill between the two rivers. The house upon it is a very small temporary frame house, that may at any time be easily removed.

10. Lots numbered in the above report from 1 to 113 being improvements made by persons connected with the armory, or for purposes connected with the armory, no rents are ever charged, the interest of the money invested being considered equivalent to the ground rent.

I certify the above report to be correct according to its purport, and according to the best of my knowledge and belief.

JAMES STUBBLEFIELD, *Superintendent.*

FEBRUARY 1, 1829.

JAMES STUBBLEFIELD.

20TH CONGRESS.] No. 409. [2D SESSION.

EXPENDITURES AT AND OPERATIONS OF THE ARMORIES DURING THE YEAR 1828.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 2, 1829.

DEPARTMENT OF WAR, *March* 2, 1829.

SIR: In pursuance of an act of Congress of the 2d of April, 1794, concerning arsenals and armories, I have the honor to transmit herewith a statement of the expenditures at the United States armories, and of the arms, &c., made therein, during the year 1828.

I have the honor to be, very respectfully, your obedient servant,

P. B. PORTER.

The Hon. SPEAKER *of the House of Representatives.*

Statement of the expenditures at the national armories, and of the arms, &c., made therein during the year 1828.

	Expenditures.					Arms, &c., made.					
	For lands, buildings, canals, repairs, and other permanent improvements.	For the manufacture of muskets.	For the manufacture of Hall's rifles.	For miscellaneous purposes not embraced in the foregoing.	Total amount expended.	Muskets.	Screwdrivers.	Wipers.	Ball screws.	Spring vices.	Arm chests.
Springfield, Mass.....	$13,476 99	$172,152 20	.....	$1,448 12	$187,077 31	15,500	15,500	15,500	1,550	1,550	721

GEO. BOMFORD, *Brevet Colonel, on Ordnance Service.*

ORDNANCE DEPARTMENT, *March* 3, 1829.

21ST CONGRESS.] No. 410. [1ST SESSION.

ANNUAL REPORT OF THE SECRETARY OF WAR, SHOWING THE OPERATIONS OF THAT DEPARTMENT IN 1829.

COMMUNICATED TO CONGRESS WITH THE MESSAGE OF THE PRESIDENT OF DECEMBER 8, 1829.

DEPARTMENT OF WAR, *November* 30, 1829.

SIR: The Secretary of War submits to the President of the United States a report, showing the manner in which the business of the department has been conducted, that its details may be before him for consideration. The communications received from the different officers connected with the War Department, here annexed, contain everything minutely, and more in detail than can be presented in this report. Such general suggestions in reference to them as may appear warranted by the public interest, it becomes his duty to submit, that they may receive from you the attention they shall be found to merit.

It is with pleasure made known that the army is satisfactorily fulfilling its just engagements to the country, and that harmony and proper zeal prevail. The rank and file is nearly complete, and although desertion has not entirely ceased, yet it is less frequent than heretofore. The rigid exactions of the law in reference to this crime are believed to carry too great severity for a state of peace, and should be meliorated into something better corresponding with the magnitude of the offence. It is not the quantum but the certainty of punishment that is calculated to deter offenders; and as no soldier in peace has been executed under the sentence of a court-martial, it has occasioned the impression that so severe a penalty will most probably not be enforced, and hence a disregard of it is entertained. I would by no means be understood as recommending a return to the infliction of stripes: it is a punishment altogether too degrading; it strips the soldier of that proud spirit and those lofty feelings of honor, which will tend to prepare him, when a suitable occasion may offer, to become a traitor to the country that has branded him with infamy, the stigma of which no future good conduct on his part can remove.

The efficiency of an army is to be discerned through the pride—the elevated character of the individuals who compose it. To secure this condition of things, no man should be inveigled into public service under false pretences, and when his mind is not in a situation to engage in contract. He who would bargain with a neighbor for his property when found in a state of intoxication would be justly reprehensible, and obnoxious to the imputation of practiced wrong; how much more cautious, then, should a government be, the guardian of the rights of its citizens, to avoid a temporary purchase of their liberties at such a time and under such circumstances. Resting upon the correctness of this impression, orders have been issued prohibiting any, when intoxicated, to be enlisted, and forbidding any contract to be finally consummated until time and opportunity are afforded for deliberation. Pursuing this course, qualified and valuable materials will enter into and compose the ranks of our army, and character and pride be obtained. To attain this end, one effectual alteration would be to withhold the premium which at present is given for enlistments, the effect of which may be to induce a carelessness and indifference as to the description of men who are received. It might be better to make the premium thus wrongly bestowed an increased bounty to the enlisted recruit.

The long-controverted question respecting brevet rank in the army has been decided in a manner which is believed to be in conformity with existing laws on the subject. I am happy to add that, so far as opinions have been ascertained, the officers of the army are disposed to acquiesce in the decision, because of the certainty which has been arrived at, and the increased harmony which it is expected will be consequent upon that certainty.

There is a doubt resting in connexion with this subject, which I beg leave to suggest the propriety of bringing to the consideration of Congress: it is as to the compensation rightfully to be extended to brevet officers, when a command is held correspondent to that rank. The interpretation given to the law upon this subject by a regulation of the War Department in 1827 is, that when a captain is in the command of any larger numerical force than a company, no matter how inconsiderable; a major a greater than two companies; a colonel more than a regiment; a general any force greater than a brigade—in all such,

and similar cases the officers, respectively, are to be considered as having a command according to their brevet, and pay corresponding to their rank, conformable to the conceived provisions of the act of April 18, 1818. The effect of this construction has been, that so far as the pay of the army is concerned, instead of having one major general and two aides-de-camp, as the act of 1821, for organizing the military establishment, contemplated, there have been in service three major generals and six aids; and instead of two brigadiers, as is required by the same act, there have been four colonels, who, in virtue of the regulation of 1827, relative to brevet appointments, have received the pay and emoluments of a brigadier general; thus appending to the army three majors and four brigadier generals, with other officers of lower grade, not contemplated by the act of 1821 for fixing a military peace establishment. It is submitted for Congress to determine how far this heretofore authorized procedure shall continue, or in future be restricted, to the conceived interpretation of the law.

As this construction had obtained, it was considered, if not strictly correct, at least not improper to be continued, especially as previous appropriations by Congress for brevet compensation had been made, and at their last session too; thereby indicating an acquiescence to the regulation of 1827. But, owing to the number of brevets which, in pursuance of the law requiring them, were conferred previous to the adjournment of the Senate, payments made on this account will exceed the estimate presented from the department for the year 1829, and the appropriation consequent upon that estimate.

Under this constructive mode of granting extra allowances, there has likewise been conceded to the Surgeon General of the army fuel and quarters, and a commutation of them. The language of the act of April 14, 1818, is: "There shall be a Surgeon General, with a salary of two thousand five hundred dollars per annum," evidently intending to render this a salary officer with a fixed and certain compensation. The act of March 30, 1814, provides "that the physician and Surgeon General of the army be entitled to two rations per day, and forage for two horses." At this time the compensation given was also twenty-five hundred dollars a year. The subsequent act, however, of 1818, fixing and regulating the peace establishment, says nothing of perquisites or emoluments, and is hence to be considered as a revocation of previous enactments upon the same subject.

There is nothing which, by a fair construction of the law, would give the Surgeon General an allowance for fuel and quarters which it is believed would not equally apply to the Paymaster General, to whom it has been refused. The words of the law are as to both the same The compensation to the Paymaster General, as fixed by the act of the 24th of April, 1816, is as follows: "The pay department shall consist of one Paymaster General of the army, with the annual salary of two thousand five hundred dollars." The allowance ought to be extended to both or else withheld from both. It is difficult to conceive how, upon any proper ground, a difference or distinction in those cases can be made, inasmuch as the laws conferring their pay are, in substance and almost in expression, identical.

Another course which, for a time past, has been pursued, arises under a regulation declaring certain bureaus connected with the War Department to be military posts, the effect of which has been to increase the number of admitted rations, and of consequence the amount of pay. By this regulation of 1825 it is provided "that double rations shall be allowed to the commanders of departments and of such posts and arsenals as the War Department shall authorize."

It is not presumable that places where mere civil duties are required to be performed merit to be denominated military posts, or were so intended by the law. A different opinion and construction, however, has prevailed, and the definition "post" has been extended to the several bureau offices connected with the War Department, and double rations attached and commuted for. The construction thus given has not been altered; it is still retained, not from a belief that it was strictly correct, but that, having been heretofore acted upon and sanctioned, it was preferred to be left for the determination of Congress, that, by some further act of legislation, it might better be defined what, for the future, should be considered a proper definition of the term, or by being passed over in silence to suffer the present understanding to prevail. The regulation adopted is not conceived to be in conformity with the acts of Congress upon this subject. These speak of an increased admission of rations to officers when "commanding," evidently intending such allowance when they should be in the exercise of a military not a civil trust. If, then, the law does not authorize it, the regulation of the department certainly ought not; for, although authority is conceded to the Secretary of War, with the President's approbation, to adopt for the army rules and regulations, it should not be intended as a privilege to exercise legislative power. Such adopted regulations must be in conformity, not in opposition, to existing laws.

To guard against all unforeseen contingencies as to the pay of officers, I would suggest if it would not be preferable to regulate the compensation of the army on some fixed and certain basis, so that all should become salary officers. The facilities which such a course would afford to the accounting officers of the treasury would be great, while an essential benefit would result to the officers themselves. To them it would prove more satisfactory. The practice so prevalent of having items of account disallowed or suspended, as by different disbursing officers different opinions and conclusions as to existing laws are entertained, has not failed to introduce difficulties to the government, and oftentimes embarrassment to the officers. By attaching to each grade, from the major general, a salary certain and specific, dependent upon no contingency, happier results would be attained and greater satisfaction produced to those who are interested. The only contingencies of payment authorized might be for stationery and postage, and for transportation, when proceeding under special orders from one post to another, with the authority which pertains to the department, of assigning at particular posts an allowance of increased rations, thereby to equalize, in some degree, the expenses of living, it being an item greater at some places than at others, and which, on principles of justice, should be placed upon some ground of equality. A tabular statement from the Paymaster General is annexed, showing the amount of pay, brevet pay, and emoluments that are annually received by officers in their respective grades, as information and data by which to regulate the allowance of salary should it be considered expedient.

From the report of the head of the engineer corps, it will be perceived that some amendments and changes are proposed. I beg leave to say that, as regards the objects of national defence, the suggestions offered are worthy of high consideration. In improving the navigation of our rivers, bays, and harbors, constructing roads, and, above all, erecting those important fortifications which are to constitute the future defences of the country, this corps forms an essential reliance. Intelligent and skilful, these branches of service have been confided to them, and the fidelity of execution everywhere displayed is a manifestation of their worth and value to the country, added to which everything of safety and strict accountability for funds placed in their hands is constantly regarded, to the entire satisfaction of the department. The same remark, however, and in equal justice, is applicable to all the disbursing officers connected with the

War Department. If it be the pleasure of Congress that the important internal improvements of the country shall continue, and a desire correspondently is possessed that those authorized works shall progress creditably to the spirit that projects them, there is no plan to be suggested preferable to an enlargement of this corps, to the extent that the entire reliance of the government for all such objects may be on their own exertions. At present the number authorized is altogether insufficient to the objects requiring attention, to say nothing of the numerous and frequent applications from the States to be afforded the benefit of their services, and which the department, owing to the paucity of their numbers, in repeated instances, have been constrained to refuse, when every disposition was felt to accord to the request.

This report minutely presents the state, condition, and progress of the different fortifications which have been projected in Congress. By some error of estimate and fact, the appropriation of last year for the completion of Fort Jackson, on the Mississippi river, has fallen short of the object, and inconveniences will be felt unless an early appropriation can be procured. Discovering that the funds would prove insufficient, it was suggested to the department, and brought to your consideration, if a portion of the unexpended amount set apart "for the repairs and contingencies of fortifications" might not be transferred to the head of "fortifications" generally. This, however, was refused on the ground of authority wanted. It is now submitted for the purpose of receiving an early appropriation, that, before the sickly season on the Mississippi commences, the work may be in progress, otherwise it must stand deferred and be greatly retarded for another year.

The communication of the board of visitors, which accompanies the report of the head of the engineer corps, will show the condition and state of the Military Academy. Towards this institution prejudices in some portions of the country have been entertained—attributable, perhaps, to the circumstance that its advantages are not fully considered, nor its benefits duly appreciated. We are becoming a numerous and strong people, forming and extending our commercial connexions throughout the civilized world. From the experience afforded by other nations in times past, we are warned to the belief that jealousies, and disagreements, and contests, are to be expected to come upon us. Prudence to avoid, and preparation to meet, such a state of things, when rendered unavoidable, is demanded by a proper regard to our safety and our institutions. Men can no more become soldiers intuitively and by instinct than they can attain to a knowledge of any other profession in life. Information must prepare, and experience qualify, in all situations. At this institution the genius of the young men of the country will dawn and ripen, and the value of their services be found in moments of greatest peril. But besides this high and estimable consideration, it may be looked to as one of the strong bonds of our union. Two hundred and sixty young men, associated for a time with all those attachments created which early friendships inspire, cannot fail to secure for the future increased strength and durability to the government. Here education, and good conduct, and military discipline, are regarded; and while the mind is led forward and trained to useful thought, all those high feelings which constitute an honorable sense of propriety are cherished and regarded. At no period has the institution been in a more flourishing condition. Colonel Thayer, the efficient superintendent, aided by professors of liberal endowments, zealous in the performance of the high trusts confided to them, are pressing it forward to a state of advancement, of which presently the country will have cause to be proud. Some additional improvements, suggested as necessary by the superintendent, and which will involve but a slight increase of expense, are desirable, and will prove beneficial. The necessary explanations as to what is proposed will be found to accompany the application.

A reference to the report of the chief of the ordnance will show the particular details of operation in that branch of the service. It merits attention. It has been frequently observed that the best way to avoid war is to be in preparation. In this point of view it is desirable that the appropriations to be made for clothing our fortifications should correspond with the probable periods of their completion. It would, indeed, be a mortifying result if, after the labor and cost which has been encountered for their completion, it should rest in the power of an enemy, at the onset of war, to seize or destroy them, because the means had not been placed in readiness for their defence.

From the report it will be perceived that at the present annual rate of appropriation, to wit, $100,000, sixteen or twenty years will have passed before a proper supply of arms for those fortifications now in progress can be obtained for their defence. As regards this subject, the course most advisable to be pursued would be, that the armament preparation should progress correspondently with the works themselves: not that they should be mounted, and, by exposure to the weather, become decayed and useless, but that, the guns being at their positions and the carriages in readiness, on the apprehension of war, suitable preparation for resistance might, at all defensible "points," appear, meeting the objects for which those fortifications were designed, and yielding protection to the assailable parts of the Union. If, in the slow and gradual preparation for a necessary and adequate armament at present pursued, sixteen years shall be found requisite, and war within that period take place, a consequence would be that some of our forts, built up at great expense, would be destroyed, because incapable of self-defence, or else, by being retained and armed, be used by the enemy as annoyance and injury to ourselves. A measure involving such important considerations should not be protracted in its execution; it carries with it, in foreboding anticipation, too much of probable evil consequence. This subject derives additional interest from the consideration that guns and carriages require time in preparation; they are things that cannot be hastily arranged, and which to defer might prove prejudicial.

At the different arsenals and magazines an abundant supply of powder is in store. Considering its liability to injury, rather than keep up the supply it would be preferable to procure the materials of which it is composed, ready to be manufactured when circumstances shall make it necessary. These articles are now remarkably cheap, and are easily preserved from deterioration. Recollection retains the fact that during the last war the average price of saltpetre was about forty cents, and brimstone eight. Involved in another contest, the same state of things might be presented, while at present those articles can be procured at one-eighth the prices which, of necessity, had then to be given. Being susceptible of ready preservation, it would prove a matter of economy to forbear any future purchase of powder, contenting ourselves merely with obtaining an adequate supply of ingredients, whenever it could be procured at fair prices. The materials thus preserved and in readiness could, at short notice, be manufactured whenever occasion should make it necessary.

The Quartermaster General's report to me will be found to explain fully the business under his supervision. For reasons sufficiently explained, the disbursements by him have exceeded the appropriation made for the service of the year. The causes which occasioned this condition of things were, that a portion of the funds intended for 1829 had necessarily to be applied to arrearages of expenditure incurred

in the preceding year of 1828, for which no estimate had been submitted and no provision made. It became necessary, therefore, to provide means from some other legal source. Accordingly, a transfer of fifty thousand dollars from the subsistence to the quartermaster was made, agreeably to the provisions of the act of May, 1820. By the act of March, 1809, it is required that a special account of moneys transferred, and of their application, shall be laid before Congress in the first week of their session. To do this, from the recent date of the transaction, will be impracticable. All that at present can be communicated is, that a portion of the transferred fund has been placed in the hands of the assistant quartermasters; though to what particular objects its application may be made can only be known when a settlement of expenditures in the present quarter shall take place. The deficiency thus incurred admonishes that an enlarged appropriation for this branch of the public service will be required for the year 1830. Indeed, such is the character of this service, dependent on so many circumstances, and on such various contingencies, that estimates in anticipation of the year cannot be rendered with precise accuracy.

The present condition of the breakwater at the mouth of the Delaware the Quartermaster General's report will explain. A desire was entertained, and a confidence reposed, that, ere the close of the season, this important and valuable work, so essential and so necessary to the commerce of the country, would have been in a more rapid state of advancement. The contractors, however, have fallen considerably short even of their own expectations. Difficulties at the onset, which they had not foreseen, and which it was not in their power, as they allege, to remedy, have retarded their progress so considerably that not more than a fifth of the quantity of stone contracted for has been delivered in the present year.

The difficulty of presenting accurate and certain estimates is alike applicable to a proper execution of the duties of the Commissary General of Subsistence. For that service they are to be made in reference to contracts previously entered into. These, however, fail occasionally to be executed, and then it devolves upon him to purchase, whereby increased prices and enlarged expenditures are incurred. In this service there are peculiar hardships frequently resulting to citizens, which are without any adequate remedy, because no sufficient discretion to afford relief is anywhere given. The proposals made and contracts entered into are always in reference to the probable prices of provisions in the market, and, the better to understand this, they are usually made early in autumn. Nevertheless, provisions, and especially flour, are often subject to sudden and considerable appreciation, thereby inducing pecuniary losses, and not unfrequently ruin, to the contractor. The government should not so severely exact upon an unfortunate contract made with a citizen as to compel him to ruin, when accidental cause, and not misconduct, has occasioned the failure, but should repose a discretion somewhere, by which relief might be afforded in cases of such peculiar and serious hardship.

A suggestion from the Surgeon General of the army is, that the medical staff does not contain a sufficient number of surgeons and assistants to perform properly the necessary and required trusts, and an enlargement of the corps is suggested. Although there are fifty-two, yet, from occasional furloughs, sickness, and other causes, it often happens that, for the supply of a post, a citizen surgeon has to be employed, producing an annual charge upon the government of $8,000 or $10,000. The proposed enlargement would not entirely, yet would in some degree prevent this. Recruiting rendezvous, and sickness to officers, when not in reach of an army surgeon, will, under any state of things, occasion some expenditure of this description. Already the posts are numerous, and possibly others may require to be established for protection to the frontiers and security of the revenue. The custom-house receipts at Key West, and the inability of the inhabitants to protect it from some piratical assault, may suggest to Congress the propriety of placing a military defence there. On the Calcasieu river, too, near the Sabine, another post recently has been directed, to prevent, in this wilderness region, illegal importations, which, in that direction, are anticipated and feared. Other causes may arise to make it necessary for more posts to be created, and hence to afford employment to a greater number of assistants and surgeons.

Connected with the army, there is a subject which merits some consideration. Our officers on distant service, particularly those on our Indian frontiers, are often called upon to execute trusts arising under general acts of Congress, and sometimes by especial orders directed to them. For supposed infractions of the laws, suits and exemplary damages are oftentimes the consequence. It is generally understood that the damages to be assessed are not to be paid by the officer, but by the government. As a suitable remedy for the evil, might it not be advisable to extend the authority of judicial interference in all cases where the interest of the United States may appear to be involved, that, under proper restrictions, they may be brought for consideration before the Supreme Court, without regard to the amount in controversy. The effect would be to prevent those frequent suits with which our officers are annoyed. If an intrusion is made upon Indian territory, a supposed trespass committed, or the United States found in possession of lands adversely claimed, no matter how, damages seldom fail to attend the prosecution. Instances of the kind have recently occurred, and, to prevent them for the future, legislative authority should be extended, that, under an exercise of proper discretion, such cases may, in disregard of the amount in contest, be submitted to the Attorney General, to be brought before the Supreme Court for decision, if he shall conceive that there is error in the decision and proceedings.

There is another subject, heretofore stated to you, which it may be proper to suggest for the information of Congress, that such measures as shall be considered advisable may be adopted. A long time ago, at an early period of our history, the Seneca tribe of Indians, situated in the State of New York, placed in the hands of the President of the United States, in trust, $100,000. That trust, through the several Chief Magistrates of this country, has been executed for the benefit of the tribe, by being from time to time vested in stocks. In 1826 it was invested in the 3 per cent. funds, amounting to $112,853 78, which yields an annual interest of $3,385 60. On applying, as your attorney in fact, for the dividend, I learned that the proceeds of the stock had heretofore passed to the credit of the Indian appropriation fund, and that, from the same fund, the sum of six thousand dollars had been paid annually to the Senecas. Not feeling myself at liberty thus to act, or to do more than receive and pay over the actual dividend arising on the stock, I forebore to do so until you were consulted. Your opinion being ascertained, I received and forwarded to the agent the actual amount of the dividend, with instructions to make to the Indians the necessary explanations on account of this diminution. It is difficult to impress them with a correct conception of this matter. They cannot bring themselves to understand wherefore they should now receive less for their money than has formerly been the case. Of dividends and government stocks they know nothing. It is for Congress then to determine if, as heretofore, the six thousand dollars shall continue to be paid, or that amount only which is the dividend resulting from the principal vested in trust for their benefit. If the former course be concluded upon, the sum of $2,614 40 will be necessary to be appropriated for the next year, and a like sum on account of the deficiency of the last.

The communication from the Pension office presents the number of revolutionary and invalid pensioners, and the deaths which have occurred with each during the year. Of the former, the number is 12,201, of which four hundred and one have died; and 3,794 of the latter, of which forty-one have died, being one out of thirty of the former, and one out of ninety of the latter. The amount appropriated for revolutionary purposes in the present year has fallen considerably short of the demands upon the government. For the present it is estimated at $50,000, though most likely it will exceed that amount. A deficiency appearing at the payments in September last, the president of the United States Bank, Mr. Biddle, voluntarily came forward and tendered any advance necessary to meet the deficiency, and thereby enabled the government to fulfil their engagements to those claimants of the revolution. Soon as the precise amount thus voluntarily advanced from the bank can be ascertained, through a report of the particular deficit at different agencies, a statement will be submitted that it may be repaid through an early appropriation. It will be necessary, the fund being completely exhausted, to appropriate generally for this object at some early period of the session, that remittances may be made to distant parts before March next, and disappointments to the pensioner on the government thereby guarded against.

A regulation was found to have been adopted in the War Department, which conceded the right of being entered as a revolutionary pensioner in all cases where the applicant should show that he was worth less than $960. This promised greatly to swell the list. Having been adopted late in December, 1828, information of it was obtaining circulation and currency through the States, and applications were fast presenting themselves. In March that regulation was revoked upon two grounds: first, that the appropriation for the payment of pensioners would be insufficient for those who, previously to that order, had been admitted; and secondly, that the regulation appeared to be of a character which none but Congress had a right to make.

The laws respecting invalid pensions require revision. As they now stand, and under the constructions given to them, he who at any time has been in the army, and can obtain a certificate that his ill health or state of infirmity is consequent upon some sickness or accident happening to him while in service or on duty, no matter of how remote a date, is entitled to a pension. Men, at distant periods from the expiration of their service, become blind, and it is reported that in consequence of being stationed at some particular place, injurious to vision, the ill effect has been produced; they sink into consumptions, and it is traced to a cold caught while in service; in such cases, the recognized precedents go to establish the right of the party to be placed on the list of pensioners. If this shall continue to be the interpretation given to the laws upon this subject, the list of invalid pensioners must continue greatly to increase. Whenever a soldier is disabled by wounds received in battle, or through an accidental injury occurring while actually in the discharge of his duty, a just claim arises that his country will support him; but those consequent disabilities which are carried back to probable and uncertain and remote causes should not be considered within the provisions and authority of the law, nor is believed to have been so intended.

During the summer two western military posts which had previously been established were abandoned. The troops at Cantonment Towson were instructed to retire upon Fort Jesup. The reasons which induced this measure were, that being above the raft on Red river, and not conveniently to be approached by water communication, in the supplies to be delivered considerable expense was created to the government. This certainly was not a matter of consideration when the safety of the frontiers was to be affected. Upon this head, however, nothing of apprehension was entertained, and the result since its reduction has fortified the truth of the anticipation. The established posts at Cantonments Jesup and Gibson, it is believed, will afford an ample guarantee for the pacific deportment of the Indians in that direction.

Cantonment Leavenworth, situated at the mouth of Little La Platte, was also reduced. The experience of several years had taught that health to the garrison could not be maintained. It was accordingly removed to Jefferson Barracks, and some of the healthy companies of the 6th regiment ordered thence to the Santa Fé road to give protection to our western traders, with directions to retire in the autumn and take up their winter residence at this post, where in the spring they will again be in readiness to proceed upon their western line of march to afford protection to the traders with Mexico. Thus acting, there will be a greater security for health, while a better effect will be produced upon the Indians than from their remaining stationary at any point. This overland trade, carrying with it many articles of our country and bringing back in exchange the gold and silver of Mexico, promises to be valuable, and merits some attention on the part of the government. The confidence inspired by the furnished escort induces a belief that the trade will prove beneficial. It is shown, by recent information received, that the return of those traders to the United States will bring in exchange in the present year for what was taken out at least $200,000 in specie.

I would suggest the propriety of granting a discretion to this department to supply a portion of the troops stationed along our western borders with horses, that, being well equipped, they might act with more efficiency. Mounted men would afford a securer protection and give rise to a more salutary effect upon marauding parties of Indians and towards the tribes themselves. Garrisons can produce little else than a moral effect, for, being stationary, they cannot easily restrain lawless parties from mischievous acts. Familiarly acquainted through the forest and active in retreat, they find little difficulty in practicing, when disposed, their outrages, and avoiding pursuit afterwards. A knowledge, from circumstances before them, that they could be overtaken, would stay them from aggression more effectually, and at the same time create but a slight addition to the expenditure of the army—a matter scarcely worthy to be considered in reference to the benefits most likely to be produced to our frontier and its inhabitants.

As regards the Indian tribes within our limits, it is important to them and ourselves that some definitive plan should be adopted to maintain them as a people, with all those principles of courtesy and justice suitable to their condition and which may be in our power to extend. Experience proves that within the States they cannot remain. Serious difficulties have threatened to arise out of this subject, and greater ones may in future be anticipated. The States will not consent for their limits to be occupied by a people possessed of savage habits, and who claim to exercise the rights of government independent of any control but their own.

A country beyond the Mississippi, better adapted to their habits and pursuits, and where they will be entirely free from all State interference, is the place they should retire to; not through any compulsion to be exercised, but by a course which shall satisfy them clearly that it is for their interest they should do so, and that their happiness requires it.

No better plan can be thought of than that the United States shall put in operation such a system of Indian protection and government, west of the Mississippi, as that a confidence may be reposed that they are indeed our fostered children, and the government not only so disposed to consider, but practi-

cally to evince their good feelings towards them. At present an objection arises with the weaker tribes. They are indisposed to emigrate, from an apprehension that powerful and stronger neighbors may oppress them, and that no surer protection can be obtained from the United States in the west than is possessed already where they reside. To remove such apprehensions will be of no importance.

I beg leave to suggest for your consideration, if an Indian territory, without the range of the western States and territories, might not be advantageously created: and to give efficiency, and to inspire confidence, military posts, under some able and discreet officer of the army, to be designated at some central and convenient point. Intrusions from the whites might thus be restrained, and the Indians maintained in quiet with each other. Laws for their general government, and to preserve peace amongst the tribes, to be the act of the United States, with a right to the Indians in council to make their own municipal regulations.

The displeasure of individual chiefs, and the exciting their young men to maraud on neighboring tribes, to be provided against, by prohibiting any war to be commenced unless it should be declared in general council, and with the knowledge and in presence of the governor or his authorized agent.

Those Indian differences usually find their origin in light and trifling matters, which timely remedies could in many instances prevent, but which, if neglected, often produce considerable difficulty and, to us, expense in restoring tranquillity. Accident or design may bring about a conceived or real wrong; retaliation is the consequence, which, being again imitated by an adverse party, presently ripens into matters of serious consequence. As moral influences can be productive of little benefit to minds not cultivated, it will be prudent and necessary to arrange to the best advantage the physical force of the country. Justice to the inhabitants of our frontiers, and humanity to the Indians, will be more certainly attained by creating a sure impression that every outrage will promptly receive a proper requital. That interference, and that assertion of authority, which this, as an independent country, has a right to exercise over dependent tribes within her limits, maintained steadily, and with strict regard to justice, may effect for this unfortunate race of people all that philanthropy can suggest or good men desire.

Nothing promises security to these people so effectually as their emigration. Within the States to the south, computing the four tribes, Creeks, Cherokees, Chickasaws, and Choctaws, their numbers will fall little short of seventy-five thousand. Removing them in small detached parties, as heretofore has been the case, renders the operation a matter of greater expense than is seemingly necessary. If the expediency of inducing them to a change of homes, and to place them without the range of the States, shall be determined on, a large appropriation will be wanted for the object, to be placed at the disposition of the Executive; and then a hope may be cherished that this desirable object may be attained. But, with partial appropriations, and partial ends accomplished, it must require a tedious time to bring about the final result, and will involve an increased expenditure to the public.

For the details of operations connected with the Indian department during the present year, I beg leave to refer to the report from the officer of Indian Affairs, which accompanies this communication.

Very respectfully,

JOHN H. EATON.

The PRESIDENT *of the United States.*

Documents communicated to Congress by the President of the United States at the opening of the twenty-first Congress, accompanying the report of the Secretary of War.

MAJOR GENERAL A. MACOMB'S REPORT.

HEADQUARTERS OF THE ARMY, *Washington, November*, 1829.

SIR: I have the honor to present herewith the reports, returns, and statements, relating to the army, required by your letter of the 12th of September last.

1st. The organization of the army of the United States, marked A.

2d. A general return showing the actual state of the army, marked B.

3d. A return showing the distribution of the troops in the eastern department, marked C.

4th. A return showing the distribution of the troops in the western department, marked D.

5th. A statement exhibiting the number of recruits enlisted in the army from the 1st of January to the 30th of September, 1829; showing also the amount of funds advanced to officers on account of the recruiting service for the same period, as well as the amount for which accounts have been rendered for settlement, with the balance of moneys on hand, marked E.

6th. An estimate of the amount which will be required to be appropriated for the current expenses of the recruiting service for the year 1830, marked F.

7th. An estimate of the sum which will be required for the current expenses of the headquarters of the army and the Adjutant General's office for the year 1830, marked G.

As far as circumstances permitted, the generals in command and the field officers of artillery have made the inspections required by the regulations. Inspector General Wool has been principally engaged in examining the arsenals, magazines, and whatever relates to the ordnance and artillery; and, although the ordnance is in a progressive state of improvement, he reports that much is yet to be done to give efficiency to that department of the service. Inspector General Croghan has, in like manner, been engaged in inspecting the several regiments of infantry, and he reports favorably as to their general condition.

In conformity with the views of government in regard to affording protection to the trade which is being carried on, through the Indian country, with the Mexican States, a detachment, consisting of four companies of the 6th regiment of infantry, under Brevet Major Riley, was ordered, last spring, from Jefferson Barracks up the Missouri to the commencement of the Santa Fé road, to escort the caravans, which might assemble at that point, as far as the line of demarcation between our government and Mexico. Due notice was given in the public papers of the proffered escort to all those who might desire to take advantage of it, and in the month of June last the convoy, with the caravans, took up its line of march on the road towards Santa Fé. Shortly after their departure, accounts were received that the troops and caravans were proceeding with great regularity and without difficulty, since which no further information of their progress has reached us. While the detachment under Major Riley was destined to afford a safe escort to the trade, it was at the same time designed to operate on the minds of the Indians

by its imposing aspect and movement through their country, and thus extend a general protection to the frontiers of Missouri and Arkansas. A doubt can scarcely be entertained that had the detachment been mounted, as originally contemplated, a more powerful effect might have been produced; but from the fact of there being no appropriation applicable to the object, the intention of mounting the troops was necessarily abandoned.

The posting of the troops upon the Winnebago frontier has resulted in the beneficial effects which were anticipated from it. The Winnebagoes, who were heretofore so restless and troublesome, appear now to be completely subdued and tranquillized.

In the month of July last the inhabitants near the frontiers of Missouri were alarmed at the hostile proceedings which took place on the Charatan river, in Randolph county, between some of the citizens of that State and a party of Indians of the Ioway tribe, in which several men on both sides were killed. As soon as the report of these hostilities reached Brevet Brigadier General Leavenworth, he ordered a detachment of one company of the 3d regiment and five companies of the 6th regiment of infantry, commanded by Lieutenant Colonel Baker, from Jefferson Barracks, to the scene of action, and every suitable preparation was promptly made by the general, in conjunction with the governor of Missouri, to suppress the irregularities and bring the offenders to justice. To convince the Indians that there was a determination on the part of the government to punish the aggressors, General Leavenworth, having previously ordered the detachment under Lieutenant Colonel Baker to Cantonment Leavenworth, proceeded thither himself, and there caused to be assembled, through the instrumentality of the Indian agents, the tribes represented to have been engaged in the affair on the Charatan. The general stated to them that it was his object to ascertain, if possible, whether the Indians or the white people were the aggressors, that the guilty might be punished. He therefore demanded of them to deliver into his hands all those who were concerned in the affair; and until this could be done, he detained as hostages some of the principal chiefs then present. The Indians accordingly delivered up nineteen of the Ioways who were of the party engaged with the whites on the Charatan. Measures were also taken to ascertain the names of the white men represented to have been likewise engaged in that conflict, and the whole of them have been presented to the proper authorities to be dealt with according to law.

From the aspect of affairs on the Missouri frontier, General Leavenworth judiciously left a detachment at Cantonment Leavenworth to watch the conduct of the Indians in that quarter, and to make preparations for the reception, on its return, of the party under Major Riley, which is destined to remain there with the view of covering that frontier against any enterprises which might be attempted by unfriendly tribes.

In consequence of the unsettled state of the Creeks, and the complaints made by the Cherokees of intruders on their lands, three companies were advanced towards their frontiers. Two of these companies were ordered to the Creek agency, and one remained at the arsenal near Augusta, in Georgia, with the company permanently stationed at that place, making in all four companies within striking distance of the Creeks and Cherokees. To facilitate operations in that quarter, Brevet Brigadier General Brooke has been ordered to take post at Fort Mitchell, with a view of directing the concerns which may require the aid of the military.

From the positions assumed by our troops on the several frontiers every reasonable expectation may be indulged that no serious difficulties with the Indians are to be apprehended.

In laying before the War Department the state of the army for the present year, it affords me great satisfaction to present it complete in its organization, in officers and men, as authorized by law, with the exception of a colonel to be appointed to the 2d regiment of artillery and eighty-one rank and file, who by this time are probably enlisted.

The army, distributed, as it is, along a seaboard of 2,500 miles and an inland frontier of equal extent, occupying forty-two posts and stations, is necessarily cut up into small detachments. It is, notwithstanding, gratifying to be able to state, that under such circumstances discipline is maintained in a manner creditable to the officers in command.

The infantry has arrived at a very respectable proficiency in the schools of the company and battalion. The several regiments have been too scattered to afford opportunities of demonstrating on the ground the ability with which they are capable of performing the evolutions of the line; but so long as the schools of the soldier, company, and battalion, are strictly attended to, the reunion of any considerable portion of the troops will, through the skill and intelligence of the superior officers, readily put it in their power to practice the more enlarged movements of brigaded corps.

The artillery, although, like the infantry, in a good state of police and discipline, has not, as yet, made that progress in the exercise of the enginery, machinery, and ordnance, which exclusively belong to that arm. There is no backwardness or want of intelligence on the part of the officers to afford the proper instruction to the men; but, as yet, there is not a supply of mounted ordnance, with equipments, nor of those machines and stores which are required for the service and instruction of artillery. There are some difficulties, which exist at this time, arising from the want of a fixed system in the construction of the guns and carriages; and there also has been a desire to avoid all expense until the improved plans of construction are fairly tested by experiment. The experience of Europe and of our own country has discovered many defects in the construction both of the pieces of artillery and their carriages. The Europeans, especially the French and English, have latterly paid great attention to the *materiel* of artillery. The results of their experience are in our hands, and are under examination and experiment, which, it is hoped, may lead to a well digested and organized system of construction and manœuvre.

I have the honor to be, sir, your most obedient servant,

ALEX. MACOMB, *Major General, Commanding the Army.*

Hon. JOHN H. EATON, *Secretary of War.*

PAYMASTER GENERAL'S REPORT.

PAYMASTER GENERAL'S OFFICE, *Washington, November* 30, 1829.

SIR: I have the honor herewith to submit a report of the transactions of the Pay department for the last quarter of the year 1828, and for the first, second, and third quarters of the present year.

The funds advanced to paymasters within the time stated amount to one million one hundred and two thousand seven hundred and twenty-seven dollars and seventy-three cents, of which forty-two thousand nine hundred and seven dollars and thirty-four cents remain to be accounted for, the whole of which is probably expended by this time, and I have confidence that the accounts will be received by the close of the year.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

Hon. J. H. EATON, *Secretary of War.*

*The recruiting service in the western department has been suspended since the month of May.

Statement of the moneys drawn from the appropriations for the pay department and remitted to the disbursing officers on account of payments for the fourth quarter of the year 1828 *and the first three quarters of* 1829, *the amount unexpended and forming part of their estimates for the fourth quarter of* 1829, *the balances to be accounted for, the periods to which the troops have been paid, and accounts rendered.*

Names of paymasters.	Amount of funds remitted in the fourth quarter of 1828 and the first three quarters of 1829.					Amount unexpended and forming part of their estimates for the fourth quarter of 1829.					Balances remaining to be accounted for.					Periods to which the troops have been paid and accounts rendered.	Remarks.
	Pay and subsistence.	Forage.	Clothing of servants.	Bounties.	Amount.	Pay and subsistence.	Forage.	Clothing of servants.	Bounties.	Amount.	Pay and subsistence.	Forage.	Clothing of servants.	Bounties.	Amount.

PAYMASTER GENERAL'S OFFICE, *November* 30, 1829.

PAYMASTER GENERAL'S OFFICE, *November* 26, 1829.

SIR: I have the honor to send you herewith the report called for in your letter of yesterday.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

Hon. JOHN H. EATON, *Secretary of War.*

Tariff of the present rate of compensation to officers of the United States army.

Rank.	Pay per month.	Subsistence per month.	Forage per month.	Servants' pay per month.	Servants' subsistence per month.	Servants' clothing per month.	Amount per month.	Fuel per month as commuted at this place.	Quarters per month as commuted at this place.	Amount of fuel and quarters per month.	Total amount per month.	Amount per annum.	Remarks.
Major general	$200 00	$91 25	$56 00	$20 00	$24 33⅓	$10 00	$492 83⅓	$15 75	$36 00	$51 75	$544 58⅓	$6,535 00	
Double rations		91 25											Double rations when commanding a department.

PAYMASTER GENERAL'S OFFICE, *November* 26, 1829.

REPORT OF THE CHIEF ENGINEER.

ENGINEER DEPARTMENT, *Washington, November* 18, 1829.

SIR: In obedience to your instructions of the 12th of September, I have the honor to report the progress of all the operations under the Engineer department during the year ending the 30th of September, 1829, and to present an estimate of the funds which will be required for their prosecution during the ensuing year. The report is also accompanied by two statements, marked A and B, of which the first is an exhibit of the fiscal concerns of the department during the past year, showing the amount of funds appropriated for each work, the amount drawn from the treasury and remitted to the disbursing officers, and the amount of accounts rendered and settled within the same period. The second statement shows the fortifications not yet commenced, for which plans have been prepared, arranged in the order in which it is recommended that the works be commenced.

The operations under this department during the year have been as follows:

I.—FORTIFICATIONS.

1. *Sea wall for the protection of George's island, Boston harbor, Massachusetts.*—This work, the object of which is to preserve an important site for one of the defences of Boston harbor, has been completed, and a small balance of the appropriation remains unexpended, which the agent has been instructed to retain in his hands in order to apply it, if necessary, in the spring to the repair of any injury which the masonry may sustain in consequence of the violent storms to which that part of the coast is liable in the winter, as well as to give additional strength to those parts of the construction which may be found to require it.

2. *Fort Adams, Newport, Rhode Island.*—The progress of operations on this work has been as great as the amount of the appropriation for the year would permit; the funds have been applied in the most efficient manner, and the materials and workmanship are of an excellent character. An abundant supply of materials is obtained from Rhode Island and the neighboring States.

3. *Fort Hamilton, New Utrecht Point, New York.*—The materials used in the construction of this work are chiefly obtained from the southern part of the State of New York; the supply is abundant, and the quality, both of materials and workmanship, very good; the progress made in the construction has been such that the completion of the work may be expected during the next year, and the estimate is founded on that expectation.

4. *Repairs of Fort Lafayette, Narrows, New York.*—Some difficulty was experienced in obtaining a sufficient number of workmen to carry on these repairs at the same time with the construction of Fort Hamilton, owing partly also to the unhealthiness of the situation during the summer, which deters workmen who can find advantageous employment elsewhere. Notwithstanding these disadvantages, much work has been done, and the repairs will probably be completed this winter or early in the spring. The funds available are ample for this purpose.

5. *Repairs of Fort Delaware, Delaware river.*—A considerable part of the working season had elapsed before an officer became disposable for this work, and that circumstance, combined with the sickness which prevailed at Fort Delaware during the summer, has prevented the completion of the repairs this season, but they will be in a great measure finished by the close of the year. The work consists principally of repairs to the embankments and wharves, necessary for the protection of the island and for the service of the garrison.

6. *Fort Monroe, Old Point Comfort, Virginia.*—The masonry of the body of this work is nearly completed, and would have been closed but for a failure in the supply of freestone, owing to the death of the person who had engaged to furnish it; 60,000 cubic yards of earth have been placed in the embankments, which will be nearly completed to the extent at present contemplated during the ensuing winter. In order that the masonry of the revetments may have time to consolidate before it is subjected to great pressure, occasioned by embankments of sand, it is proposed to raise these embankments at present only to the level of the terreplein, which is to receive the upper tier of guns, leaving for a future time the formation of the parapet to cover that tier. The amount estimated for the next year is, therefore, intended to be applied principally to constructing the outworks on the front of attack.

7. *Fort Calhoun, Hampton roads, Virginia.*—The extent of operations on this work has corresponded with what was contemplated at the beginning of the season.

No contracts have been made for the supplies of materials during the past year at the works in Hampton roads, but they have been obtained by purchase in open market. The supplies have been, except in the article of freestone before mentioned, very abundant, and of superior quality; they have been obtained principally from the country bordering on the waters of the Chesapeake.

8. *Fort Macon, Beaufort, North Carolina.*—The progress of operations on this work has not been so great as was expected, owing, as the superintending engineer represents, to difficulties which have arisen in procuring a sufficient supply of bricks of a suitable quality; and this being the chief material used in the construction, the work has been necessarily retarded. It is hoped that arrangements will soon be made to obviate any further difficulty on this subject.

9. *Fort at Oak island, North Carolina*—During the past year the construction of this work has been continued in a satisfactory manner, and a great portion of its masonry is now completed.

10. *Fortifications in Charleston harbor, South Carolina.*—As contemplated at the time of my last annual report, an officer of engineers was assigned last winter to the Charleston station. He has been, as yet, chiefly occupied with the preparatory arrangements for the construction of a fort on the shoal opposite to Fort Moultrie. The work has been traced out, and preparations made at Fort Johnson, on James's island, for receiving materials and quartering the persons to be employed. A contract has been made for the delivery of 30,000 tons of stone for the foundation of the new fort, and active operations will be forthwith commenced.

As Castle Pinckney enters into the system of defences projected for Charleston harbor, the superintending engineer has been instructed to put it in a state of thorough repair, agreeably to a project approved by the department. The cost of the repairs will be about ten thousand dollars. In addition to the funds now available for fortifications in Charleston harbor, the sum of $25,000 is estimated for, in order to enable the superintending engineer to take advantage of all the facilities that may be presented by transient vessels for obtaining a further supply of stone on the most reasonable terms.

11. *Fort on Cockspur island, Savannah river, Georgia.*—The operations on this work have also been chiefly of a preparatory nature, such as an examination of the site, laying out the work, the construction of wharves and temporary quarters, and the excavation of a short canal to facilitate the delivery of

materials. The small sum required for the next year is to be applied to the purchase of the site, which could not be concluded for want of the special authority required by law in such cases.

12. *Fort at Santa Rosa island, Pensacola bay, Florida.*—For the same reason which delayed the commencement of operations on the two last-mentioned works, viz: the want of disposable officers, a considerable time elapsed, after the appropriation for this fort was made, before the officer charged with its construction could repair to his post. Preparatory arrangements were commenced in November last, and in June the excavations were begun. Since that time the work has been prosecuted with great activity, and to the entire satisfaction of the department. The estimate for the service of this work during the ensuing year is rather greater than usual, the reasons for which are that, as a general rule, the construction of such works can be carried on with more economy when circumstances will permit of its being done in a short period; and in the case of works on our southern frontier, such is the mildness of the climate, that where the site is sufficiently healthy, the operations are uninterrupted during the year, and the facilities for applying a large sum are consequently very great. In addition to this consideration it is also urged that, in justice to the officers and other persons employed on the construction of these works, they should be completed as rapidly as possible; for even in situations comparatively healthy, many of them, being necessarily not inured to the climate, contract diseases which, if not fatal, produce an effect on their constitutions which may never be removed. The loss of valuable lives, which the corps cannot cease to regret, bears testimony to the truth of this remark, and affords the strongest argument in support of the principle proposed to be adopted.

13. *Fort at Mobile Point, Alabama.*—The memoir explanatory of the progress of this work during the past year has not yet been received; but on reference to the annual statement it appears that the funds advanced have been applied agreeably to the project offered at the commencement of the year.

14. *Tower at Bayou Dupré, Louisiana.*—A contract has been made for the construction of this work, which is now in progress under the direction of an officer of engineers, and will probably be completed during the ensuing winter.

15. *Fort Jackson, Plaquemine Bend, Louisiana.*—At the date of my last annual report it was supposed that no additional appropriation would be required for the completion of this work, and consequently none was made for the year 1829. The following extracts from the annual memoir of the superintending engineer will explain the causes which have defeated this expectation and made it necessary to ask for the further sum introduced into the estimate for next year:

"Many causes have tended to lead me from a correct estimate, particularly in the article of bricks. They have varied in size from 64 to 76 cubic inches; and of these different sizes millions have been received from year to year. No correct idea was therefore formed of the total number required, as has proved to be the case; nor could a uniformity in size have been secured, owing to the inequality of shrinkage of the clay of which they are made. At all the northern Atlantic ports from whence they are drawn the size of the mould was made uniform; this, however, did not secure the desired result.

"Another cause was the impracticability of ascertaining the number of this material remaining on hand at any particular period—the quantities, always exceeding millions, did not justify the expense of counting them. Another fruitful source of error has been the vast difference in bulk between the soil when first taken from the ditches, or its natural position, and after it had completely dried, when its bulk is very materially reduced; added to which is the settling of some inches of the whole mass of the embankments, owing to the compressibility of the soil beneath, in a ratio nearly equal to the shrinking of the earth excavated. Various other causes have tended to retard the progress of this work, as detailed from time to time in the monthly reports, and made its cost exceed any sum I had supposed requisite. Hence, then, the necessity for the present estimated amount. The inconvenience and increased expense of suspending works of this description from time to time, together with the impracticability of giving orders for the manufacture of materials until after the appropriations are made, has been so repeatedly made known to your department as to make further mention of this subject unnecessary."

I would here respectfully call your attention more particularly to the last paragraph just quoted from the memoir of the superintending engineer at Fort Jackson, and represent the importance of early appropriations in securing the most efficient and economical application of the funds for public works. This remark applies with peculiar force to the works situated in the southern region of our country where the winter season, the most favorable, and, in some instances, the only one in which the work of construction can be carried on, is frequently lost, in consequence of the appropriations being made at a late period of the session of Congress. To obviate this inconvenience as far as practicable this year, with regard to Fort Jackson, it was suggested that a portion of the contingent fund for fortifications should be applied to the service of that work, that the engineer might make immediate engagements for the purchase and delivery of materials during the winter; but the idea was abandoned in consequence of the opinion of the President that such an application of the fund was unauthorized by law, and that it would be better to defer the completion of the fort for another year.

16. *Repairs and contingencies of fortifications.*—About one-third only of this appropriation has been drawn from the treasury; that sum has been applied chiefly to the payment of a small arrearage due at Fort Delaware; to repairs at Fort Columbus, New York; Fort McHenry and Fort Washington, Maryland; and Fort Moultrie, South Carolina; to the completion of a cistern at Fort Monroe; to the service of fortifications on the Gulf of Mexico; to defraying expenses of the board of engineers for fortifications, and the expenses incidental to a resolution of the Senate relative to the examination of certain sites for an armory on the western waters.

II.—CIVIL CONSTRUCTIONS.

1. *Pier at La Plaisance bay, Michigan Territory.*—The construction of this pier was completed on the 30th of September, with the exception of a part of the planking, which will be finished as soon as the materials can be obtained from the mills.

2. *Huron river, Ohio.*—One of the piers intended to form a channel at the entrance of this river, has been extended to the length contemplated, and the other requires an addition of 150 yards of pier work to complete it. A small additional sum is required for planking and raising these piers in some parts, where the action of the current has caused them to settle.

3. *Black river, Ohio.*—As stated in the last annual report, the works for removing the sand bar at the entrance of this river were commenced in the autumn of 1828, since which time satisfactory progress has been made in their construction.

4. *Cleveland harbor, Ohio.*—To the length of the piers forming the entrance of this harbor, 262 yards have been added during the past year; the sum stated in the estimate will complete the work.

5. *Grand river, Ohio.*—No funds having been appropriated this year for the works at the mouth of

Grand river, a further sum is now asked for to complete them; the progress of the construction during the last year has been as great as the means would permit—270 yards having been added to the length of the piers. The beneficial effects resulting from the works, as stated in my last annual report, continue to be felt.

6. *Cunningham's creek, Ohio.*—The pier at the mouth of this creek was nearly finished on the 30th of September, and will be completed this year.

7. *Ashtabula creek, Ohio.*—The construction of piers at the entrance of this creek having been completed, a safe harbor has been formed, and the required depth over the bar, mentioned in my last annual report, will be obtained by means of a dredging machine now in operation.

8. *Conneaut creek, Ohio.*—The construction of piers at the entrance of this creek, for which the first appropriation was made at the last session of Congress, was commenced during the summer, and has been successfully continued.

9. *Presque Isle bay, Pennsylvania.*—The works forming the harbor of Erie have been completed, and the operation is attended with complete success in forming a spacious and commodious anchorage for the largest class of vessels navigating Lake Erie. Over the bar, which had formerly but one and a half foot of water, seven feet may be now carried even at a lower stage of water than is usual in the lake, and the effect of closing the breach in the peninsula, which has been done this year, will no doubt be to improve the entrance still more.

10. *Dunkirk harbor, New York.*—The pier constructed as a breakwater to secure this harbor is found to have the desired effect. A small sum is introduced into the estimate in order to enable the engineer to complete the planking of the pier, which would suffer injury from being left in its present unfinished state.

11. *Buffalo harbor, New York.*—The balance remaining from the appropriation of 1828 has been advantageously applied during this year; and, to complete the improvement of the harbor, a further sum is now required, as stated in the general estimate. The importance of this harbor to the commerce and navigation of Lake Erie is considered such as fully to justify the expense incurred in making it safe and easy of access.

12. *Black Rock harbor, New York.*—The object of the appropriation made at the last session of Congress for improving the entrance to this important harbor, which forms the western termination of the Erie canal, has been in a great measure accomplished by the erection of suitable works of a substantial character. For the completion of the works which have been thus commenced, the additional sum stated in the general estimate, which falls below the original estimate of their cost, is required; and with a view to the further security of the harbor, agreeably to the plan originally contemplated, the expediency of asking for an appropriation to construct a mole on the eastern side of the entrance is respectfully submitted.

13. *Genessee river, New York.* } The construction of piers for the improvement of these two harbors
14. *Big Sodus bay, New York* } was commenced during the last summer under the direction of one agent, and has been continued in an approved manner as far as the funds appropriated have availed. By the close of this year about one-fifth of the work at each place will have been finished.

15. *Oswego harbor, New York.*—The calm season on Lake Ontario has been too short to enable the contractor to complete the piers at the entrance of this harbor, and the work has also sustained some damage by storms, which it was necessary to repair. An inspection of the works in this harbor was made last year by the officer of engineers, who surveyed the several harbors on Lake Ontario, and he recommended the construction of a pier head as requisite for their security. The estimate for next year embraces, therefore, three items; the first for indemnifying the contractor for damages sustained in storms; the second for completing the piers; the third for the pier head; which is submitted for approval. Oswego harbor is the outlet of a canal which connects Lake Ontario with the Erie canal of New York, and is therefore an important point in the navigation of the lake.

16. *Sackett's harbor, New York.*—The operations for the improvement of this harbor were placed in the spring of this year under the charge of the assistant quartermaster at that post, and are now conducted under the direction of the Quartermaster General.

17. *Lovejoy's Narrows, Kennebec river, Maine.*—The obstructions to the navigation of this river at the Narrows consisted of two masses of rock, called the "Half-tide Rock" and the "Sunken Rock," for the removal of which contracts were made last winter. That for deepening the water on the "Sunken Rock," the smaller of the two obstructions, has been accomplished, but the agent has informed me that the contractor will abandon the "Half-tide Rock," being convinced that he cannot, without loss, comply with his engagements. As the work is one concerning which no person in the vicinity had any experience, but one offer was made for the contract, and for the same reason no penal bond was required of the contractor. To effect the object of removing these obstructions a further appropriation is therefore required.

18. *Harbor of Saco, Maine.*—One of the piers for the improvement of this harbor remains to be constructed, and one of those completed will require some repairs in consequence of injury it received from storms. It is believed that the funds now available will be sufficient for these purposes, and that the works will have the desired effect of protecting the harbor.

19. *Kennebunk river, Maine.*—The pier at the entrance of this river has been completed except a small part of the sheathing, which could not be done before the close of the working season, but will be finished early in the spring.

20. *Berwick branch of Piscataqua river, Maine.*—The operations for improving the navigation of this river near Berwick have been conducted with intelligence and success during the past year, and it is believed that the funds available will be sufficient to complete the removal of the obstructions so as to afford a navigation of six feet water at mid-tide, which will effect the object for which the appropriation was granted.

21. *Merrimack river, Massachusetts.*—The construction of works at the mouth of this river for improving the harbor of Newburyport was commenced last spring—materials for the purpose having been prepared during the preceding winter. These works differ from those on the lakes in the material circumstance of being constructed in tide water, and hence the project was considered in a great measure experimental. It is not surprising, therefore, that the experiment should not have been at first attended with complete success. A portion of the mole across the lateral channel has been undermined and swept away by the tide. Measures have been taken to repair the injury sustained; in consequence of which an additional appropriation will be required for the completion of the work agreeably to the original design.

22. *Deer island, Boston harbor, Massachusetts.*—Satisfactory progress has been made during the past year in the construction of the sea-wall for the preservation of that island. As before remarked with respect to George's island, the works in Boston harbor are liable to injury whilst incomplete from the effects of violent storms. Such a one occurred on the 31st of last month, and the action of the sea dis-

placed a part of the upper courses of stone on the more exposed part of the wall; the replacing of which will cause an expense of $1,200 or $1,500.

23. *Plymouth beach, Massachusetts.*—The expenditures on the work for the preservation of this beach have for two years past been very small; about $500 having been applied to keeping them in repair; and it is desirable to have a small sum disposable, to be used in checking the encroachments of the sea, until by the effect of natural causes, constantly operating, the work shall have acquired complete permanency.

24. *Provincetown harbor, Massachusetts.*—The appropriation for the preservation of the point of land forming this harbor was first made in 1826, and reverted last year to the surplus fund in consequence of the want of success which attended the endeavors of the department to procure a local agent for directing the works, and the same cause has still prevented the application of the fund which was re-appropriated at the last session of Congress.

25. *Hyannis harbor, Massachusetts.*—The construction of the breakwater for the protection of this harbor has been continued during the year, and a small balance of funds is still in the hands of the agent, to be applied next spring to the same object.

26. *Nantucket harbor, Massachusetts.*—In order to try the experiment of opening a deeper channel over the bar at the entrance of this harbor, a dredging machine, with the necessary apparatus, was purchased last spring, and advantage has been taken of all the favorable weather which has since occurred for using it. The agent reports that the channel already excavated remains open, and that he has no doubts of a satisfactory result from the continuance of the operations.

27. *Edgartown harbor, Massachusetts.*—An appropriation was made last spring for extending the pier on which the light-house at the entrance of this harbor is built, and the object has been accomplished in a satisfactory manner.

28. *Warren river, Rhode Island.*—The erection of a pier and beacon on Allen's rocks, in this river, has been effected. The work is done in a substantial manner, and the expense has fallen a little short of the sum appropriated for the object.

29. *Stonington harbor, Connecticut.*—The construction of a breakwater for the improvement of this harbor has been well conducted, and, from the protection which the work, even in its present unfinished state, is represented to have afforded during the last equinoctial gales, the best results are anticipated from its completion.

30. *Mill river, Connecticut.*—A portion of the funds appropriated for the formation of a harbor at the mouth of this river, and for improving its navigation, has been applied, during the last season, to the construction of a breakwater, and the balance will probably suffice to effect what remains to be done next spring, to complete the projected works.

31, 32, 33. *Marcus Hook, Fort Mifflin, Port Penn, Pennsylvania*; 34. *New Castle, Delaware.*—The annual report of the officer who superintends the construction of these places has not been received, but from his monthly reports of progress, it is concluded that the piers in the Delaware, at the several points, are very nearly if not quite finished; some further funds may be required for deepening the harbors around them.

35. *Ocracoke inlet, North Carolina.*—The operations under the acts appropriating funds for the removal of the shoals that obstruct the navigation of this inlet have been as yet confined to the construction and preparation of the necessary machinery. The superintending engineer at Fort Macon, under whose directions this was commenced, being unable, on account of his distance from Ocracoke, to devote sufficient time to that object, without interfering with his other duties, the direction of the operations has been assigned to another officer of engineers, by whom they will be commenced on the completion of the machinery, which has been somewhat delayed by the failure of the contractors.

36. *Cape Fear river, North Carolina.*—To avoid, if possible, imposing new duties on the superintending engineer at Oak island, it was at first proposed to place the operations for improving the navigation of this river under the direction of the State authorities, but the Board of Internal Improvements of North Carolina having requested that a different course might be pursued, they were afterwards given in charge to the above-mentioned officer, who has made suitable arrangements for carrying them on. The lateness of the season at which he was put in charge, and the unhealthiness of the river shores in the summer, has prevented the accomplishment of much work previously to the 30th September last.

37. *Inland passage between the St. Mary's river, Georgia, and St. John's river, Florida.*—The operations for improving this navigation have been satisfactorily carried on during the last season, and it is expected that, by the middle of December, they will be completed as far as the available funds will suffice for that object. The additional sum estimated for is intended to cover the expenses of superintendence and other contingencies.

38. *St. Mark's river, Florida.*—For want of a suitable agent to conduct the work for improving the navigation of this river, nothing has yet been done towards that object.

39. *Apalachicola river, Florida.*—On the 3d of September the agent assigned to superintend the improvement of the navigation of this river reported that, in consequence of the high stage of the water throughout the summer, he had been unable to operate, but expected to do so during the months of October or November. He also states that the good effects of the work done last year have been sensibly felt in the navigation.

40. *Bay of Mobile*; 41. *Pass au Heron*; 42. *Pascagoula river.*—The operations for deepening these several channels of navigation are, for want of a sufficient number of officers, all placed under the charge of the engineer who superintends the construction of a fort a Mobile Point; the last alone is sufficient to occupy him very fully, and time has therefore been wanting for him to prepare his annual reports up to the 30th of September, and transmit them to this department. It is known, however, that a dredging machine has been in operation on each channel for some time past.

43. *Red river, Louisiana and Arkansas.*—Under the direction of the commanding engineer on the Gulf of Mexico, a careful examination of the part of this river which includes the raft was made last summer, and a project proposed for improving its navigation. An officer of infantry has since been detailed, to take charge of the operations for that purpose, which will be carried on this winter.

44. *Mississippi river.*—To conduct the operations for improving the navigation of this river with more effect, the superintendent, Captain Henry Shreve, was authorized to construct a steamboat of such strength, and furnished with such apparatus, as can be applied to the removal of snags. This boat having been completed and put in operation, has, according to the superintendent's report, fully answered the purpose. By means of its machinery, a snag or sawyer of the largest dimensions is removed in a few

minutes ; and it is expected that the continuance of the operations will go very far to effect the important and highly desirable object of freeing the navigation of the Mississippi from those dangerous impediments.

45. *Ohio river.*—The operations for improving the navigation of this river have been this year confined to deepening the channel through the "Grand Chain," near its mouth; the charge of them was entrusted to the superintendent on the Mississippi river. On the 24th of September the boats and machinery for this purpose were in readiness to take advantage of the first low stage of water in the river to commence operations.

46. *Repairs of the Cumberland road, between Cumberland and Wheeling.*—The superintendent appointed to direct this work was instructed to adopt the MacAdam system of road making, and to apply the funds to repairing the worst parts of the road, the sum appropriated being entirely inadequate to effect a complete repair of it. With respect to the manner in which these instructions have been complied with, information is expected in a few days from an officer of engineers, who is now engaged in making an inspection of the road, unless he should be prevented by snow from performing the duty assigned him.

47. *Road from Canton to Zanesville;* and 48. *Road westwardly from Zanesville, in Ohio.*—The report of operations on these roads, up to the 30th September, not having been received, no exact statement can here be made of the work done; but it is known that travelling has been admitted on the road as far as Zanesville, and that the construction of 26 miles westwardly from that place, extending to the crossing of the Ohio canal, has been contracted for and is in progress.

48. *Road through Indiana.*—Under a literal construction of the law for opening this part of the national road two commissioners were appointed to superintend it, and contracts were made, agreeably to their instructions, for *cutting off* and removing the timber and cutting down the banks so as to form as good a road as circumstances would admit of. Subsequently, however, finding that the expense of this work would absorb but a small part of the funds appropriated, the superintendents were authorized to provide for grubbing the trees from the central part of the road, which will be accordingly done. Contracts were made for opening the road entirely across the State of Indiana, and will probably be completed this winter.

50. *Road from Detroit to Chicago, Michigan Territory.*—The contracts made on this road, together with the portion finished previously to this year, will effect by the close of this year the completion of 64 miles of the road, commencing at Detroit.

51. *Road from Detroit to Fort Gratiot, Michigan Territory.*—Of this road seventeen miles have been put under contract, a considerable portion of it completed, and the remainder is in a state of forwardness.

52. *Road from Detroit to Saganaw, Michigan Territory.*—The construction of fifteen miles and a quarter of this road has been contracted for and is in progress

53. *Road from Detroit to Maumee.*—On the 1st of October this road was finished, except a few sections, which were to be completed by the 15th of the present month.

III.—SURVEYS UNDER SPECIAL ACTS AND RESOLUTIONS OF CONGRESS.

Of the surveys enumerated under this head as in progress at the time of my last annual report, all have been completed and were reported to Congress last year, except the survey of the Wabash river and the examination of sites for an armory on the western waters, on which a report will be made this winter.

Those ordered at the last session of Congress are—

1. Survey of the ship channel of Penobscot river, Maine, from Whitehead to Bangor, and ascertaining the cost of improving the navigation of the same, and proper sites for spindles and buoys.

2. Survey of the Cochico branch of Piscataqua river, New Hampshire, from Dover Falls to its confluence with the Piscataqua, for the purpose of ascertaining the practicability of removing obstructions to navigation, and the cost.

3. Survey of North river, between Scituate and Marshfield, Massachusetts, to ascertain the expediency of removing obstructions at the mouth of the same, and to make an estimate of cost.

4. Survey of the piers erected at Sandy Bay, Massachusetts, to report the condition of the same, and what works are necessary to make a good and safe harbor at that place, together with an estimate of the cost.

5. Survey of the harbor of Bass river, between Yarmouth and Dennis, Massachusetts, to ascertain the practicability and expense of improving the said harbor.

6. Survey of the river Thames, Connecticut, with a view to improve the navigation of the same, and estimating the cost of such improvement.

7. Survey of the harbor of Westbrook, near the mouth of Connecticut river, Connecticut, with a view to the improvement of said harbor, and for ascertaining the cost of such improvement.

8. Survey of the harbor of Norwalk, Connecticut, with a view to its improvement.

9. Survey of the harbor of Stamford, Connecticut, with a view to its improvement.

10. Survey of the bars at the mouth of Sag Harbor, New York, to ascertain the best method of preventing the harbor being filled up with sand, and the cost of the same.

11. Survey of Flat Beach, alias Tucker's island, New Jersey, with a view to preserve the anchorage of the port, and to report an estimate of the cost of such improvements as may be necessary to effect those objects.

12. Survey of Deep Creek, a branch of the south branch of Elizabeth river, Virginia, for the purpose of improving the navigation of the same, and an estimate of the cost.

13. Survey of Pascotank river, North Carolina, for removing bars and obstructions in the same, and an estimate of cost.

14. Survey of the harbor of St. Augustine and the bar at or near the entrance of the same, with a view to remove the latter, and to render the access to the harbor safe at all times, and to make an estimate of the cost of accomplishing that object.

15. Survey of the water tract between Lake Pontchartrain and Mobile bay, with a view to the erection of light-houses and placing buoys.

16. Survey of the passes at the mouth of the Mississippi river, with a view to the improvement of the navigation and building light-houses and buoys.

17. Survey of the entrance of the river Teche, with a view to improve and shorten the navigation of the same, and an estimate of the cost of such improvement.

18. Survey of certain sites on the Ohio river, to ascertain the practicability of erecting bridges over said river.

These surveys have been made, and the reports, some of which have already been received, will be presented as soon as practicable.

19. The surveys for continuing the location of the national road to the seat of government of Missouri have been diligently prosecuted this season. At the date of my last annual report the location had been effected as far as Vandalia; since that time experimental surveys have been made from Vandalia through St. Louis, along the south side of the Missouri, to Jefferson; thence, in returning, along the north side of the Missouri back to Vandalia, which place the commissioners expected to reach about the 25th of October. In the course of this winter, therefore, such a report may be expected as will afford the means of deciding on the most advantageous route for the road beyond Vandalia.

IV.—SURVEYS UNDER THE ACT OF THE 30TH APRIL, 1824.

The operations under this head during the year past, in addition to those reported to Congress at its last session, have been as follows:

1. Preparing copies of various maps required by the commissioners for settling the northeast boundary of the United States. Maine.

2. Surveys, with a view to connect the waters of Lake Champlain with those of the Connecticut river, by the valleys of Onion and Wills rivers. Vermont.

3. Survey, with a view to unite the Connecticut and Pemigewassett, by the valley of the Oliverian. New Hampshire.

4. Survey of a canal route from Taunton to Weymouth. Massachusetts.

5. Survey of a route for a railroad from Catskill to Ithaca. New York.

6. Survey to connect the Pennsylvania and Ohio canal by the valleys of the Big Beaver and Mahoning. Pennsylvania and Ohio.

7. Survey of the Alleghany river from French creek to Pittsburg. Pennsylvania.

8. Surveys for the location of a canal round the Muscle and Colbert shoals in the Tennessee river. Alabama.

9. Surveys for the location of a railroad from Charleston to Hamburg. South Carolina.

10. Preparation of a map of Pensacola bay. Florida.

11. Survey of the country between the Tennessee and Altamaha rivers, and preparation of a report on the same. Georgia and Tennessee.

12. Surveys of Licking and Green rivers, in Kentucky, with a view to improve their navigation.

13. Surveys, with a view to connect the waters of Lakes Erie and Michigan with those of the Ohio and Illinois rivers. Indiana.

14. Survey of a canal route to connect the waters of Lake Michigan with those of the Illinois river. Illinois.

15. Surveys of the Des Moines and Rock River rapids in the Mississippi river. Illinois.

16. Survey and examination of the concerns of the Louisville and Portland canal, made at the request of the Secretary of the Treasury. Kentucky.

17. The aid previously afforded by the department to the Baltimore and Ohio Railroad Company has been continued during the year. Maryland.

The necessity of withdrawing some of the officers from the duties in which they were engaged, for the purpose of making the surveys enumerated in the preceding class, has prevented the completion of some of the reports on those of this class, which would otherwise have been rendered.

Pursuant to your instructions, the sum appropriated for surveys at the last session of Congress has been applied exclusively to the expenses under that head for the current year, and it therefore becomes necessary to present a special estimate for the payment of arrearages due for services performed in 1828, principally on surveys in Virginia, South Carolina, and Georgia, and for the rent of a topographical office in Georgetown, in 1826, 1827, and 1828.

V.—THE BOARD OF INTERNAL IMPROVEMENT

Has been occupied this year in completing the report on the Florida canal, which was presented to Congress at its last session; in preparing a project for a canal between Buzzard's and Barnstable bays, which is finished; and in drawing up instructions for some of the before-mentioned surveys. One member has also been engaged, in connexion with commissioners appointed by the President, in completing the project for a breakwater at the entrance of Delaware bay, and, as a member of the board of engineers for fortifications, in preparing plans for the defence of Pensacola bay.

VI.—THE MILITARY ACADEMY.

The report of the board of visitors, a copy of which is herewith presented, and my personal inspections, combine to give perfect satisfaction as to the management of this valuable institution and its gradual amelioration. In consequence of the representations of the superintendent and the suggestions of the boards of visitors in 1828 and 1829, I have added to the usual estimates an item to cover the expenses of constructing a building for military and other exercises in bad weather and during the winter; for constructing a military laboratory, necessary for the course of artillery instruction; and also a small additional sum for completing the hospital, which will, I hope, meet with your approbation.

VII.—OFFICE OF THE CHIEF ENGINEER.

Under an order of the Senate, a contract has been made by this department for engraving the map which accompanied the report of the Florida canal. A part of the impression ordered will be ready for distribution by the 1st of December.

In consequence of the great increase of the business of this department, which an inspection of the annual reports for several years past exhibits, two additional clerks are necessary for the prompt and efficient discharge of the duties of this office. An estimate for their salary is therefore submitted. From the same considerations have also resulted the frequent representations that have been made by the chief engineer of the necessity of increasing the number of officers by whom the operations intrusted to this department are conducted. On this subject I shall have the honor to present to you a special report.

All of which is respectfully submitted by, sir, your most obedient servant,

C. GRATIOT, *Brigadier General, Chief Engineer.*

A.—*Exhibiting the fiscal concerns of the Engineer department, for the year ending September* 30, 1829, *in which the funds which had accrued within that period, and the manner of their accruing, are stated and accounted for by showing their application; and showing, also, the amounts expended upon the several works under construction.*

Designation of the appropriations and the objects to which they are applicable.	Funds available for the service of 1829, and whence derived.			Amount available accounted for.				Cost of the several works on September 30, 1829.	Remarks.
	From appropriations for 1829.	From balances of appropriations undrawn from the treasury, and those remaining in the hands of agents, September 30, 1829, and amounts refunded, &c.	Aggregate available.	Amount applied, corresponding with accounts rendered to September 30, 1829.	Amount undrawn from the treasury on October 1, 1829.	Balances in the hands of agents on October 1, 1829.	Aggregate accounted for, and corresponding with the aggregate available.

B.

Exhibiting the works projected by the board of engineers which have not been commenced, and the estimate of their cost.

FIRST CLASS, TO BE COMMENCED AS SOON AS POSSIBLE.

Designation of the works	Estimate of their cost.
Fort St. Philip, Louisiana	$77,810 79
Fort at Sollers's Point Flats, Patapsco river	673,205 44
Fort Tompkins, New York	420,826 14
Redoubt in advance of Fort Tompkins, New York	65,162 44
Fort at Wilkins's Point, New York	456,845 51
Fort at Throg's Point, New York	471,181 53
Fort at Dumpling's Point, Rhode Island	759,946 57
Fort at Rose island, Rhode Island	82,411 74
Dikes across west passage, Narraganset Roads	205,000 00
For the defence of Boston harbor:	
Fort on George's island	458,000 00
Fort on Nantasket Head	539,000 00
Lunette in advance of ditto	79,000 00
Redoubt No. 2, in advance of ditto	32,000 00
Redoubt No. 1, on Hog island, in advance of ditto	29,000 00
Dike across Broad Sound Passage	140,000 00
Cutting of the summit of Gallop island	2,429 51
Works for the defence of Conanicut island, Narraganset bay, Rhode Island	220,053 43
	4,531,873 10

SECOND CLASS, TO BE COMMENCED AT A LATER PERIOD.

Fort at Grand Terre, in Louisiana	$264,517 52
Tower at Pass au Heron, bay of Mobile	16,677 41
Fort at Hawkins's Point, Patapsco river	244,337 14
Fort at St. Mary's, Potomac river	205,602 33
Fort opposite the Pea Patch, Delaware river	347,257 71
Fort at the Middle Ground, outer harbor of New York	1,681,411 66
Fort at East Bank, outer harbor of New York	1,681,411 66
Fort Hale, Connecticut	31,815 83
Fort Wooster, Connecticut	27,793 34
Fort Trumbull, Connecticut	77,445 21
Fort Griswold, Connecticut	132,230 41
Fort on Fort Preble Point, Portland harbor, Maine	103,000 00
Fort on House island, Portland harbor, Maine	32,000 00
Fort Pickering, Salem	116,000 00
Fort for Naugus Head, Salem	35,000 00
Fort Sewall, Marblehead	116,000 00
Fort for Jack's Point, Marblehead	96,000 00
Fort on Bald Head, North Carolina	120,000 00
Fort on Federal Point, North Carolina	12,000 00
	5,340,500 22

THIRD CLASS, TO BE COMMENCED AT A REMOTE PERIOD.

The rafts to obstruct the channel between Fortress Monroe and Fort Calhoun	$240,568 00
Fort, Craney Island Flats	258,465 00
Fort at Newport News	244,338 14
Fort on Naseway Shoal	673,205 44
For the defence of Patuxent river:	
Fort on Thomas's Point	173,000 00
Fort on Point Patience	164,000 00
Fort on the Narrows of Penobscot river, Maine	101,000 00
	1,854,575 58

Recapitulation.

1st class, 17 works	$4,531,873 10
2d class, 19 works	5,340,500 22
3d class, 7 works	1,854,575 58
	11,726,948 90

Remarks.

The classification in this table, distinguishing three periods, exhibits the works enumerated in the order of their efficiency to meet the earliest possible emergency.

Statement showing the amount of money drawn from the treasury and remitted to the officers and agents disbursing under the Engineer department from the 1st of October, 1828, to the 30th September, 1829, inclusive, and the amount of accounts rendered by each within the same period.

Names.	On what account.	Am't remitted on each account or appropriation.	Am't of accounts rendered	Remarks.
Gen. C. Gratiot	Fortress Monroe	$124,100 00	$123,766 54	
	Fort Calhoun	96,200 00	112,558 69	
	Repairs and contingencies of fortifications	3,115 80	5,384 02	
Col. Joseph G. Totten	Fort Adams	96,995 68	101,229 61	
Lieut. Colonel S. Thayer	Quartermaster's department of the Military Academy	27,925 11	32,694 17	
Major S. Babcock	Fortifications at Savannah, Georgia	5,300 00	5,242 64	
Major R. E. DeRussy	Fort Hamilton	74,389 56	81,779 16	
	Repairs at Fort Lafayette	22,000 00	12,254 98	
	Repairs and contingencies of fortifications	500 00	244 73	
Major T. W. Maurice	Removing sand-bar at mouth of Black river	6,500 00	6,806 33	
	Building piers at Buffalo harbor	13,106 00	19,142 61	
	Building piers at Dunkirk harbor	11,414 00	11,473 17	
	Building piers at Black Rock harbor	26,445 00	26,297 10	
	Building piers at La Plaisance bay	2,000 00	----------	
	Closing breach in peninsula at Presque Isle bay	6,987 00	6,496 53	
	Surveys of Genesee river	300 00	156 05	
	Surveys of Sandy creek	300 00	127 44	
	Surveys of south shore of Lake Ontario	400 00	390 53	
	Survey relating to internal improvements under act of April 30, 1824	----------	199 95	
Capt. I. L. Smith	Repairs and contingencies of fortifications	362 22	422 72	
	Survey of Wabash river	500 00	175 42	
	Surveys in relation to internal improvements under act of April 30, 1824	350 00	329 26	
Capt. George Blaney	Fort at Oak island	66,882 00	66,513 87	
	Improving navigation of the Cape Fear river below Wilmington	6,760 00	857 31	
Capt. W. H. Chase	Fortifications at Pensacola	70,000 00	63,181 51	
	Tower at Bayou Dupré	7,000 00	----------	
	Battery at Bayou Bienvenue	6,447 80	6,322 64	
	Repairs and contingencies of fortifications	500 00	207 00	
	Improving the navigation of Red river	1,500 00	353 25	
	Survey of the mouth of the river Teche	200 00	----------	
	Survey of water tract between Lake Pontchartrain and Mobile bay	200 00	175 00	
Capt. R. Delafield	Fort Jackson	65,556 00	47,652 23	
	Survey of the passes at the mouth of the Mississippi river	500 00	413 26	
Lieut. And. Talcott	Survey of Deep creek	80 00	22 60	
	Survey of Pascotank river	80 00	44 25	
Lieut. Wm. A. Eliason	Fort Macon	48,853 60	69,622 92	
	Removing obstructions to the navigation near Ocracoke inlet	12,000 00	216 87	By Lieut. Dutton.
Lieut. C. A. Ogden	Fort at Mobile Point	100,000 00	82,654 21	
	Improving the harbor of Mobile	3,520 00	8,537 42	
	Deepening the channel, Pass au Heron	9,350 00	8,664 69

UNITED STATES MILITARY ACADEMY, *West Point, June*, 1829.

SIR: Having been invited by you to attend the examination of the cadets of this institution as a board of visitors for the present year, and having in that capacity completed our observations and inquiries, we beg leave to submit to your consideration the result of our labors.

The examination commenced with the mathematical department, and nothing could surpass the proficiency of the cadets in whatever was connected with the science of calculation. The most complicated diagrams and figures were drawn with the greatest neatness, dexterity, and precision, and all the required demonstrations, however elaborate or involved, were conducted with a promptitude and correctness which quite astonished some members of the board of visitors whose previous experience enabled them to judge of such exhibitions. Nor could there be a fallacy in this, or, indeed, in any other part of the examination, since, in addition to the questions proposed by the examining professor, many queries, and some of them of the most abstruse character, were propounded by the visitors themselves. All were answered with equal readiness, propriety, and exactness.

In engineering, military and civil, the attainments of the cadets were no less satisfactory. In reference to military operations, the mode was exhibited of constructing and arming fortifications, whether permanent or temporary, and whether such works were designed for attack or defence either in the field or on the sea-coast.

In the civil department was stated the manner of collecting and preparing the various materials used in masonry and carpentry; in architecture, ornamental and useful; in the structure of roads, bridges, and railroads; in remedying the obstructions in rivers; and in the formation of canals and artificial harbors.

While on the subject of engineering, however, the visitors are bound to remark that, at present, the civil branch of the science can be more thoroughly taught than the military; the models, &c., belonging to the former being more complete than those appertaining to the latter. But this school is, primarily and essentially, military. To secure, consequently, not only the equality, but the just superiority of military engineering, the visitors would recommend that the appropriation which has been for some years annual, be continued for the purchase of models and the employment of a modeller. If this be done for a short time, whatever may be requisite will be obtained, and then the expenditure may cease.

To the mathematical sciences, and their various and important applications, succeeded natural philosophy, embracing mechanics, optics, electricity, magnetism, and astronomy. On these several subjects the acquirements of the cadets were highly creditable; but two deficiencies were noticed: First, the entire omission of acoustics, they not being contained in the text-books which are used. Secondly, the course of instruction is not sufficiently practical. The laws regulating the propagation of sound are obviously connected with military manœuvres, and every cadet should be able to illustrate, by experiment, the truths which he has been taught in physical science. But this he cannot do with the apparatus at present possessed by the institution. To remedy this defect, an appropriation was made the last year, which, although judiciously disbursed, has been found inadequate, and will be in a great measure lost, unless it is further extended. The visitors, therefore, would recommend that a small sum be granted, and a very small one indeed is all that is required to complete, in this respect, the experimental department of the academy.

In ethics, natural and national law, &c., the cadets proved the excellence of the instruction which they had received, and the valuable use which they had made of that instruction. Under this head, consequently, the visitors have only to advise, first, a strict adherence to the directions of the law, as it at present stands, with regard to the subjects which the professor of this department is to teach; and secondly, that this professor have an additional assistant. This last recommendation involves an increase of expense, and would, if complied with, be every way advantageous.

In teaching French, the object is not that the cadets should speak the language with the strictest propriety of accent, but that they should be able to translate with correctness and despatch any work written in that tongue. This end the visitors think is attained.

In chemistry no regular professorship has been established by the government. Until lately an officer of the medical department of the army, specially detailed for that purpose, discharged the duties of this chair. Those duties, since the resignation of Dr. Torrey, have devolved upon Lieutenant Hopkins, and how well they have been performed the admirable preparation of his class fully evinced. For his year of toil and responsibility Mr. Hopkins receives, in addition to his ordinary pay as lieutenant, *the sum of eight and forty dollars.* Surely this statement of the fact will at once induce Congress to correct so manifest an impropriety, by erecting and endowing a professorship of chemistry, mineralogy, and geology. These sciences are exceeded by none in utility, and surpass all others in the rapidity and extent of their improvement.

While speaking of the emoluments of the professors, the visitors would remark that one of those gentlemen (the professor of natural and experimental philosophy) is much more highly paid than his

colleagues. This inadvertence, for such it is understood to be, should be rectified. All the professors should have assistants in proportion to their respective wants, and be placed upon perfect equality both as regards rank and remuneration.

In the examination hall, and daily in the field, the visitors had ample evidence of the skill and dexterity of the cadets in infantry tactics. Equal attainments were manifested in drawing. And in this department, which is fully provided with every requisite, it is worthy of observation that, on making the comparison, the class of each year surpasses that by which it was preceded.

If any one subject taught at this institution deserves superior attention, that pre-eminence, the visitors conceive, should be bestowed upon the department of artillery. The value of instruction in this department results not only from the intrinsic importance of this arm of the public defence, but from the peculiarity of the knowledge which it requires, a knowledge not to be elsewhere very readily attained. Under these impressions, the visitors are bound to state that this branch of instruction, though conducted with zeal and talent by Lieutenant Kinsley, labors under great disadvantages. In the first place, the appropriation for the erection of buildings, &c., although not exhausted, from the great economy observed in its expenditure, is nevertheless inadequate. Secondly, more time should be bestowed upon the management of great guns, the preparation of ammunition, and the study of pyrotechny generally. Lastly, merit in this department should be more highly estimated in determining the relative standing of the cadets, since those studies will always be the most eagerly pursued in which rank is conferred by proficiency.

Having thus, sir, disposed of the subjects which are taught in the academy, of the manner in which instruction on those subjects is imparted, and of the acquirements of the cadets, the visitors will next call your attention to the general concerns of the institution. And here the visitors with great pleasure remark, that the police and discipline which prevail in the establishment are admirable in themselves, and are faithfully and impartially administered. But the officers, to whom are confided such important trusts as police and discipline, labor under a difficulty which the visitors would earnestly represent cannot be too speedily and effectually removed. The evil alluded to arises in this manner: To enforce the regulations of the academy, to keep the cadet, in all things, and at all times, to his duty, is a task which admits of no relaxation, is never agreeable, and frequently becomes odious. It is not to be supposed, therefore, that officers will either seek such employment, or remain in it longer than they are obliged, unless there be something to compensate them for the irksomeness of their situation. So far is this from being the case, however, that an officer, whose days and nights are devoted to the unpleasant duties which have been mentioned, duties which, it is almost needless to say, affect not only the prosperity, but the very existence of the academy, is actually in a worse condition than if he were at his post, since his chance for promotion to staff appointments is less. And it must, too, be borne in mind that those officers who are selected for the duties of which we are speaking are precisely those whose merits would lead to the promotion mentioned. Compulsory service, consequently, on the one hand, and, what is worse, frequent changes, on the other, are unavoidable, and constitute the most serious evil to which the academy is at this time subjected. The mischief may be, in part, if not fully, remedied by a more liberal, and, it is believed, by a juster construction of the law granting officers of companies, whether captains or lieutenants, an extra pay for extra services. Than this nothing can be more proper; and, well aware of its weighty importance, the visitors cannot too strongly urge it upon your early and most favorable attention.

The management of the academy, as it regards the diet of the cadets, their supplies of clothing, necessaries, &c., has not escaped the attention of the visitors. All these subjects have been inquired into, and were found in every respect well regulated.

The last topic to which the visitors would call your attention is the wants of the institution. A large number might be easily enumerated, but the board, well knowing that a sound economy should ever characterize a wise administration, will mention but two—a house to preserve the health of the cadets, and a building for the worship of God.

With regard to the first, it is well known to all who have attended to such inquiries, that severe mental labor, without corresponding corporeal exercise, will undermine the strongest constitution. The cause of this need not be here investigated. The fact is notorious, and has been observed in this place, as well as elsewhere. True it is that many of the cadets do not die, the mortality being as low as one-sixth of one per cent. But it is believed that some, after leaving the school, have ultimately fallen victims to the sedentary habits which have unavoidably been acquired at this establishment. A calamity, moreover, of this kind, it must be remembered, is much more likely to befall those who are the most emulous of distinction. With regard to all the cadets, however, it may be averred that they are constantly tasked to the utmost in the way of mental exertion, while, from the nature of the climate, for very nearly an entire moiety of the year, they are, for all the purposes of recreation, debarred from the use of their limbs. A building sufficient for the purposes contemplated may, it is understood, be erected for some six or seven thousand dollars—a sum altogether insignificant in comparison with the magnitude and the importance of the object to be attained.

The apartment at present used for divine worship was originally designed to answer a different purpose, for which indeed it is much needed. If this were otherwise, however, more room and better accommodation are wanted for religious exercises; and a mere expression of the fact is all that the Christian rulers of a Christian people can require, where those rulers alone are competent to rectify the evil.

In conclusion, the present visitors concur with their predecessors in bearing cordial testimony to the zeal, ability, and devotedness of Colonel Thayer and the academic staff. From the colonel himself and the various gentlemen connected with him the visitors experienced individually every courtesy, civility, and attention. And the different members of the board will now return to their respective dwellings fully persuaded that this institution, even in peace, more than repays its cost to the nation. They are yet more thoroughly convinced, should the storms and perils of war assail us, that among the graduates of West

Point would still be found the appointed and efficient defenders of this our country, so favored and so beloved.

We have the honor to be, respectfully, sir, your obedient servants,

PIERRE VAN CORTLANDT, *President.*

ROBERT ARCHER, *Secretary to the Board.*

HON. SECRETARY OF WAR.

MILITARY ACADEMY, *West Point, November* 18, 1829.

SIR: I have the honor to submit, for the consideration of the department, "a bill making further provision for the Military Academy." The act placing the academy on its present footing was passed in April, 1812. It cannot, I think, be matter of surprise to any one that a plan for the organization of the academy drawn up so long ago as the commencement of the last war, and without the lights of experience, should be found at this time to be susceptible of great improvements. That the present organization is essentially defective in many of its parts is generally acknowledged. As to the nature of these defects, and the proper remedies, there is also a very general agreement of opinion among those who have enjoyed the advantage of witnessing the operation of the system and of making examinations on the spot. My own views on the subject are embraced in the bill now presented; other improvements, of minor importance, might be suggested, but in drawing up the bill it was my object to include in it only such provisions as were deemed indispensably necessary to the advancement of the institution. By reference to the reports of the various boards of visitors appointed to attend the annual examinations in the course of the last six years, it will be perceived that nearly every provision embraced in the bill has been discussed and recommended in some one or more of these reports. Although the provisions of the bill are many, they all, with a single exception, tend towards one object, which is, to prevent frequent changes in the corps of instructors, and thus to render it permanent and efficient. Some idea of the frequency of these changes may be inferred from the fact that of the twenty-eight instructors employed in the academy fourteen have filled their situations only one year, and not more than eight over three years. As a large body, therefore, they are measurably destitute of experience, and consequently of skill. This is the grand obstacle to the progress of the institution, although it may not be duly appreciated, except by those who are practically acquainted with the business of instruction. To remove it, I can suggest no other way than by a moderate increase of the pay of a certain portion of the instructors. The whole amount of the increase proposed is $1,807 36, which, together with the compensations of the professor of chemistry and teacher of French, as also proposed, would add to the present expenses of the academy the sum of $4,368 60, as is more particularly shown in the subjoined statement. Thus the effect of the bill would be to increase the present expenses of the academy about four per cent.; on the other hand, its effects on the condition of the institution would be more than proportionally great, or rather would be incalculable.

In the hope that the present may be deemed a favorable time for presenting the subject to the consideration of Congress, I remain, very respectfully, your obedient and humble servant,

S. THAYER, *Lieutenant Colonel, Sup. Military Academy.*

Brigadier General CHARLES GRATIOT, *Chief Engineer, Inspector of the Military Academy.*

A BILL making further provision for the Military Academy at West Point.

SECTION 1. *Be it enacted by the Senate and House of Representatives of the United States in Congress assembled,* That the President of the United States be, and he is hereby, authorized to appoint a professor of chemistry and mineralogy in the United States Military Academy.

SEC. 2. *And be it further enacted,* That the professors of the Military Academy, from and after the passing of this act, shall receive, each, the pay and emoluments allowed to the professor of natural and experimental philosophy.

SEC. 3. *And be it further enacted,* That the teacher of the French language and teacher of drawing shall each receive the pay and emoluments of a major of infantry.

SEC. 4. *And be it further enacted,* That the President of the United States be, and he is hereby, authorized to appoint two other teachers of the French language, who shall each receive the pay and emoluments of a captain of infantry.

SEC. 5. *And be it further enacted,* That the President of the United States be, and he is hereby, authorized to appoint an assistant professor of chemistry and mineralogy, who, together with the assistant professors already provided, shall, if an officer of the army, receive so much in addition to his pay and emoluments as shall equal those of a captain of infantry; and if not taken from the army, shall receive the pay and emoluments allowed to a captain of light dragoons by an act entitled "An act to raise, for

a limited time, an additional military force," passed the twelfth day of April, one thousand eight hundred and eight.

SEC. 6. *And be it further enacted*, That all lieutenants who shall, under the direction of the President, be detailed from the army to act as instructors, assistant professors, or assistant teachers in the Military Academy, shall, after the first year, while so employed, be allowed each ten dollars per month in addition to his pay in the line.

SEC. 7. *And be it further enacted*, That each officer of the army in the actual command of a company of cadets shall be entitled to receive the same additional compensation as is allowed to every officer in the actual command of a company in the army by the second section of an act entitled "An act giving further compensation to the captains and subalterns in the army of the United States in certain cases," passed the second day of March, one thousand eight hundred and twenty-seven.

SEC. 8. *And be it further enacted*, That so much of the act entitled "An act making further provision for the corps of engineers," passed the 29th day of April, one thousand eight hundred and twelve, as confines the selection of assistant professors to the corps of engineers and cadets, shall be, and is hereby, repealed.

SEC. 9. *And be it further enacted*, That the professors and officers attached to the Military Academy, who by law are entitled to forage, shall receive, in lieu thereof, an equivalent in money, at the rate allowed to officers of the army, (although they may not actually keep the horses for which they are allowed the forage.)

SEC. 10. *And be it further enacted*, That all officers, professors, teachers, and their assistants, and all other persons authorized to be employed for the service of the Military Academy, shall be subject to the Rules and Articles of War which are now, or which hereafter may be, established.

REMARKS ON THE FOREGOING BILL.

SECTION 1. The importance of a knowledge of chemistry, mineralogy, and geology to the military officer will not, it is believed, be disputed by any one. Those sciences form a part of the system of education in every military school of Europe, and have been taught (imperfectly, it must be confessed) at this institution for more than eight years, during which there have been four different persons acting as professor. Little or no improvement can be expected in this department of instruction till provision shall be made by law for a permanent professor, as recommended by various boards of visitors.

SEC. 2. The object of this section is to equalize the compensation of the professors. This may be done either by reducing the compensation of the professor of natural and experimental philosophy, or by allowing to each of the other professors one hundred and ninety-three dollars a year more than he now receives. The latter is recommended as both reasonable and expedient. The pay and emoluments of the professors, increased as proposed, would be considerably less than the salaries paid the professors at many of our colleges and universities, those, for instance, of Pennsylvania and Virginia, in which the professors receive from two to three thousand dollars a year.

SEC. 3. The considerations which I would mention in favor of this section of the bill are, the importance of French and drawing in a system of military education; the number of cadets attending to these branches, which varies in the French department from 160 to 180, and in drawing, from 120 to 140; the valuable services rendered by the able teachers who have presided over those departments, the one for fifteen and the other for eleven years; and finally, the prospect of promotion which it holds out to the under teachers, and which will, as I believe, be found necessary in order to procure competent under teachers for the moderate compensation proposed in the next section.

SEC. 4. The number of French teachers at the academy is three, (the same number that has been employed during the last twelve years,) each of whom has about 60 pupils under his charge. There is, however, no legal provision for more than one teacher.

The second teacher is employed by virtue of an order issued by the Secretary of War in February, 1818.

The third is an officer of the army detailed for that purpose. It is proper, however, to state that he performs the duty with reluctance, because he is sensible that it can be properly performed only by a native Frenchman.

SEC. 5. The object of the last clause of this section is to induce the principal assistant professor in each department to resign his army commission, that he may be connected with the institution by stronger and more durable ties than at present. As the law now stands, an assistant professor would be required to leave the academy on his promotion to a captaincy; even while a subaltern he is liable to be removed, either at the will of his superiors or at his own request. From one or the other causes such removals must frequently occur; moreover it cannot be expected that an assistant professor, who considers himself as only on temporary duty at the academy, and is looking elsewhere for promotion or a more durable situation, will pursue those peculiar studies which best fit him for the profession of a teacher, or that he will be as devoted as one whose entire views and prospects are confined to the institution.

SEC. 6 proposes to allow to lieutenants performing the duties of instructors the same extra compensation as is now allowed by the army regulations to cadets detailed to perform the same duties. Until two or three years ago these duties were almost exclusively performed by cadets, whose extra compensation amounted to twelve or fourteen hundred dollars a year; since that time the places of the cadet instructors have, agreeably to the recommendations of the boards of visitors, been gradually supplied by graduates, so that the number of the former now employed is only two, while that of the latter (in addition to the assistant professors provided for by law, and the assistant instructors of tactics) is twelve, which may be considered as the average number that will be required. Of these, *two* have been attached to the academy three years; *three* during two years; and the other *seven* since last September. According to the principle proposed in the bill, the first five only would be entitled to extra pay, although, should the bill pass, it may be calculated that, one year with another, *eight* would be entitled to the extra allowance, the total of which would be $960 a year. It must not, however, be supposed that this sum, small as it is, would be so much added to the expense of the academy, since it cannot be doubted that if the provision recommended be refused, resort must again be had to cadet instructors. The only question is, whether it shall be paid to lieutenants or to cadets—for good or for bad instruction.

SEC. 7. The provision embraced in this section having been discussed at length, and strongly recom-

mended in the report of the visitors who attended the examination in June last, any further remarks on the subject are deemed unnecessary.

SEC. 8. The provision proposed to be repealed would, in effect, become null and void by the passing of the 5th section of the bill. Indeed, that provision has never been complied with. The officers of engineers having been required elsewhere, and cadets not being qualified to discharge the duties of principal assistant professors, it became indispensably necessary to make the selection from other corps.

Statement showing the number of professors, teachers, assistant professors, and assistant teachers, at the United States Military Academy, and the amount of pay and emoluments of each.

ACCORDING TO THE PRESENT ORGANIZATION.

	Professor of natural and experimental philosophy, pay and emoluments of lieutenant colonel		$1,699 24
	Professor of mathematics, pay and emoluments of major		1,506 24
	Professor of engineering, pay and emoluments of major		1,506 24
(1)	Second lieutenant, acting professor of chemistry and mineralogy, $10 a month extra pay		180 00
	Chaplain and professor of geography, history, and ethics, pay and emoluments of major		1,506 24
(2)	Second lieutenant, assistant professor of natural and experimental philosophy, extra pay to equal pay and emoluments of captain		180 00
(2)	First lieutenant, assistant professor of mathematics, extra pay to equal pay and emoluments of captain		120 00
(2)	Second lieutenant, assistant professor of engineering, extra pay to equal pay and emoluments of captain		180 00
(3)	Two teachers of French, pay and emoluments of captains		1,724 24
	Teacher of drawing, pay and emoluments of captain		862 12
(4)	Twelve cadets, assistant professors, each $10 a month extra pay		1,440 00
	Pay and emoluments of the professor of chemistry, and of an additional teacher, as proposed in the bill	$2,561 24	
	Proposed increase of pay of the present professors, teachers, and assistants	1,807 36	
			4,368 60
			15,272 92

(1) The acting professor of chemistry and mineralogy, who is a lieutenant, is, by a regulation of the War Department, allowed ten dollars a month in addition to his pay proper.

(2) The principal assistant professor in each of the departments of mathematics, natural and experimental philosophy, and engineering, is, by law, entitled to so much in addition to his pay and emoluments (as a lieutenant) as shall equal those of a captain. This difference only is chargeable to the academy.

(3) One teacher of French only is provided for by law. The other is employed by virtue of an order issued by the Secretary of War in 1818.

(4) See remarks on the "bill" under 6th section.

ACCORDING TO THE PROPOSED ORGANIZATION.

	Professor of natural and experimental philosophy, pay and emoluments of lieutenant colonel	$1,699 24
	Professor of mathematics, pay and emoluments of lieutenant colonel	1,699 24
	Professor of engineering, pay and emoluments of lieutenant colonel	1,699 24
	Professor of chemistry and mineralogy, pay and emoluments of lieutenant colonel	1,699 24
	Chaplain and professor of geography, history, and ethics, pay and emoluments of lieutenant colonel	1,699 24
(1)	Second lieutenant, assistant professor of natural and experimental philosophy, so much extra pay as equal those of captain	180 00
(1)	First lieutenant, assistant professor of mathematics, so much extra pay as equal those of captain	120 00
(1)	Second lieutenant, assistant professor of engineering, so much extra pay as equal those of captain	180 00
(1)	First lieutenant, assistant professor of chemistry and mineralogy, so much extra pay as equal those of captain	120 00
	First teacher of French, pay and emoluments of major	1,506 24
	Second and third teachers of French, pay and emoluments of captains	1,724 24
	Teacher of drawing, pay and emoluments of major	1,506 24
	Eight lieutenants, acting assistant professors, ten dollars per month extra pay	960 00
	Four lieutenants commanding companies of cadets, ten dollars per month extra pay	480 00
		15,272 92

(1) These assistant professors are here supposed to be officers of the army as at present. Should any of them be appointed from citizens, the compensation to which each would then be entitled should be inserted in lieu of the extra compensation here charged —(See 5th section of the bill.)

ENGINEER DEPARTMENT, *Washington, November* 18, 1829.

SIR: Pursuant to the intention expressed in closing my annual report of the last year's operations, I have now the honor to submit for your consideration my reasons for recommending an increase of the corps of engineers.

The establishment of this corps dates from the year 1794, at which time it was, however, connected with the artillery, undert he denomination of the "corps of artillerists and engineers." On fixing the peace establishment in 1802 a separate corps, consisting of sixteen officers, was organized, which, having been found insufficient for the service, was increased in 1812 to include six additional officers, making a force of twenty-two, which has constituted the corps up to this time.

Whether this number is adequate to the present wants of the service will appear by a reference to the annual report, in which nearly all the operations enumerated under the heads of fortifications and civil constructions, as well as several of the surveys, are conducted by the officers of the corps of engineers; this will more clearly be seen by an inspection of the accompanying statement, exhibiting the duties in which they were engaged during the past year. This want of officers is not now felt for the first time, but has for several years past been the subject of communications to the Secretary of War and to the Military Committees of Congress, by both of whom the required increase has been several times recommended, though the subject has never yet been discussed in either branch of the national legislature.

A reference to the proceedings of Congress since the 1st session of the 19th Congress, and especially to the Secretary of War's letter to the Military Committee, of January 10, 1826, (Document No. 153 of the House of Representatives, 1st session 19th Congress,) will show the views which have been entertained on this subject by the War Department; and the progressive increase of duties gives additional force to the arguments then advanced in favor of the proposed measure. The advantage of having these duties performed by officers educated for and permanently attached to the corps of engineers, instead of by those temporarily detailed from other corps, or by persons not attached to the military service, engaged under the pressure of the moment, is too obvious to require further illustration.

The organization proposed is that recommended by the Military Committee of the Senate, in the bill reported by them last February, a copy of which accompanies this letter. The number of officers to be added is barely sufficient for the discharge of their duties. With regard to the increase of pay, which is also proposed in the bill referred to, the measure is founded on justice and the usage of all other services. The duties of engineers in all armies are considered of the highest order of military service, and as such they are specially recognized by our 63d article of war; but in our army alone, I believe, is this acknowledgment unattended with that demonstration of it which leads government to attach a higher emolument to a more elevated branch of service, not with a view of rendering by pecuniary considerations that station more desirable, which is by such acknowledgment rendered highly so, but with a view to maintain the character of its officers by enabling men of suitable talent and acquirements to continue in the service without disregarding what is due to themselves. That this remark is not without force is proved by the fact that within three years the corps has lost by resignation four young officers, discouraged by the small prospect of promotion, or by the reflection that years of experience and service would still find them with emoluments even much inferior to those of officers who had entered the army at the same time with them in other corps. These considerations are further strengthened by the circumstances of additional expenses to which they are often exposed from the nature of their duties, and of their exclusion from the emolument attending staff appointments, which are mentioned in the letter above referred to.

The delay and expense which sometimes occur in conducting the correspondence of this department, for want of the franking privilege being extended to its chief, have caused the insertion of the last clause of the bill, which proposes such an extension.

In conclusion, I beg leave to call your attention to those parts of the letter of January 10, 1826, which relate to the organization of a topographical corps, for the reasons therein stated.

I have the honor to be, very respectfully, sir, your most obedient servant,

C. GRATIOT, *Brig. General and Chief Engineer.*

S. 78.—In Senate of the United States, *February* 4, 1829, introduced on leave by Mr. Benton, and read.—*February* 5, 1829, read second time and referred to the Committee on Military Affairs.—*February* 12, 1829, amendment reported.

A BILL providing for the gradual increase of the corps of engineers, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States be, and he is hereby, authorized to add to the corps of engineers, whenever he may deem it expedient to increase the same, one lieutenant colonel, two majors, six captains, six first and six second lieutenants: *Provided,* That not more than three lieutenants shall be added annually, over and above the number necessary to fill vacancies which may occur in said corps, until the whole corps shall take the form and organization above prescribed.

Sec. 2. *And be it further enacted,* That the pay and emoluments of the officers of the said corps shall be equal to those allowed to the officers of light dragoons under the act of April 12, 1808, except so far as relates to the rations allowed to the captains and subalterns by said act, in lieu of which the captains and lieutenants of said corps shall be entitled to receive the same subsistence as is now allowed to the other corps of the army; and that, in cases in which forage is not drawn in kind, the officers of the said corps shall be entitled to receive, in lieu thereof, eight dollars per month for each horse which said officers may, by their rank, be entitled to keep.

Sec. 3. *And be it further enacted,* That so much of the act passed the 29th day of April, 1812, entitled "An act making further provision for the corps of engineers," as provides that one paymaster shall be taken from the subalterns of the corps of engineers, be, and the same is hereby repealed; and that the paymaster, so authorized and provided, be attached to the Pay department, and be in every respect placed on the footing of other paymasters of the army.

Sec. 4. *And be it further enacted,* That the officers authorized to be appointed by this act be subjec to the rules and articles of war, as they are now or may be hereafter established.

Sec. 5. *And be it further enacted,* That all letters and packets to and from the Chief Engineer, which may relate to his official duties, shall be free from postage.

Statement exhibiting a view of the stations and duties of the officers of the corps of engineers from October 1, 1828, to September 30, 1829.

Names.	Stations and duties.	Assistants.
Brig. Gen. C. Gratiot....	*Washington, D. C.*—Chief of the Engineer department, inspector of the Military Academy, and superintending the construction of fortifications in Hampton Roads.	Lt. A. Mordecai, Engineer department; Lieut. A. Talcott, principal assistant; Lt. Geo. Dutton and Lt. I. Mansfield, assistants at fortifications in Hampton Roads.
Col. Jos G. Totten.....	*Newport, Rhode Island.*—Member of the board of engineers, and charged with the construction of the fortifications in Newport harbor, and with the general superintendence of the following civil constructions, viz: Repairs of Plymouth beach, Massachusetts; preservation of George's island, and Deer island, in Boston harbor, Mass.; improvement of the harbors of Saco, Me.; Hyannis, Mass.; Stonington, Conn.; improvement of the navigation of Kennebec river, and of the Piscataqua river, Me.; improvement of the mouth of Merrimac river, Mass.; erection of a pier and beacon on Allen's rocks, in Warren river, R. I.; repairing pier in Kennebunk river, Me.; improving the harbors of Nantucket and Edgartown, Mass.; and Mill river, Conn.	Lieut. T. S. Brown and Lt. W. H. C. Bartlett.
Maj. S. Babcock.....	*Savannah, Georgia.*—Superintending the construction of fortifications for the defence of Savannah river.	Bvt. 2d Lieut. R. E. Lee.
Lieut. Col. S. Thayer...	*West Point, New York.*—Superintendent of the United States Military Academy.	
Maj. R. E. De Russy....	*New York.*—Superintending the construction of Fort Hamilton, and repairs at Fort Lafayette.	
Maj. T. W. Maurice....	*Erie, Pennsylvania.*—Superintending the works for deepening the channel leading into Presque Isle harbor, in Pennsylvania, and the general superintendence and direction of the following works, viz: Improvement of the harbors of Buffalo, Dunkirk, and Black Rock, in New York; Cleveland harbor, Ashtabula, Conneaut, and Cunningham creeks, Huron, Grand, and Black rivers, Ohio; and La Plaisance bay, Michigan.	
Capt. I. L. Smith	Examination of sites for bridges over the Ohio; survey of the Wabash river, from Eel river to its mouth; inspecting the Cumberland road from Canton to Zanesville; inspecting the Louisville and Portland canal, and duties relating to the examination of sites for a national armory.	
Capt. Geo. Blaney	*Smithville, North Carolina.*—Charged with the construction of fortifications for the defence of Cape Fear river, and with the improvement of the navigation of the Cape Fear river, North Carolina.	
Capt. W. H. Chase.....	*Pensacola, Florida.*—Commanding engineer on the Gulf of Mexico; charged with the construction of fortifications for the defence of Pensacola, and with the direction of the improvement of Pascagoula river, until the 8th of May; the improvement of the navigation of the Red river at the raft; survey of the entrance of the river Teche, Louisiana; survey of the waters tract, between Lakes Pontchartrain and Mobile bay.	Lieut. A. H. Bowman.
Capt. R. Delafield.....	*Fort Jackson, Louisiana.*—Superintending the construction of Fort Jackson; making a survey of the passes at the mouth of the Mississippi river, and inspecting the Cumberland road from Cumberland to Wheeling.	
Lieut. T. I. Leslie... ..	*West Point, New York.*—Paymaster and treasurer of the Military Academy.....	
Lieut. Andrew Talcott..	*Old Point Comfort, Virginia.*—Chief assistant engineer at Fort Monroe and Fort Calhoun, and in making the survey of Deep creek, in Virginia, and Pasquotank river, in N. Carolina.	
Lieut. W. A. Eliason ...	*Beaufort, North Carolina.*—Superintending the construction of Fort Macon, and the improvement of the navigation near Ocracoke inlet, North Carolina, until August 1.	
Lieut. C. A. Ogden.....	*Mobile, Alabama.*—Superintending the construction of fortifications at Mobile Point; improving the harbor of Mobile; deepening the channel through the Pass au Heron, near the bay of Mobile; and deepening the bar at the mouth of Pascagoula river, from the 8th of May.	Lieut. S. Tuttle, assistant engineer until March 30.
Lieut. H. Brewerton....	*Charleston, South Carolina.*—Charged with the construction of fortifications at Charleston....	
Lieut. S. Tuttle.....	*Mobile Point, Alabama.*—Assistant engineer on fortifications at that place until 30th of March, since which time he has superintended the repairs at Fort Delaware; building and repairing piers at Newcastle, and repairing piers at Marcus Hook.	
Lieut. George Dutton ...	*Old Point Comfort.*—Assistant engineer until the 1st of August, from which time superintending the improvement of the navigation near Ocracoke inlet, North Carolina.	
Lieut. I. Mansfield.....	*Old Point Comfort.*—Assistant engineer at Forts Monroe and Calhoun.....	
Lieut. A. Mordecai.....	*Washington, D. C.*—Assistant to the chief engineer.....	
Lieut. D. H. Mahan.....	In Europe, on furlough, for the benefit of his health.....	
Lieut. A. D. Bache.....	Resigned June 1, 1829.....	
Lieut. A. H. Bowman...	*Pensacola, Florida.*—Assistant engineer; and from 1st September at Bayou Dupré, Louisiana; superintending the construction of a tower at the Bayou Dupré, Louisiana.	
Lieut. T. S. Brown	*Newport, Rhode Island.*—Assistant engineer at Fort Adams.	
Lieut. W. H. C. Bartlett.	*West Point, New York.*—Assistant professor of engineering at the Military Academy until September 1, from which time assistant engineer at Fort Adams.	
Lieut. T. S. Twiss.....	*Fort Jackson, Louisiana.*—Assistant engineer; resigned July 1, 1829.....	
Bvt. 2d Lieut. C. Mason.	*West Point, New York.*—Assistant professor in the Military Academy.....	
Bvt. 2d Lieut. R. E. Lee.	*Savannah, Georgia.*—Assistant engineer on fortifications for the defence of Savannah river....	

REPORT FROM THE ORDNANCE DEPARTMENT.

ORDNANCE DEPARTMENT, *Washington, November 30, 1829.*

SIR: I have the honor to submit herewith a general report of the operations of this department during the past year:

Statement marked A exhibits an account of the moneys drawn from the treasury and remitted through this department during the year 1828 to disbursing officers and contractors, and also the amount of the accounts rendered and the balance remaining in the hands of each at the close of the year. By this statement it appears that the remittances during the year 1828 amounted to $990,520 27

That the accounts rendered and settled during the same period amounted to..... 977,819 24

And that the unexpended balances remaining in the hands of the several disbursing officers at the close of the year amounted to 12,701 03

The whole of which was accounted for in the first quarter of the present year.

Statement B shows the amount of funds transmitted to the several disbursing officers of this department and to contractors during the first three quarters of the present year, by which it will be seen that the total amount transmitted was	$737,569 56
And that the accounts rendered amounted to	701,151 51
Leaving an unexpended balance in the hands of disbursing officers, on the 30th September, of	36,418 05

All the accounts due up to the 30th of September last have been received from all the armories and arsenals.

Statement C exhibits an account of some of the principal articles made at the several armories and arsenals during the year ending 30th September, 1829, by which it will appear that 25,970 new muskets, with their various appendages, have been made at the armories; and that 5,875 small arms have been cleaned and repaired, and about 12,000 sets of accoutrements for small arms and 92 new gun-carriages have been made at the arsenals.

Statement D exhibits the number and description of arms, artillery, and other ordnance supplies issued by this department to the army and to the marine corps during the year ending 30th September, 1829, by which it will be seen that 3,109 small arms, (of which 1,500 new muskets and 321 Hall's rifles were furnished to the marine corps,) 36 gun-carriages, and about 1,500 sets of accoutrements for small arms, are among the principal articles issued.

Statement E exhibits an account of the expenditures made, and of the arms and artillery carriages and equipments procured under the act of 1808 for arming and equipping the militia during the year ending the 30th September, 1829. The arms procured are, 11,100 muskets; 1,960 rifles; about 6,900 sets of accoutrements for small arms, and 71 field artillery carriages, with their various equipments. The amount expended on this account was $219,074 57.

Statement F exhibits an account of the arms apportioned to each of the several States and Territories for the year 1828, and of the artillery, arms, and other military equipments distributed to the militia during the year ending September 30, 1829.

Statement G exhibits the general results of the operations of the public lead mines during the year ending 30th September, 1829, to which is appended a brief statement showing the quantity of lead made at these mines in each year from 1821 to the present time. By these statements it will be seen that the rents during the year past amounted to 1,454,131 pounds, exceeding those of the previous year upwards of 220,000 pounds.

I beg leave on this occasion to renew a proposition for the re-establishment of this department as a separate branch of the public service. This subject has been heretofore submitted to Congress, and has received the favorable consideration and support of the committees to which it has been referred. Bills for effecting the object have been proposed, and one of them was passed by the House of Representatives, but for want of time was laid over unacted upon in the Senate.

Believing it to be very important to the interests of the public service that a measure of the kind proposed should be adopted, I respectfully submit the subject again, and have to solicit for it such consideration and support as it may appear to merit.

The current service of this department involves an expenditure of nearly one million of dollars per annum, and the preservation of arms, artillery, ammunition, and other military stores to an amount of about twelve millions of dollars, together with the arming and equipping of the whole body of the militia of the United States. Under the present law these important duties are performed by persons who are only temporarily assigned to them; and since the passage of the law in 1821 one hundred and forty different officers have been assigned to their performance. That duties of this description could be more advantageously performed by persons in the constant practice of them appears too obvious to require extended remarks.

For a more detailed exposition of the views which are entertained upon this subject, I beg leave to refer to a printed report contained in the first volume of State Papers, 1st session, 20th Congress, document 1, page 94.

I have the honor to be, sir, your most obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance Service.*

Hon. JOHN H. EATON, *Secretary of War.*

A.

Statement of the money expended through the Ordnance department in the year 1828.

ORDNANCE DEPARTMENT, *November* 30, 1829.

C.

Statement of work done and articles procured at the armories and arsenals of the United States from October 1, 1828, *to September* 30, 1829.

MADE AND PROCURED.

25,970 muskets, complete.
32,864 screw-drivers.
70,792 flint caps.
31,500 wipers.
1,650 ball screws.
4,792 spring vices.
1,751 arm chests.
10,714 cartridge-boxes.
10,654 cartridge-box belts.
10,905 bayonet scabbards.
10,322 bayonet belts.
1,284 sword belts.
880 sabre belts.
131 cavalry cartridge-boxes.
796 holsters, pairs.
14 rifle pouches and belts.
7,928 belt plates.
2,006 rifle flasks.
1 4-pounder field artillery carriage, with equipments complete.
79 6-pounder field artillery carriages.
2 12-pounder field artillery carriages.
8 24-pounder howitzer carriages.
1 24-pounder casemate carriage.
1 mortar carriage.
3 shot, truck, and sling carts.
386 brass nave boxes.
4 sets shot gauges.
19 sets verifying instruments for cannon.
4 artillery percussion locks.
4,596 percussion primers.
815 cannon wads.
84,570 musket cartridges
100 lacquer for cannon, gallons.
149 sponges.
355 port fires.
2 press screws.
4,399 priming tubes, filled.
10,099 cartridge bags, flannel.
2,516 gun slings.
7,958 brushes and picks.

REPAIRED.

5,716 muskets.
124 rifles.
30 pistols.
5 blunderbusses.
35 gun slings.
12 field artillery carriages.
26 garrison carriages.
49 rammers and sponges.
88 ladles and worms.

GEORGE BOMFORD, *Brevet Colonel, on Ordnance Service.*

ORDNANCE DEPARTMENT, *November* 30, 1829.

D.

Statement of artillery, small arms, accoutrements, and other ordnance stores, issued to the troops and the marine corps of the United States, from October 1, 1828, *to September* 30, 1829.

1 6-pounder brass cannon.
10 6-pounder iron cannon.
23 6-pounder field carriages, with equipments complete.
4 12-pounder field carriages, with equipments complete.
7 18-pounder siege carriages, with equipments complete.
1 24-pounder siege carriage, with equipments complete.
1 8-inch howitzer carriage, with equipments complete.
3 caissons.
2 mortar beds.
51 sponges.
1 powder measures (sets.)
1 powder funnels (sets.)
1,120 port fires.
66 bricoles.
12 prolongs.
1,562 wads.
14 gunners' haversacks.
1 gin and fall.
2 gin blocks.
2 sets rocket moulds, with drifts complete.
54 pounds slow matches.
8 pounds twine.
1,082 6-pounder cannon balls.
150 12-pounder cannon balls.
556 24-pounder cannon balls.
150 spherical case-shot.
985 cannister shot, fixed.
715 6-pounder strapped shot, fixed.
1,178 24-pounder shells.
142 8-inch shells.
100 6-pounder cannisters.
100 6-pounder cannister blocks.
100 6-pounder cannister bottoms.
1,934 pounds musket bullets.
952 pounds cartridge paper.
2,785 muskets, complete.
322 Hall's rifles, complete.
2 pistols, complete.
27 sergeants' and musicians' swords.
1,200 cartridge-boxes.
931 cartridge-box belts.
1,668 bayonet scabbards.
757 bayonet belts.
692 gun slings.
1,838 brushes and picks.
1,222 belt plates.
62 screw-drivers.
89 wipers.
30 ball screws.
21 spring vices.
17 sword belts.
321 sets rifle accoutrements, (Hall's.)
28,300 flints.
28,595 pounds powder.
234,460 musket cartridges.
14,154 priming tubes.
11,945 cartridge bags, flannel.
100 pounds sulphur.
30 pounds antimony.
184 pounds charcoal.
280 pounds pul. nitre.

6 pounds tow.	95 pounds white lead.
30 pounds thread.	6 pounds lampblack.
347 yards flannel.	5 gallons spirits turpentine.
30 gallons pitch.	6 paint brushes.
60 gallons lacquer, for cannon	1 chest carpenter's tools, complete.
63 gallons linseed oil.	5 drums.
3 gallons sperm oil.	4 fifes.

Note.—Of the above articles 1,500 muskets, 321 Hall's rifles, 321 sets of rifle accoutrements, 100 cartridge-boxes, and 100 cartridge-box belts, have been issued to the marine corps.

GEORGE BOMFORD, *Brevet Colonel, on Ordnance Service.*

ORDNANCE DEPARTMENT, *November* 30, 1829.

E.

Statement of the arms, accoutrements, &c., procured, and of the expenditures made under the act for arming and equipping the militia from October 1, 1828, *to September* 30, 1829.

11,100 muskets.
1,600 rifles.
360 rifles, repeating.
3,006 rifle-flasks.
3,900 sets of infantry accoutrements.
910 sabre belts.
105 pairs of holsters.
71 6-pounder field artillery carriages, with equipments complete.

Expenditures, viz:

Amount paid for arms, &c	$211,449 18
Amount paid for inspection, packing boxes, storage, and distribution to the States and Territories	7,625 39
	219,074 57

ORDNANCE DEPARTMENT, *November* 30, 1829.

ORDNANCE DEPARTMENT, *Washington, November* 30, 1829.

SIR: I beg leave to submit herewith an estimate for additional appropriations for the service of the year 1830, marked H. Most of these items have been heretofore submitted in the annual estimates. But that form of submitting them being considered irregular by the Committee of Ways and Means, they were struck out of the appropriation bills and referred to another committee. By the delay thus occasioned, the matters submitted have remained unacted on. They are now therefore submitted separately from the annual estimates.

In explanation of the several items submitted, the following remarks are offered.

National armories.—Under this head the usual sum of $360,000 is inserted in the general estimate, and is necessary to continue the fabrication of arms upon the same scale as has been usual for many years past.

The additional sums required in this estimate are for additions and improvements of a permanent

character. It has been customary, heretofore, to make improvements of this kind to a limited extent from time to time, as the necessities of the armories required, from the annual appropriations. But as those now required are extensive, they cannot be made from the ordinary appropriation without materially diminishing the ordinary product of arms. As it is considered proper to continue the usual operations of the armories, and, at the same time, to make the improvements suggested, which are very necessary to the advantageous operation of the works, additional appropriations are necessary.

The five and a half acres of land proposed to be purchased at Springfield armory adjoins the land heretofore purchased. The original purchase was restricted to a very narrow slip on the margin of the stream where the water-works are placed. Much inconvenience is occasioned by this limited space, and the superintendent of the armory has sometimes been obliged to rent a part of the land. The owner of this land has hitherto been unwilling to dispose of it, except at an extravagant price. But circumstances have recently placed it in a position to be obtained at a reasonable rate; and the superintendent has secured it by a provisional agreement, which expires at the end of the next session of Congress.

The additional ground proposed to be purchased at Harper's Ferry armory is similarly situated in many respects. A plat of it is annexed, an inspection of which will show its connexion with the works there, and the importance of its being possessed by the United States. The price asked for this small tract is very high. But as the possession of it is of much importance to the public works, and as it has been ascertained that it cannot be obtained for a less sum, the item is respectfully submitted.

The erection of a new fire-proof arsenal at Springfield armory is necessary, because the storeroom is now so limited as to oblige the storage of arms in frame buildings, where property of great value is necessarily exposed to the dangers of fire.

With respect to the purchase of additional land at the Watertown arsenal I have to state that when that site was purchased its northern boundary was limited by a public road, which has since grown into disuse by the making of another road near it. The accompanying sketch exhibits the position of the tract proposed to be purchased; and it will be seen that the public buildings are situated near to one of the boundaries of the public ground. By extending the public land on that side it will secure the public buildings from the danger to be apprehended from the erection of private edifices in their immediate vicinity. It is for this purpose, and for giving a more convenient access to the public highway, that the purchase is necessary. If it be made, the old road will be included in it, as it is kept open now merely to afford a passage from the arsenal to the public highway.

Armament of new fortifications.—The amount annually appropriated for this object, for a few years past, has been $100,000. The additional sum now submitted is $150,000, making a total, if granted, of $250,000 per annum.

The amount hitherto appropriated appears to have been predicated on an estimate prepared in pursuance of a resolution of the House of Representatives, passed in December, 1821. That resolution required an estimate, to be limited to the new fortifications *then* completed or in progress. The estimate thus limited amounted to nearly one million of dollars; and it was proposed to provide that amount by an annual appropriation of $100,000 for ten years. This basis was subsequently adopted, and four appropriations, of $100,000 each, have been made.

But since that estimate was prepared a number of new fortifications have been commenced, and several of those formerly commenced have been completed. A statement of all the new fortifications, including those completed and those in progress, is submitted herewith, marked I. This statement exhibits in detail the number of pieces of ordnance, their calibre and description, which are required at each fortification, and the probable time when each will be completed. And it will be seen that all the works now commenced, it is expected, will be completed in 1832, and that they will require a total of 2,587 pieces of ordnance.

I submit also an estimate of the cost of the ordnance mentioned, together with the gun-carriages and equipments necessary for them; and also a supply of cannon balls and shells, marked K. The number of balls and shells stated in the estimate allows to each cannon one hundred of the former, and to each mortar fifty of the latter. This is a moderate allowance, and would not be considered sufficient for a time of war.

By this estimate it will be seen that, in addition to former appropriations, the amount yet necessary to provide a suitable armament for the fortifications mentioned is about two millions of dollars. And it is supposed that they will be completed and ready for the reception of their guns in the year 1832. To provide the requisite armament, with an annual appropriation no larger than that heretofore made, will require a period of twenty years, or until the year 1850. This would leave a portion of these fortifications unarmed, and consequently defenceless, for a period of eighteen years. With an annual appropriation of the amount now proposed, viz: $250,000, all the fortifications now completed or commenced may be fully equipped in eight years. This would extend the completion of the armaments five years beyond the time of completing the fortifications.

It should be observed that the fortifications referred to in these remarks are those only which are now erecting or have been recently finished, and have no reference to any of the projected works which have not yet been commenced. It will be seen, by reference to the statement before mentioned, that this class of works, if constructed according to the plans of the board of engineers, will require about four thousand pieces of ordnance. These are not included in the estimate or calculations now submitted.

It is presumed that a portion of these works will be commenced when those now in progress shall have been completed; as many of them are enumerated in what the board of engineers denominate the *first class*, or those most necessary to be *first constructed*, and are designed for the protection of Boston, Baltimore, and other important positions, for which no new defences have yet been provided.

It is, therefore, probable that new fortifications, which are not included in the present estimate, will be completed and in a condition to require their armaments before those which are now in progress shall be fully supplied. But whether any new works be commenced or not, the amount of the estimate now submitted will be necessary for several years. And even with that amount the supplies of ordnance will not keep pace with the finishing of new fortifications.

Saltpetre and brimstone.—No purchase of these articles has been made since 1816, nor is any now required for immediate use. The amount inserted in the estimate for this object is submitted under a conviction that it is of great importance to the public interest that provision should be made for securing an ample supply of these articles at the present time. Saltpetre and brimstone are both obtained from foreign countries. The quantity required to meet the current demands for domestic consumption in the United States is supplied entirely by importations from abroad.

The price of crude saltpetre, in the seaports of the United States, for eight or ten years past has varied from five to eight cents per pound. The fair average price may be stated at six and a half or seven cents. The price of brimstone, during the same period, may be stated at two and a half cents per pound.

The prices paid for crude saltpetre during the late war, in 1812, 1813, and 1814, averaged about thirty-nine cents per pound, being six times greater than the average of the last ten years. The price of brimstone, during the same period of war, was nine or ten cents per pound, being about quadruple the present price. These prices are ascertained by reference to government contracts and purchases during the war, and by transcripts from the books of extensive manufacturers, embracing a period of twenty-five years.

At the commencement of the war, in 1812, there was on hand in the government stores about one and a half million pounds of crude saltpetre. The quantity purchased for the public service during the war amounted to about the same number of pounds; and this cost about thirty-nine cents per pound. Thus it appears that the stock of crude saltpetre provided by the government, previous to and during the war, amounted to about three millions of pounds, and, at the prices then paid for it, cost about one million dollars more than the same quantity would now cost.

The quantity of brimstone necessary to be used in working into gunpowder 3,000,000 pounds of saltpetre is about half a million pounds. The cost of this, at the prices paid during the war, would be about $35,000 more than the cost at present prices. But, great as the difference appears between the prices of war and of peace, it is not as a measure of economy alone that the expediency of making the provision suggested is recommended. The more important consideration of national security is materially concerned in it. Saltpetre is an article of the most imperious necessity in war. And the experience of the last proves that it is not to be obtained in sufficient quantities from domestic sources. The principal dependence must be on foreign supplies. The hazard of depending on these in time of war, when the commerce of the country may be interrupted or cut off, must be obvious.

In order to exhibit the views of those best acquainted with this subject, I beg leave to submit an extract from a communication recently received from Callender Irvine, Commissary General of Purchases, the officer who procured all the saltpetre and gunpowder provided during the late war.

The Commissary General says: "Of the importance to the nation of laying up an abundant supply of nitre in time of peace, and of the great economy of doing so, no man can be more sensible than I am—the results of my experience, and recollection of the difficulty of procuring that article during the late war at the prices paid for it.

"At the commencement of the late war there was little nitre, of foreign produce, in our country, and it became necessary to draw upon our own resources, and to husband the stock that had been previously provided by the government, *as a reserve*, as much as possible. But for the knowledge of the fact that government had in depot a considerable quantity of nitre, the holders of that article would have advanced the price of it much beyond that which was paid; and it is obvious that, under other circumstances, they would have coerced the government into their own terms."

I beg leave to add, also, extracts from a communication of Messrs. E. J. Dupont & Co., who have been very extensive purchasers of saltpetre and manufacturers of gunpowder for twenty-five years past. They remark that: "The caves of Kentucky, which had furnished the principal supply until 1814, were then generally exhausted; the richest had been worked and could produce no more. The saltpetre manufacturers had to work caves of an inferior quality, and at a greater expense; the supply from Kentucky was rapidly decreasing, and the works for extracting saltpetre were then extended to the caves of Tennessee and Missouri, which would soon also have been exhausted forever, as the saltpetre manufacturers of the west would never have taken the trouble to replace the lixiviated earth in the caves, to become there again, in course of time, impregnated with saltpetre, as it is practiced in the *nitrieres artificielles* of France and Switzerland.

"In relation to the price of saltpetre in 1812, 1813, and 1814, it is also to be observed that, at the time war was declared, the government had in store a large quantity of saltpetre and brimstone, say about a million and a half of pounds of saltpetre, which had been secured under the provident administration of Mr. Jefferson; had it not been for this supply, and had the government been under the necessity of hurrying its purchases at the beginning of the war, the competition between the agents of the government and the manufacturers would inevitably have caused a considerable difference in the market price."

From the foregoing observations it will be seen that the supply of saltpetre, which had been procured by the government previous to the war, had a material influence in preventing the still higher advance in the price of the article, and in enabling the government to keep up the necessary supplies of gunpowder. Without this provident supply, and even with this aid, had the war continued another year, serious embarrassments must have been felt in obtaining an adequate supply on any terms.

The quantity of saltpetre and of brimstone which it would be proper to provide and lay up in depot for future emergencies cannot be very precisely stated. The stock ascertained to have been provided for the last war may, however, be assumed as not too great. Taking this as a basis, we have for saltpetre 3,000,000 lbs. and for brimstone 500,000 lbs. as the quantity for which provision should be made.

Nitre in its crude state, especially if stored in damp situations, is subject to deliquescence and to a diminution of quantity from this cause; but if refined and placed in dry storerooms it is liable to no injury of this kind, and may be safely preserved free from any risk of loss or damage; and in this condition it is in readiness to be converted into gunpowder at very short notice whenever required. Upon these considerations it is proper that saltpetre should be preserved in a refined state. The process of refining, by freeing the crude article from impurities, lessens its weight from ten to fifteen per cent. This diminution of weight, together with the expense of refining, will make the cost of refined saltpetre about ten cents per pound.

The quantity of saltpetre necessary to be provided has been stated to be three million pounds. There is now on hand about half a million pounds, leaving yet to be provided 2,500,000 pounds. The cost of this, at ten cents per pound, will be $250,000. The quantity of brimstone to be in due proportion to the nitre is 500,000 pounds, which, at two and a half cents per pound, will cost $12,500—making in all the sum of $262,500 as the amount required to procure the proposed supply of nitre and brimstone.

An annual appropriation of the amount now submitted, viz: $40,000, will enable the government to procure the required supply in seven or eight years.

It may be proper to add, in conclusion, that the foregoing remarks are limited to the military service alone, and do not include any allowance for the gunpowder which may be required for the navy.

I have the honor to be, sir, your most obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance Service.*

Hon. J H. EATON, *Secretary of War.*

[Here followed the *plat* and *sketch* referred to in the foregoing letter.]

H.

Estimate for additional appropriations for the service of the Ordnance department for the year 1830.

For the national armory at Springfield, viz:		
For the purchase of 5½ acres of land	$2, 200	
For the erection of a new fire-proof arsenal	16, 000	
		$18, 200
For the national armory at Harper's Ferry, viz:		
For extending the walls and embankments which convey the water from the Potomac river to the works	$9, 300	
For erecting a forging shop and tilt-hammer	4, 000	
For erecting a new workshop	2, 500	
For erecting ten dwelling-houses for workmen	10, 000	
For slating roofs of present workshops	3, 200	
For the purchase of one acre of ground adjoining the workshop and canal	5, 000	
		34, 000
Total for national armories		52, 200
For arsenal, viz:		
For the purchase of five acres of land adjoining the arsenal at Watertown, Massachusetts		500
For the armament of new fortifications, viz:		
For an addition to the amount usually appropriated for this object		150, 000
For the purchase of saltpetre and brimstone, viz:		
For procuring gradually a supply of saltpetre and brimstone, to be laid up in store for future use		40, 000
Total amount submitted		242, 700

G. BOMFORD, *Brevet Colonel, on Ordnance Service.*

	From which deduct the amount appropriated in the years 1825, 1826, 1828, and 1829		400,000 00
	Amount yet necessary to fully equip the fortifications mentioned		1,901,655 67

G. BOMFORD, *Brevet Colonel, on Ordnance Service.*

ORDNANCE DEPARTMENT, *November* 30, 1829.

QUARTERMASTER GENERAL'S REPORT.

QUARTERMASTER GENERAL'S OFFICE, *Washington City, November* 23, 1829.

SIR: In obedience to your order, dated the 12th of September, I have the honor to report the operations of this department during the first, second, and third quarters of the present year; to which I have taken the liberty of adding the fourth quarter of last year, thus presenting the operations of an entire fiscal year.

The balance in the hands of the several officers of the department at the date of the last report amounted to			$4,6499 87
To which is added—			
1st. Amount remitted in the 4th quarter of 1828	$87,599 71		
1st quarter of 1829	148,985 00		
2d quarter of 1829	141,385 71		
3d quarter of 1829	171,308 81		
		549,279 23	
2d. Proceeds of sales of damaged public property and rents of lands and buildings not required for military purposes during the above periods			8,987 94
Total to be accounted for			604,767 04

Brought forward		$604,767 04
Of which there was accounted for—		
In the 4th quarter of 1828	$136,434 43	
1st quarter of 1829	130,201 15	
2d quarter of 1829	136,262 89	
3d quarter of 1829	155,500 89	
		558,399 36
Leaving to be accounted for		46,367 68

The accounts of nine officers are yet to be received, which will probably diminish the balance about seven thousand five hundred dollars. The remainder will be applicable to the service of the present quarter, and, it is believed, will all be accounted for at the end of the year.

By comparing the sums for which the department was accountable with the amount accounted for, in the several quarters, it will be seen that the accountability for money is almost perfect. The accountability for property of the quartermaster's department is not less so; and it affords me great pleasure to add that the clothing, camp equipage, and other property of the purchasing department, placed in the hands of commanding officers of companies, ordnance depots, and recruiting stations, is accounted for by them with promptitude and accuracy. In no other branch of the public service is the accountability better.

The operations late last fall for the protection of the frontiers and the security of the revenue, together with the increased expense of transporting provisions, occasioned by the failure of several subsistence contractors, produced a heavy arrearage, which was not ascertained in time to be submitted to Congress. According to the practice of the government, that arrearage became a charge upon, and was reimbursed from, the appropriation for the present year. The consequence was, that nearly the whole appropriation had been expended by the first day of the present month; and to enable me to provide for the wants of the service for the remainder of the year, it became necessary to ask for a transfer from the subsistence department, under the authority vested in the President by the 5th section of an act of Congress approved the 1st May, 1820.

It has been found necessary to increase the estimates of the department for the ensuing year under several of the heads of expenditure. The necessity for this increase results from the extended operations and increased activity of our little army, occasioned by the extension of our frontiers and the great increase of Indian force west of the Mississippi. The army being too small to occupy all the points that require protection, the government is compelled to supply the want of numbers by frequent movements. It is believed that the necessity for such movements will remain so long as our citizens continue to extend their settlements westward and carry on a trade with the Indians and the Mexican States. If the policy of the government and the circumstances of the country remain unchanged, every cent will be required.

Of the works under the direction of the department, the road from Pensacola, in Florida, to Blakely, in Alabama, authorized by an act of the last session of Congress, has been completed; but the appropriation was not sufficient to continue it to Mobile Point.

The quartermaster at Pensacola was, at the date of the last report, actively engaged in repairing the road from that place to Tallahassee; and the quartermaster at St Augustine had examined the road from Tallahassee to St. Augustine with a view to its repair. It is believed he has already commenced the work.

Orders have been given to continue the repair of the Old King's road, in Florida, south of St. Augustine, from Tomoka to New Smyrna, or as far as the unexpended balance of the appropriation will permit.

A contract was made in July last for erecting a bridge over St. Sebastian's river, at St. Augustine, but it is not ascertained whether the contractor has commenced the work. Should he fail to commence in the present month, I would respectfully recommend that a detachment from the army be placed under the direction of the quartermaster, to enable him to execute the work, as it is not possible to complete it by contract without a further appropriation.

Arrangements were made early in the present season to commence the military road in Maine authorized by an act of the last session of Congress. Public notice was given inviting proposals for contracts, and numerous bids were received; but they so far exceeded the appropriation that it was found impossible to construct such a road the whole distance as is considered necessary for military purposes. Twenty-three miles were put under contract, and arrangements have been made to have the whole distance opened and grubbed out. This road is highly important as it regards the supply of the troops on the frontiers of Maine, and I respectfully recommend that an additional appropriation be made.

The quartermaster at Sackett's Harbor has been actively engaged, during the season, in improving that harbor. His operations have ceased for the present season, but the work has been so far executed that he will be able to complete in one month of the next year all that remains to be done. No further appropriation will be necessary.

When the direction of the Delaware breakwater was confided to this department, in April last, I entertained the confident hope that our operations would be as far advanced by the end of the year as the appropriation would admit.

A contract had been made by the Navy Department for 120,000 perches of stone, and every arrangement depending on the government was promptly made to insure the most vigorous prosecution of the work. Difficulties, however, occurred at the commencement, between the contractors and the engineer, in regard to the measurement of the stone delivered. An appeal was made to the War Department and referred by you to this office, and the matter in controversy was settled, with your approbation, on terms both just and liberal, and it was believed at the time to the entire satisfaction of the contractors: at all events, those gentlemen expressed themselves satisfied, and gave the most positive assurances that their contracts should be executed in good faith; but notwithstanding more than six weeks of the season remained, they had, previously to the 16th instant, entirely discontinued the work. They were bound by the terms of their contract to deliver thirteen thousand perches of stone in each month; consequently, when they suspended their operations, ninety-seven thousand and five hundred perches were due, of which only twenty-three thousand four hundred and forty-five perches had been delivered; leaving a deficiency of seventy-four thousand and fifty-five perches.

The department has had the power to deprive them of the contract every hour since the 30th of April;

I believe, however, the indulgence extended to them has been judicious. To have declared a failure of the contract would have subjected them to heavy losses; and it was apprehended that any considerable losses sustained at the commencement of the work would have an injurious effect upon the public interests in all subsequent contracts. Besides, when the inability of the contractors to comply with their engagements became apparent, it was too late to make advantageous contracts with others. Therefore, under all the circumstances of the case, it was thought better to allow them to go on and deliver as much as possible during the present year, pay them for what they should deliver, and make timely arrangements for a more efficient prosecution of the work during the next season.

Much as the operations of the present season have fallen short of our reasonable expectations, the time has not been lost; valuable experience has been acquired, which cannot but be useful in the prosecution of the work; and we now know that it is possible not only to obtain all the material necessary, but that if we fail to make advantageous contracts, we can take the work into our own hands and execute it promptly.

The stone delivered by the contractors has been deposited on the upper extremity of the breakwater, and the lower end of the ice breaker, in nearly equal proportions, and on a base comprising about 175 feet in breadth, by 280 in length, of each work, with the view of affording a pier on each, as early as possible, for the shelter not only of vessels engaged in the work, but of those engaged in commerce. The stone deposited having shoaled the water from five to about two fathoms, and both those points having consequently become dangerous to the navigation of ships, they have been marked by spar buoys and signal lights, the bearings of which have been published for the information of pilots and all others concerned. Yet the safety of the navigation demands, in the opinion of the engineer, that those piers should be raised to their destined height as early as possible in the course of the next season.

In addition to the balance of the appropriation remaining on hand, it is believed that one hundred thousand dollars will be required next year; and to enable me to make timely arrangements for the prosecution of the work in 1831, I have thought it my duty to submit an estimate for that year.

At Houlton barracks have been erected for the troops, with storehouses, hospitals, and other buildings required for the use of the post, all of which are reported by the quartermaster as finished. That officer also reports a part of the officers' quarters finished and the remainder in progress. The land on which the post is established was purchased by the commanding officer, or the officer acting as quartermaster when the troops arrived there, on account of the United States; but without a special appropriation the amount paid for it cannot be passed to the credit of the officer who made the purchase. An estimate for the sum necessary was presented last year, but was not acted on by Congress. Unless an appropriation be obtained, the land will necessarily become private property.

Under an appropriation made at the last session of Congress, barracks and other necessary buildings were commenced near the portage of the Wisconsin and Fox rivers, and are in such a state of forwardness as to leave no doubt of their completion during the next season. The appropriation will be sufficient.

Under the act making an appropriation for barracks at Fort Crawford, near the junction of the Wisconsin and Mississippi rivers, a tract of land was purchased and arrangements made to construct the necessary buildings. The works are now in rapid progress. The original estimates were for the accommodation of a garrison of four companies; but it having been decided to increase the garrison, a further appropriation is necessary. An appropriation is likewise necessary to enable me to pay for the land purchased. A lot of land, the property of the United States, adjoins the site of the garrison, and is necessary for its accommodation. I recommend that application be made to Congress to reserve it for military purposes.

The quarters and barracks authorized to be erected at Fort Trumbull, Connecticut, by an appropriation made last session, are in progress, and as far as the appropriation will admit, will be completed during the present season; but the garrison having been increased, further accommodations are necessary, for which an additional appropriation is required.

Not having an officer disposable to superintend the building of the barracks authorized at Fort Severn, nothing has been done the past season. The work will be commenced as early next spring as the weather will permit, and I have no doubt will be finished in time to be occupied the next autumn. The appropriation is believed to be sufficient.

The barracks authorized at Fort Sullivan, Eastport, Maine, by an appropriation of last session, have been completed, and considerable repairs have been made to the old buildings at that post And besides the casual and ordinary repairs at the greater number of posts throughout the Union, extensive and thorough repairs have been made, or are in progress, at Fort Preble, Maine; Fort Constitution, New Hampshire; Fort Independence, Boston harbor; Fort McHenry, near Baltimore; Fort Moultrie, in Charleston harbor; at Baton Rouge, Louisiana; and at Cantonment Brooke, Florida.

The barracks and other buildings at Fort Howard having become almost untenable, it is necessary that new buildings be erected; but to avoid the collisions with the civil authority likely to grow out of the contested title to the present site, I recommend that a different position be occupied. There are many in that vicinity which are the undisputed property of the United States, and which, besides possessing equal military advantages, are decidedly superior in everything relating to the accommodation of the troops as well as to their discipline and police.

So great a diversity of opinion prevails in relation to the compensation of officers of the army, that I have thought it might not be improper to notice briefly the several allowances of which it consists, and to trace the legal authority on which those allowances rest.

That compensation at present consists of pay, subsistence, forage, quarters, fuel, transportation, and, in certain cases, additional rations.

Pay and subsistence are allowed and the amount fixed by law; they are paid whether the officers be on duty or not, and are the only parts of their compensation that are not contingent.

The allowances for servants and that for forage are authorized and the maximum fixed by law; but they are paid only when the horses and servants charged for are actually kept by the officers claiming those allowances.

The allowance of additional rations is authorized by law to such officers as the President, from the circumstances of each case, may think entitled to it. This allowance is made as an equivalent for the extra expense to which officers in the exercise of independent jurisdiction or command are exposed.

Fuel and quarters are allowed to officers on duty, but are withheld from those on furlough or leave of absence. At all stations where there are public quarters, officers, as well as soldiers, are required to

occupy them; and no expense is incurred for rents, except at stations where there are either no public quarters, or not sufficient to accommodate the officers and soldiers stationed there.

Transportation is furnished in kind to officers who move with troops, whether by land or water; to those who travel on duty without troops, a commutation in money is made to reimburse the expense of travelling; and in that case the service must be performed before the allowance be claimed.

From the commencement of the revolutionary war down to the late war with Great Britain, the allowances of fuel, quarters, and transportation for the army, like most of the contingent expenses of Congress and other civil departments of the government, depended upon annual appropriations, which were applied under the direction of the President, according to the exigencies of the service. But on the 28th day of May, 1812, a few days before war was declared, Congress, by law, made it the duty of the Quartermaster's department, under the direction of the Secretary of War, to purchase military stores, camp equipage, and other articles requisite for the troops, and to procure and provide means of transportation for the army, its stores, &c. And on the 3d day of March, 1813, that body authorized the Secretary of War to make regulations for the purchase and distribution of supplies, and for defining the powers and duties of the several branches of the staff, which regulations, when approved by the President, were to continue in force until revoked by the same authority. Regulations were accordingly made, which conferred on the officers of the quartermaster's department, in addition to other powers, that of providing fuel, quarters, and transportation for the army, and made it their duty to furnish those supplies and accommodations according to a specific scale. The regulations conferring those powers and prescribing those duties were recognized and adopted by the 9th section of an act of Congress for reorganizing the general staff and making further provision for the army of the United States, approved the 24th day of April, 1816, subject to such alterations as the Secretary of War, with the approbation of the President, might adopt. The estimates for those allowances are every year made out in the most minute detail, in strict conformity with the regulations thus sanctioned by law; and Congress, having the means of examining every item, has never failed to authorize the payment by appropriating the money. Those allowances, therefore, have been considered as strictly legal as any other allowance or expenditure made by the government. They, as well as the allowance of forage, are not considered as making part of the regular compensation of officers, but as affording them the means of performing their military duties, which they could not efficiently perform were those allowances withheld.

I have the honor to be, sir, respectfully, your obedient servant,

TH. S. JESUP, *Quartermaster General.*

Hon. JOHN H. EATON, *Secretary of War, Washington City.*

QUARTERMASTER GENERAL'S OFFICE, *Washington City, December* 4, 1829.

SIR: I have the honor to submit a statement of the requisitions made from this office on the War Department, on account of the transfer made by order of the President from the appropriation for subsistence of the army to the appropriation for the quartermaster's department. The sum of fifty thousand dollars was transferred, and the requisitions to this date amount to thirty eight thousand; the remainder will be required in the course of this month The whole will be applied to the service of the quartermaster's department within the present year; but the particular application of the amount drawn cannot be reported in detail until after the accounts of the several officers to whom remittances have been made shall have been received and settled.

I have the honor to be, sir, your obedient servant,

TH. S. JESUP, *Quartermaster General.*

Hon. J. H. EATON, *Secretary of War, Washington City.*

List of remittances to officers and agents of the quartermaster's department from the amount transferred from the appropriation for the subsistence department on the 28th October, 1829.

Major H. Stanton, quartermaster, New York, November 5		$6,000

REPORT OF THE COMMISSARY GENERAL OF PURCHASES.

COMMISSARY GENERAL'S OFFICE, *Philadelphia, November* 6, 1829.

SIR: In obedience to your instructions I have prepared and have now the honor to enclose six statements as follows, viz:

No. 1.—Of moneys drawn from the appropriation for the "purchasing department" during the three first quarters of 1829.

No. 2.—Of moneys drawn from the appropriation for the purchase of woollens in advance for 1830 during the same period.

No. 3.—Of moneys received and disbursed during the same period on account of the purchasing department.

No. 4.—Of moneys received and disbursed during the same period on account of the purchase of woollens in advance for 1830.

No. 5.—Comparative statement of the cost of clothing for the United States army during the years 1828, 1829, and 1830.

No. 6.—Statement of the cost of clothing for the army of the United States during the year 1830.

These statements I hope will meet your approbation, and be received in time to answer your purpose.

With high respect, I have the honor to be, sir, your most obedient servant,

TIMOTHY BANGER,
For CALLENDER IRVINE, *Commissary General of Purchases.*

Hon. JOHN H. EATON, *Secretary of War.*

No. 1.

Statement of moneys drawn from the appropriation for the purchasing department (for 1829*) during the three first quarters of the year* 1829.

April 9, 1829.—To Treasurer's draft No. 285—amount	$35,000 00
June 8, 1829.—To Treasurer's draft No. 38—part	20,062 52
August 24, 1829.—Secretary of the Treasury's warrant, No. 614, for	15,500 00
	70,562 52

COMMISSARY GENERAL'S OFFICE, *Philadelphia, November* 6, 1829.

REPORT OF THE COMMISSARY GENERAL OF SUBSISTENCE.

OFFICE OF THE COMMISSARY OF SUBSISTENCE, *Washington, November* 21, 1829.

SIR: I have the honor to present to your view a statement of the moneys remitted and charged to contractors and the disbursing officers of the department, in the first, second, and third quarters of the year, amounting to $322, 913 67
And the moneys accounted for by them, amounting to 275, 807 17

Leaving a balance unaccounted for of 47, 106 50

From this sum, $47,106 50, is to be deducted $19,022 93, charged to contractors, not as moneys advanced or remitted to them out of the annual appropriation, but as the difference between the prices of provisions contracted for and the purchases which it became necessary for the agents of the department to make at various posts to supply deficiencies; also $1,492 17, residue of a balance of $1,813 43 due by Lieutenant E. B. Griswold at the period of his decease, and exhibited in the statement for 1828; making an aggregate of $20,515 10 unconnected with the fiscal operations of 1829, and leaving $26,591 40 actually in the hands of the assistant and acting assistant commissaries, which, no doubt, will be entirely accounted for by them in the fourth quarter of the year.

It is a source of great gratification for me to state that of 106 officers who have acted as commissaries, in the various mutations at the different posts, there are but fifteen whose accounts have not been received, and those generally at the most remote points; and there is every reason to believe that they will reach the office previous to the expiration of the month.

Very respectfully, your most obedient servant,

GEORGE GIBSON, *Commissary General of Subsistence.*

HON. JOHN H. EATON, *Secretary of War.*

Statement exhibiting the moneys remitted to contractors from January 1 to September 30, 1829, the sums charged to them on account of failures, the amounts accounted for and due by them; the balances in the hands of the disbursing officers of the department December 31, 1828; the moneys remitted to them in the first, second, and third quarters of 1829; the sums charged to them on account of sales to officers on the frontier posts; sales of empty barrels, boxes, &c.; and the amounts accounted for by them for the same period; together with the balances in their possession at the expiration of the third quarter of the year.

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, November* 21, 1829.

GEORGE GIBSON, *Commissary General of Subsistence.*

SURGEON GENERAL'S REPORT.

SURGEON GENERAL'S OFFICE, *October* 23, 1829.

SIR: I have the honor to report that the amount expended on account of the medical department, during the year ending September 30, has been $26,704, the whole of which has been accounted for. The annual supplies were put up and forwarded at an early period, and are reported to have arrived in good order, and to have been of a good quality. The returns and reports required by the regulations have been regularly received, and all public property under the charge of the several officers of the department has been satisfactorily accounted for. The hospitals appear to have been amply suplied in every respect, and the sick to have been well accommodated, with the exception of a few posts, where considerable repairs are required, especially at Fort Delaware.

The number of deaths reported during the first two quarters was 71; of which 8 were from consump-

tion, 11 from intemperance, and 7 accidental, leaving but 45 from all other causes during the six months. All the officers of the department are on duty, or under orders for their respective stations, except three, who are on leave of absence for the recovery of their health, and two who are on furlough for a short period.

During the first three quarters of the present year $8,297 were expended for the payment of private physicians, in addition to $4,050 to those employed at the several recruiting rendezvous; although, with few exceptions of urgent necessity, every officer of the department not disabled by disease has been constantly on duty. I therefore beg leave to call your attention to the subject of an increase of the surgeons and assistants, which was more particularly noticed in the annual report of last year. At present it is impracticable to furnish one surgeon to every post and station, even when they are all on duty, which can seldom be the case. At the larger and more sickly ones, however, at least one surgeon and one assistant is required, and more especially at those places where, in case of the sickness or death of the surgeon, medical attendance cannot be obtained for several months. Agreeably to a statement then furnished, it would require 12 surgeons and 55 assistant surgeons to effect this, making no allowance for such as might be sick, on furlough, or accompanying detachments, or for any of the recruiting rendezvous, except New York and New Orleans. The number at present allowed by law is 8 surgeons and 45 assistants.

I beg leave, also, to call your attention to the several reports that have heretofore been made on the subject of graduating the pay of the surgeons in proportion to the length of time they may have been in service. Several memorials have been presented by them, and two bills have been reported in the House of Representatives, but they were not finally acted on, although the compensation of every other officer in the army, below the rank of major, has been so far increased that the pay and rations of the youngest second lieutenant are now nearly equal to those of the oldest assistant surgeon, who has been upwards of twenty-three years in service. In 1828 an act was passed for the better organization of the medical department of the navy, in which this principle was adopted, with a provision that no person shall receive the appointment of either surgeon or assistant surgeon unless he shall have been examined and approved by a medical board, to be designated by the secretary of the department, and which proviso, it is believed, would be equally beneficial to the army.

I also take this opportunity of adverting to the inconveniences and expense to the department from the omission in the existing laws to continue the privilege of franking letters and packages on public business, and to provide for requiring bonds of the officer performing the duties of acting apothecary.

Very respectfully, your obedient servant,

JOS. LOVELL, *Surgeon General.*

21st Congress.] **No. 411.** [1st Session

ON A CLAIM FOR BOUNTY LAND, ARREARS OF PAY, GRATUITY, AND COMMUTATION FOR CLOTHING ON ACCOUNT OF SERVICES IN THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 23, 1829.

Mr. Drayton, from the Committee on Military Affairs, to whom was referred the petition of William Jacocks, reported:

It appears that the petitioner, on the 1st of January, 1813, enlisted as a musician for the term of five years in a company of bombardiers commanded by Lieutenant Horace C. Story; that he faithfully served until the expiration of his enlistment, when he was honorably discharged; that he placed his discharge, his duplicate descriptive list, and a power of attorney in the hands of his agents, to procure for him the patent for his bounty land, some arrears of pay, the three months' gratuity allowed by the government to discharged soldiers who had faithfully performed their duty, and an amount due to him for clothing which ought to have been, but never was, delivered to him. From accidental causes all the foregoing documents were lost; but the petitioner, by sufficient testimony, having shown that he enlisted for five years in the company referred to, and that he was honorably discharged, the committee are of opinion that he is entitled to relief, and therefore report a bill granting to him his bounty land, and also any arrears of pay, gratuity, and commutation for clothing which may be due to him.

21st Congress.] **No. 412.** [1st Session.

LAND FOR THE ACCOMMODATION OF THE MILITARY POSTS AT GREEN BAY AND FORT WINNEBAGO, MICHIGAN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 29, 1829.

War Department, *December* 24, 1829.

On the 14th of January last a resolution was passed by the House of Representatives directing the Secretary of War to report the "quantity of land belonging to individuals that is required for the convenience of the military posts at Green Bay and Fort Winnebago, in the Territory of Michigan, and to fur-

nish an estimate of the amount of money which, in his opinion, will be required to make the necessary purchases." In obedience to which resolution, I have the honor to submit the enclosed communication to me from the Quartermaster General.

Very respectfully,

J. H. EATON.

The SPEAKER *of the House of Representatives.*

QUARTERMASTER GENERAL'S OFFICE, *Washington City, December* 21, 1829.

SIR: In compliance with a resolution of the House of Representatives of the 20th Congress, dated the 14th day of January, 1829, and referred to this office on the 18th instant, requiring information as to the quantity of land belonging to individuals which is necessary for the convenience of the military posts at Green Bay and Fort Winnebago, in the Michigan Territory, and also an estimate of the amount of money which may be required to make the necessary purchases, I have the honor to report that it is not known that any land necessary for the accommodation of the military post at Fort Winnebago *belongs* to individuals, but it is understood that certain individuals *claim* a large tract of land adjoining the fort, and perhaps including it, which is necessary for military purposes; at least a league square should be reserved around Fort Winnebago, in order to secure a supply of fuel for the troops, and the timber and other materials that may be necessary in building and repairing quarters for their accommodation; and I respectfully recommend that application be made to Congress for a reserve to that extent. The claimants have no legal title to the land claimed, and it would seem to be carrying liberality to an extreme for Congress to grant as a donation lands required for public use. To prevent discontent and complaint, a donation of an equal quantity might be made in some other place.

In regard to the post at Green Bay, I believe all the land outside of the pickets is claimed by individuals, but it is not known what sum would be sufficient to satisfy the claimants. To attempt to hold the land for the use of the garrison would subject the officers to vexatious and ruinous suits, and to purchase it would only tend to encourage the assertion of similar and equally unfounded claims in future. I therefore recommend that, in place of purchasing the claims, a reserve be made by Congress for military purposes of at least a league square at a new position on Green Bay, to be selected by the commanding officer, or whomsoever the President may appoint for that purpose. This arrangement would be conveniently effected at this time; for the barracks and other buildings at Green Bay have become so entirely untenantable that, if the present position be occupied, they must be renewed in the course of the next season. As regards economy, as well as the comfort and discipline of the troops, a new position would be every way preferable. I return the resolution, and am, sir, respectfully, your obedient servant,

TH. S. JESUP, *Quartermaster General.*

Hon. JOHN H. EATON, *Secretary of War.*

21ST CONGRESS.] **No. 413.** [1ST SESSION.

CONSIDERATIONS SHOWING THE EXPEDIENCY OF CONSTRUCTING FORTIFICATIONS ON THE ISLAND OF KEY WEST, IN FLORIDA.

COMMUNICATED TO THE SENATE DECEMBER 29, 1829.

WAR DEPARTMENT, *December* 24, 1829.

Agreeably to a resolution from the Senate of the 22d December, requiring the Secretary of War to lay before the Senate any report on file in this department containing information as to the population and business of the island of Key West, I have the honor to submit the enclosed papers as containing all the information on file in the department which relates to the island of Key West.

I have the honor to be your obedient servant,

JOHN H. EATON.

The PRESIDENT *of the Senate.*

DETACHMENT HEADQUARTERS, *Cantonment Brooke, April* 4, 1829.

GENERAL: In pursuance of your instructions, dated on the 10th of January last, (which were not received till the 10th of February,) I left this post on the 22d of the last named month in open boats, no opportunity or other means of conveyance occurring, and after a most boisterous passage reached Key West on the 7th of March.

Immediately on my arrival the proper inquiries were made of the authorities as well as of the proprietors their precise views in asking for the establishment of a military post. Their answers, as well as those of the proprietors, in relation to the site, are herewith enclosed, and will afford you the information requested on those two points. In referring to the letter of the proprietors, marked No. 1, you will perceive that they are perfectly willing that the United States should occupy a part of Jackson Square for military purposes, so long as it may be used for the same, free of expense. This lot presents one of the most eligible sites for barracks on the island. Its situation is high, airy, and probably the most healthy. It is detached a short distance from the town, which, in some measure, would prevent that constant intercourse between the lower classes of citizens and the soldiers, leading to intemperance and other vices inseparable from such a connexion. It is sufficiently near the town to afford any aid in suppressing riots or assisting the civil authorities as far as infantry can operate. It appears to me, in order to command

the harbor, and to defend it, or carry any law into execution, or assist the collector, as it regards foreign-armed vessels, or such others as may offend by illegal acts, that a battery is absolutely necessary, and an infantry force without heavy guns would be of little utility excepting as observed above.

The channel of the harbor is too far removed from Jackson Square for guns of any calibre, either to defend the entrance or operate upon all parts of the harbor, which it should do. If, therefore, barracks should be constructed on Jackson Square, it would be necessary to erect a small battery in front of the collector's office, (which the collector is perfectly willing should be done,) it being the nearest point to the channel, and commanding the whole and any part of the harbor. The battery might be thrown up from the soil as a temporary breastwork, (in the absence of regular fortifications;) the guns to be mounted on travelling carriages, kept under sheds or pent houses at the barracks, and would at any time be placed in battery as circumstances might require it. In occupying Jackson Square there would be no other inconvenience than removing your guns, your battery being separated a short distance from your barracks. The place on Jackson Square referred to would require a vast deal of labor, it being covered with the thickest underbrush and some heavy growth, as well as great quantities of small and some large rock, but out of which you might construct your houses and enclosures. In referring to letter No. 2, (J. Whitehead, proprietor,) you will perceive that three lots are offered for $5,000. This ground was looked at for the purpose of giving to the United States the right of selecting between Jackson Square and this place, where the barracks could be erected in connexion with the battery. This site approaches the channel, and commands the harbor nearly as well as the point before the collector's office. In drawing, however, a comparison, I should prefer the location on Jackson Square, (for temporary defences,) as the soldiers could more easily be kept distinct from the citizens. There would be no expense to the United States in the purchase of the land, the materials, either for tappia or stone work, would be on the spot, and from its situation, when cleared, must be the most healthy.

I shall now do myself the honor to answer to each head of your inquiries as laid down in your letter. The soil is, in some places, a very rich vegetable mould, based on secondary limestone; in other places sand. All the materials for erecting the quarters, fort, or battery, are on the island in the greatest abundance, whether for tappia or stone work, with the exception of that part which must consist of wood. The position selected I believe to be as healthy, if not more so, than any other on the island; and, from what I saw and heard, the place was perfectly healthy at the time we were there, excepting somes cases of the small-pox. In regard to its health, I beg leave to refer you to the report of Assistant Surgeon Edward Macomb, and also a letter from Dr. Lacey, a resident physician. The ponds near the town were formerly fresh, stagnant water, which have been drained, and is believed to have relieved the inhabitants from many of the violent attacks of fever which they were afflicted with. There are still several ponds of the same character which should and can be drained; but there is nothing which would add more materially to the health of the place than the cutting out of the underbrush, which is now so thick as to prevent the necessary circulation of air; indeed, I believe it would increase the health and comfort more than any other improvement which has been attempted. The water used for drinking (unless cistern water) is of the worst kind, and much of the sickness which has heretofore prevailed may be attributed to that cause, as the poorer class of people are compelled to resort to the springs and wells, particularly in dry seasons when cistern water is scarce. In the erection of barracks, one great object must be an immediate attention to the construction of very extensive and good cisterns. Rain water is the only kind which can be used with impunity at Key West during the fall and summer months. The military should be allowed everything which can be legally given them in good quarters—hospital stores, provisions, clothing, bedding, and mosquito bars, all of the best kind and quality. The great mortality which prevailed amongst the officers and seamen of the navy during the period of their occupancy of the island is to be attributed to many causes. A want of comfort on their first establishment, in not having good quarters; bad water, there being no cisterns at that time; stagnant ponds of fresh water, which have been since drained; the island imperviously covered with wood, preventing the least circulation of air; the long cruises of six weeks' duration in open boats under a tropical sun, and immediately on their return placed on extremely laborious duty in cutting roads and erecting quarters; added to this, a want of police, in not being able to prevent the men from an excessive use of ardent spirits, sold to them by the hucksters, and after becoming intoxicated laying out during the night, and hiding themselves in the underbrush, where it was impossible to find them, and when taken sick the hospital entirely too small, either for the necessary room or proper ventilation in so southern a climate. It is easy enough to suppose that such causes which are here represented would produce the most fatal diseases in any country.

The advantages derived from the military occupancy of the island are many and important. Key West being so detached from the United States, its sovereignty would be expressed by its flag, supported either by a military or marine force; but by a military force in preference, inasmuch as a marine force would not be intended to be stationary, but removed as other causes or objects might impel it, and could, of course, afford no protection during its absence. It has now no protection saving the occasional presence of two revenue cutters, both of which a large privateer could easily capture. The present population is not sufficiently large to defend it, neither have they arms of any kind to assist themselves with, and could be laid at any time under contribution by any lawless marauder.

The United States have frequently large sums of money in the hands of the collector, besides large sums in the hands of the marshal of the United States court belonging to individuals. There are often brought in by the wreckers vessels with their cargoes valued from $20,000 to $100,000. There are many vessels belonging to the place, with a great deal of property, owned by the inhabitants, all of which would be and is at the mercy of any daring adventurer. In a naval point of view, there is no port in the United States south of the Chesapeake where such a draught of water can be taken in, admitting vessels of the largest class, and when in, one of the safest harbors in the world.

In the event of a war with any power owning islands in the West Indies, (and by the time that such a circumstance might take place we, as a nation, would probably be strong enough on the ocean to operate on any of those islands,) Key West would afford the best and most desirable position from which the necessary expeditions could be fitted out. We should be able to act quickly at all times, taking advantage of fortuitous circumstances regarding winds and weather, cutting up and destroying all the commerce of our enemy in those seas, and protecting our own, besides affording during the equinoctial gales or bad weather the very best roadstead; and should the island prove to be healthy, a navy yard of the first class might be established, the necessary depth of water coming up to the very beach. Key West, from its proximity to the island of Cuba, will always be a check on the authorities there, and the establishment of a military post, even at this time, will place them in a state of fear and alarm. During

the war with Great Britain the English used all the ports of Spain in this peninsula, but since the cession of the Floridas to us she will be deprived of those harbors; and in the event of another war they would endeavor to take possession of Key West, to prevent us from using a harbor which would be of so much advantage to us, whilst it would suit her equally as well. It is a harbor exceedingly difficult to blockade, in consequence of its several channels, as is proved by the fact that Commodore Laborde, with a very superior squadron, was never able to confine to port that of Commodore Porter. The island to us, regarding the commerce of the Gulf and Bay of Mexico, is nearly as valuable as if we possessed the Havana. It is the key on the northern side of the Gulf, which the island of Cuba is to the south. Nature has done so much for its harbor that it can be made exceedingly strong by proper fortifications The commerce of Key West at this time is not very extensive, as will be seen from the letter of the proprietors to me, which I beg leave to refer to, showing in a clear and lucid point of view to what extension its commerce might be increased, particularly when the salt ponds are put in operation. The statements made in this letter are perfectly correct from what I saw and the information derived from other sources. There is no limit to the quantity of salt which may and can be made. The island of Key West, being only about three miles long and one in breadth, is not susceptibe in being made profitable in an agricultural point of view; but being beyond the region of frost, all the tropical plants would no doubt succeed admirably; the fruit, of course, would yield a handsome profit to the owners shipped to the different ports of the United States, freed from the duties which are now paid on the foreign article. From what I heard, it is probable the experiment will be made. The number of vessels and seamen employed in fishing and wrecking, with the value of the exported fish, which can be extended to any amount, I beg leave to refer you to the letter of William Pinkney, esq., collector. It is difficult to ascertain the amount and value of wrecked property, but it must be of great value, varying from year to year, as tempests may prevail. From what has been stated in this communication, together with the enclosed letters, I think that the information required has been given as far as I am capable, and that the government will perceive that Key West is an extremely important situation, both in a military and naval point of view. The only disadvantages which may be supposed are its possible unhealthiness, there being a constant intercourse between the Havana and the other ports of the West Indies, from whence malignant fevers may be imported; the difficulty of reinforcing it in time of war, and a scarcity of good water, should any dry season prevail. It will be well enough to mention that the Mexican squadron, whilst under the command of Commodore Porter, and since, enjoyed perfect health whilst in the port of Key West since the ponds have been drained, and their ability to procure good water.

Before concluding this report it may be proper to observe that there should be at least two companies stationed at Key West; that the battery should be garrisoned with 18 and 24-pounders, two large howitzers, and one mortar. The houses should be constructed of two blocks twenty-five feet square, with a passage of twenty feet between them, (covered;) each room to have six windows and two doors, with porticoes twelve feet wide extending all round them. It is absolutely necessary in this climate that every building should be well shaded and ventilated. There should also be two 6-pounders, to be used as light artillery for the defence of any unprotected part of the island.

This report would have been made and forwarded long since, but it has been delayed in consequence of our long passage both to and from Key West, with the absence of Colonel Greene, (principal proprietor,) who was in the Havana, and to which place we were obliged to go for the purpose of seeing him, it being only ninety miles across.

I have the honor to be, general, your most obedient servant,

GEO. M. BROOKE, *Bvt. Lieut. U. S. A.*

Major General A. Macomb, *Commanding the Army of the United States, Washington, D. C.*

Key West, *March* 9, 1829.

The fisheries carried on within the district of Key West are highly important. The tonnage alone employed in that trade amounts to seven hundred and eighty tons, and I estimate the value of the exported fish at one hundred thousand dollars per annum, which finds a ready sale at Havana.

The number of vessels engaged solely in wrecking within the collection district of Key West is twelve or thirteen, navigated by about one hundred and twenty men.

The agriculture of the district is at present so small as scarcely to deserve notice, but in a commercial point of view I consider Key West as a point of the highest importance, and not less so as a military and naval position. The healthiness of the island I consider as good as any other situation in the southern section of the United States.

I am, very respectfully, your obedient servant,

WM. PINKNEY, *Collector.*

Colonel Brooke, *United States Army.*

Key West, *March* 10, 1829.

Sir: In compliance with your request, I proceed to communicate to you the reasons by which the authorities at this place were influenced in making an application to the government of the United States for the establishment of a military force at some convenient point upon the island of Key West. For several years previous to the organization of the court, a population had been forming upon the island, consisting of persons who had been induced by interest, or other considerations less worthy, to migrate hither from different parts of the United States, and from the Spanish and British West Indies. These persons settled here with views, feelings, and motives essentially different, and being uninfluenced by legal or other restraints, did not hesitate to adopt that course of conduct which each believed best calculated to promote the attainment of his own ends. Such a state of things necessarily produced discord, conflict, and crime, and which, from a long continuance, had grown almost into habit.

Upon the arrival of the officers of the court at the island, it was immediately discovered that restraints must be imposed to which the inhabitants had not been accustomed, and to which it was

believed they would not readily submit; a large portion of them were ignorant, and belonging to that class which in all countries are governed more by the operation of fear arising from punishments than by the influence of any moral principle, and many of them were wholly unacquainted with the effect and could not admit the necessity of the administration of law under this or any other government; hence it was that the belief arose that resistance to the civil authority might be made when that authority was brought to bear upon persons so situated, especially when it should be known that no adequate force was at hand to aid it in its operations.

I should do injustice to the islanders, however, were I not to state in conclusion that so far no difficulty has been experienced by the officers in the discharge of their duties; whether this has resulted from the correct feelings of the community, the mild character of the punishments heretofore inflicted, or the aid which it is known the officers commanding the revenue cutters upon this station have always been ready to afford, I am not prepared to say.

I have the honor to be, very respectfully, your obedient servant,

JAMES WEBB, *Judge of the Southern District of Florida.*

Colonel GEORGE M. BROOKE.

KEY WEST, *March* 10, 1829.

SIR: In one of our conversations the refusal of the officers of a Mexican privateer to obey the orders of the collector of this port was mentioned as one of the causes that required here the presence of a military force, and you have asked of me correct information on the subject.

In the month of July, of the last year, the collector of this port, having previously witnessed many violations of our neutrality by the Mexican private armed schooner, called the Molestadora, commanded by C. C. Hopner, ordered her to leave the waters of the United States, which was disobeyed; and after the orders were repeated and still disregarded, he required the assistance of the revenue cutter Marion, to enable him to carry her beyond our maritime jurisdiction. No respect was paid to the command of the officer of the cutter, and upon his attempting to carry it into effect, the privateer beat to quarters and trailed her guns with lighted matches upon the cutter, with many threats that they would fire into her if they were not permitted to remain. After some communication with the shore, the officers of the cutter got her underweigh and proceeded to sea. She was left in the Gulf, but scarcely had the boat returned to the cutter, before the privateer was again at anchor in this harbor.

Some of the many violations of the neutrality of this country, by the said privateer, were: augmenting her force in this harbor, proceeding to sea, capturing Spanish vessels, and returning here with them; and at other times crossing over to the Tortugas, unlading her prizes, and transhipping the goods on board of the privateer.

This case is by no means singular within these waters, and the Spanish government have just cause of complaint against us. Matters now depending will doubtless bring to light other cases of a character equally glaring.

I have the honor to be, with high respect, your obedient servant,

WM. ALLISON McREA,

Attorney of the United States for the Southern District of Florida.

Colonel GEORGE M. BROOKE.

KEY WEST, *March* 10, 1829.

SIR: Knowing that you have been instructed to make a report upon the civil, military, and commercial situation of this port, and to ascertain the reasons why the officers of the court for the southern judicial district of Florida recommended that a military post might be established here, I beg leave to state to you what were my motives in so doing. In the first place I consider the island of very great importance as a commercial and maritime port; secondly, and the principal reason with me, was our very exposed situation to the depredations of almost any force, even of pirates, that might at any time make a descent and plunder the town whenever the revenue cutters were out on a cruise and none of our vessels-of-war in port. It frequently happens that valuable vessels and cargoes are wrecked on the coast of Florida and brought in here for adjudication and salvage. The proceeds of which are lodged in my hands, or the clerk of the court, and might be an object to pirates to make an attack, knowing our defenceless situation. Thirdly and lastly, I think it very essential to assist the court to carry into effect its decrees and enforce the laws of our country.

I have the honor to be, very respectfully, your very obedient servant,

HENRY WILSON, *U. S. Marshal, Southern Judicial District of Florida.*

Colonel GEORGE M. BROOKE.

Report on the Island of Key West, by Edward Macomb, M. D., Assistant Surgeon United States Army, to Brevet Colonel George M. Brooke, United States Army.

The island of "Key West," in latitude 24° 26′ north, longitude 4° 50′ west from Washington, is three miles in length, and one mile in breadth; containing 1.900 superficial acres, including the principal salt pond which covers about 300 acres.

The Spaniards call the island *Cayo Wesso* (Bone Key,) and the name by which it is known to us must be a corruption of the Spanish, as it is by no means the most westerly of the Florida keys.

Key West is situated in the centre of a group of smaller islands, and from its relative size, and general aspect, presents an imposing appearance on approaching it from any quarter.

This report will be confined to the following *features* in the island, which have a direct tendency on

its salubrity. The number of ponds—the nature of the soil—the peculiar density of the undergrowth—the quality of the water in the springs and wells.

Ponds of water abound on the island; some of these ponds contain fresh water, but the greater numbers are filled with salt water. They are very shallow, and exist in such numbers in consequence of the peculiar flatness of the general surface. But this same peculiarity renders them susceptible of being very easily drained.

The soil of the greater part of the island is decomposed vegetable matter, based on a stratum of secondary carbonate of lime. This stone when exposed to the atmosphere becomes hard, and well adapted for the construction of barracks or fortifications. The soil would produce the tropical fruits abundantly, and would answer for all horticultural purposes. But its strength and quantity is not sufficiently great for the more extensive operations of the *planter*. The growth of the island is very dense, but not lofty, differing essentially from that on the peninsula of Florida or in the island of Cuba. No varieties of the *pine* or of the *oak* are to be found, nor do the delicious fruits grow (spontaneously) that abound in Cuba The comfort and salubrity of the inhabitants would be much enhanced by cutting down the dense undergrowth, and leaving the larger trees for ornament and shade.

The water in the springs and wells is highly impregnated with muriate of soda and carbonate of lime, and is unfit for any domestic purposes. The rain water is secured by some enterprising gentlemen, in capacious brick reservoirs, and when clarified by filtration through the dripping stone, is excellent potable water.

From what has been stated above, it may be concluded that *draining the ponds, clearing out the undergrowth, building cisterns to contain water*, with the necessary attention to diet and regimen, will secure to the residents on the island of Key West as much health as could be expected in any part of Florida or in the West India islands.

The remarks made in the accompanying letter from Dr. R. A. Lacey, resident physician at Key West, will finish this report.

EDWARD MACOMB, M. D., *Assistant Surgeon, United States Army.*

KEY WEST, *March* 11, 1829.

SIR: The information you have asked relative to the health of this island shall be answered so far as my limited means will permit, and my short residence enable me to judge with accuracy.

I have resided upon this island near twelve months, and during the whole period but two cases of disease of any importance have occurred. The one, yellow fever; the other, a case of billious remittent. Nearly all my practice was confined to chronic cases of disease, and these exclusively seamen, and that class of population. The subject of the yellow fever was a mechanic, who, engaged in building a wharf, exposed himself for many days to the intense and almost suffocating rays of a tropical sun. Frequently during this period he was in the water, and the alternations from the water to the sun were so violent as naturally to produce fever. He was attacked while engaged at his work, and instead of confining himself to the house he continued his labor, until carried home, with all the violent symptoms of the disease. He died on the third day. The other was Colonel Pinkney, the collector, whose case, although somewhat violent in its incipient state, yielded without difficulty to the remedies prescribed.

These cases occurred in the months of June and July, since which period no disease has existed whatever, except cases of dengue, an epidemic, which was common to the West Indies and the south Atlantic cities of the United States, and all of which were easily removed by the treatment recommended. The year preceding, (as I am informed,) passed off without a death resulting from the former prevailing epidemics, and with fewer cases than existed during the summer of 1828.

As it regards the matter in question there is no doubt but that a great change has taken place in the healthful condition of Key West; whether it results from the removal of local causes, or a greater caution in the inhabitants in exposing themselves to the operating causes of disease, or both, I am not prepared to say. During the continuance here of the naval forces under Commodore Porter there was a great mortality among them, so much so that the force was removed, and Key West viewed and declared a *perfect "graveyard."*

This mortality may be traced, I think, to the following causes: the unavoidable exposure of the men to the inclemency of the weather, and the frequent and excessive use of ardent spirits. They come here direct from a northern climate, and after cruising for ten or twelve weeks in open boats, exposed to the burning rays of the sun and the heavy dews, would return to the island and could not be restrained from drink, the pernicious effect of which at such a time must be strikingly evident. A filthy and disgusting pond immediately in the rear of the station doubtless increased the prevalence of the disease. This pond has since been canalled, which opens a free communication with the sea; and, in the opinion of the inhabitants, the great local cause has thus been removed.

The result of my practice and observation has been that Key West is as healthy as any of the West Indies or the south Atlantic cities. Indeed, no apparent cause exists that could induce a contrary belief; and, from its being in such a commanding position, I feel perfectly satisfied that the national interests will be benefited by promoting its growth, in such a manner as will best comport with the views of the government, and afford protection to the inhabitants.

Believe me, sir, with high regard, your friend and obedient servant,

ROBERT A. LACEY.

Dr. EDWARD MACOMB, *United States Army.*

KEY WEST, *March* 10, 1829.

GENTLEMEN: Having been directed by the commander-in-chief to repair to Key West for the purpose of selecting a site for the erection of quarters and a battery to be occupied by a military force, I am instructed to inquire whether the proprietors of the island are willing to release to the United States a

suitable position for the purpose above named, with the necessary quantity of land to include a space sufficiently large for a garden and parade, as well as their precise views in wishing the establishment of the post. The release of the ground to be made for so long a period as the said land shall be occupied for military purposes. As the proprietors and inhabitants of the island are much interested in the establishment of a military post, it is expected that the release will be made without expense to the government.

As you have been for some length of time residents of the place, you would much oblige me by stating, as far as you are acquainted, the commercial, agriculture, fishing, and wrecking advantages of the island, as well as the depth of water which could be brought in the harbor through its several channels.

I have the honor to be your obedient servant,

GEORGE M. BROOKE, *Brevet Colonel United States Army.*

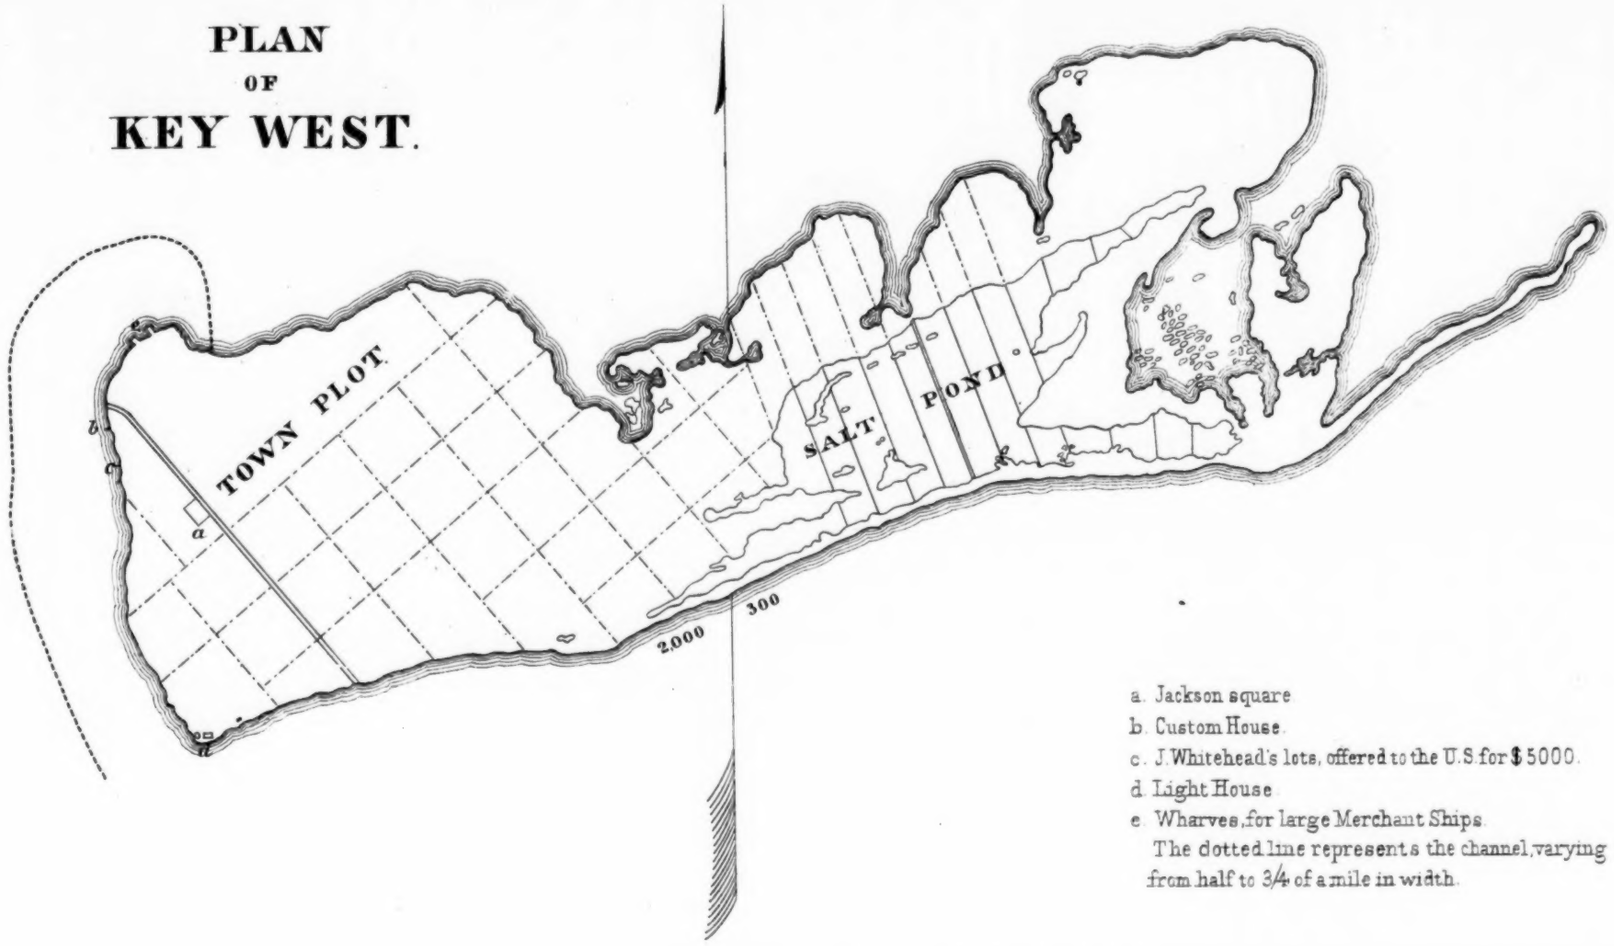
Messrs. P. C. GREENE, J. W. WHITEHEAD, and J M. SIMONTON,
Proprietors of the Island of Key West.

KEY WEST, *March* 31, 1829.

SIR: Our reply to your letter of the 10th instant has been withheld in consequence of the absence of two of the proprietors. We have given due consideration to the proposition made by the government, through you, and having heard your suggestions for locating the site for a battery and barracks, we have determined that as the latter will be upon a square reserved in the plan of the town for the public buildings, and the former on a lot proposed to be purchased by the United States for custom-house stores, and that as those locations will not interfere with private property, (the whole island having been divided among the proprietors,) we readily approve of them, and consent to the free occupation of the said square so long as it may be required for military purposes. Should, however, the location for those purposes be made different by you or any other officer employed to make them, when they will fall upon property belonging to either of us, we must decline making its release to the United States on the terms suggested. It is true the proprietors are deeply interested in the establishment of a military post here, but they are not so alone—all the inhabitants of the island, those engaged in trade with it, the wreckers and fishermen, as well as the government, who have a custom-house from which they derive no mean revenue, a judicial tribunal, &c., &c., are equally interested. We, the original settlers and present proprietors of the island, have suffered severely by being kept by United States officers from the enjoyment of our property for upwards of five years, and would feel cautious, now our titles are secured to us by confirmation from the government, how we concede such a privilege as is asked, conceiving that the importance of the place must secure to it permanent military defence, and that the unlimited concession called for amounts to a *fee simple* relinquishment. Besides, we believe such a condition unprecedented, and feel a conviction that the government, being in no pecuniary distress, would prefer paying a fair price for what ground they may require for public purposes, (which we are willing to receive,) to obtaining the same on any other terms.

The importance of the island, derived from its commerce and geographical position, its flattering prospects, its proximity to the continued scenes of piracies in these seas, and its totally unprotected situation, are, we deem, sufficient inducements for having applied for the establishment of a military or naval force here.

Our opinions of the commercial advantages of this port being requested, as under a statement of its present commerce, we respectfully state that the establishment at this place was made under the most flattering prospects. Business arising from wrecks was no object with its settlers. Those prospects were fully realized for a short period, until the envy of our own neighboring ports, and the suspicions of our neighbors, the Spaniards of Cuba and the Mexicans, were excited and brought to operate towards their defeat. The latter prohibited the entrance of vessels from our ports into theirs, while the former withdrew from their own vessels the benefits they derived from a trade with *this port alone*—a restriction not extended to any other port in our Union.



Since the settlement of the place unceasing and powerful exertions have been made by us, aided by our friends, to have extended to us the privilege of debenture on foreign goods brought hither *coastwise*, which we now only enjoy on *direct importations*, but which to this time has been denied us. That privilege would secure permanently to this port a trade with all the ports on the north side of Cuba, on the bay of Mexico, and with Central America. Our northern merchants would find it to their interest to make this a *depot*, from which, on meeting a profitable sale of one cargo, they could in a few days draw any supply to suit the ascertained wants of that market, without the danger and loss of time incident to a voyage to Baltimore or more northern ports. The trade with those foreign ports is now enjoyed by Havana, where our vessels are subjected to onerous charges and duties, and their crews are exposed to disease. The former would be wholly saved here, while to the latter the liability is less than in any known port near the same latitude. By a diversion of that trade to this port the revenue would be largely increased by the duties on the foreign produce that would be introduced to be exchanged for our merchandise.

Another point on which calculations may be reasonably made for an extended commerce with this port is that a very large number of vessels will be required for the transportation to other markets of the immense quantity of salt which the salt pond in this island is capable of producing yearly.

And, again, it will only be necessary to advert to the fact, well known, that the establishment of a naval force would be one of the certain means of extending the business of the island. At present the importations and sales of wrecked property and supplies necessary for the island and district, the fishing and wrecking vessels, the many vessels that find this the most convenient port when in distress, in which they can supply their various wants, and a limited trade with Cuba, is the business of the place, but which affords constant and profitable employment to a great number of trading vessels, and support to merchants and to persons of all other professions.

Although the soil of the island is rich, and it is capable, with the aid of its climate, of yielding all the tropical fruits, in addition to the common produce of our southern States, and its cultivation would largely reward the planter, yet nothing beyond experiments have been engaged in as regards agriculture.

PLAN OF KEY WEST.

a. Jackson square
b. Custom House
c. J. Whitehead's lots, offered to the U.S. for $5000.
d. Light House
e. Wharves, for large Merchant Ships.
The dotted line represents the channel, varying from half to 3/4 of a mile in width.

Bowen & Co. Lith Philad.a

The convenience of the port for the entrance and clearance of the large number of vessels employed in supplying Havana with live and salted fish, and for the reception of the large number of vessels and great quantity of property stranded on this coast, is too well known to our government to require any remarks from us on those heads. Having no data from which we are enabled to state the value derived from those pursuits to our revenue, we would respectfully suggest that the returns from our collector will furnish all information required in relation to them.

There are three channels through which vessels may pass into this harbor: one is the common ship channel, having not less than twenty-eight feet; the second is over the reef to the leeward of Sand key through which not less than six fathoms can be brought; and the third is through what is called the "northwest channel," in which can always be found twelve feet.

The advantages of this port for a naval station were discovered by our government at the time it was used as such. Since that period it has been made to appear, by the attempt of the Spanish squadron to blockade the Mexican vessels in this harbor, that it cannot be blockaded.

We have the honor to be, sir, very respectfully, your most obedient servants,

WILLIAM WHITEHEAD,
J. W. C. FLEEMING,
By their Attorney.

Colonel GEORGE M. BROOKE, *United States Army.*

KEY WEST, *March* 31, 1829.

SIR: In answer to your question, "what price will be required from the government for a fee simple right to lots numbered 3 and 4, in square No. 17, and lot No. 3, in square No. 16?" I state that I will accept $5,000 for the three lots, extending the privilege of fencing the whole, so as to close and embrace the street now running through them.

I have the honor to be, very respectfully, your most obedient servant,

J. WHITEHEAD.

Colonel G. M. BROOKE, *United States Army.*

21ST CONGRESS.] **No. 414.** [1ST SESSION.

APPLICATION OF VERMONT FOR THE CONSTRUCTION OF CERTAIN FORTIFICATIONS, AND THAT PERSONS UNDER TWENTY-ONE AND OVER THIRTY-FIVE YEARS OF AGE BE EXEMPTED FROM MILITIA DUTY IN TIME OF PEACE.

COMMUNICATED TO THE SENATE DECEMBER 29, 1829.

STATE OF VERMONT.

IN GENERAL ASSEMBLY *October* 19, 1829.

Resolved, the governor and council concurring herein, That our senators in Congress be instructed, and our representatives requested, to use their influence to procure such alterations of the militia laws of the general government as to exempt from military duty, in time of peace, all persons under twenty-one and over thirty-five years of age.

Resolved, That the secretary of state be directed to transmit a copy of the foregoing resolution to each of the senators and representatives from this State in the Congress of the United States.

Concurred October 22, 1829.

IN GENERAL ASSEMBLY, *October* 23, 1829.

Resolved, the governor and council concurring herein, That the senators of this State in the Congress of the United States be instructed, and the representatives requested, to use their influence to cause an act to be passed by Congress for constructing fortifications on the north point of Vineyard, Isle la Motte, and on the great shoals between said point and Point Au Fer, in the State of New York, and for making the necessary appropriations.

Resolved, That the secretary of state be directed to transmit a copy of the foregoing resolution to each of the senators and representatives from this State in the Congress of the United States.

Concurred October 28, 1829.

The foregoing are true copies of resolutions of the legislature of the State of Vermont.

NORMAN WILLIAMS, *Secretary of State.*

21st Congress.] No. 415. [1st Session.

ON THE EXPEDIENCY OF MERGING THE MARINE CORPS INTO THE INFANTRY OR ARTILLERY OF THE ARMY, AND ON THE PROPER ORGANIZATION OF THE ORDNANCE DEPARTMENT OF THE ARMY.

COMMUNICATED TO THE SENATE DECEMBER 29, 1829.

War Department, *December* 29, 1829.

Sir: Your letter of the 24th, requesting to have prepared the outline of a plan whereby to merge the marine corps in the army, was received and referred to the major general. He has made a report accompanied by two bills, which are here enclosed for your consideration. The one proposes to unite the corps with the infantry, the other with the artillery; your experience and observation will determine which is the preferable plan.

It is also matter of consideration if the Ordnance department does not require attention on that subject; Colonel Bomford's communication to me will explain matters fully and in detail. There are some differences between his proposition and that presented by the major general, a greater number of companies being proposed by the former than by the latter plan. Which is best is for you to consider.

Very respectfully,

J. H. EATON.

Col. Thomas H. Benton, *Chairman of the Military Committee, Senate United States.*

Headquarters of the Army, *Washington, December*, 1829.

Sir: In conformity with your instructions, I have taken into consideration the letter of the chairman of the Military Committee of the Senate, dated the 24th of the month, transmitted to me under cover of your note of the 26th, all having reference to the merging of the marine corps into the infantry or artillery, according to the recommendation of the President in his message to Congress. The letter of the chairman relates solely to merging the marines into the infantry, but your note has reference more particularly to merging the marines into the artillery. I have therefore thought it my duty to take the subject into consideration under both views, and have drawn bills to correspond with the request of the chairman and with your directions. The bills are hereto annexed, marked A and B.

First, to merge the marines into the infantry. In order to effect this, I propose to form the whole of the infantry and marines into eight regiments, each regiment to have one colonel, one lieutenant colonel, one major—ten companies, two of which to be light companies. The battalion companies to consist of one captain, one first and one second lieutenant, as now organized, but to the flank or light companies, each, one additional first lieutenant is given. By this organization the marines will all be absorbed into the infantry, with the exception of one officer. Now, the rank of the lieutenant colonel of marines ought to be settled. It appears to me to be a higher rank than that of lieutenant colonel. At the time the office was created (April 29, 1800) it corresponded with the commandant of a regiment in the line of the army, and was the next rank to brigadier general. In the revolutionary army lieutenant colonels commanding were classed with colonels, and took their promotion to brigadiers according to seniority.—(See Journals of Congress, 1782, vol. 4, page 111.) From the peace of 1783 till 1802 there were no colonels in the army; the commanders of regiments bore the title and commission of lieutenant colonels commandant, both in the artillery and the infantry, as well as in the cavalry, and likewise in the militia. The reason given for establishing this rank in preference to that of colonel was, that in the revolutionary army there was much difficulty experienced in the exchange of prisoners with the British as to the commandants of regiments; the colonels of the British army, being for the most part generals, did not command their regiments in person, and the officers at the heads of regiments were in such cases lieutenant colonels. The act fixing the military peace establishment (March 16, 1802) restored the rank of colonel for the first time after peace; but the pay and emoluments corresponded precisely with those allowed to a lieutenant colonel commandant. So that it would appear to be a rank, if not equal to a colonel, at least a grade higher than that of a lieutenant colonel. I would propose, therefore, to arrange the commandant of the corps of marines to the command of the eighth regiment, with the rank of colonel; then to promote the senior major of infantry to be lieutenant colonel of his regiment; then the senior captain of marines to be major of the regiment out of which the major should be taken to be lieutenant colonel of the eigth regiment, which arrangement will correspond with their relative rank; then to distribute the other captains of marines in the different regiments according to their rank; in like manner the lieutenants. As an illustration a list is herewith presented, showing the manner in which it is proposed to amalgamate them with the officers of infantry. I have given a sub-adjutant and two chief musicians to each regiment, with the pay and emoluments of a cadet; the former takes the place of our present sergeant major, and as he is to assist the adjutant, it appears to me proper that his title should correspond with his office; and besides, it will be a stepping place to promotion from the ranks, an incentive much wanted in our regiments to encourage the meritorious non-commissioned officers. In the French service he is called *adjutant sous-officier*, or non-commissioned adjutant. We have no other staff to the regiments, because the general staff supplies quartermasters, commissaries, paymasters, and medical officers. The organization of a company is different from the present in some respects. To each company there is a sergeant major, who is to the company what an adjutant is to a regiment; a quartermaster sergeant, to take charge of the property and accounts of the company, to distribute the clothing, provisions, and supplies of every kind; these, with the music, may be considered as the staff of the company. The French always had these, (sergeant major and fourrier.) In our service they are absolutely necessary, on account of the liability of the companies to be detached. These are improvements which have been long wanted; but, independent of the advantages of organization, there is another object which is of equal importance: it is, that these non-commissioned officers, being better paid and of higher rank than the other sergeants, will open a field for competition, and induce better characters to enter the army than heretofore have been willing to enlist. The

companies will be stronger in the rank and file. The aggregate of a company of infantry being now fifty-one non-commissioned officers, musicians, and privates, will, by incorporating the marines, become fifty-five non-commissioned officers, musicians, and privates. The present aggregate of the several regiments of infantry, as now authorized by law, amounts to, in the companies..... 3,570
Non-commissioned staff..... 28
Marines, non-commissioned officers, musicians, and privates..... 865

4,463

In the proposed establishment of eight regiments..... 4,400
Non-commissioned staff..... 24

4,424

Less than present establishment of infantry and marines..... 39

Second, to merge the marines into the artillery. I propose, in order to effect such an arrangement to have only four regiments of artillery, nearly as now organized, with the exception of having ten companies in each regiment instead of nine companies, as now established; and further, to provide out of the artillery a corps of ordnance, to consist of thirty-three officers, making it a separate establishment from the artillery, as it is, in effect, at this time, and as it ought to be for the good of the service. The following is the scheme:

Of the artillery, there are four regiments now in service, having 4 colonels, 4 lieutenant colonels, 4 majors—16 field officers. Of the marines, there is now in service 1 lieutenant colonel commandant—1 field officer. Total field officers, 17; but if the colonelcy of the second be left vacant, there will be only 16, as now authorized in the artillery. Captains of artillery, 40; first lieutenants, 72; second lieutenants, 72. Captains of marines, 9; first lieutenants, 24; second lieutenants, 16.

Now, to form the corps of ordnance, and to merge the marines into the artillery, we have sixteen field officers of artillery and one of marines; but if we do not count the colonel of the second regiment of artillery, who is not appointed, we have only sixteen field officers to dispose of, and forty captains of artillery and nine of marines, making forty-nine captains, which, added to the sixteen field officers, make sixty-five. Now, out of these field officers and captains it is proposed to select three field officers and six captains for the ordnance corps, say nine officers, which will leave fifty-six to be arranged to the artillery, which will exactly furnish the sixteen field officers and forty captains required for the four regiments of artillery. Then there are seventy-two first lieutenants of artillery and twenty-four of marines, and seventy-two second lieutenants of artillery and sixteen of marines, making in all one hundred and eighty-four lieutenants. Of these, one hundred and sixty will be required for the artillery; the remaining twenty-four just complete the ordnance corps.

With regard to the sub-adjutants, chief musicians, sergeant majors, and quartermaster sergeants, the same remarks are applicable as those made on the organization of the infantry.

I am, however, of the opinion that the marines could be merged into the infantry with more propriety than into the artillery: first, because the nature of their service is connected with small arms, and not ordnance; and second, because the artillery is an arm that requires previous scientific instruction in those destined to serve in it, in the same manner as for the engineers. The introduction of so many officers entirely ignorant of the artillery duty would tend much to diminish the efficiency of that respectable corps; besides, it would interfere more with the rights and expectations of the artillery officers than it could with those of the infantry. I would not, however, propose to exempt the artillery from serving on ship-board or in the navy yards; on the contrary, they would be well adapted for bomb ketches and for the batteries intended for the defence of naval establishments. If the army be intended to supply the place of the marines, I would suggest that a detail be every two or three years made from the infantry and artillery to guard the navy yards and to go to sea as marines. This arrangement will give an opportunity to our young officers to visit foreign countries, which will improve them professionally, and at the same time make them more satisfied with their stations on shore. I have no doubt but that the marines, as well as the army, will be benefited by the amalgamation. The experiment can be made without expense, and I think it worthy the trying.

Respectfully submitted.

A. MACOMB, *Major General, Commanding the Army.*

Hon. JOHN H. EATON, *Secretary of War.*

A.

AN ACT to merge the marine corps into the infantry.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That as soon as the public service will permit, the marine corps shall be merged into the infantry of the United States, now in service, to form with the said infantry eight regiments; each regiment to consist of one colonel, one lieutenant colonel, one major, one adjutant, to be taken from the lieunteants, one sub-adjutant, two chief musicans, each with the pay and emoluments of a cadet; ten companies, each company to consist of one captain, one first and one second lieutenant, except the two flank companies, to each of which there shall be two first lieutenants and one second lieutenant, one sergeant major, one quarter-master sergeant, two sergeants, four corporals, two musicians, and forty-five privates. That the said officers, non-commissioned officers, musicians, and privates, shall be respectively entitled to the same pay, forage, subsistence, and emoluments, as are now allowed to the infantry, and shall be subject to the rules and articles of war, and such regulations as are now or hereafter may be established by the Department of War; and shall be entitled to the same provision for wounds and disabilities, the same provision for widows and children, and the same benefits and allowances, in every respect, not inconsistent with the provisions of this act, as are authorized by the act of the sixteenth of March, eighteen hundred and two, entitled "An act fixing the military peace establishment of the United States;" that they shall be recruited in the same manner, and with the same limitations; and that the bounty to the recruit, and the

compensation to the recruiting officer, shall be the same as allowed by the act of the twelfth of April, eighteen hundred and eight.

SEC. 2. *And be it further enacted*, That the said regiments of infantry, when so organized, and the regiments of artillery now in the service of the United States, or any part or detachment of them, may, at the discretion of the President of the United States, be ordered to serve on board any of the public ships or vessels-of-war, or in the dock yards, or other naval establishments of the United States, in like manner as the troops heretofore composing the marine corps were liable to serve; and during such service they shall be subject to such rules and discipline as the President of the United States may adopt for their government, and shall be entitled to the same advantages and shares of salvage and prize money as the officers and marines serving on shipboard were heretofore entitled by law, regulation, or custom.

SEC. 3. *And be it further enacted*, That the officers of marines thus merged into the infantry shall take rank according to the dates of their respective commissions in the line of the marines, preserving to those who may possess it their brevet rank, to be placed in that and every other respect on the same footing with the other officers of infantry.

SEC. 4. *And be it further enacted*, That the lieutenant colonel commandant of marines, shall take rank in the above arrangement as colonel of infantry, to date from the passage of this act.

B.

AN ACT to merge the marine corps into the artillery and to form a corps of ordnance.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the passing of this act it shall be lawful for the President of the United States to merge the marine corps into the artillery and to constitute a corps of ordnance.

SEC. 2. *And be it further enacted*, That the artillery of the United States shall consist of four regiments. Each regiment shall be composed of one colonel, one lieutenant colonel, and one major, one adjutant, to be taken from the lieutenants, one sub-adjutant, and two chief musicians, each with the pay and emoluments of a cadet; and ten companies, each company to consist of one captain, two first lieutenants, and two second lieutenants, one sergeant major, one quartermaster sergeant, two sergeants, four corporals, two musicians, four artificers, and fifty-six privates; two of which companies shall be designated and equipped as light artillery.

SEC. 3. *And be it further enacted*, That there be organized a corps of ordnance, to consist of one colonel, one lieutenant colonel, one major, six captains, twelve first and twelve second lieutenants, and the same number of enlisted men as are now authorized by law for the ordnance department.

SEC. 4. *And be it further enacted*, That the said corps of artillery and ordnance, when so formed, shall be subject to the rules and articles of war as are now or hereafter may be established, and to the same pay, forage, subsistence, and emoluments as are now allowed to the officers of ordnance; that the commanders of companies and the adjutants be entitled to receive the allowance of extra pay and forage as now authorized by law; and that the non-commissioned officers, musicians, artificers, and privates, receive the same pay, rations, and clothing, as are now allowed by law to the non-commissioned officers, musicians, artificers, and privates of artillery, and shall also be entitled to the same provision for wounds and disabilities, the same provision for widows and children, and the same benefits and allowances, in every respect, not inconsistent with the provisions of this act, as are authorized by the act of the 16th of March, 1802, entitled "An act fixing the military peace establishment;" that they shall be recruited in the same manner, and with the same limitations; and that the bounty to the recruit, and the compensation to the recruiting officer, shall be the same as allowed by the act of the 12th of April, 1808.

SEC. 5. *And be it further enacted*, That the said regiments of artillery and corps of ordnance, when so organized, and the regiments of infantry now in the service of the United States, or any part or detachment of them, may be, at the discretion of the President of the United States, ordered to serve on board any of the public ships or vessels-of-war, or in the dock yards or other naval establishments of the United States, in like manner as the troops heretofore composing the marine corps were liable to serve; and during such service they shall be subject to such rules and discipline as the President of the United States may adopt for their government, and shall be entitled to the same advantages and shares of salvage and prize money as the officers and men of the marines serving on shipboard were heretofore entitled by law, regulation, or custom.

SEC. 6. *And be it further enacted*, That the officers of marines, when thus merged into the artillery, shall take rank according to the dates of their respective commissions in the line of the marine corps, preserving to those who may possess it their brevet rank, and be placed in every respect on the same footing with regard to rank and command with the other officers of artillery.

SEC. 7. *And be it further enacted*, That the lieutenant colonel commandant of marines shall take rank in the above arrangement as colonel of artillery, to date from the passage of this act.

ORDNANCE DEPARTMENT, *December* 18, 1829.

SIR: In the annual report of the 30th ultimo I took occasion to advert briefly to a proposition heretofore submitted for a reorganization of this department. The measure has uniformly received the favorable consideration and support of your predecessors, and of the committees of Congress, to which it was referred; and bills for effecting the object have been reported, one of which passed the House of Representatives. The approval and sanction thus far given to it adds to the strength of the previous conviction that a measure of the kind proposed is very important to the interests of the public service. I therefore beg leave to renew the subject, and to submit the facts and considerations in relation to it which were exhibited in former reports.

The ordnance service, as now provided for by the act of March 3, 1821, is performed by officers temporarily detached from the regiments of artillery. The average number engaged in this service at any one time has been about thirty The whole number which have been engaged in it, for eight years past, has been 149; and of these but *four* only have been continued throughout that period.

The duties of the Ordnance department, as prescribed by law, are to provide, to inspect, to preserve, to distribute, and to account for every description of ordnance, artillery carriages, small arms, and ammunition required for the permanent defences of the country, or for its armies in the field. Its duties embrace, also, the arming and equipping of the whole body of the militia in the United States.

The appropriations made for effecting these objects have sometimes exceeded one million of dollars

per annum; and during the last sixteen years they have amounted to about fourteen millions—making the average about $863,000 per annum.

These large sums are expended not for articles for immediate use or consumption, but mostly for permanent objects—for articles of a durable character—which remain as a part of the great common stock and means of defence of the country. The value of this description of military property, now in the immediate charge of the Ordnance department, is at least eleven millions of dollars. The value of the small arms alone exceeds six millions. And this estimate includes only that part of such property as is deposited at or connected with the armories and arsenals which are under the immediate and exclusive direction of ordnance officers.

These duties are of a class which are wholly distinct from those of any other branch of the military service. They are of a different character, also, in several important features, among which the following may be named: The annual expenditures of the several departments for subsisting, clothing, paying, quartering, and transporting the army, and for providing its medical and miscellaneous supplies, are mostly for objects which are transient, which seldom extend much beyond the time present, and for articles which are soon consumed or expended, and disappear. The responsibilities of these several departments do not, therefore, extend much beyond the present application of the means confided to them for the current service. It is the Ordnance department alone which retains in its charge the accumulating product of its expenditures, for the preservation of which its officers are held responsible.

The ordnance service differs from other branches, also, in this: that its duties are less varied in a change from peace to war, or from war to peace, and that it embraces the arming and equipping of the whole body of the militia as well as of the regular army.

These duties are not less important in time of peace than they are in war. In the latter the distribution or the furnishing of supplies would be greater, but the former is the proper one for procuring them For it is in time of peace that the treasury can most conveniently furnish the requisite means, and it is then that the supplies can be obtained on the most favorable terms. Whether an army, large or small, is or is not maintained in time of peace affects very little the current service of the ordnance, for the main purpose of this is to make provision for the future; and this service would necessarily be continued if the army was entirely abolished.

It is, besides, the only branch of the United States military service which has any immediate or beneficial connexion with the militia. Of all the various attempts which have been made, from the first Congress down to the present time, to impart vigor and efficiency to the great body of the militia, none have proved effective except that which provides for *arming* them. The interests of the militia, of that which has not inaptly been called the great bulwark of the nation, are therefore connected with the measure proposed. It may, in short, be said of the ordnance service that it embraces the fabrication and the preservation of all the military weapons of the country, whether for the militia or for the regular army; and that all the essential military *materiel* of the nation, that which constitutes its armament in peace and its reliance in war, is confided to its supervision.

The business of disbursing nearly a million of dollars annually, and the preservation of eleven millions value of military stores, considered merely as a matter of ordinary business transactions, must, to be well performed, be conducted by persons experienced in such business. But the duty of devising and of deciding on the plans and models of all the various arms, artillery and other military equipments which are provided by the Ordnance department, is a matter of a much more important character, and requires much higher and more varied attainments in those who perform it. The qualifications requisite for a judicious performance of this branch of service, involving as they do a familiar acquaintance with the exact sciences and with mechanical philosophy, both theoretical and practical, are to be attained only by long experience and zealous application, joined with an aptitude to such pursuits Suitable qualifications are, therefore, not to be expected in those who are but temporarily engaged in such duties; for to them can be presented no adequate motives for the zeal and perseverance which are indispensable to the acquisition of such attainments, even if it were possible to acquire them in the short space of time to which their service in the ordnance is usually limited.

The utility of a separate organization for the Engineer, Quartermaster, Commissary, and other departments, has been abundantly demonstrated by experience, and it is presumed will not now be questioned. The expediency of extending the same principle to the ordnance service must be equally obvious. If we suppose, for example, that officers, without previous preparation or experience in the business, were required to prepare plans for permanent fortifications and to construct them, or to lay out routes for railroads and canals, the ruinous consequences of it would soon be manifested; yet no higher degree of skill or experience is requisite in the performance of these duties than is required in the correct discharge of those which are assigned to the ordnance.

The ordnance service differs not less from the line of the army than from that of the several administrative departments above mentioned. Yet, by the present law, it is required to be performed solely by officers temporarily detached from the line. And, as before stated, about 150 different officers have been so detached for the performance of ordnance duty, a large proportion of whom consisted of junior lieutenants. The embarrassments occasioned by these fluctuating changes may be exemplified by noting those which recently occurred at a single post. The proper commander left the arsenal soon after the beginning of a quarter, and transferred to his successor the balance of funds from the previous quarter, and the military stores in depot. To the second commander additional funds were transmitted, which did not reach him until he also had departed, and was four hundred miles distant. The third commander also left the post and placed the public property under the charge of the surgeon, who, in turn, was relieved by a fifth. Funds were again transmitted, the former having been repaid into the treasury; but before they reached the post the fifth commander to whom they were directed had been superseded by the sixth, and the quarter had expired, leaving the workmen employed at the post unpaid. These changes were all unknown to the department which is charged with the direction of the duties of the post, and is responsible for them, until after each had occurred.

The ordnance service differs so essentially from all other branches of the military service, and is of a character so peculiar to itself, that a separate and more permanent provision for it is believed to be indispensable to its correct performance, and to be demanded by the best interests of the public service. Any reasons which may be assigned for preferring a separate organization for any other branch of service must apply with equal force to the ordnance also.

No sufficient reason can be perceived why the ordnance service alone should remain in a state of

dependence upon temporary details from the line of the army, and be subject to all the fluctuations incident to, and inseparable from, such an unstable system.

The Ordnance department was first established in May, 1812, but was modified and extended by several successive acts during the war, until near its close, when it was entirely remodelled by the act of February 8, 1815. This act embodied all such provisions as the experience of the war had shown to be necessary, the duties of the department were much extended and more accurately defined, and were so adapted to the demands of the public service, as to guard against the inconvenience of the past, and to insure efficiency for the future.

This act, which gave the department its most approved form, continued in force until March, 1821, when, without its being repealed, the department was essentially changed and in effect nearly abolished by its being merged in the artillery regiments, although its duties and responsibilities remain unaltered.

The reasons which were assigned for blending the ordnance with the artillery service were, that the officers of the latter might thereby be enabled to acquire some practical knowledge of artillery constructions. The advantages anticipated in this respect, it is believed, have not been realized to any considerable extent. But, whatever may be the benefits resulting from this feature, they may be secured by limiting its operation to the junior grades. By making a separate and permanent provision of the senior officers of the ordnance service, for those upon whom its most responsible trusts would necessarily devolve, and by providing that the junior officers shall be detailed from the regiments, the measure would combine the advantages of both plans.

The act of February, 1815, made the department consist of four field officers, ten captains, and thirty lieutenants—in all forty-four. If this act be so amended as to attach permanently to the ordnance service the four field officers and ten captains, and to substitute for the thirty lieutenants an authority to detail from the artillery such number as may be necessary for ordnance service and instruction, all that is now proposed will be accomplished.

No inconvenience will be felt in the artillery service because of a portion of its lieutenants being detached, for an excess of officers in this grade was provided by the act of March 2, 1821, and for the express purpose, as was stated in the documents relating to that act, of furnishing assistants for ordnance service.

In order to exhibit in a more condensed form the general views above expressed, and the legislative provisions necessary for effecting them, I have taken the liberty of presenting them in the form of a bill, which is herewith respectfully submitted. To the bill is appended a few explanatory remarks and an estimate of the additional expenses which the passage of it would occasion.

It will be perceived that this bill proposes to attach permanently to the ordnance service four field officers and ten captains. But as it will discontinue the four supernumerary captains authorized by existing laws, its effect, if enacted, will be to add ten officers only to the number which now compose the military establishment.

A less number than fourteen officers, it is believed, would be insufficient for discharging the principal duties of the department. There are seventeen arsenals, eleven of which are important ones, and require each one ordnance officer at least. Beside these, the office at the seat of government, the inspection of ordnance, &c., at the founderies, and of small arms at the armories, and the supervision of the armaments constructing for the new fortifications, will require three at least.

The annexed memorandum of the arsenals and other stations, where officers are serving on ordnance duty, and the number and grade of officers who are now so employed, will serve to show the necessity for the number of officers proposed in the bill.

I have the honor to be, respectfully, your obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance Service.*

Hon. JOHN H. EATON, *Secretary of War.*

A BILL to amend an act entitled "An act for the better regulation of the Ordnance department," approved February 8, 1815.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the passage of this act, the Ordnance department shall consist of one colonel, one lieutenant colonel, two majors, and ten captains, and as many enlisted men as the public service may require, not exceeding two hundred and fifty.

SEC. 2. *And be it further enacted,* That all officers and enlisted men authorized by this act shall be subject to the Rules and Articles of War, and that the officers shall be appointed from the present military establishment, and vacate their places in their respective regiments, and shall receive the pay and emoluments now received by officers who perform ordnance duties.

SEC. 3. *And be it further enacted,* That the first section of the act hereby amended, and so much of the second section of the act entitled "An act to reduce and fix the military peace establishment of the United States," approved March 2, 1821, as provides one supernumerary captain to each regiment of artillery to perform ordnance duty, and so much of the fourth section of the same act as merges the Ordnance department in the artillery and reduces the number of enlisted men, be, and the same are hereby, repealed: *Provided,* Nothing contained in this act shall be construed to prevent the said supernumerary captains from retaining their rank in the army, nor to divest the President of the United States of authority to select from the regiments of artillery such number of lieutenants as may be necessary to perform ordnance duties.

Remarks.

The purpose of the bill, as drawn, is to restore the act of February, 1815, so modified, however, as to exclude the thirty lieutenants and to limit the number of enlisted men. The first section is designed to effect this.

The second section makes those who may compose the department subject to the Rules and Articles of War, and directs the manner in which the appointments are to be made.

The third section is designed to repeal all such parts of previous acts as conflict with the provisions of the bill, continuing, however, the authority to select lieutenants for ordnance duty.

Pay and emoluments of artillery and ordnance officers, exclusive of double rations.

Artillery.	Colonel.	Lieut. colonel.	Major.	Captain.	1st lieutenant.	2d lieutenant.
Pay per month	$75 00	$60 00	$50 00	$40 00	$30 00	$25 00
Subsistence	36 50	30 41⅔	24 33⅓	24 33⅓	24 33⅓	24 33⅓
Forage	32 00	24 00	24 00	.....	.....	.....
Servants' pay	10 00	10 00	10 00	5 00	5 00	5 00
Servants' subsistence	12 16⅔	12 16⅔	12 16⅔	6 08⅓	6 08⅓	6 08⅓
Servants' clothing	5 00	5 00	5 00	2 50	2 50	2 50
Total per month	170 66⅔	141 58⅓	125 50	77 91⅔	67 91⅔	62 91⅔
Total per annum	2,048 00	1,699 00	1,506 00	935 00	815 00	755 00
Additional for ordnance per annum	180 00	180 00	120 00	120 00	40 00	100 00
Total for ordnance per annum	2,228 00	1,879 00	1,626 00	1,055 00	855 00	855 00

Estimate of the additional expense which would be occasioned by the enactment of the bill herewith submitted.

Pay of one colonel, per annum		$2, 228 00
Pay of one lieutenant colonel, per annum		1, 879 00
Pay of two majors, each $1,626		3, 252 00
Pay of ten captains, each $1, 055		10, 550 00
Total amount for pay of fourteen officers		17, 909 00
From which deduct the pay of the four supernumerary captains, discontinued by the bill, each $1,055	$4, 220 00	
The appointment of fourteen officers would supersede the same number who are now serving by detail, the extra pay of whom is as follows, viz:		
One colonel, per annum	$180 00	
Three majors, each $120	360 00	
Six captains, each $120	720 00	
Two 1st lieutenants, each $40	80 00	
Two 2d lieutenants, each $100	200 00	
	1, 540 00	
To be deducted		5, 760 00
Total amount of additional expense		12, 149 00

As no addition will be made to the number of "double ration posts" by the passage of the bill, no allowance for double rations is included in the estimate. Neither is the pay of enlisted men included. These men would consist entirely of artificers and laborers, and would be employed as such, and whatever number may be enlisted, they would supersede a like number of hired artificers and laborers.

Memorandum of arsenals and other posts where officers are employed on ordnance service.

Ordnance Office, Washington.

Principal arsenals.

1. Watervliet, near Troy, New York.
2. Washington, District of Columbia.
3. Pittsburg, Pennsylvania.

Important arsenals.

4. Augusta, Maine.
5. Watertown, Massachusetts.
6. Frankford, Pennsylvania.
7. Richmond, Virginia.
8. Augusta, Georgia.
9. Mount Vernon, Alabama.
10. Baton Rouge, Louisiana.
11. St. Louis, Missouri.

Minor depots.

12. Vergennes, Vermont.
13. Rome, New York.
14. Detroit, Michigan.
15. New York harbor.
16. Pikesville, near Baltimore, Maryland.
17. Charleston, South Carolina.
    Fort Monroe, Virginia.
    Galena, Illinois.

Total number of posts, 20.

An officer is employed at Fort Monroe in constructing its armament. At Galena an officer is engaged in superintending the United States lead mines. Two officers are employed in inspecting ordnance at the founderies, which occupies a large portion of their time. They serve at arsenals also.

Number and grade of officers now serving on ordnance duty.

Colonels	1
Majors, (all of whom are brevet lieutenant colonels)	3
Captains, (five of whom are brevet majors)	6
Brevet captains	2
Lieutenants	24
Total	36

PORTLAND, *December* 22, 1829.

DEAR GENERAL: In reply to your inquiries as to my opinion in relation to a reorganization of the Ordnance department, you will recollect that the subject has been some time before Congress, and that a bill passed the House of Representatives, I believe, two years ago, which came up to the Senate and was referred to the Committee on Military Affairs, the main purpose of which was to separate the ordnance service from the line of the army by making it a separate corps. Under the present law the ordnance duties are performed by officers temporarily detailed from the regiments of artillery, who, after a short time of service, return to their regiments, and their places in the ordnance service are supplied by others.

As a member of the Military Committee, my attention was necessarily drawn to this subject. At first I was opposed to any change, as I thought it important that a knowledge of ordnance duties should be made familiar to as many of the officers of the line of the army as possible; besides, I did not like frequent changes in the law upon the subject. Subsequent reflection, some discussion, and a more careful examination of the subject, however, convinced me that it is very important that something should be done to place the ordnance service on a more stable footing. I consider the Ordnance department extremely important, as it relates to the defence and security of our country; large appropriations are annually made for this service, I believe to the amount of eight or nine hundred thousand dollars, (I speak from memory only.) The arms, artillery, and other military supplies provided by those appropriations are laid up in the arsenals for future service. I believe some of the documents represent the supplies already deposited to amount to something like eleven million of dollars. The proper preservation of this vast amount of property is of itself a highly responsible trust. The other branches of the military service have but little responsibility compared with this branch. The appropriations for paying, subsisting, clothing, quartering and transporting the army are, when expended, at an end; in these cases the responsibility ceases with the expenditure and a settlement of the accounts, the money is expended, and nothing visible remains. Not so with the ordnance service; the great object in this department is to create, prepare, deposit, and preserve cannon, mortars, gun-carriages, and arms of every description, and, indeed, every other article which can be prepared and preserved, necessary for the use of an army in a time of war, not only for the use of the regular army, but for the militia when called into actual service. The amount of property in charge of this branch of the military service must therefore be immense and increasing, and the responsibility of those who have it in charge must be great. I therefore think frequent changes in this department should be avoided, to do which a change seems to me now necessary that it may be placed on a footing more permanent. A bill similar, or nearly so, to the one which passed the House of Representatives would, I think, effect the object desired, and I doubt whether it would be more expensive than the present system. But it should furnish as many permanent officers of the department as the arsenals and the other service in the department would require. I am opposed to increasing the expense of the army in a time of peace, but I would adopt this and every other measure necessary to preserve the property of the government which has been or may be prepared and collected for a time of war; otherwise, your ordnance and military stores, &c., which have been collected at great expense, will be destroyed or rendered useless; the discovery of which may be made at the commencement of a war, at a moment when they may be wanted for the defence of the country. I therefore repeat that, in my opinion, such a change should be made as to secure the object for which the department was created.

I am, with much respect, your humble servant,

JOHN CHANDLER.

General JAMES W. RIPLEY.

21ST CONGRESS.] **No. 416.** [1ST SESSION.

ON PAY AND EMOLUMENTS OF BREVET OFFICERS, THE PAYMASTER GENERAL, SURGEON GENERAL, AND OFFICERS AT THE HEAD OF BUREAUS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 4, 1830.

Mr. DRAYTON, from the Committee on Military Affairs, to whom was referred so much of the President's message as relates to the army, the Military Academy, and fortifications, reported:

The subjects embraced in the President's message, to which the attention of the committee has been specially directed, are the consideration of the laws and regulations respecting the pay, emoluments, and allowances of certain officers, suggested, in some instances, to be vaguely and ambiguously expressed, and in others to have received an incorrect construction. The officers whose interests may be affected by the ambiguity or the misconstruction of the laws alluded to are: 1. Brevet officers. 2. The Paymaster General and the Surgeon General. 3. Officers at the head of bureaus connected with the Department of War. These cases the committee will take up in the order in which they have been stated. 1. Brevet officers. By an act passed April 16, 1818, "officers of the army who have brevet commissions shall receive the pay and emoluments of their brevet rank when on duty and having a command according to their brevet rank, and at no other time." By the act of March 2, 1821, the army was reduced to about twelve regiments, under a specified number of regimental and staff officers and three general officers, viz: one major general and two brigadier generals. This organization shows it to have been the intention of Congress that a major general, under the President, should command the whole of the military establishment, and that each of the brigadiers under the major general should command one-half of it. Had there been no brevet officers this must have been the distribution of the generals; and the circumstance of the existence of such officers cannot affect the principle of a system which was so framed as to be carried

into execution without any functions having been assigned to officers by brevet. Upon comparing together the acts of 1818 and 1821, it appears to the committee that an officer is not entitled to additional pay and emoluments by virtue of a brevet commission, unless he exercises under it a greater command than is annexed to the rank which he holds in the line or the army. A brigadier, therefore, with the brevet of a major general, under the present peace establishment, can never be entitled to the pay and emoluments of his brevet unless a command should be devolved upon him exceeding that of a department, or one-half of the troops. In ordinary military language, a brigade means two regiments under a brigadier; a division, two brigades under a major general; a corps d'armée, two divisions under a lieutenant general, &c.; but by the act of 1821 different extents of command than those which are usual are given to a major general and to a brigadier general, (the two highest grades now known in our service,) and in construing their duties and rights we must be governed by the letter and spirit of our own legislation, and not by technical phraseology. The same act which has increased the commands of a major general and of a brigadier general, has left those of regimental officers as they have always existed in the United States. If then a colonel with the brevet of a brigadier, have under him a force exceeding a regiment, the pay and emoluments of a brigadier would be due to him according to the act of April 16, 1818, his command being limited to a regiment when it is more numerous, though not amounting to a brigade, as there is no rank between a brigadier's and a colonel's, if he be entitled to any compensation beyond a colonel's it can only be to that of a brigadier.

The committee have expressed what they conceive to be the meaning of the law relating to the rights of brevet officers; but they are of opinion that an officer, whether he possesses a brevet commission or not, ought in no instance to receive any other pay and emoluments than such as he is entitled to by his rank in the line or the army, unless when exercising a command specially assigned to him by the President, under the authority of the 62d of the Rules and Articles of War. They therefore report a bill to that effect.

2. The Paymaster General and the Surgeon General. That the Paymaster General and the Surgeon General are entitled to the allowance of quarters and fuel the committee apprehend will sufficiently appear by a reference to the laws. By the third section of the act of Congress of April 24, 1818, the Paymaster General is to receive a salary of $2,500 per annum. By the act of April 14, 1818, some change is made in the Medical department, and by its second section the annual salary of the Surgeon General is fixed at $2,500. The tenth section of the act of March 2, 1821, enacts that there shall be one Paymaster General with the present compensation; and its eleventh section declares that there shall be one Surgeon General, &c., saying nothing about his compensation, but by the following section: "officers, &c., retained by this act, excepting those specially provided for, shall have the same rank, pay, and emoluments as are provided in like cases by existing laws."

The ninth section of the act passed April 24, 1816, says: "that the regulations in force before the reduction of the army" (which was on March 3, 1815,) "shall be recognized as far as the same shall be found applicable to the service, subject, however, to such alterations as the Secretary of War may adopt, with the approbation of the President." Anterior to the passage of this act, quarters and fuel were allowed by the regulations to the Paymaster and Surgeon General; and subsequently to its date, (see the "General Regulations for the Army," p. 223,) the same quarters and fuel were continued to them by regulations founded upon the authority of the law which has just been cited. It may, perhaps, be proper to remark, that no act of Congress grants quarters or fuel to any officer. From the major general to the lowest subaltern the right to these allowances is derived exclusively from the regulations of the War Department, when approved of by the President, which, it has been shown, are sanctioned by law. Although the committee entertain no doubt as to the rights of the Paymaster and Surgeon General to quarters and fuel, yet, as doubts upon the subject have been elsewhere expressed, in order to obviate them they report a bill.

3. Officers at the head of bureaus, &c. It has been questioned whether the President be legally authorized to direct double rations to be issued to the officers at the head of bureaus connected with the Department of War. By the fifth section of the act of March 16, 1802, there are given to every officer in the army a certain number of rations daily; and "to the commanding officers of each separate post such additional number of rations as the President of the United States shall from time to time direct, having respect to the special circumstances of each post." It has been intimated that bureau officers do not come within the provisions of this act, as their bureaus are not posts. It seems to the committee that such officers are comprehended both within the letter and the spirit and the meaning of the law. An officer is at his post when he is at that place, whether it be in a city or in a camp, which is assigned to him by his superior; and when there, if he have under his separate orders a regiment or a bureau, he is equally the commanding officer of a separate post; that is, in the meaning of the law, he exercises a separate and distinct command.

The discretionary power of increasing rations was vested in the President, that he might exercise it when commanding officers were stationed where provisions were dear, or where, from their situation, they were frequently called upon to incur the expenses of hospitality. It must be obvious that these reasons are as applicable to an officer superintending a bureau in Washington as to one commanding a regiment or a fortress upon the sea-coast or in the interior of the country. The committee, to remove the doubts which have been suggested as to the legality of the allowance of double rations to officers at the head of bureaus, have reported a bill.

21st Congress.] No. 417. [1st Session.

ON A CLAIM OF A DEPUTY COMMISSARY OF PURCHASES TO ADDITIONAL COMPENSATION FOR ACTING AS DEPUTY QUARTERMASTER GENERAL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 4, 1830.

Mr. Drayton, from the Committee on Military Affairs, to whom was referred the petition of Thomas Buford, reported:

That the petitioner was appointed a deputy commissary of purchases in the United States army on the 29th of June, 1812, and served as such until the 3d of July, 1813; that during this period the Secretary of War, anticipating the failure of the contractor, required the petitioner to purchase and forward large quantities of subsistence for the troops destined for Detroit; that at various times, owing to failures of the contractor, similar orders were issued to the petitioner by the commanding officers of the United States troops; that in the execution of these orders his disbursements, labor, and personal expenses, were very greatly increased. As the petitioner then performed the duties of a deputy quartermaster general, in addition to those of his own, although he has never received any other compensation than that of a deputy commissary of purchases, he prays that such further compensation may be allowed to him as Congress shall consider him entitled to. The committee, under the foregoing circumstances, deeming the petitioner to be justly and equitably entitled to the pay of a deputy quartermaster general, have reported a bill accordingly.

21st Congress.] No. 418. [1st Session.

INCREASE OF THE NUMBER AND PAY OF THE CORPS OF ENGINEERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 4, 1830.

War Department, *December* 24, 1828.

Sir: In compliance with the request of the Committee on Military Affairs, as communicated to me in your letter of the 21st instant, received yesterday, I have the honor to transmit herewith a letter from the Engineer department, furnishing the estimates required by the committee "of the sums necessary for the following objects at the Military Academy: 1st, for the purchase of apparatus in the department of natural philosophy; 2d, for the purchase of additional chemical apparatus;" and for the reasons stated in that letter no estimate is presented for the erection of a building to contain a lecture room and a laboratory for the professor of chemistry.

The communication from this department to the chairman of the Committee on Military Affairs of the House of Representatives, dated the 10th of January, 1826, sets forth so fully and clearly the expediency of increasing the number and pay of the officers of the corps of engineers that it is deemed almost unnecessary to say anything further concerning those points; I therefore refer the committee to that communication, which will be found in document No. 36, of the first session of the nineteenth Congress. It may be proper here to remark that the increase in the number of objects, both of fortifications and works of internal improvement, which have been conducted under the direction of the Engineer department since the date of the communication alluded to, calls still more imperiously for an increase in the number of officers of the corps of engineers, in order that all public constructions of the above character may be placed under the superintendence of those who are competent to direct them, and personally responsible to the government for the proper conduct of their operations. And, in addition to the strong reasons set forth in the same communication for increasing the pay of the officers of that corps, it may not be improper to state to the committee that although the nature of their duties assimilates them to staff officers, in point of responsibility and expenses, they not only receive inferior pay to those officers, but are rendered, by the very nature of these duties, ineligible to staff appointments, which are held by officers of other arms of the service.

In the second section of the bill reported by the committee, and which acompanied the document above referred to, I would recommend an amendment, the justice of which will immediately occur to the committee; it is to place the captains on the same footing, with regard to rations, as the other captains of the army, under the act of the 2d of March, 1827. The bill, unless so amended, will in its operation entitle the lieutenants to receive a greater number of rations than the captains.

I also beg to renew the recommendation heretofore made by this department that the privilege of franking should be extended to the chief engineer; by which means delays in the despatch of business would be avoided, and the expenses of the Engineer department diminished, as many of its correspondents, through ignorance or inadvertence, address their communications and packets to the chief engineer directly, thereby frequently charging the contingent fund of that department with a heavy postage.

The accompanying bill, amended agreeable to these sugestions, fully meets the views of this department as to the proposed increase in "the number and pay of the corps of engineers."

With considerations of high respect, I have the honor to be, sir, your most obedient servant,

P. B. PORTER.

Colonel William Drayton, *Chairman of the Committee on Military Affairs, House of Representati ves.*

21ST CONGRESS.] No. 419. [1ST SESSION.

APPROPRIATION TO MOUNT TROOPS FOR THE PROTECTION OF THE FRONTIERS OF ARKANSAS RECOMMENDED.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 6, 1830.

WAR DEPARTMENT, *January* 5, 1830.

I beg leave to submit to you the enclosed report from the commanding general, A. Macomb, in reply to a resolution of the House of the 17th of December, relative to the protection of the frontiers of Arkansas.

Very respectfully,

J. H. EATON.

ANDREW STEVENSON, *Speaker of the House of Representatives.*

HEADQUARTERS OF THE ARMY, *Washington, January* 4, 1830.

SIR: In pursuance of your directions, I have the honor to report as to the expediency of more effectually providing for the defence and protection of the Arkansas Territory, as required by the resolution of the House of Representives of the 17th of December, 1829.

The troops which are now stationed on the frontiers of Louisiana, Arkansas, and Missouri, are deemed sufficient for the defence and protection of the Arkansas frontier, provided an appropriation can be obtained from Congress to mount such portion of the troops (say not exceeding eight companies) as the President of the United States might direct. By this means a disposable force will be on those frontiers, which can act at all times with great promptness and effect, and which will be sufficient to protect, not only the frontiers of Arkansas, but those of Louisiana and Missouri, as well as the lucrative trade which is being carried on with Santa Fé; a measure I strongly recommend as being the only means by which the Indians can be properly punished, should they molest the inhabitants who are settled on the frontiers, or who may be engaged in the trade with Santa Fé.

I have the honor to be, very respectfully, sir, your obedient servant,

ALEX. MACOMB, *Major General, Commanding the Army.*

HON. JOHN H. EATON, *Secretary of War.*

21ST CONGRESS.] No. 420. [1ST SESSION.

ON THE CLAIM OF SOUTH CAROLINA FOR PAYMENT FOR THE SERVICES OF THE MILITIA OF THAT STATE IN THE WAR OF 1812-'15.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 11, 1830.

Mr. DRAYTON, from the Committee on Military Affairs, to whom was referred the memorial of the State of South Carolina, by Alexander Speer, comptroller general, reported:

That the object of the memorial, as therein set forth, is to obtain payment from the United States of the sums of money expended by the State of South Carolina upon her militia whilst in the service of the general government, together with interest thereon. As the claims of South Carolina depend upon the existence of the facts that her militia were in the service of the United States during the late war under such circumstances as constitutionally entitled her to reimbursement for the expenditures which she made upon them, and that these expenditures were appropriated for the purposes to which they were applied, the committee will state the substance of the evidence by which, in their judgment, these facts are fully and conclusively proved.

Before the commencement of the war with Great Britain, and for a long time afterwards, the State of South Carolina was almost destitute of any of the means of military protection, excepting such as could be furnished by her own resources. In the harbor of Charleston alone were there any forts, and these were in so feeble a condition that at a period when a British squadron was engaged in sounding the depth of water off the bar, and its commander apparently meditating an attack upon the forts, the quantity of gunpowder in the harbor belonging to the United States was not more than sufficient to have enabled the garrison to fire a single round. Although this state of things was earnestly and repeatedly represented to the Department of War, only two small and very inadequate supplies of the requisite articles were obtained. The national government being unable to supply either cannon or ammunition for the security of the maritime frontier of South Carolina, to put muskets into the hands of the militia called out for that purpose, or to furnish the pecuniary funds to pay and feed those who were actually engaged in its service, the legislature of the State, prompt in the discharge of the duties which she owed to her citizens and to the Union, *unanimously* resolved "cordially to support the general government in the vigorous prosecution of the war until a peace could be obtained on honorable terms, and cheerfully to submit to every privation

that might be required to accomplish that great object." Influenced by the spirit of this resolution, the State established manufactories of arms and of cannon balls, purchased every munition of war necessary for her troops, appropriated half a million of dollars for the defence of her maritime frontier, ordered a brigade of State troops to be enlisted, clothed, and equipped, and then to be offered to the general government; and at her own expense called out the militia, at various times, to protect the points which were menaced by the enemy. The State furnished with arms that portion of her militia which was mustered into the service of the United States, and, in some instances, supplied them with provisions and blankets; she had deposited in the arsenals, in Charleston, large quantities of cannon balls for the defence of the harbor; and for her quota of the direct tax, long before it was imposed, she advanced the sum of $———, which was paid to Major General Thomas Pinckney, and applied by him to the pressing wants of the regular soldiers in the service of the United States. In making disbursements under the direction of inexperienced State officers, it unavoidably occurred that many of the regulations prescribed by the Department of War were not observed. They were, in numerous instances, unknown; and had they been known, under the circumstances in which the State was placed, they could not have been strictly attended to. South Carolina steadily persevered in her patriotic exertions as long as the war continued. Before the restoration of peace she sent an agent to Washington to settle her accounts with the United States, whose officers rejected a very large proportion of them, amounting, with interest, to nearly $200,000. To obtain from Congress the payment of the items which were disallowed by the officers of the treasury is the object of the memorial now presented by the State of South Carolina. These items the committee will proceed to consider in their order.

1. The first claim is for *interest* on so much of the advances of the State during the war as have been or may be recognized and paid by the United States. On this point it appears that at the time these advances were made, the State being unable to meet the various demands on the treasury by taxes upon her citizens, drew the whole amount from a fund which she had previously invested in an incorporated bank, and on which she was then receiving an average interest of nearly 12 per cent. Interest has heretofore been allowed by special acts of Congress to several States on similar advances, where the money was borrowed from banks or where a previous promise to pay interest was made by an officer of the general government. The committee are clearly of opinion that the principle involved in the former class of cases applies to the advances by South Carolina, and they can conceive no substantial difference between the payment of interest and the loss of interest by a State on moneys applied to the service of the United States. In the case before us, the claim is rendered still stronger by the amount of the loss having greatly exceeded the usual interest of money, which alone, however, is now claimed by South Carolina. With respect to the claim of some of the States, arising from a previous promise to pay interest, the committee, while they of course admit the obligation arising from such a promise, can by no means admit that advances, under circumstances equally meritorious, are less entitled to favor because made without any previous stipulation whatever. In every view of the subject, therefore, the committee are of opinion that the State of South Carolina is entitled to the usual interest for these advances.

2. The next claim is for the *arms* furnished by the State to the militia in the service of the United States. This account has been adjusted at the Ordnance department, and the number and character of the arms due to the State is duly certified by the proper officer. The State, however, claims to be paid the value of the arms *in money*, while the War Department having no funds at its disposal applicable to that object, can only discharge the debt in *kind*. It appears that the State of South Carolina caused the arms in question to be manufactured or purchased at an expense of from 15 to 17 dollars per stand; that the present contract price is twelve dollars; and that the State, though at the time the arms were furnished she stood greatly in need of them, has now no use for them whatever. As the State is willing to receive payment for those arms at the present contract price, the committee can see no possible objection to their receiving the money in lieu of the arms, especially as this arrangement will cost the government nothing, it only being necessary to lessen to an equal amount the number hereafter to be manufactured.

3. The next claim is for *cannon balls* manufactured by the State, in consequence of no supplies being furnished by the United States, and when essential to the defence of Charleston. Those cannon balls were, it appears, rejected by the Ordnance department in consequence of their not being exactly conformable to a standard established by that department. The evidence before the committee being conclusive to show that at the time these balls were manufactured by the State, the United States had not furnished, and were unable to furnish them, and that the harbor of Charleston was almost defenceless; and it further appearing that the State used the best means within its power at the time to procure them of a suitable kind and proper quality, it is deemed just and reasonable that the State should be refunded the amount paid for said cannon balls.

4. The next item of the claim is for *transportation*. On this point it appears that in marching troops to the place of rendezvous it was often found necessary to employ a greater number of wagons than is allowed by the regulations of the army. In some instances ten or twelve wagons have been found necessary to enable a regiment to reach its place of destination; and it is stated that the number actually found necessary, and no more, were paid for by the State; while she has been allowed in the settlement of her accounts only eight to each regiment. The committee are of opinion that under the circumstances of the case the State of South Carolina ought to be remunerated for the expenses thus necessarily incurred for transportation.

5. The next item of the claim is for the amount of compensation actually paid by the State to the paymaster general, commissary general, and other staff officers of the militia employed by the State in making the expenditures which have been or may be recognized as chargeable to the United States. It appears that the State of South Carolina thrown in a great measure on her own resources, and compelled to call out her militia, and to provide transportation, arms, and munitions of war of every description, had no alternative but to use the officers of her own staff for these purposes. Compensation was allowed to these officers by the State as a matter of course; and under the peculiar circumstances of the case, it appears to the committee reasonable that the expenses thus incurred for the benefit of the United States should be refunded.

6. The next item taken into consideration by the committee was for *blankets*, which it appears were furnished by the State to a regiment of militia actually in the service of the United States. It appears that the officers of the regiment united in a memorial to the legislature of South Carolina, representing that many of the men under their command were entirely destitute of blankets, and were therefore exposed not only to great suffering, but to the loss of health, and even of life itself. The legislature humanely interposed and appropriated the sum of $7,500, which was applied to supply those men with blankets who

were destitute of that necessary article. The account for the blankets thus furnished has been rejected by the United States, on the ground that the troops in the case in question, having been called out only for *six months*, were not entitled to blankets by the regulations of the army.

Although the issue of these blankets was not authorized by the regulations of the Department of War, yet, as they were furnished under the exigencies of such pressing want, the committee feel no hesitation in deciding that this item ought to be allowed.

The last item submitted was for the payment of interest upon the sums advanced by South Carolina, for which she has not been reimbursed, and which were rejected by the officers of the treasury for the reasons already specified. As the claim for interest upon these advances is founded upon the same principle as upon the advances which have been already refunded, the committee are therefore of opinion that it ought to be admitted. South Carolina expended large sums on account of her militia in the service of the United States, the repayment of which she has never asked for. These expenditures were requisite for the uses to which they were dedicated, but it being supposed that they would not have been incurred by the United States, however flourishing her finances and resources might have been, no demand was made for remuneration. Other demands have not been preferred in consequence of the inability of the State to procure vouchers to establish them, which is to be attributed to the inexperience or negligence of officers, or to the hurry and confusion in which many purchases were made and distributed. From these causes, the loss which has been suffered by the State exceeds fifty-nine thousand dollars, exclusive of interest.

All the items for which payment is required by South Carolina from the general government, as well those which have been allowed as those which have been disallowed, have been examined by the committee. The evidence to substantiate the latter was acknowledged by the proper officers of the Treasury to be ample and satisfactory; they were rejected solely because they were inadmissible according to the regulations of the Department of War. Being inadmissible by these regulations, relief can only be afforded to the memorialists by the federal legislature. As the committee are of opinion that relief ought to be granted, they therefore report a bill.

PART I.

Statements and letters showing the circumstances under which the advances were made for which reimbursement is claimed by the State of South Carolina.

1st. Extracts from the message of Governor Alston to the legislature, with the accompanying papers marked A, B, C, D.

2d. Report of Committee of Foreign Relations.

3d. Statement of Colonel William Drayton, late a colonel in the army of the United States, then commanding the troops in the harbor of Charleston.

4th. Statement of General Tucker, now a member of the House of Representatives of the United States.

5th. Statement of Colonel Robert Y. Hayne, now a senator of the United States, quartermaster general of South Carolina during the late war.

PART II.

Statement of the drafts on the banks by the State of South Carolina out of which the advances were paid.

PART III.

Documents in support of the claim for arms and cannon balls, numbered from 1 to 6.

PART IV.

Documents in support of the claim for blankets.

PART V.

1st. The rejected items of the account presented by the State of South Carolina, with the reasons for such rejection—E.

2d. The account acknowledged and paid by the United States—F.

3d. Summary of the claims of the State—G.

PART I.

Extracts from a message, No. 1, of his excellency the governor of South Carolina, delivered to both branches of the legislature September 16, 1813.

"FELLOW-CITIZENS: Sensible of the inconveniences to which many of you would be subjected by a meeting at this season, it was with unaffected concern that I found myself constrained to exercise the constitutional power of convening you. But while a just regard to the duties devolved upon me rendered the exercise of that power unavoidable, I had too much confidence in your patriotism not to feel assured that all private considerations would be lost in your devotion to the public service. The period in which we live is a period of sacrifices, and it becomes men worthy of the splendid destiny allotted to our beloved and favored country not only to make them but to make them with cheerfulness.

"From these ravages, so essentially disgraceful to those who have committed them, South Carolina has hitherto been happily exempt, nor is it probable, from the nature of her sea-coast, that she will at any time be much exposed to them Accessible at two or three points only, by the larger vessels of the enemy, the judicious application of a very moderate force would place us beyond the reach of any serious injury.

But while our coast is thus unfriendly to the operations of ships of the line, or even frigates, indented with numerous bays and inlets, it leaves us vulnerable at many points by the light cruisers of the enemy. Of this advantage has not failed to be taken. While the blockading squadrons generally stationed before our ports rendered all outward communications imminently hazardous, if not impracticable, privateers and armed barges, fitted out for the occasion, have at different intervals infested every sound and inlet from the Savannah to Winyaw. At one time all water communication with Charleston, whether from the northern or southern districts, was completely cut off: not the smallest craft could pass without risk of capture. The inconveniences to which our fellow-citizens generally, and the serious losses to which many of them were thus subjected, could not fail to excite a proper interest Sensible of the importance of preserving safe at least the inland coasting trade, and justly apprehensive that these inroads, if permitted with impunity, would be extended from our waters to our shores, I felt it incumbent upon me to lose no time in adopting measures for repressing them. To effect this a suitable number of cannon, adapted to the purpose, were directed to be mounted on travelling carriages, and detachments from the militia, under the command of Lieutenant Colonel Youngblood, ordered to take post at the most exposed points. Considering the co-operation of a certain naval force indispensable to the full attainment of the object in view, application (of which A is a copy) was at the same time made to the Navy Department for such number of gun-boats and barges as were deemed adequate to the purpose. To this application no official answer has yet been returned; but informal assurance has been received that the naval force allotted to this State will be increased as soon as circumstances shall permit. Believing it incumbent upon the general government to provide for the defence of each member of the Union, representations (marked B) were also addressed to the War Department, in the hope of inducing such an addition to the regular troops here as might obviate alike the inconvenience and expense of calling out the militia, unless in the event of a serious descent. The answer of Mr. Secretary Armstrong (marked C) will sufficiently impress upon you the expediency of providing from our own resources such means as shall be deemed requisite to our better security.

"There is another subject intimately connected with the business of defence, which I avail myself of this occasion to bring to your view. It is the want of a manufactory of arms in this State. During a time of peace there was little difficulty in procuring arms, either from the other States or from Europe; at present the difficulty amounts almost to an impracticability. It is suggested to you how far it may be prudent either to establish such a manufactory, at the expense and under the direction of the State, or to extend to them such patronage as may induce a similar establishment by individuals.

"Aware of the general solicitude at this season for an early return to your families and friends, and as another opportunity of communicating with you will so soon present itself, I forbear to offer for your consideration any other subjects, by the short postponement of which the public service will sustain no injury.

"I beseech the merciful and Almighty Disposer of Events to have you under His protection, and to direct your deliberations to the honor, the happiness, and the true interests of our beloved country.

"JOSEPH ALSTON.

"COLUMBIA, *September* 16, 1813."

A.

Letter from Governor Alston to the Secretary of the Navy, dated May 30, 1813.

SIR: The frequent representations made by my predecessor to the department over which you preside cannot have left you unapprised of the very defenceless condition of the sea-coast of this State. The policy and necessity of extending to us the aid of the general government were so obvious that it was not unreasonably expected they would before this have obtained for us your consideration. As other matters, however, doubtless more urgent, if not more important, seem to have occasioned our situation to be overlooked, I beg leave very respectfully, but very earnestly, to invite your attention to it.

From the nature of our coast, it is only at one or two points that anything is to be apprehended, except the predatory attacks of light vessels. Aided by the local facilities of defence, the judicious distribution of a few gun-boats and barges would have rendered us secure. The utmost vigilance of the enemy's squadrons could only have intercepted our foreign and outward coasting trade. The inland navigation, from North Carolina to Georgia, would have been carried on without interruption. The advantages of preserving the inland navigation thus open and free from annoyance are too apparent to require comment; they are, nevertheless, under the present state of things, completely lost to us. Encouraged by the strange apathy exhibited on this interesting subject, and fully apprised *that not a single measure of defence has been adopted*, the enemy have gradually extended their depredations to almost every creek and inlet on the coast. The smallest barge can no longer pass from Georgetown to Charleston, or from Charleston to Beaufort or Savannah, without imminent danger of capture. In a little time, there is every reason to apprehend, these depredations will be extended still further. Georgetown, the *entrepot* of the finest and richest part of South Carolina, which receives for exportation all the productions of the Waccamaw, Little Peedee, Great Peedee, Black river, and Sampit, may at this moment be burnt or laid under contribution by a privateer of a single gun. Bull's bay, which completely commands the inland navigation to this city from the northern parts of the State of North Carolina, is at present entered by the most inconsiderable barges of the enemy with impunity; indeed, it is but a few days since that the squadron of light vessels blockading our harbor very leisurely watered and obtained supplies of fresh provisions on Bull's island. Apprised in time of their intention, a plan was immediately formed for intercepting them, which, there is every reason to believe, would have eventuated not only in making prisoners of the watering parties, but in the capture of two brigs. On consulting, however, with Commodore Dent, I had the mortification to find that, under late instructions from you, the loan to the State of even a single barge was peremptorily interdicted. I need not add that the contemplated enterprise was necessarily abandoned.

Stono inlet, which commands the rear of Charleston, through which the enemy, in four hours after entering it, might fire the city without the smallest risk to himself, is at present open to the most contemptible invader.

North Edisto inlet, a few miles only more remote from Charleston, is similarly situated. Surrounded with valuable and highly improved settlements, the smallest privateer might run up, and in the course of six or eight hours destroy property to the amount of $100,000.

St. Helena sound, which receives Pon Pon, Ashepoo, and Combahee rivers, has been, and without some more efficient exertions will doubtless continue to be, the scene of frequent and considerable depredations. One or two small schooners of the United States are occasionally on this station, but as it is well known to the enemy that they are frequently obliged to visit Beaufort and Charleston, their movements are watched, and the moment of departure is the signal for some new capture.

The constant danger to which Beaufort is exposed is scarcely less than that of Georgetown. At each of these places there is a thing *called a fort*, but at neither have the United States *a single cannon ball or a pound of powder*. Were these forts, however, even properly constructed, and properly provided with the munitions of war, they would still afford a very incompetent protection. The one at Georgetown, from its situation, could only bring its guns to bear upon the enemy for a moment; the one near Beaufort could only be engaged with an enemy who should encounter it from choice, for the navigation of Broad river is even better than that of Port Royal river, and an enemy, by ascending the former, might effect a landing at about a mile from the town without the slightest possible interruption from the fort.

This, sir, is a sketch of our situation. Under the expectation that it would before this have engaged the attention of the general government, I have hitherto forborne to avail myself of the resources of the State; but the late frequent depredations of the enemy, and the just apprehension that these depredations will become still more serious and extensive, render more decisive measures, in my opinion, indispensable. I have ordered out, therefore, to the most exposed points of our coast, detachments of State troops, which preparations are made to increase as occasion shall require. To give complete efficiency to this force, however, either as regards the defence of the coast or especially the protection of the inland navigation, it is essential to obtain for it the co-operation of a certain number of gun-boats and barges. From the local circumstances which distinguish most of the inlets I have mentioned, fixed batteries could not be rendered of much avail, without an expense so enormous that it would not be expedient to incur it. A comparatively trivial sum, on the other hand, appropriated to the species of defence suggested would afford an ample security. With ten or twelve gun-boats, (attended each by a barge or two,) and as many hundred men, judiciously distributed on our coast, Charleston would be the only point of any solicitude to us. Requiring so little, will it be too much, sir, for the State of South Carolina to expect that that little will not be withheld? Addressing myself to your department, I allude, of course, only to the gun-boats and barges. I beg leave merely to add that, should circumstances render it impracticable at present to allot more to this quarter, even two gun-boats stationed in Winyaw, two in Bull's bay, as many at the junction of Broad and Port Royal rivers, and the two schooners now in that neighborhood constantly stationed in St. Helena sound, would constitute an auxiliary force not a little to be desired.

I have the honor to be, sir, with great respect and consideration, your obedient, &c.

B.

CHARLESTON, *May* 31, 1813.

SIR: The copies I have the honor to enclose of my communications to Major General Pinckney and Colonel Drayton, commanding the United States troops at this station, will explain to you the measures I have deemed it expedient to adopt for the better defence of our coast. Relying upon the protection of the general government, I have hitherto considered it unnecessary to avail myself of the resources of the State; *existing circumstances, however, have rendered a resort to those resources indispensable.* A reference to my letter to General Pinckney will show the situation in which the important posts of Georgetown and Beaufort had been left. In the four forts defending the harbor of Charleston, which no military man would consider properly garrisoned with less than 2,500 men, there are not at this moment more than 400, of which number I am officially informed there are 180 fit for duty. With the enemy almost daily on our coast, and, as hourly occurrences demonstrate, perfectly informed of our situation, it is only matter of astonishment that the outward posts of Fort Moultrie and Fort Johnson, which are totally unprotected in their rear, have not before this been carried by assault, and the cannon spiked.

Except at this place and Port Royal, the nature of our coast affords sufficient protection against the larger vessels of the enemy; but it is so indented with bays and inlets that it is assailable at almost every point by light cruisers and privateers. This description of vessels have already commenced their depredations, and there is every reason to believe will extend them, if not repressed, still further. To afford protection to the most exposed parts of the coast, and to preserve the inland navigation as far as shall be practicable free from interruption, a detachment of State troops has been ordered out, who will form a chain of posts between Charleston and Beaufort. Another detachment will be stationed on Bull's island, which, completely commanding the inland coasting trade from the northern part of this State and North Carolina to Charleston, it is of the utmost consequence should be closed against the enemy. Aided by ten or twelve gun-boats, with a suitable number of barges, 1,000 or 1,200 men judiciously posted will leave us nothing to apprehend. Should the representations made to the Secretary of the Navy obtain for us the small naval force desired, Charleston will be the only point about which any solicitude will be felt. This solicitude, which is general and well founded, compels me earnestly to invite your attention to the very inefficient number of regular troops allotted to the defence of our capital; the propriety of protecting the coast generally by other troops than militia is also respectfully submitted to your consideration.

I have the honor to be, sir, with high respect and consideration, your obedient servant,

JOS. ALSTON.

Hon. J. ARMSTRONG, *Secretary of War.*

C.

The Secretary of War to the governor of South Carolina.

WAR DEPARTMENT, *June* 21, 1813.

SIR: I have the honor to acknowledge your excellency's letter of May 31, and to inform you that the subject of seaboard defence generally is now *before Congress*. When the means are granted by that body, I shall have the pleasure to communicate with your excellency relative to measures for the further protection of South Carolina.

I beg you to accept the assurances of the great respect and consideration with which I have the honor to be your excellency's most obedient, humble servant,

J. ARMSTRONG.

His Excellency the GOVERNOR *of South Carolina.*

D.

Letters from Governor Alston to Colonel Drayton and General Pinckney.

HEADQUARTERS, *Charleston, May* 31, 1813.

SIR: In consequence of the removal from this harbor of so many of the United States troops, I have deemed it expedient to order out a detachment of the militia, under the command of Major Howard, consisting of two companies of artillery, two companies of infantry, one rifle company, and one troop of cavalry. These troops, intended as a reinforcement to your command, are now ready to march, and will assume any position you shall point out. Major Howard has instructions to place himself under your command, and conform on all occasions to your orders.

Colonel DRAYTON, *of the United States Army.*

HEADQUARTERS, *Charleston, May* 29, 1813.

SIR: Having been informed by Colonel Drayton of the *very exposed situation of the forts in this harbor, in neither of which there are forty men fit for duty*, and as the cruisers of the enemy are daily on the coast, sometimes *sounding the bar*, I have deemed it expedient, and conformable to the spirit of the communication I had the honor of receiving from you just before your departure from this place, to issue the enclosed general order. Colonel Drayton, who, in the obvious facility with which either Fort Moultrie or Fort Johnson might be carried by a handful of the enemy, perceives how much both his reputation as an officer and the safety of the city are involved, and is therefore anxious to be reinforced, informs me, nevertheless, that he has no orders on the subject, and has neither been vested with authority to receive the detached militia into the service of the United States, nor even to provide them while on duty with rations. Presuming that Colonel Drayton's not having been apprised of your communication to me, so far at least as related to his co-operation, nor furnished with corresponding orders, was merely the result of the pressure of other business which must have occupied your attention; and believing it essential that the reinforcement detached should not be delayed, I have not hesitated to direct the commissary general of this State to provide for the detachment the same supplies as are provided for troops of the United States. Reimbursement for the advances thus ordered on account of the general government can be made on your return. It is desirable, however, that orders should be issued for supplying the detachment through the ordinary agents of the United States as early as shall be convenient. In detaching these troops from *Charleston* I have acted from what was conceived the urgency of the occasion. Should the aid of the militia be required for any length of time, it is intended to relieve them by ordering down such troops as you may judge necessary of that part of the quota of this State organized in the upper division. I pray you have the goodness to communicate to me your wishes on this subject. A memorial, which I understand has been transmitted to you by the intendant of Georgetown, will have apprised you of the danger of that post. The frequent approach of the enemy to that harbor, and the accurate and constant information which it is perfectly ascertained they regularly receive of our situation and movements, render it by no means improbable that the condition of what is *called* the *fort* might invite the visit of a marauding party. To repress, as far as practicable, attempts of that kind, Captain Brittain, who stated *that he had not a single cannon-ball or a pound of powder, was furnished before my departure with an order on the State arsenal in that vicinity for any article he may require on loan for the United States service.* He has accordingly mounted some 12 and 9-pounders, the only cannon there for which we had ball, which he will keep till a supply of ball and powder is received for the larger pieces belonging to the United States. In consequence of representations from Beaufort, stating that the United States troops in that quarter were still literally *destitute of every kind of ammunition*, and the alarm excited by the capture of certain vessels on the inland voyage to that place, within a very short distance of it, I have directed the keeper of the State arsenal there likewise *to loan to the United States officer commanding the fort any articles he might require. In supplying these deficiencies in the appointments of the United States troops, it is with the same spirit with which I shall always co-operate with them for the common defence;* but I think it right to observe that the military equipments of the State are too inconsiderable to be relied on. You will of course take such order as you shall deem proper for more certain and regular supplies from the general government. As your instructions were stated to relate merely to the defence of our *fortifications*, and no hope was entertained that the aid of the United States would be extended to other points, I have been induced, as you will perceive by the enclosed general order to General Cuthbert, to order out a detachment of State troops as well for the protection of our maritime frontier as to prevent the interruption lately suffered by our inland coasting trade. The troops for this purpose will be increased as occasion shall require; but

it is considered essential to the complete attainment of their object that they be aided by a naval force. Confident from your accurate knowledge of our local situation that your opinion will coincide with mine, it would be highly gratifying to me to have the weight of your representations to the Navy Department added to my own.

I have, &c.

Hon. Major General PINCKNEY.

HOUSE OF REPRESENTATIVES OF SOUTH CAROLINA.

DECEMBER 17, 1814.

Mr. HAYNE submitted the following report:

The Committee of Foreign Relations, to whom was referred so much of the governor's message No. 1 as relates to our foreign affairs, report:

That the history of the war in which the United States is now engaged must swell the bosom of every patriot with honest pride. Remote from the convulsions, and free from the vices which it is the nature of despotic governments to create, America, in the full enjoyment of rational liberty, cultivated the arts of peace. In the struggle for power which tore asunder the nations of the old world, America took no part; happy at home, she looked abroad only to extend the hand of friendship to all the nations of the earth. It was the monstrous injustice of Great Britain, her long-continued injuries, unprovoked aggressions, and unheard of insults, that overcame the patience of the American people, and roused them to determined and manly resistance. As in the origin, so in the progress of this war, the most earnest desire for peace has been manifested by the American government. Such, however, has not been the disposition displayed by the enemy. Deaf to the calls of justice, he has waged a most cruel and sanguinary war, in violation of all the maxims held sacred by civilized nations, of the voice of humanity, and the mandate of heaven. In devastating our fields, burning our cities, and devoting to the scalping knife the helpless and the innocent, Britain has "shut the gates of mercy on mankind," and taught the American people that they have nothing to expect but what they can acquire by the sword. To these *injuries* has now been added the *insult* of demanding, as the price of peace, terms the most degrading to the American people—terms "which would inflict the most vital injury on the United States, by dismembering their territory, leaving their frontier exposed to British invasion and Indian aggression—by the loss of their territory—a portion of their citizens, and the admission of a foreign interference in their domestic concerns"—terms which should only be offered to a conquered country, and (to use the language of the American commissioners) "will only be a fit subject for deliberation when it becomes necessary to decide upon the expediency of an absolute surrender of national independence." The spirit, however, which has met and subdued the enemy on the ocean, on the lakes, at Plattsburg and at Chippewa, still exists in our country, and that spirit assures us that America can have no peace on such conditions. Whatever political differences may exist among the people of these United States, no true American will desert his country in such a struggle. We have asked for peace, and have met with insult. What then remains for a free and magnanimous people but to call into action all the energies of the nation, and by one great effort to speak to the interests, if we cannot speak to the justice of the enemy. Every patriot is now required to rally around the standard of liberty, to support the Constitution of his country, and to aid the government in every measure for the vigorous prosecution of the war. Impressed with these sentiments, the legislature of South Carolina do adopt the following resolutions:

1. *Resolved*, That we consider the present war as founded in justice and forced upon the United States by the aggressions of Great Britain.

2. *Resolved*, That we regard the terms offered by the British commissioners at Ghent as an insult to the American people, and we do highly approve of the "unanimous and decided negative" of the American commissioners.

3. *Resolved*, That we will cordially support the government in the vigorous prosecution of the war until a peace can be obtained on honorable terms, and we will cheerfully submit to every privation that may be required of us by our government for the accomplishment of this great object.

IN THE HOUSE OF REPRESENTATIVES, *December* 20, 1814.

Resolved, That this house do unanimously agree to the within report.
Ordered, That the same be sent to the senate for their concurrence.

By order of the house: R. GANNT, *Clerk of the House of Representatives.*

IN THE SENATE, *December* 21, 1814.

Resolved, That this house do concur with the house of representatives in the foregoing report.
Ordered, That the same be returned to the house of representatives.

By order of the senate: J. MURPHY, *Clerk of the Senate.*

Colonel Drayton's statement.

In May, 1812, being then lieutenant colonel of the 18th regiment of United States infantry, I was ordered to the command of Charleston harbor, within which were three forts, partly garrisoned by regular artillerists and partly by militia of the State. In the neighborhood of Charleston a detachment of militia infantry was posted, also subject to my orders. Shortly after entering upon my duties, and shortly before the declaration of war, I ascertained that there was an almost absolute destitution of ammunition and

military stores of every description. To the best of my memory there was not a sufficient quantity of powder and ball for one discharge of the artillery in the different forts, which I made the subject of a communication to the Secretary of War, who replied to me that the wants I had pointed out would be remedied as soon as practicable. Some small supplies of articles needed were furnished; within what space of time I do not recollect.

Upon the appearance of a British squadron within a few miles of the forts, I again addressed a letter to the Secretary of War, stating to him the appearance of the British squadron, our expectation of an attack being made by it upon the forts, and that we had not a sufficiency of powder and ball for our defence, even should it be necessary for us to keep up a fire but for a short time. I cannot say precisely what was the answer I received from the Secretary, but my impression is that it was similar to that which had before been given.

I continued in the command of the harbor of Charleston and of the troops in its vicinity from May, 1812, until May or June, 1814, when I left the State and proceeded to the north, where I remained until the peace. During the whole time that I was in this command there never was such a supply of powder, ammunition, and military stores belonging to the United States as was nearly adequate, during a war, for the troops in the forts in the harbor. Had a requisition been made by the State authorities upon the officers of the United States for arms or other military stores for the militia of the State in the service of the general government, for the reason which I have stated, such a requisition could not have been complied with.

WILLIAM DRAYTON.

WASHINGTON, *January* 18, 1828.

Statement of General Tucker.

Starling Tucker, a member of Congress from South Carolina, appeared before the committee and stated: That he commanded, during the late war, one of the regiments called into actual service, and whose service has been since recognized and paid for by the United States. My regiment, when called out, was ordered to march to the seaboard, a distance of about two hundred miles. Neither baggage nor provisions being provided by the United States, it became absolutely necessary for the commanding officer to provide wagons for the transportation of the necessary baggage and rations to the place of destination; and for this purpose, as well as I now recollect, I think about nineteen wagons were employed, and I well recollect that not one was employed beyond what was absolutely necessary. The rations were not only for the use of the regiment on the march, but for its subsistence after it arrived at the place of destination; at which place no rations were provided, except some damaged flour, not fit for use, and some spirits which had been furnished by the State.

STARLING TUCKER.

Statement of Colonel Robert Y. Hayne.

On the 16th of June, 1812, I accompanied (as a lieutenant) a detachment of militia, composed of volunteers and drafted men from Charleston, S. C., to Fort Moultrie, where we were mustered into the service of the United States. A few weeks after the war was declared the detachment joined the regiment to which it belonged, consisting of ten full companies, at Haddrell's Point, in the harbor of Charleston. While at that station, in consequence of the destitute condition of many of the men, the officers united in a memorial to the legislature, praying for a supply of blankets, which was furnished accordingly. I believe all the facts stated in that memorial to be strictly true. In the progress of the war, and throughout the most trying period of it, I was *quartermaster general* of the State, and at the same time a member of the legislature and chairman of the committee of military affairs. In these situations I became thoroughly acquainted with the condition of the State in relation to its pecuniary resources and means of defence. It became my duty, as *quartermaster general*, (according to the organization of the *quartermaster general's* department, under the laws of the State,) to inspect the arsenals, take an accurate account of the arms and munitions of war, of every description, and, to a certain extent, to superintend the execution of the measures adopted for the general defence. As chairman of the military committee, every question which related to the means of carrying on the war (so far as the State of South Carolina was concerned) fell necessarily under my examination. From these sources I became, of course, well acquainted with all the proceedings of the State touching military affairs. Without attempting, after so great a lapse of time, to speak accurately as to dates or the order of events, I think I cannot be mistaken in any of the material facts which have any bearing on the claim of the State now before the committee. It is very certain that the federal government *did not provide* (and I presume they were unable to provide) an adequate defence for the State, at any period during the war. I always understood that the United States troops within the limits of the State were altogether insufficient in number, and that cannon, small arms, and, indeed, all the munitions of war, were either wholly wanting or so insignificant in amount as to leave the sea-coast almost defenceless. I well remember that on making a rigid examination of the military resources of the State, for the express purpose of ascertaining *how far she could aid the federal government in the defence of the country*, I discovered, and so reported, that our means of defence were in no one respect adequate to the emergency; and yet at that time much had been already done by the State to put her citizens in a condition to repel any sudden incursion. I know that when it was discovered that the federal government was *unable* to protect the State of South Carolina, (for in the most trying period of the war it was never believed that they were *unwilling* to do so,) the resolution was firmly and unanimously taken by the legislature and people of the State to defend themselves to the whole extent of their resources. This resolution was steadily adhered to up to the termination of the contest; and from the spirit then manifested I have no doubt that, had the war continued, the State would have borne the whole expense of its own defence, at least so long as she possessed either funds or credit. I well remember two facts strongly illustrative of the spirit which then animated the whole of South Carolina. The officers of the bank in which the State had invested all its funds (and from which during the whole war it was drawing an

interest) were required to state how long and to what extent the bank could continue to furnish money as the public exigencies might require, before its capital, as well as its credit, should be utterly exhausted; and I also remember that, on a communication being received from General Pinckney, informing the governor of the want of funds, on the part of the federal government, even to sustain the troops then in their service, the legislature immediately directed a large sum (I think upwards of two hundred thousand dollars) to be advanced to the officers of the United States, to be refunded or accounted for at some future period. About this time a brigade of regular troops was ordered to be raised, and $500,000 appropriated for the defence of the maritime frontier. It was under such circumstances that the State of South Carolina made nearly the whole of the expenditures for which reimbursement has been claimed of the United States. Muskets, rifles, pistols, swords, cannon balls, and indeed all the munitions of war, were manufactured or purchased, because the United States had not supplied them, and, as we understood and believed, were unable to supply them. The militia were called out, from time to time, and furnished with provisions and transportation by the State, as the exigencies of the country required, and the arsenals of the State, as well as its treasury, were freely thrown open to the officers of the federal government. The State did not stop to consider what portion of these expenditures might be justly chargeable to the United States—much less in what form the accounts were to be kept, or the requisitions to be made, in order to entitle herself hereafter to remuneration. She went on to do what was deemed necessary to sustain the war and defend the country, without inquiring when or how her claims were to be adjusted. When, after the peace, this question came to be considered, commissioners were appointed to determine what portion of the expenditures of the State during the war ought to be charged against the United States. A very large proportion of these expenditures (probably more than half) were considered as a fair contribution by the State towards her own defence, and the balance only has, it appears, been claimed of the United States, of which upwards of one hundred thousand dollars have been *disallowed*, for the reasons stated on the account itself. On looking over these *rejected items* I can only say, from the general knowledge I possess in relation to them, that it is very certain that the amounts claimed by the State were necessarily expended, in consequence of the failure of the United States to furnish articles essential to her defence, and that those articles were obtained on the best terms, and in the only mode in which it was then possible to procure them; and that the officers employed by the State were the only agents then under her control through whom it was possible to carry on her military operations.

ROBERT Y. HAYNE.

WASHINGTON, *January* 18, 1828.

PART II.

Sums drawn from banks, out of which the advances were made by the State of South Carolina for the United States.

STATE BANK, *Charleston, S. C, January* 15, 1827.

I hereby certify that the first twelve items on the first page of this sheet were paid to checks from the treasury office of this State on this bank, for the sums there stated, on the days on which they were severally charged; excepting the first item, which was paid on the 13th June, 1812; and the 5th item, which was paid on the 14th January, 1814.

SAMUEL WRAGG, *Cashier.*

BANK OF THE STATE OF SOUTH CAROLINA, *Charleston, January* 15, 1827.

I hereby certify that the items charged in this account, from August 14, 1813, to January 6, 1818, inclusive, were paid to checks from the treasury office of this State on this bank for the sums charged; and the credits from November 14, 1814, to December 23, 1816, were passed to the credit of the treasury at the dates expressed.

S. ELLIOTT, *President.*
A. HENRY, *Cashier.*

STATE TREASURY OFFICE, *Charleston, January* 15, 1827.

I hereby certify that it appears from the books of this office that, of the payments mentioned in the annexed account, the first twelve were made by checks upon the "State Bank," and the remainder by checks upon the "Bank of the State of South Carolina."

CHARLES M. FURMAN, *Treasurer.*

TREASURY OFFICE, *Charleston.*

I further certify that the payments made by the State Bank in the year 1814, specified in the annexed statement, were from a fund which the legislature had directed to be deposited in the Bank of the State of South Carolina, to be held by the said bank for the benefit of the State, in the same manner, and on the same terms, with which they held the funds from which they paid the remaining items in the above account.

CHARLES M. FURMAN, *State Treasurer.*

I do certify that the sums drawn out of the Bank of the State, as within mentioned, were advanced by the said bank to the said State, whereby the State was deprived of the interest which would otherwise have been received on said sums. The bank during that period has paid interest to the State on other sums in the possession of the said bank at the following rates, viz:

For the year ending on the 1st October, 1814, 1.85 per cent.; 1815, 16.08 per cent.; 1816, 13.16 per cent.; 1817, 11.92 per cent.; 1818, 8.38 per cent.; 1819, 7 23 per cent.

STEPHEN ELLIOTT, *President Bank of the State of South Carolina.*

Payments made from the treasury office in Charleston, in consequence of sundry appropriations made by the legislature, since the declaration of war against Great Britain in June, 1812.

NOTE.—The whole of the expenditures of the State of South Carolina for which remuneration has been claimed of the United States were taken from the sums drawn out of the bank as above stated.

ALEXANDER SPEER, *Comptroller General.*

PART III.

No. 1.

Colonel Bomford to C. J. Steedman, Esq.

ORDNANCE DEPARTMENT, *October* 15, 1821.

It has been directed on the part of the honorable the Secretary of War, that such of the cannon shot remaining from the purchases made by the State of South Carolina during the late war, for the troops called into the service of the United States, as may conform to the calibre adopted for the ordnance of the United States, and shall pass the regular inspection to be made by an officer appointed by the Ordnance department, will be received and accounted for by the United States at the present contract prices.

GEO. BOMFORD, *Lt. Col., on Ordnance duty.*

C. J. STEEDMAN, Esq., *Agent for State of South Carolina, &c., &c.*

No. 2.

Lieutenant Williams to Colonel Bomford.

WASHINGTON CITY, *May* 6, 1822.

SIR: Upon my arrival at Charleston, South Carolina, I commenced the inspection of the shot at the State arsenal, agreeable to my instructions. After inspecting 2,000 of the eighteen-pounders, and finding but 112 of the proper dimensions, which were much deficient in weight, I concluded that, if the shot of the other calibres were as defective as the eighteen-pounders, it would be unnecessary to inspect the whole quantity. I therefore examined 500 of each calibre, which gave the following results, viz:

Of 500 24-pounders, 43 were of the proper dimensions, the average weight of which was 21 lbs. 5oz.

Of 500 18-pounders, 28 were of the proper dimensions, the average weight of which was 16 lbs. 10½ oz.

Of 500 12-pounders, 184 were of the proper dimensions, the average weight of which was 11 lbs. 3½ oz.

Of 500 6-pounders, 48 were of the proper dimensions, the average weight of which was 5 lbs. 8 oz.

The diameter of the 24 and 6-pounders generally fell short, and the 18 and 12-pounders exceeded the established dimensions, and all were quite rough; the 12 and 6-pounders, in particular, were defective in this respect.

Finding the shot so generally defective, both in dimensions and weight, I considered it unnecessary to proceed further in the inspection, unless it should be desired by the agent of the State. The agent was at this time absent from Charleston. Upon his return, I addressed him a letter, communicating the result of the inspection as above stated, and requesting him to inform me if it was his wish that I should proceed. To which I received the following answer:

CHARLESTON, *March* 12, 1822.

SIR: I have the honor to acknowledge the receipt of your letter of the 9th inst., communicating the result of your inspection of a part of the shot purchased by the State of South Carolina during the late war, and that you had discontinued (owing to but few of the balls being of proper dimensions or weight) until you could learn my "wish and desire." I beg leave to request that you will continue until the whole are inspected, to enable me to make a proper representation or report on this subject, either to the War Department or the executive of the State, as circumstances may hereafter determine.

I have the honor to be, &c.,

CHARLES J. STEEDMAN, *Agent State South Carolina.*

Lieutenant W. E. WILLIAMS.

I therefore resumed the inspection, and in addition to those formerly examined I inspected 2,322 24-pounders, and 1,608 6-pounders, of which 94 of the former and 17 of the latter were of the proper dimensions. When I had proceeded thus far, I received the following communication from Colonel Steedman, upon which I discontinued the inspection altogether:

CHARLESTON, *April* 25.

SIR: Since I last had the honor of addressing you I have submitted your letter of the 9th of March to his excellency the governor, who has instructed me to inform you it is considered unnecessary for you to proceed any further in the inspection of the cannon balls in the arsenal at Charleston, as he does not consider the claim of the State to rest upon the quantity that may pass inspection, but that the United States is bound for the whole.

I am, respectfully, &c.,

CHARLES J. STEEDMAN, *Agent State South Carolina.*

Lieutenant W. E. WILLIAMS.

I examined the canister shot mentioned in my instructions. The 6-pounder canisters were much too small; they were filled with musket bullets. The 18-pounder canisters were too large, and defective in quality; they were filled with cast iron balls of various sizes, from ½ to 1½ inch, and of irregular shape, and very rough casting.

I have therefore to report that I did not approve nor receive any of the shot submitted to my inspection.

I am, very respectfully, your obedient servant,

W. E. WILLIAMS,
Lieutenant United States Artillery, on Ordnance duty.

Lieutenant Colonel G. BOMFORD, *on Ordnance duty.*

NOTE.—The diameters of the 6 and 24-pounder shot are from 1-20th to 1-10th of an inch less than the smallest established limit.

Comparison with English shot.

	24-pounder.	6-pounder.

At Charleston	5.477	3.417
	.70	.81

No. 3.

From Captain Wade to Colonel Steedman.

ORDNANCE DEPARTMENT, *May* 23, 1822.

SIR: All arms, &c., which have been delivered by the State to United States troops, or to militia called into service by the United States, and which shall not have been returned by the general government, shall be credited to the State.

Where arms have been delivered by the State to militia called into service by State authority, and subsequently recognized by the United States, the government to be responsible only for such arms as were captured by the enemy, or otherwise lost or destroyed, while said militia were in the service of the United States. Satisfactory vouchers for the delivery, return, capture, or loss of arms, to be produced by the party claiming credit therefor.

With regard to the charges for the repairs of arms, those only can be allowed where it is clearly established that the arms were delivered to a particular body of militia, in good order, and those same arms subsequently returned in bad order, and the degree of damage ascertained at the time of their return.

Respectfully, I am, sir, your obedient servant,

W. WADE, *Captain, on Ordnance duty.*

By order of Lieutenant Colonel Bomford.

No. 4.

ORDNANCE DEPARTMENT, *Washington, January* 17, 1827.

SIR: I have received your notes of the 16th and 17th instants, and in compliance with your request I communicate herewith an account, in which the balance due from the State of South Carolina to the United States, as stated on the books of the Third Auditor, has been carried to the account of arms due to the State, on the settlement made by this department in May, 1822.

By this arrangement, which has been approved by the Secretary of War, the number of muskets due to the State has been reduced from three thousand two hundred and sixty-seven, to two thousand four hundred and eighty-nine. The balance, together with that of other arms and accoutrements now due to the State, will be paid by this department in arms of the same or of different kinds, whenever desired.

I have the honor to be, respectfully, your obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance service.*

ALEXANDER SPEER, Esq., *Comptroller General of South Carolina.*

P. S. The Secretary of War wishes to be understood that his approval of the arrangement above-mentioned must be considered as subject to the established usages of the Treasury; and the measure cannot therefore be considered as final until it receives the sanction of the Treasury Department.

G. B.

GEO. BOMFORD, *Brevet Colonel, on Ordnance service.*

ORDNANCE DEPARTMENT, *Washington, January* 17, 1827.

No. 6.

ORDNANCE DEPARTMENT, *Washington, February* 6, 1827.

SIR: I have now to acknowledge the receipt of your letter to this department, of the 16th ultimo, and to state in answer, that in the settlement of May, 1822, of the accounts between the State of South Carolina and the United States, for arms and accoutrements, the following articles having been charged and sufficiently vouched for on the part of the State, were admitted to its credit, viz: 3,267 muskets; 40 pistols; 3,244 cartouch boxes and belts; 3,014 bayonet scabbards and belts; 1,582 brushes and wires; 210 screw drivers; 140 ball screws; 115 gun-worms.

An additional claim was made at the same time for the following arms and accoutrements, stated to have been delivered by the State of South Carolina to Sergeant John McCord, and Quartermaster Tandy Moss, of the militia, under General Moore, but the vouchers for which, not being satisfactory, were withdrawn, and consequently the State received no credit on account of them, viz: 750 muskets; 750 cartouch boxes and belts; 175 brushes and wires; 12 gun-worms.

It is also understood that the State has a further claim for a number of cannon balls, which has not been settled. The difficulty in regard to this item appears to be that they were of inferior quality, and remained on hand unexpended at the close of the war, and that the State required that the United States should receive them, such as they were, and to allow for them in the general account of supplies charged against the United States the current contract price. To this it was agreed on the part of the United States, so far as to receive and account as above, for any and all of the balls which should be found on inspection to be suitable for the public service; and an officer of this department was accordingly instructed on the 5th of February, 1822, to proceed to make the inspection preparatory to a settlement upon that basis. The officer, however, had not proceeded far in his inspections before, upon the request of the governor of the State, he discontinued his inspections; and so the matter has remained ever since.

It may be proper to add, in conclusion, that the same vouchers which sustain that portion of the account first above-mentioned embrace other articles also, which not being considered ordnance stores, or as appertaining to this department, were not included in any settlement made by it. The articles referred to are as follows, viz: 1,432 canteens; 740 camp kettles; 605 common tents; 60 officers' tents; 17,956 flints; 16 mess pans; 164 knapsacks.

Thus you have all the articles which have been claimed by the State of South Carolina, as well those which have as those which have not been allowed or decided on by this department.

Very respectfully, I am, sir, your most obedient servant,

GEO. BOMFORD, *Brevet Colonel, on Ordnance service.*

ALEXANDER STEER, Esq.,
Comptroller General of South Carolina, Columbia, S. C.

PART IV.

To the governor of the State of South Carolina.

The officers of the third regiment of State troops, in the service of the United States, stationed in the harbor of Charleston, beg leave to submit to the consideration of your excellency the following representation :

The troops under our command were called into service under very peculiar circumstances. Those who inhabited the interior parts of the State, "who earned their daily bread by the sweat of their brows," were (at the shortest notice, many of them at a moment's warning) taken from their homes, without being able to make any provision for their own wants, or those of their families. Destitute of every convenience, without blankets, almost without clothes, many of these men laid down their ploughs when their corn most needed them, and marched to this post, without any prospect of supplying these necessary articles. Deprived of the fruits of their industry, they are prevented from making that provision for their wants which they are accustomed to do at home. In addition to the shortness of the notice, there was another reason why these men came into service in an unprovided condition. They were, in almost every instance, led to believe that when they arrived here they would be supplied by the United States with every article necessary for their health and comfort; so strongly was this idea impressed on their minds, that many arrived here without a single change of clothes. The United States do not, under existing laws, allow clothing to troops engaged in their service for a shorter period than twelve months; and as the pay of a soldier is not sufficient to be of any consequence in the purchase of such articles, the men under our command have no prospect of being relieved from their present lamentable situation. The present season of the year does not make a blanket an indispensable article, but as our term of service embraces nearly two months of the winter, it is difficult for us to conceive how men can exist without blankets when almost destitute of clothing.

We represent, also, to your excellency, that our soldiers have no shelter from the heavy rains that fall at this season, being compelled to live in tents, which are by no means water-proof. Their sufferings from this cause have already been great, and they must daily increase. We trust that this plain representation of facts must be sufficient to bring to your view the destitute condition of many of the men under our command. Yet, under all these circumstances, under every privation, no murmur has escaped their lips, though the abundant supplies by the United States to the regular troops in this harbor was calculated, by contrast, to excite discontent. That the national government will hereafter make such provision for the militia in their service as to remove these evils we cannot doubt; but, in the meantime, they press heavily upon those who compose the first quota.

In bringing these things to the view of your excellency we have no consideration for ourselves. We feel ourselves, however, bound by every principle of humanity and duty to make this representation to you in behalf of those men, whose lives and whose happiness are, in a great measure, entrusted to our care. To see those brave men who, by coming forward at this time in the service of their country, have sacrificed their private interest, and manifested at least an inclination to do their utmost in the defence of her rights, and the promotion of her honor, without shoes, without hats, and almost destitute of blankets and of clothes, must be painful to our feelings as officers and men, more particularly as they generally manifest a disposition to do their duty with alacrity and zeal.

With regard to the inconveniences arising from living in tents, we have understood that they are about to be remedied by the erection of temporary barracks by the patriotic citizens of Charleston. You will be better enabled to judge than we can be how far this plan will afford the desired relief in this respect. With respect to the other subjects of complaint, we bring them before you in the most perfect confidence that whatever is proper to be done in this respect will be done by you. Whatever may be done by this State on this subject may perhaps be sanctioned by the United States so far as to make it a proper subject of charge against them ; and it is more than probable that such provision will be made for the future as will render unnecessary any other application to the State authorities.

JOHN RUTLEDGE, *Lieut. Col. 3d Regt. State troops.*

E. DUNNAN, *Ensign.*

Report of the Committee of the Whole on the representation of the officers of the third regiment of the quota of militia of this State.

The Committee of the Whole, to whom was referred the memorial of the colonel and officers of the third regiment of State troops, report: That the committee have had the same under their consideration, and recommend that the following resolution be adopted.

Resolved, That $7,500 be appropriated for the purpose of purchasing blankets for the quota of militia now in service. *Adopted.*

PART V.

Deductions from the accounts of the State of South Carolina on the settlement thereof, with the reasons for making them. Settlement dated September 21, 1826.

Account.	Voucher.	To whom and for what paid.	Amount.
		COLONEL J. CARSON'S ACCOUNTS.	
A	11	Jacob Lazarus, for blankets	$1,800 00
B	20	Blair, Napier & Co., for blankets	2,890 00
	23	Lewis Ogier, for blankets	557 00
	24	Simon Mairs, for blankets Disallowed; the foregoing are not proper charges against the United States.	408 00
No. 1	26	John Howard, for repairing magazine, (the voucher withdrawn)	760 00
	48	J. S. Barker, for scales, &c. $33 75 Amount receipted for 30 00	
		Overcharge disallowed	3 75
	66	Wilson Nisbett, for grape shot and cannon-balls, (referred to Ordnance department)	1,852 50
	67	T. Sullivan, for grape-shot, (referred to the Ordnance department)	8 80
No. 2	78	James Brown, for sundries used by the regiment of artillery, disallowed; (the nature of the articles is not stated; the regiment does not appear to have been in service.—See Colonel Stevens's letter)	29 50
	80	Wilson Nisbett, for cannon balls, (referred to the Ordnance department)	901 68
	81	William Smith, for carting cannon-balls	6 91
	82	Negro, for putting cannon-balls in the arsenal	2 50
	87	Wilson Nisbett, on account, for rifles, (referred to the Ordnance department)	2,000 00
No. 3	94	Charles Kiddall, for grindstones and saws. $69 79 Receipt for 68 79	
			1 00
No. 4	116,117,121	William Smith and others, for carting balls, (referred to the Ordnance department)	55 95
	126	Wilson Nisbett, for cannon balls, (referred to the Ordnance department)	4,000 00
No. 5	127	ditto ditto	3,500 00
	128	John Howard, for building barracks, (suspended for further explanation)	640 00
	129,131,132	William Smith and black cartman, for carting cannon-balls, (referred to the Ordnance department)	32 39
	138	Wilson Nisbett, for cannon-balls, (referred to the Ordnance department)	3,118 39
	139	Hire of stables for horses belonging to the State, disallowed; (not properly chargeable to the United States)	84 00
	147	E. M. Phelson, for sundries furnished James Brown, disallowed; (see remarks on voucher 78, account No. 2	16 94
	148	J. B. White, advance, disallowed; (a charge is subsequently made for all his disbursements.—See letter D)	508 00
	150	C. J. Steadman, advance, (withdrawn by the agent)	500 00
No. 6	151	J. Thomas, for stowing and piling cannon-shot, (referred to Ordnance department)	7 50
No. 7	----------	John Vaughn, for arms, &c., (referred to the Ordnance department)	14,312 41
No. 8	----------	ditto ditto	3,900 08
No. 9	1	Wilson Nisbett, for cannon-balls, (referred to the Ordnance department)	3,000 00
	2	Adam Caruth, for rifles, (referred to the Ordnance department)	2,500 00
		Richardson & Bennett, for drawing contracts for rifles, (referred to the Ordnance department)	10 00
	8,10,11,12	Negroes, for carting cannon-balls, (referred to the Ordnance department)	28 62½
	13	Wilson Nisbett, for cannon-balls, (referred to the Ordnance department)	1,115 37½
	14	John Thomas, sorting and piling cannon-balls, (referred to Ordnance department)	8 00
	15	Adam Caruth, for rifles, (referred to the Ordnance department)	2,500 00
	16	Negro, for carting balls, (referred to the Ordnance department)	7 72
	17	Wilson Nisbett, for cannon-balls, (referred to the Ordnance department)	1,357 81
	18	Thomas Martin & Co., for landing shot, (referred to the Ordnance department)	4 96
	19 and 20	Wilson Nisbett, for cannon-balls, (referred to the Ordnance department)	2,174 25
	21	John Thomas, sorting and piling cannon-shot, (referred to Ordnance department)	8 50
	22 and 23	Negro, for carting balls, (referred to the Ordnance department)	13 00
	24	John Thomas, piling shot, (referred to the Ordnance department)	3 50
	25	Wilson Nisbett, for cannon-balls, (referred to the Ordnance department	557 31
	26 and 27	Adam Caruth, for rifles, (referred to the Ordnance department)	5,000 00
	29	Wilson Nisbett, for cannon-balls and grape-shot, (referred to Ordnance department)	5,425 44
	28	Archibald Bryson, for gunpowder, disallowed; (the powder is stated in his receipts to have been sold *February* 27, 1816, and its cost, therefore, not properly chargeable to the United States	543 20
			66,154 99
		Colonel Carson's commissions, at 2½ per cent. on the foregoing sum of $66,154 99, is disallowed	1,653 88
		Total amount deducted from Colonel Carson's account	67,808 86
		Total amount of Colonel Carson's accounts, as charged by South Carolina	114,965 07
		Amount of Col. Carson's disbursements admitted to the credit of South Carolina.	47,156 21
		ACCOUNTS OF GOVERNOR MIDDLETON.	
	1, 6 and 7	J. B Earle, advances, suspended, (voucher for his disbursements wanting)	208 00
	5	Colonel Richard Moore, advance, disallowed; (charge No. 27 of Governor Middleton's account is for the entire amount of Colonel Moore's disbursements)	50 00
	19	William House, brigade quartermaster, for rations for militia commanded by Captains Hodge, Williamson, and McNeill, on the march to Haddrell's Point, in June and July, 1812, (including officers,) Captain Hodge appearing to have received from Paymaster Bay payment for all his subsistence, a deduction is requisite of	6 00
	20	Quartermaster Wm. House, for forage for Major Evans's horse, disallowed; (Major Evans received payment for forage from the time his pay commenced)	3 66

PART V.—*Deductions from the accounts of the State of South Carolina, &c.*—Continued.

Account.	Voucher.	To whom and for what paid.		Amount.
No. 9	21	W. Youngblood, lieutenant colonel, for disbursements suspended as to an advance to Captain Walker, (vouchers for the disbursement of the money by him wanting).		$25 00
		General Alston, advance	$200	350 00
		Colonel Walker, advance	100	
		Colonel Rowe, advance	50	
		Suspended: their vouchers for the expenditure of the sums charged must be produced.		
		Total amount deducted from Governor Middleton's account		642 66
		Total amount of Governor Middleton's account, as charged by the State of South Carolina		2,705 15
		Amount admitted to the credit of South Carolina on Governor Middleton's account.		2,062 49
		ACCOUNTS OF COLONEL THOMAS LEHRE.		
No. 1	3	James Roddy, for rations for Captain Prioleau's company, disallowed; (the company was part of Major Howard's detachment, and a larger number of rations are charged for, in voucher No. 2 of Colonel Lehre's account for that detachment, than it was entitled to for the full period of its service)		11 15
	14	James Roddy, for rations for Major Howard's detachment, (see note No. 3)		30 00
	18	Wm. Clements, treasurer, amount refunded to the State treasury by Colonel Lehre, erroneously charged to the United States		314 52
No. 2	4 and 5	Sundry persons, for provisions purchased for the regiment commanded by Colonels Carter and Youngblood, in service from December, 1813, to March, 1814, $18,681 96.		
		On examination of the rolls of the regiment it has been found that the number of complete rations all the officers and men were entitled to for the full period of service, and for travelling allowance (after deducting the rations paid for by the paymaster) is $79,860; which, at 20 cents per ration, amounts to	$15,972 00	
		It appearing by the receipt of the quartermaster of Colonel Tucker's regiment that there were turned over to him by Tandy Moss, the quartermaster of Colonel Youngblood's regiment, 37 barrels of flour, 1 barrel of pork, 4 barrels of vinegar, and 272 bushels of salt, and allowance is made for the same of	420 50	
			16,392 50	
		Difference between $18,681 96 and $16,392 50, disallowed		2,289 46
No. 4	49	Richard G. Warring, for rations, for guarding specie, suspended for further explanation		44 80
No. 2	2 and 3	G. R. White and Richard Wall, for wood and candles for magazine guard, near the jail, in November, 1813, disallowed		25 25
		Total amount deducted from Colonel Lehre's accounts		2,715 18
		Total amount of Colonel Lehre's account, as charged by South Carolina		23,964 68
		Amount admitted to the credit of South Carolina on Colonel Lehre's account		21,249 50
		ACCOUNT OF COLONEL COCHRAN, PAYMASTER GENERAL.		
		The charges made by the State are—		
		For this sum paid by him, as per his account current, dated April 2, 1814	$34,174 14	
		For this sum paid per his account current, dated January, 1816, and book of accounts, pages 35—42	13,413 93	
		Amounting to	47,588 07	
		The foregoing charges are presumed to be founded principally on vouchers for Colonel Cochran's advances to enable them to pay off the militia and magazine guards.		
		The fact as to the first of them cannot be ascertained for want of the account current; that the second charge was of this description appears by the pages referred to. It is not on receipts for advances that any allowance can be made by the United States, but on the vouchers of the several paymasters for their payments to the militia, &c.		
		If from Colonel Cochran's account be deducted for pay, &c., of militia and magazine guards, which are separately charged for by the State, (see letters F, I, K, L) there will remain to be charged, in respect of his accounts, only the following sums, viz:		
		For pay, &c, of the regiment commanded by Lieut Colonels Carter and Youngblood, (see Colonel Cochran's book, pages 28, 30, 32, and 40)	$26,678 66	
		For pay of Major Howard's detachment, (see page 33 of same book)	1,438 86	
		For pay of magazine guards, of which James Scott was paymaster	283 84	
		For pay, &c., of Lieut. Colonel Youngblood, as engineer	119 40	
		For pay, &c, of Patrick Noble, while paying off Col. Youngblood's regiment	238 00	
		For pay of Colonel Cochran, as paymaster general	945 00	
		For stationery and blank forms	24 00	
			29,727 76	
		Total amount of Col. Cochran's account brought forward	47,588 07	
		Leaving an overcharge of		17,860 31

PART V.—*Deductions from the accounts of the State of South Carolina, &c.*—Continued.

Account.	Voucher.	To whom and for what paid.		Amount.
		To which add for sundry overpayments, &c., as follows, viz:		
		Lieut. Col. Youngblood's regiment.		
No. 2	5	Captain P. B. Rodgers, pay overcharged	$0 08	
		Six rations twice charged	1 20	
				$1 28
	7	Captain Wm. Ware, his pay and subsistence while marching from home to the place of rendezvous, sixty miles, are charged for four instead of three days, and his pay is otherwise overcharged sixteen cents		2 05
	10	Captain Samuel Scott, pay and subsistence charged from December 6, 1813, to January, 1814; he is stated on the muster-roll to have left home on the 8th of December—two days therefore overcharged		3 78
	12	Adjutant George McMurphy, subsistence charged at three rations per day instead of two	$6 20	
		Forage undercharged	2 00	
				4 20
	22	Lieutenant J. T. Coleman, account overcharged		8
	24	Lieutenant J. C. Watson, account overcharged		7
	27	Lieutenant John Gray:		
		Pay and subsistence charged from December 6, 1813, and he is stated on the muster-roll to have left home on the 8th		2 73
	36	Ensign Lindsay Harper, pay and subsistence charged from December 6, 1813; and he is stated on the muster-roll to have left home on the 8th		2 09
	38	Ensign John Stevenson:		
		One day's pay and subsistence overcharged while marching from home to place of rendezvous		1 04
	39	Captain Samuel Scott's company:		
		For pay from December 6, 1813. Each individual is stated on the muster-roll to have left home on the 8th December.		
		Deductions requisite:		
		4 sergeants, at 76 cents	$3 04	
		4 corporals, at 69 cents	2 76	
		2 musicians, at 62 cents	1 24	
		47 privates, at 55¼ cents	25 97	
			33 01	
		Amount of roll $541 50		
		Amount charged 536 35		
			5 15	
				27 86
	40	Henry Wood, private of Captain Cheatham's company:		
		His pay is not receipted for, and Paymaster Noble has credited the sum as not paid by him		1 86
	41	Captain P. Halloway's company:		
		Overpayments as follows, arising from errors in calculation, viz:		
		Sergeant Hazell	$0 04	
		Corporal McMahon	9	
		Private Burnett	19	
		Private Malone	37	
		Residue of the company (except Wm. Little) one cent each	74	
			1 43	
		William Little underpaid	10	
			1 33	
		Amount of roll as charged $670 35		
		Its amount is only 665 09		
			5 26	
				6 59
	42	Captain John Miller's company:		
		Overpayments arising from errors in calculating the pay at thirty days to a month, instead of thirty-one, for services in December and January.		
		3 sergeants	$0 06⅔	
		3 corporals	5⅓	
		25 privates, at 1⅔	41⅔	
		27 privates, at 2⅓	62	
		1 private	15⅓	
			1 32	
		Amount of roll $624 40		
		Amount charged 623 86		
			54	
				78
	43	Captain Samuel Perrin's company:		
		Similar overpayments.		
		4 sergeants, at 3 cents	12	
		63 corporals, privates, and musicians, at 2 cents	1 26	
		1 private	12	
			1 50	
		Amount of the roll $597 63		
		Amount charged 596 96		
			67	
				83
		Captain B. Hatter's company:		
		Similar overpayments.		
		4 sergeants, at 3⅓	13⅓	
		4 corporals, at 2⅔	10⅔	

PART V.—*Deductions from the accounts of the State of South Carolina, &c.*—Continued.

Account.	Voucher.	To whom and for what paid.			Amount.
No. 2		Captain B. Hatter's company—Continued.			
		1 musician		$0 02	
		63 privates, at 2½		1 47	
				1 73	
		Amount charged	$646 40		
		Amount of the roll	636 80		
				9 60	
					$11 33
	45	Captain Frazier's company:			
		Pay of Jesse Bettis, who served 19 days as sergeant and 13 days as ensign, is over-calculated		$2 61	
		His pay as ensign is before charged, (see voucher 28)		8 39	
		Amount charged in respect of roll	$554 88		
		Its amount is only	553 93		
				95	
					11 94
	48	Captain John Key's company:			
		Overpayments occasioned by calculating the pay at thirty instead of thirty-one days to a month, for services in December and January.			
		4 sergeants, at 1⅔ cent		$0 06⅔	
		4 corporals, at 1⅓ cent		5⅓	
		66 privates, at 1⅔ cent		1 10	
					1 22
	49	Lieut. Col. William Youngblood:			
		Transportation of baggage charged for at 15 instead of 12 cents per mile, over-payment			2 35
	57	Major John Hodges:			
		Pay and forage overcharged		$5 70	
		Subsistence undercharged		20	
					5 50
	53	Adjutant George McMurphy:			
		He has charged for pay, subsistence, forage, and servant, for 9 days, while returning home after discharge, 135 miles; the distance entitled him to an allowance of only 7 days' pay and subsistence, and there is no law authorizing any allowance for forage or for pay and subsistence of a servant after discharge. The pay is, besides, overcalculated. Deduct, therefore, for—			
		His pay		$3 18	
		Servant's pay		2 44	
		Subsistence of both		2 60	
				8 22	
		Forage charged for, at $6 per month, $8 allowed by law—2 months and five days	$17 29		
		Sum charged	14 80		
			2 49		
		Account undercharged in paymaster's book	10		
				2 59	
					5 63
No. 2	55	Tandy Moss, quartermaster:			
		Overpayment			94
	56	Paymaster Pat. Noble:			
		He has been paid for 3 days' pay and subsistence, whilst returning home, more than he was entitled to, and for pay of a servant, and for forage for 12 days after discharge, (not allowed by law,) and his charges are otherwise wrong calculated.			
		Requisite deductions from his pay		$4 60	
		servant's pay		3 24	
		subsistence of both		3 48	
				11 32	
		Forage charged at $6 instead of $8 per month, allow the difference for 2 months and 5 days		1 83	
					9 49
	57	Captain Samuel Perrin:			
		Pay and subsistence charged for 3 days more than he was entitled to while returning home, and otherwise wrong calculated. Deduct for pay, $3 26; subsistence, 60 cents			3 86
	58	Captain John Cheatham:			
		Pay erroneously calculated, and travelling pay and subsistence overcharged.			
		Requisite deduction			2 45
	59	Captain Peter B. Rogers:			
		Overpayment for pay, (like cause)		$4 52	
		Subsistence undercharged		40	
					4 12
	60	Captain Samuel Scott:			
		Pay wrong calculated, and charged for three days more than he was entitled to while travelling home		4 64	
		Subsistence undercharged		60	
					4 04

PART V.—*Deductions from the accounts of the State of South Carolina, &c.*—Continued.

Account.	Voucher.	To whom and for what paid.		Amount.
No. 2	61	Captain John Miller:		
		Travelling pay and subsistence overcharged two days; his and his servant's pay prior to discharge short-charged one day.		
		Deduct for his pay	$1 85	
		Deduct for his subsistence	1 20	
		Pay of servant after discharge $2 38½		
		Allow for one day prior thereto, short-charged 25		
			2 13½	
				$5 18½
	62	Captain Benjamin Hatter:		
		Travelling allowance charged at 15 instead of 20 miles per day, and pay and subsistence over-calculated.		
		Deductions requisite for pay	$3 26	
		Deductions requisite for subsistence	1 80	
		Deductions requisite for forage, (to any allowance for which infantry officers are not entitled)	35 32	
				40 38
	64	Captain John Key:		
		Travelling allowance charged at 15 instead of 20 miles per day, and his charges wrong calculated.		
		Deduct for his pay	$1 94	
		Deduct for his subsistence	1 20	
			3 14	
		Allow for underchage in servant's pay prior to discharge	21	
			2 93	
		Servant's pay after discharge inadmissible	2 67

		Charges for pay of the paymaster general, disallowed by the Secretary of War		945 00
		Total amount deducted from Colonel Cochran's accounts		19,526 46
		Total amount of Colonel Cochran's disbursements charged by South Carolina		47,588 07
		Amount admitted to the credit of the State of South Carolina on Colonel Cochran's accounts		28,061 61
		ACCOUNT OF W. B. MITCHELL, QUARTERMASTER GENERAL.		
	6	Elam Shark, for cleaning and oiling guns, &c., disallowed, (not a proper charge against the United States)		50 00
	12	General William Butler, advance, disallowed; (this sum appears to have been paid over by General Butler to Colonel Mayo, and by him to Tandy Moss, the quartermaster of Colonel Youngblood's regiment, for the purchase of provisions, for which an allowance is made in Colonel Lehre's account)		500 00
	20	J. Murden, for boards and scantling, overcharged		50
	24	J. B. Earle, advance, disallowed, (no vouchers for his disbursements)		2,000 00
	25	J. B. White, for services as deputy quartermaster general, from October 1, 1813, to January 31, 1814, (suspended for further explanation)		396 00
		Advances to wagoners, to bear their expenses to camp Alston, at twenty cents each per day; (no voucher; suspended for explanation; hire is charged for every team employed in the transportation of baggage of Lieutenant Colonel Youngblood's regiment to camp Alston, at five dollars for every fifteen miles' travel, and the charges state the drivers to be included)		8 40
	28	J. B. White, for services as deputy quartermaster general from the 1st to the 28th of February, 1814, (suspended for further explanation)		96 00
	31	Gabriel Long, team hire, disallowed		170 00
	33	Samuel Scott, team hire, disallowed		40 00
	35	Agrippa Cooper, team hire, disallowed		170 00
	36	Jeremiah Mobley, team hire, disallowed		165 00
	52	Jeremiah Mobley, team hire, disallowed		170 00
		The foregoing five charges for team hire are disallowed under a decison of the Secretary of War, allowing only eight teams for the transportation of the baggage, &c., of Lieutenant Colonels Carter's and Youngblood's regiments.		
	53	J. B. White, for services as deputy quartermaster general from the 1st to the 31st March, 1814, (suspended for further explanation)		98 00
	58	Francis Baker, for keeping horses of the State, (suspended for further explanation)		24 00
	59	William Joyner, carting and storing corn for the State horses, &c., (suspended for further explanation)		25 00
	60	Samuel Hall, for superintending and delivering wagons and horses belonging to the State, (suspended for further explanation)		17 00
	61	Isaiah Wright, corn for the horses belonging to the State, (suspended for further explanation)		40 00
	63 & 65	John Thomas, services in the arsenal, (suspended for further explanation)		38 50

PART V.—*Deductions from the account of the State of South Carolina, &c.*—Continued.

Account.	Voucher.	To whom and for what paid.		Amount.
No. 2	66	John Spring, for a frame building in the arsenal yard, (suspended for further explanation)		$188 41
	70	John Schriver, for stocking muskets, &c., disallowed, (the charge not being a proper one against the United States)		508 00
	72 & 76	John Thomas, for service in the arsenal, (suspended for further explanation)		10 00
	74, 75, 80	William D. Brown, for work at the magazine guard-house; A. Beckman, for sashes for the magazine guard-house; John Stent, for posts for the magazine guard-house, (suspended for further explanation)		180 00
	82	Jeremiah Bulfinch, for transportation of ammunition from Charleston to Coosawatchie, January 31, 1815, (suspended for explanation; charges for transportation of stores from one arsenal or place of deposit to another are not proper charges against the United States, unless the articles were for militia actually in service, or the transportation ordered by a United States officer)		40 00
	84	M. Kelley, for knives, inadmissible		6 00
		Quartermaster general's account overadded		10
		Charge for munitions of war, loaned by the State to the United States, disallowed; the articles having been already paid for to the State by the United States, as appears by the receipt of Colonel James Carson, commissary general of the State, being voucher No. 8 of the account of Major Champlain, for the 3d quarter of 1814		3,516 70
		Total amount deducted from W. B. Mitchell's account		8,457 61
		Total amount of his disbursements, as charged by South Carolina		13,856 04
		Amount admitted to the credit of South Carolina on said Mitchell's accounts		5,398 43
		ACCOUNT OF SIMON MAGWOOD.		
	1 to 5	Charges for forage for Major Howard's detachmment, $888 48. Major Howard's requisitions are for thirteen days' forage for one hundred horses; the hay charged for exceeds by 1,367 pounds the quantity allowed by regulations for one hundred horses for thirteen days, and by two bundles the quantity receipted for by Major Howard's quartermaster, and his receipts are also for five bushels of corn less than charged for; therefore,		
		Deduct for 1,367 pounds of hay, at 2½ cents per pound	$30 75½	
		Deduct for 5 bushels of corn, at 87½ cents per bushel	4 37½	
				35 13
	6 to 41	Charges for forage for horses belonging to the State, June to November, 1813, (suspended for explanation)		1,436 86
	42	John Gell, for stabling and feed for the horses of Captain Daingerfield's company of cavalry, at 75 cents per day for each horse, disallowed; (the company was part of Major Howard's detachment, and there is no proof that forage for these horses was not included in his requisitions.—(See note No. 1)		120 00
		Simon Magwood, for services as foragemaster general, May 31 to November 15, 1813, (suspended for explanation; no provision by any law of the United States for an officer of this description)		412 50
		Simon Magwood, for services in same capacity, from November, 1813, to April, 1814		375 00
	1 to 34	Forage for horses belonging to the State, November, 1813, to April, 1814		864 33
No. 4		Forage for horses belonging to the State, April, May, and June, 1814, (suspended for explanation)		40 18
		R. G. Waring, for forage for horses of a detachment guarding ammunition from Charleston to Camden, October, 1814, (see note No. 82, Quartermaster General's account)		55 66
		Total amount deducted from S. Magwood's account		3,339 66
		Total amount of his disbursements, as charged by South Carolina		4,384 63
		Amount admitted to the credit of South Carolina on said Magwood's accounts		1,044 97
		ACCOUNTS OF COLONEL TUCKER.		
No. 3	1	Lieutenant Colonel Starling Tucker: There are no muster-rolls; by the pay-rolls of the respective companies it appears that the regiment commenced its services March 1 and was discharged March 31, 1814.		
		Colonel Tucker's pay, exclusive of travelling allowances, being charged so as to include the 1st of April, a deduction is requisite of	$2 00	
		His pay while travelling from home to the place of rendezvous, and from the place of discharge home, together 250 miles, amounts to only $26 28, and $33 33 being charged, a further deduction is necessary of	7 05	
		Forage overcharged	20	
				9 25
	2	Major Samuel Cannon:		
		Charge for pay while travelling 172 miles	20 00	
		Amount to which he was entitled	15 11	
			4 89	
		Subsistence while travelling, twice charged	9 60	
		Forage while travelling, inadmissible	4 00	
				18 49
	3	Major Robert Woods:		
		Charge for travelling pay, 230 miles	25 54	
		He was entitled to only	20 23	
			5 31	

PART V.—*Deductions from the accounts of the State of South Carolina, &c.*—Continued.

Account.	Voucher.	To whom and for what paid.			Amount.
No. 3	3	Charge for servant's pay	$12 00		
		Entitled thereto only from the time of arrival at the place of rendezvous to the day of discharge, one month	8 00		
				$9 00	
		Forage overcharged		16	
					$8 47
	4	Joshua Miller, wagon-master:			
		He has charged for 100 rations of forage, at 20 cents		20 00	
		Allowed for forage for the same period as pay is charged for, (from the 1st of March to the 19th of April, longer by several days that other officers charged for,) at $8 per month		13 06	
					6 94
	5	J. B. O'Neal, judge advocate:			
		Travelling pay and subsistence, charged at fifteen instead of twenty miles per day, making a difference of three days' forage, charged for two horses, at $6 per month each, for forty-three days, (after deducting for ten days' forage drawn,) which period includes the time he was travelling, he can be allowed only for forage prior to discharge, at $8 per month, for each horse.			
		Deduct for pay		$5 00	
		Deduct for subsistence		2 40	
		Deduct for forage		1 97	
					9 37
	6	Daniel Long, surgeon:			
		He has charged for 1 month and 24 days		18 00	
		Deduct for 3 days drawn		60	
				17 40	
		He states that he was detained eight days after the discharge of the regiment to take care of the sick. The regiment appears by the rolls to have entered on service March 1, and to have been discharged March 31, 1814, for which period, and for the eight days he was detained, (after deducting for three days' forage drawn,) an allowance is made at $8 per month		9 33	
					8 07
	8	John Fowle, forage-master:			
		Pay calculated at $40 instead of $30 per month, and for eleven instead of eight days, while travelling home after discharge, 160 miles, overpayment			11 79
	9	Quartermaster Sergeant A. Durhee:			
		Pay overcharged			35
	14	Paymaster William Cowan:			
		Charge for forage		$13 60	
		Entitled to an allowance for forage for 1 month		8 00	
				5 60	
		Charge for expense of himself and horse while travelling home	$11 81		
		Entitled to an allowance for 11 days' subsistence	6 60		
				5 21	
				10 81	
		Allow for 2 days' pay while travelling to place of rendezvous		2 85	
					7 96
	16	James Barnes, drum-major:			
		Pay calculated at $12 instead of $11 per month			1 41
	17	Moses Cole, fife-major:			
		Pay calculated at $12 instead of $11 per month			1 41
		COMPANY OFFICERS.			
	1	Captain Samuel Parsons:			
		Travelling pay, charged at 15 instead of 20 miles per day, overpayment			5 10
	2	Lieutenant Aaron Jones:			
		Travelling pay twice charged, and calculated at 15 instead of 20 miles per day, overpayment			15 86
	3	Ensign John Moseley:			
		Pay for 17 instead of 13 days, charged for travelling 250 miles, overpayment			2 58
	4	Captain Lewis Hogg:			
		Pay for travelling 195 miles, charged for 13 instead of 10 days, overpayment		$3 91	
		Rations overcharged		40	
					4 31
	6	Benjamin Duckett, ensign 19 days, and afterwards lieutenant:			
		Pay while travelling 203 miles, charged for 13 instead of 10 days, and otherwise wrong calculated, overpayment			4 09
	8	Captain Benjamin Lewis:			
		Pay over-calculated			4 21
	9	Lieutenant Nicholas Harding:			
		Travelling pay twice charged and erroneously calculated, overpayment		$14 18	
		Subsistence short charged		1 60	
					12 58
	10	Elisha Adair:			
		For services in Captain Lewis's company, 15 days as lieutenant and 16 days as ensign. Lieutenant Harding having been paid as lieutenant from the 8th of March, E. Adair can be allowed as such only up to that day. His pay besides erroneously calculated and charged for 13 instead of 10 days, while travelling 200 miles—overpayment		4 64	
		Subsistence overcharged		6	
					4 70

PART V.—*Deductions from the accounts of the State of South Carolina, &c.*—Continued.

Account.	Voucher.	To whom and for what paid.			Amount.
No. 3.....	12	Lieutenant Joseph Lever:			
		His travelling pay is included in his first charge, (27th of February to 12th of April,) and afterwards separately charged, and for 12 instead of 9 days, the distance being 180 miles, overpayment			$14 86
	13	Ensign Daniel Dewalt:			
		Similar overpayment			9 21
	14	Captain Geo. M'Creless:			
		Pay charged for 13 instead of 10 days, while travelling 195 miles, overpayment	$4 00		
		Subsistence overcharged	60		
					4 60
	15	Lieutenant George Schoppert:			
		Pay for 12 and subsistence for 11 days instead of for 9 days, charged for travelling allowance, 180 miles, overpayment			3 80
	16	Lieutenant Robert Nance, similar overpayment			3 30
	21	Captain Charles Gillam:			
		Pay for 12 instead of 9 days, charged for travelling 180 miles, overpayment	$4 00		
		Allow for a days' pay while marching from home to place of rendezvous	1 42		
					2 58
	22	Lieutenant Abraham Dyson:			
		His travelling pay is charged twice, and for 3 days more than he was entitled to, overpayment			14 93
	23	Ensign William Johnson, like overpayment			8 49
	24	Captain James Vaughan:			
		Travelling pay charged for 14 days. The pay-roll of his company states the distance to the place of rendezvous to be 30 miles, and from the place of discharge home, 180 miles; pay for 11 days is all that can be allowed, overpayment			3 81
	25	Lieutenant Wiet Chandler:			
		Like overpayment, (except that the charge is for 15 days)			3 86
	26	Ensign Lewis Ball:			
		Pay charged for a longer period, while travelling, than allowed by law, and also wrong calculated, overpayment			1 58
	27	Captain John Smyly:			
		Pay for travelling 180 miles, charged for 12 instead of 9 days, overpayment			4 00
	28	Lieutenant Thomas Ridlesperger:			
		Like overpayment			3 00
	29	Ensign Wm. Cannon:			
		His travelling pay is twice charged, and the first charge is for two days more than he is entitled to, overpayment			8 78
	30	Captain Reuben Powell:			
		Travelling allowance, 255 miles, charged for 17 instead of 13 days, overpayment			7 50
		Ensign William Osborn, travelling pay overcharged			2 09
		Lieutenant Joseph Davenport and six others, for services as paymaster's guard from Camp Alston to Charleston, and thence home, out nineteen days from March 31, 1814, suspended for explanation The persons composing the guard (except two, one of whom was the forage-master) were part of Captain Caldwell's company of cavalry; and the period here charged for is included in that for which they were paid on the rolls for travelling allowance			70 00
		Captain Smyly's company:			
		Overpayments to five privates discharged 17th March, 22 cents each			1 10
		Wagoner's accounts:			
	5	March Duncan, over addition	$10 00		
		One item short charged	5 00		
					5 00
	6	William Gillam, $65 instead of $60, charged for hire, whilst going to Camp Alston, 180 miles, at $5 for every 15 miles			5 00
		Account of Col. Tucker, for provisions, &c, purchased:			
		Isaac Cohen & Co., charge for 25 bushels corn, furnished March 17, 1814, disallowed, (Messrs. Cohen having been paid for the same by Simon Magwood, forage-master general, per order of the wagon-master of Colonel Tucker's regiment, and the amount charged in S. Magwood's account, No. 2)			25 00
		Charge for interest on the balance due from the State to Col. Tucker, (not admissible against the United States)			34 61
		Total amount deducted from Col. Tucker's accounts			375 04
		Total amount of Col. Tucker's accounts, as charged by the State of South Carolina.			13,779 12
		Amount admitted to credit of the State of South Carolina, on Col. Tucker's accounts.			13,404 08

		Amount admitted to credit of South Carolina on W. Singleton's account		4,645 07
		ACCOUNTS OF MAJOR JOHN WILSON.		
		The charges for pay, &c., of Major Wilson, and Thaddeus Sobieski, his assistant, disallowed; Major Wilson having been paid by the commissioners on fortifications for the defence of Charleston as chief engineer at $93 per month, from October 5, 1814, to March 11, 1815, inclusive, and Thaddeus Sobieski having been paid by the same commissioners for services as assistant engineer at $58 per month, from October 1, 1814, to December 31, 1815; which payments have been allowed by the United States on settlement of the account of the commissioners		$456 00
		Total amount deducted from Major Wilson's account		$456 00
		Total amount of Major Wilson's account as charged by South Carolina		688 32
		Amount admitted to credit of South Carolina on his accounts		232 32
		ACCOUNTS OF R. Y. HAYNE, QUARTERMASTER GENERAL.		
	1	William Sims, for cutting, welding, and putting on the tire to the wheels of tumbrils in December, 1814. Suspended for explanation; no evidence that the work was rendered necessary by use of the tumbrils in the public service		$46 77
	8	Aaron Richardson, for four days' hire of a team transporting baggage of a detachment to the Sisters' Ferry in January, 1815; suspended for further explanation. It cannot be found that either Quartermaster Gillison or General Cuthbert, by whom the account is certified, was in service. The militia in service at this time were called out by United States authority; they were paid and subsisted by the United States, and payments to a very large amount for the transportation of their baggage was made by Major Champlain; whether or not he provided transportation in this case cannot be ascertained, the name of the officer who commanded the detachment not being stated		20 00
	9	William Givens, for quartering Sergeant Cole and eleven dragoons who were ordered to Beaufort to escort and guard arms to Coosawatchie October 14, 1814, disallowed. It appears by the draught of J. B. White's letter to General Cuthbert, (by whom W. Givens's account is certified,) dated September 22, 1814, that an order was issued "for arming such companies of General Cuthbert's brigade as were within supporting distance of the seacoast," and that they were to be supplied from the arsenal at Beaufort; there is no evidence that any of these companies had then been called into service, and the expense is not therefore properly chargeable to the United States		34 50
	11	John Rogers, for hire of his team from camp Alston to his house, 165 miles. This is presumed to be embraced in voucher 19 of Colonel Hayne's account; but if it is not it is then disallowable under the Secretary of War's decision, allowing only eight teams for Colonel Youngblood's regiment		55 00
	13	Auppe Cooper, for team hire		220 00
	14	Gab. Long, for team hire		220 00
		(The two foregoing charges disallowed under the Secretary of War's decision allowing only eight teams for Colonels Carter and Youngblood's regiments)		
	18	Artemas B. Darby, quartermaster 22d regiment militia, for hire of a team for the transportation of Captain Utsey's company to the Two Sisters' ferry in February, 1815; suspended for explanation, no such company can be found to have been in service; see note on voucher No. 8		75 00
	20	George I. Strother, for hire of his team from camp Alston home in March, 1814, disallowed. Before charged; see his account in voucher 52 of J. W. White's account		50 00
	21	Samuel McConahay, for services of his team transporting baggage of Major Meadows' detachment to Georgetown in November, 1814. Major Meadows was an officer of Lieutenant Colonel Alston's regiment, which appears to have been called out and marched to Georgetown, in November, 1814, to relieve Major Gasque's detachment; the regiment was in the United States service, and consisted of only five companies. Major Meadows states in a certificate that the other wagons could not have the above baggage The United States officer in the Quartermaster's department at Georgetown, B. S. Hart, paid for the hire of five teams, and Major Champlain for the hire of a sixth team; on Major Meadows' certificate $910 appears to have been paid for the hire of these six teams. This account also, it is evident, was presented to Major Champlain, and it is presumed he considered it an improper one and refused to discharge it		140 00
	23	Captain Zachariah Meriwether, for a payment to Isaac Logan for the transportation of the baggage, &c., of Captain Meriwether's company in February, 1815, disallowed; Major Champlain paid for the hire of nine teams on account of Colonel Austin's regiment, of which this company was a part		25 00
		Total amount deducted from R. Y. Hayne's accounts		886 25
		Total amount of R. Y. Hayne's accounts, as charged by South Carolina		2,888 39
		Amount admitted to the credit of South Carolina on Colonel Hayne's accounts		2,002 14

Accounts allowed by the legislature of the State of South Carolina.

Murdoch Murchison, for nine day's services as quartermaster in conveying 27th regiment of drafted militia from Marion Court-House to Georgetown, in November, 1814; nine day's services of his wagon and team, and for 254 rations stated to have been furnished to the militia during the march on the 26th, 27th, 28th, and 29th November, 1814. The regiment, which then marched to Georgetown, was that commanded by Lieutenant Colonel Alston, and F. M. Baxter was mustered and paid as the quartermaster thereof. With respect to the charge for team hire, see the remark on Samuel McConahay's account, voucher 21, of Quartermaster General R. Y. Hayne's account. Colonel Alston's first requisition on the contract includes subsistence for the days charged in the above account for 430 men, and which have been paid for by the United States. Major Champlain paid for marching subsistence of a detachment of 209 men of the regiment, at one ration per day each, including the same days. The regiment, as appears by Colonel Alston's ration returns, had not more than 540 men after they were assembled. Quartermaster Murchison's account is not supported by any other testimony than his own, and the proof of the payment of it by the State is wanting	$86 22
Dr. James H. Davidson: his charges for services are over-calculated	2 83
Reuben Roberts, for 1080 pounds of bacon furnished to a detachment under command of Lieutenant Colonel Alston, in February, 1815. He states in his petition that Mr. Roddy (who was at that time United States contractor) admitted the justice of his claim, but objected to the form of the certificate he had taken, and which has since been lost. It appears by Major Champlain's accounts that in January, 1815, he entered into a contract with John Ling (who, as Colonel Steedman states, was a clerk of Roddy) for the supply of rations to a regiment of South Carolina militia, on its march to the Two Sisters' ferry on the Savannah river, and on returns certified by Lieutenant Colonel Austin, whose regiment entered the service on the 1st and 4th of February, 1815, payments were made to Mr. Ling, for complete rations for the regiment from the 2d to the 18th of February, 1815, by Major Champlain. From the 18th of February, the regiment was subsisted by Mr. Roddy, as appears by Lieutenant Colonel Austin's returns, with Roddy's accounts. It is Mr. Roddy, therefore, and not the United States, who is properly chargeable for the bacon; and the proof of the State having paid for it is wanting	202 50
Dr. Charles Drayton, for cattle, &c., impressed for the use of men under command of Captains Singleton and Jenkins, 27th and 29th of May, 1813. There is no proof that these officers were then in service, nor of the value of the cattle, &c., impressed. The legislature appropriated only $30, and of the payment of that sum the proof is wanting	30 00
Captain Samuel Bingham, seven months interest charged on his disbursements. Not admissible	14 21
Artemas B. Darby, for rations furnished Captain John Utsey's company of South Carolina militia, on its march to the Two Sisters' ferry, in February, 1815. No evidence can be found of the service of this company.—(See remark on voucher 18 of Quartermaster General Hayne's account	93 80
Total amount deducted from accounts allowed by legislature	429 56
Total amount of said accounts as charged by South Carolina	1, 571 60
Amount admitted to the credit of South Carolina on said accounts	1, 142 04

RECAPITULATIONS OF DEDUCTIONS.

Total amount suspended for further proof, &c	$6, 027 01
Total amount wholly disallowed	42, 331 15
Total amount referred to Ordnance department	57, 413 60
Total amount deducted from South Carolina accounts	105, 771 76

TREASURY DEPARTMENT, *Third Auditor's Office, January* 13, 1827.

SIR: Agreeably to the request made of me by you, I have had prepared and now enclose a copy of all the deductions made from the accounts of the State of South Carolina for military expenditures during the late war, together with a copy of the official statement thereof, as adjusted at this office during the past year. After stating the reasons for each respective deduction, you will find at the end of the list, that—

The whole amount suspended for further proof is	$6,027 01
The whole amount wholly deducted is	42,331 15
The whole amount referred to the Ordnance department	57,413 60
Making an aggregate amount of deductions	105,771 76

I am, very respectfully, your most obedient servant,

PETER HAGNER, *Auditor.*

ALEXANDER SPEER, Esq., *Comptroller General of the State of South Carolina.*

Stated by

TREASURY DEPARTMENT, *Third Auditor's Office, September* 21, 1826.

ROBERT READ, *Clerk.*

G.

Summary of the claims of the State of South Carolina.

1. Interest on advances to the United States during the war, the sums so advanced having been drawn out of the Bank of the State of South Carolina from a fund then drawing an average interest of about twelve per cent., which interest was lost by the State, though only six per cent. is now claimed.

2. Arms purchased by the State at about $17, and furnished to the United States, who have disposed of them as their own. This account has been adjusted at the proper department, and the question is, if the State shall be paid in arms or in money. The State is willing to receive payment at $12 a stand, and this can be made without costing the government a dollar, by merely keeping the arms in lieu of having the same number manufactured.

3. Cannon balls manufactured by the State, in consequence of no supplies being furnished by the United States, and when essential to aid them in defence of Charleston; rejected by the United States after the peace in consequence of their not being *exactly* conformable to the standard *prescribed after they were made.*

4. Blankets furnished to a small portion of the militia in the actual service of the United States, in consequence of their entire destitution, as proved by the memorial of the officers. Those men only were furnished who were totally destitute.

5. Transportation—no more wagons were ever used than the situation of the troops rendered absolutely necessary; but in the settlement of our claims only eight have been allowed to any regiment of 1,000 men. The claim is for the number actually paid for by the State, and without which the troops could not have been marched to the place of *rendezvous.*

6. Commissions and other compensations necessarily paid by the State to the commissary general, paymaster general, and *other heads of departments,* under whom these expenditures were made, all of which are rejected because these officers were not considered in the service of the United States.

7. There are various other items included in the claim which, either from their nature or the smallness of their amounts, are not now brought before the committee, some of which, it is believed, can be adjusted with officers of the proper department.

Remarks.

1. Only a portion (it is believed less than half) of the amount actually expended by the State for military defence during the war has been claimed of the United States, and this claim has been confined to troops actually received into the service of the United States or recognized by them, and for arms, &c., furnished *to supply what the United States did not and could not furnish.*

2. Of the sum claimed a large sum has been rejected for irregularity, and $——— in addition, for the reasons before stated.

3. The State made these advances to the federal government in consequence of being given to understand that the means of the federal government were inadequate, and under a resolution unanimously passed by the legislature, to aid the government to the whole extent of the resources of the State, and to look to a period of peace for the settlement of her claims.

21st Congress.] No 421. [1st Session.

ALLOWANCE OF MONEY IN LIEU OF THE PRESENT RATION OF SPIRITS IN THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 14, 1830.

War Department, *January* 12, 1830.

In answer to a resolution of the House of Representatives of the 28th of December, 1829, relative to an alteration in the ration of the army and navy to non-commissioned officers, &c., I have the honor to forward the enclosed communications from the commanding general and from the commissary general of subsistence, explanatory of their views upon the subject.

It is not the allowance made by the government to the soldier which produces his intemperance; the quantity is too small. It is occasioned by supplies of ardent spirits obtained from citizens, and which no vigilance heretofore practiced at posts has been sufficient to prevent. The remedy suggested by the commissary general is, perhaps, as wholesome a one as could be offered.

Everything of beneficial reform upon this subject must be considered merely as matter of experiment. One heretofore made with a detachment of the army, and which proved highly salutary, was to remove restraint, and permit a free and unrestrained use of ardent spirits. This privilege was conceded to the soldiers by the officer in command; and, in return for it, they consented to subject themselves to their own laws, and accordingly annexed particular penalties to be imposed by themselves for any improper abuse of the privilege. During three or four weeks that this plan was kept up little of intemperance or misconduct took place. It is another of many proofs that could be adduced to show that mankind, when under too rigid restraint, are more disposed to restiveness and a violation of rule than when liberally placed under the guidance of their own sense of propriety.

Very respectfully,

J. H. EATON.

Andrew Stevenson, *Speaker of the House of Representatives.*

Headquarters of the Army, *Washington, January* 11, 1830.

Sir: In conformity with your instructions I have duly considered the subject presented by the resolution moved in the House of Representatives on the 28th of December, 1829, directing the Committee on Military Affairs to inquire into the expediency of inducing the soldiers of the army and the seamen and marines of the navy to voluntarily discontinue the use of whiskey, substituting for it an equivalent to be paid in money at the expiration of the period of enlistment; also as a further inducement to sobriety and orderly deportment in the army and navy, as well as with a view to preserve the lives and health of the soldiers and seamen, that said committee be instructed to inquire into the expediency and propriety of allowing an additional bounty in money or clothing, or both, to be paid to every soldier and seamen at the expiration of his term who shall produce from his commanding officer a certificate of *total* abstinence from ardent spirits, and of orderly behavior during his enlistment.

It is certain that nothing has tended so much to degrade the rank and file of the army as the excessive use of ardent spirits; nor has it been less destructive of their health and discipline. Any plan, therefore, that can be devised that will be likely to eradicate the evil is worthy of the trial. In accordance with the tenor of the resolution, I would suggest that the ration of liquor now furnished to the troops be discontinued, and, in lieu thereof, a portion of rice and molasses be issued; and, further, that a bounty of one dollar a month to each non-commissioned officer, musician, artificer, and private soldier, be paid at the expiration of his term of service, on his producing a certificate from his commanding officer of *total* abstinence from the use of ardent spirits, declaring, at the same time, that he has conducted himself in an orderly manner during the term of his enlistment.

Respectfully,

ALEX. MACOMB, *Major General, Commanding the Army.*

Hon. John H. Eaton, *Secretary of War.*

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, January* 6, 1830.

SIR: In relation to the resolutions of the Hon. Mr. Condict in the House of Representatives of the 28th of December, 1829, a copy of which has been referred to this office, respecting "the expediency of inducing the non-commissioned officers, musicians, and privates in the army, and the seamen and marines in the navy of the United States, voluntarily to discontinue the use of whiskey, substituting for it a full equivalent, to be paid in money at the expiration of the period of enlistment," and offering further inducements, I have the honor to report, as far as regards the army, that a circular letter was addressed on the 10th of August, 1820, to the assistant commissaries of subsistence at all the military posts, stating that it was the wish of the then Secretary of War, the Hon. John C. Calhoun, as well as my own, to dispense with the whiskey part of the ration, and to offer to the troops, through the commanding officers of the posts, the contract price of the whiskey ration, in money, as an equivalent for the voluntary relinquishment of said ration, the payment of which equivalent to be made either monthly or quarterly, at the option of the commanding officers, who were to appoint an officer at the post to receive and distribute the same to the troops.

This proposition was acceded to at some few posts, and at others totally rejected. At those posts where it was accepted the practice was continued for some time, and only relinquished when it was found to be entirely of non-effect.

The accompanying copy of a letter addressed to General P. B. Porter, late Secretary of War, upon the same subject, in reply to a resolution of the House of Representatives of the 14th of January, 1829, I request may be considered as part of this report.

I have the honor to remain, very respectfully, your most obedient servant,

GEO. GIBSON, *Commissary General of Subsistence.*

Hon. JOHN H. EATON, *Secretary of War.*

OFFICE OF COMMISSARY GENERAL OF SUBSISTENCE, *Washington, January* 20, 1829.

SIR: Upon consideration of the resolution offered in the House of Representatives on the 14th instant, requesting information as to "what beneficial effects, if any, have arisen, or are likely to arise, from the daily use of spirituous liquors by the army, and whether the consequences of that practice have not been, and will not be, injurious, and particularly upon the health, morals, and discipline of the soldiers," I have the honor to state that I do not know of any beneficial effects from such issues, nor do I believe any are likely to arise; neither am I aware that any great evil can ensue from the daily issue of *one* gill to the troops generally, or of *one and a half gill* to men on fatigue duty. The most unhappy and pernicious effects of spirituous liquors to the army result from its being clandestinely supplied by citizens; nor can this be totally prevented, but might be in a very great measure arrested by inducing the States to enact laws prohibiting persons selling ardent spirits to soldiers under the penalty of levying fines, recoverable before a justice of the peace, one-half of said fines to be applied to the use of the State, and the other half to the person giving the information, and making the informant in all cases a competent witness. Could this be efficiently done, there is no doubt that the deleterious effects of the use of spirituous liquors by the army would cease as regards the health, morals, and discipline of the soldiers.

Very respectfully, your most obedient servant,

GEO. GIBSON, *Commissary General of Subsistence.*

Hon. PETER B. PORTER, *Secretary of War.*

21ST CONGRESS] **No. 422.** [1ST SESSION.

ON THE APPOINTMENT OF A COLONEL OF THE SECOND REGIMENT OF ARTILLERY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1830.

Mr. VANCE, from the Committee on Military Affairs, to whom was referred that part of the President's message asking an explanatory act to designate the class of officers from which the colonelcy of the 2d regiment of artillery should be filled, reported:

The act of the 2d of March, 1821, to reduce and fix the military peace establishment of the United States, authorized that, out of the then military establishment, there should be organized four regiments of artillery and seven regiments of infantry, and that the corps of engineers (bombardiers excepted) and the topographical engineers, and their assistants, should be retained in service as then organized; and that the ordnance should be merged in the artillery.

This organization was, by the before recited act, to be arranged and completed by the 1st of June of that year. The 12th section enacted, "That the President of the United States cause to be arranged the officers, non-commissioned officers, artificers, musicians, and privates of the several corps, now in the service of the United States, in such manner as to form and complete out of the same the force authorized by this act; and cause the supernumerary officers, non-commissioned officers, artificers, musicians, and privates, to be discharged from the service of the United States." Under this act the President made the following arrangements of the colonelcies of the four regiments of artillery: Colonel Porter, of the light artillery, was arranged to the 1st regiment; Colonel Towson, paymaster general, and late a captain of light artillery, was arranged to the command of the 2d regiment; Colonel Armistead, of the engineers, was arranged to the 3d regiment; and Lieutenant Colonel Fenwick, of the artillery, to the 4th regiment.

This arrangement of commandants to the four regiments of artillery was published in general orders

from the War Department on the 17th of May, 1821, and was subsequently carried into effect, both by the appointing and confirming powers of the government, with the single exception of N. Towson, who was arranged to the 2d regiment of artillery, nominated to the Senate, and by them rejected. The question now presents itself, which of the officers discharged as supernumeraries on the 1st of June, 1821, ought, in accordance with military usage, to have been arranged to this command; as the joint action of the Executive and Senate, in completing the organization of the artillery, with this single exception, precludes the necessity of all further inquiry on this subject.

Your committee, to arrive at certainty on this point, have examined the army register of the 1st of January, 1821, by which they find the discharged officers held the following rank in the army: Wadsworth was a colonel on the 2d of July, 1812; Bissell was a colonel on the 15th of August of the same year; King on the 21st of February, 1814; and Smith the 10th of February, 1818. This being the rank of those officers, and but one vacancy to fill, it would follow as matter of right, they all belonging to the same corps of the army, that Wadsworth, and not Bissell, as heretofore contended by the Senate, was the individual that ought to have been arranged to this place in the army; but, in addition to this view of the case, Wadsworth was a colonel of ordnance, which corps was merged in the artillery by the very law that authorized the reduction of the army, and which made him as much a colonel of artillery as if it had been named in terms in the body of his commission. Not so with Bissell, he was a colonel of infantry; and to take command in the artillery, must have been transferred by orders from the War Department, under the rules and regulations to govern the army, which rules and regulations are in the following words:

ARTICLE 75. "The transfer of officers will only be made by the War Department, in orders on the mutual application of the parties, (except in extraordinary cases.")

SEC. 63, Articles of War. "Nor shall an officer be transferred into a regiment to the prejudice of the rank of any officer thereof."

This being the law of transfers, as legalized and adopted by the act of the 2d of March, 1821, to reduce and fix the military peace establishment, all must agree that the President had the power of withholding this place from Bissell, and that, too, in strict accordance with law and military usage; but it was different in the case of Wadsworth. There was no transfer necessary in his case. An arrangement to the command, he belonging to the proper corps and holding the proper rank, would have satisfied all the requisitions of the law, without the responsibility of transfer. The power of transfer is a highly responsible and important one, and has been properly vested in the hands of the President. It is for him to know that the qualifications of the officer transferred from a lower to a higher grade of service are sufficient to justify him with the army and the nation.

It is well known to all military men that there are three grades of service in our army: 1st, the engineers; 2d, the artillery; and, 3d, the infantry. The President has full power to transfer engineer officers to any corps of the army, under no other restrictions than a due regard to rank. This right was, no doubt, vested in him without limit, because of the superior scientific attainments of the officers of that corps. The same reasoning will apply to the officers of artillery, when compared to the infantry. An officer may be very competent to command a regiment of infantry, whom it would be dangerous to put at the head of a regiment of artillery. Hence the necessity of throwing the responsibility of transfer from one corps to another on the War Department, where it was at the time of the reduction of the army, and still continues.

In making this statement your committee would not wish to be understood as drawing an invidious distinction between the officers of the different corps of the army; far from it. They are well aware that many of its first officers belong to the infantry, and would do credit to the command of any grade of service; and from a general diffusion of military science through every branch of the army, by the Military Academy at West Point, the time will soon come when the officers of our army may be transferred from one corps to another without prejudice, limit, or restriction.

But it is said that the death of Wadsworth prior to the rejection of Colonel Towson by the Senate, which caused the vacancy in the 2d regiment of artillery, leaves the place open for Bissell. Your committee do not concur in this opinion. The command of this regiment, all will agree, ought, from military principle and usage, at the time of arranging the officers as published in orders from the War Department on the 17th of May, 1821, to have been assigned to Wadsworth. For him to have entered on command needed no new appointment, no transfer, no reduction or elevation of rank; he held the proper grade, and by law belonged to the proper corps of the army.

Let us examine this matter and see how it stood under the arrangement as published by orders from the War Department. Colonel Porter was arranged to the 1st regiment of artillery; Colonel Towson, late a captain of light artillery and Paymaster General, was arranged to the 2d regiment of artillery; Colonel Armistead, of the engineers, was arranged to the 3d regiment of artillery; and Lieutenant Colonel Fenwick was arranged to the 4th regiment of artillery. Neither Porter nor Armistead needed new commissions to assume and continue in the command of their regiments, and Wadsworth would, under a similar arrangement, have occupied the same ground. But it was different with Fenwick and Towson. They had to go before the Senate for confirmation, and the result was that Fenwick was confirmed and Towson rejected. This confirmation of Fenwick was on the 8th of May, 1822, and Lieutenant Colonel House, on the death of Colonel Porter, was promoted to the colonelcy of the 1st regiment of artillery, and confirmed on the same day. By this statement it will be seen that House succeeded to the command, after the death of Porter, in the regular line of promotion, and it is equally clear that if Colonel Wadsworth had been arranged to the 2d regiment of artillery, as in right he ought to have been, that the next oldest lieutenant colonel would have succeeded to the command in the same line of succession. Porter and Wadsworth held the same rank and belonged to the same corps. Both died within a few months of each other, and neither could have been appointed to the colonelcy until by law the officers should have been arranged and the army organized. Bissell belonged to a different corps, and could take no command in the artillery but by transfer from the War Department. Will it be contended that the injury done to Wadsworth by the arrangement, as published in general orders from the War Department, should benefit Bissell and prejudice the corps of artillery by withholding the regular promotion therefrom—a right known to be held as most sacred by every officer of the army? That Colonel Bissell was discharged from the army in accordance with military usage your committee are not prepared to say, nor is it necessary. It may be that the reduction of the rank of Atkinson, in the corps to which Bissell belonged, from that of a brigadier general to a colonel of infantry, was prejudicial to his rights; but as that act has been ratified by the constituted authorities of the country, he is left without remedy, unless the President

should exercise his constitutional right of appointment, or assume the responsibility of transfer; neither of which your committee are prepared to question, but which, in this case, they have no doubt would be subversive of military principle and highly prejudicial to the interest of the junior officers of the army.

Who can question, after the confirmation of Lieutenant Colonel Fenwick by the Senate to the command of the 4th regiment of artillery, that they would have withheld their sanction in like manner to the next oldest lieutenant colonel as commandant of the 2d regiment, if he had been nominated thereto? The difficulty between the appointing and confirming power was not whether it was proper to arrange a lieutenant colonel to this place, for this was sanctioned by the action of both in the case of Fenwick; but it was whether a staff officer that had never held a higher lineal rank than captain should be placed in this command, to the prejudice of his seniors in this corps of the army. In every view your committee are able to take of this question they are convinced that the command of the 2d regiment of artillery belongs to the army by promotion, and to that end they report a bill.

21st Congress.] **No. 423.** [1st Session.

NUMBER OF SURVIVING OFFICERS AND SOLDIERS OF THE REVOLUTION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 19, 1830.

War Department, *January* 19, 1830.

The resolution of the House of Representatives of the 14th of January instant, relative to the number of surviving revolutionary officers, &c., cannot be fully and satisfactorily answered by any information on file in this department. The enclosed communication from the principal clerk of the Pension Bureau is a reply to the extent that the records of the War Department will permit.

Very respectfully,

J. H. EATON.

Hon. Andrew Stevenson, *Speaker of the House of Representatives.*

War Department, *Pension Office, January* 15, 1830.

Sir: In relation to the resolution of the House of Representatives of the 14th instant, respecting the surviving officers and soldiers of the revolutionary war, I have to inform you that the archives of this department furnish no data upon which an estimate could be made as to the probable number of those who belonged to the State regiments, volunteers, and militia during the revolutionary war. Of such troops we have no rolls except the three State regiments of Virginia. Of the number of Virginia State troops now living I can form nothing like an accurate calculation; possibly a hundred of them may still survive, and perhaps three-fourths of them might ask for assistance, if a law should pass embracing their cases. If all who served on the continental establishment are comprehended in the resolution, it would embrace men who served for six and eight months. What portion of these are now alive and in needy circumstances I am unable to determine, but four hundred would, I think, be a large estimate.

I have no means of ascertaining what number of persons were disabled during the last war, who are incapable of maintaining themselves by manual labor, and who are not provided for by law.

I have the honor to be, very respectfully, your obedient servant,

J. L. EDWARDS.

Hon. J. H. Eaton, *Secretary of War.*

21st Congress.] **No. 424.** [1st Session.

APPLICATION OF MAINE THAT THE FORTIFICATIONS ON THE PENOBSCOT BAY AND RIVER BE REPAIRED.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 25, 1830.

STATE OF MAINE.

RESOLVE relating to fortifications on the Penobscot river and bay.

Resolved, That the senators in Congress from this State be instructed and the representatives requested to use their influence to obtain an appropriation for the purpose of erecting and repairing, as soon as may be, fortifications on the Penobscot bay and river, sufficient for the protection thereof, and that the governor be requested to communicate this resolve to the senators and representatives in such manner as he may think proper.

In the House of Representatives, February 26, 1829. Read and passed.

GEORGE EVANS, *Speaker.*

In the Senate, February 27, 1829. Read and passed.

NATHAN CUTLER, *President.*

February 27, 1829. Approved.

ENOCH LINCOLN.

21st Congress.] No. 425. [1st Session.

ARMY REGISTER FOR THE YEAR 1830.

COMMUNICATED TO THE SENATE JANUARY 25, 1830.

DEPARTMENT OF WAR, *January* 21, 1830.

SIR: I have the honor to transmit herewith fifty copies of the Army Register for 1830, for the use of each member of the Senate of the United States, conformably to a resolution of December 13, 1815.

Very respectfully, your obedient servant,

J. H. EATON.

The PRESIDENT *of the Senate of the United States.*

Army Register for 1830.

GENERAL OFFICERS.

No.	Names, rank, and date of commission.	Regiment and corps.	Brevets.	Remarks.
	MAJOR GENERAL.			
1	Alex. Macomb, May 24, 1828			
	BRIGADIER GENERALS.			
1	Edmund P. Gaines, March 9, 1814		Maj. gen. bvt., August 15, 1814	
2	Winfield Scott, March 9, 1814		Maj. gen. bvt., July 25, 1814	
3	Thomas S. Jesup, May 8, 1818	Q. M. G.	Maj. gen. bvt., May 8, 1828	

RELATIVE RANK

	COLONELS.			
1	Hugh Brady, July 6, 1812	2d infantry	Brig. gen. bvt, July 6, 1822

The western department comprises all west of a line drawn from the southernmost point of East Florida to the northwest extremity of Lake Superior, taking in the whole of Tennessee and Kentucky; and the eastern department all east of such line.

The headquarters of the general-in-chief is in the District of Columbia.

Those officers whose stations are changed by transfers and promotions will report for duty accordingly.

By order of the Secretary of War:

R. JONES, *Adjutant General.*

21st Congress.] No. 426. [1st Session.

ON THE ORGANIZATION AND DISCIPLINE OF THE MILITIA OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 27, 1830.

Mr. Thompson, of Georgia, from the Committee on the Militia, to whom was referred so much of the President's message as relates to the organization and discipline of the militia of the United States, have had the subject under laborious investigation, and, on mature deliberation, adopting the principal views and leading principles submitted to the House by the Committee on the Militia during the second session of the twentieth Congress, your committee ask leave to make that report,* with some alteration of its details, a part of this report, with which they report a bill.

TWENTY-FIRST CONGRESS, FIRST SESSION.—H. R. 168.

A BILL to provide more effectually for the national defence by organizing, arming, and establishing a uniform militia throughout the United States, and to provide for the discipline thereof.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the office of general superintendent of militia affairs be, and the same is hereby, created, to be established and kept at the seat of the general government, under such rules and regulations as may be prescribed by the President of the United States.

Sec. 2. *And be it further enacted*, That the President of the United States be, and he is hereby, authorized to nominate and, by and with the advice and consent of the Senate, appoint a fit and proper person as general superintendent of militia affairs, who shall be invested with all the powers, relative to the militia of the United States, which, by the Constitution and laws of Congress, the President now possesses and may constitutionally exercise; to be exercised under the control and direction of the President of the United States. And it shall be the duty of said superintendent of militia affairs to receive and record, in a book or books to be kept for that purpose, all returns of the militia of the United States which may be made to him in obedience to the requisitions of this act, exhibiting by such record a consolidated abstract view of the whole strength, age, condition, and organic arrangement of the militia, under the designation "of the line of the" States and Territories, respectively, to which said militia belongs. And such record shall also exhibit annually the number of militia included in the several subdivisions of the junior and senior classes of the militia provided for by this act. And the said general superintendent of militia affairs shall annually, on or before the 1st day of March in each year, successively, prepare and distribute among the militia of the United States suitable blank forms of all exhibits and returns of the militia of the United States, required by the provisions of this act. And the said general superintendent of militia affairs shall cause to be made and kept a regular and correct record of any and all disbursements, issues, and expenditures, of whatever nature or kind, made and incurred by the United States for and on account of the militia thereof, and shall report annually to Congress, at the commencement of each session thereof, or as soon thereafter as practicable, a correct and full statement of such disbursements, issues, and expenditures, so made as aforesaid, within the year immediately preceding each annual report; such report to be accompanied by a consolidated abstract view and exhibit of the whole strength, condition, and organic arrangement of the militia of the respective States and Territories of the United States, with his recommendation of any improvement in the organization, condition, or mode and system of discipline thereof, which his observation, experience, or reflection may suggest. And it shall moreover be the duty of the said general superintendent of militia affairs to urge on the attention of the commanders-in-chief of the respective States and Territories the importance of a strict conformity to the requisitions and provisions of this act, for the purpose of insuring that uniformity of action and practice so indispensable to an efficient militia, by circulars, to be annually addressed to said commanders-in-chief for that purpose, and to elicit from said commanders-in-chief any and all information which may aid in the improvement of the militia, and especially to ascertain the geographical and relative positions of the divisions, brigades, and regiments in each State and Territory respectively.

Sec. 3. *And be it further enacted*, That the said general superintendent of militia affairs shall be entitled to, and receive for his services, an annual salary of ———— dollars, to be paid by the United States quarter-yearly.

Sec. 4. *And be it further enacted*, That, within four months from and after the passing of this act, each and every free able-bodied white male citizen of the States and Territories, respectively, who is or shall be of the age of twenty-one years and under the age of forty years, except as hereinafter excepted, shall severally and respectively be enrolled in the militia by the commanding officer of the company within the limits of whose district such citizens may respectively reside. And it shall at all times thereafter be the duty of the captain or commanding officer of each company of the militia of the United States to enrol every citizen as aforesaid, and also those who shall or may from time to time thereafter arrive at the age of twenty-one years, as also those who shall or may come to reside within the limits of his said district. And the age of each citizen so enrolled shall, at the time of such enrolment, be registered by the captain or commanding officer of the company in which such enrolment is or may be made, in a book to be kept for that purpose. And the captain or commanding officer of the company shall, without delay, notify such citizen of his enrolment by a non-commissioned officer of the company, by whom such notice may be proved.

Sec. 5. *And be it further enacted*, That within six months after the passing of this act, or as soon thereafter as practicable, the militia of the respective States and Territories, if it is not already done, shall be arranged into divisions, brigades, regiments, battalions, and companies, as the legislatures of the States and Territories may respectively direct; and each division in the States and Territories, respectively, shall be numbered, in regular numerical progression, from the first to the maximum number of divisions in each State and Territory, respectively; and each brigade, regiment, battalion, and company in each division shall be numbered from the first to the maximum number of brigades, regiments,

* For this report see antecedent No. 402.

battalions, and companies in the divisions, respectively, that, as nearly as may be convenient, each division shall consist of two brigades, each brigade of two and not more than four regiments, each regiment of infantry of two battalions, each battalion of five companies, and each company of not less than one hundred privates. To each division there shall be one major general, whose staff shall consist of one division inspector, with the rank of lieutenant colonel, two aides-de-camp, one division quartermaster, and one judge advocate, each with the rank of major; to each brigade one brigadier general, whose staff shall consist of one brigade inspector, to serve also as brigade major, with the rank of major, one aide-de-camp, and one brigade quartermaster, each with the rank of captain; to each regiment one colonel, one lieutenant colonel, and one major; and there shall be a regimental staff, to consist of one adjutant and one quartermaster, to rank as lieutenants, one paymaster, one surgeon and one surgeon's mate, one chaplain, one sergeant major, one quartermaster sergeant, one drum major, and one fife major; to each company one captain, one first lieutenant, one second lieutenant, four sergeants, four corporals, one drummer, and one fifer or bugler; to be appointed as the legislatures of the States and Territories of the United States may respectively direct.

SEC. 6. *And be it further enacted*, That it shall be the duty of the major generals and brigadier generals, with their respective staff officers, to attend, at least once in each year successively, the reviews of inspection of the militia within their respective commands; and it shall, moreover, be the duty of the brigade inspectors to attend the brigade, regimental, and battalion meetings of militia in the brigades to which they respectively belong, at least once in each successive year, under such rules and regulations as may be prescribed by the legislatures of the States and Territories, respectively, for the purpose of training the militia according to the system of discipline which is, or hereafter may be, prescribed by Congress; to carry into effect all orders which they may from time to time receive under the authority of the States or Territories to which they severally belong; to make returns, on or before the first day of August, annually, to the major generals of the respective divisions to which their brigades severally belong, exhibiting the strength, age, and classification of the militia within their respective brigades, with the actual condition of said militia, and of the arms, ammunition, and accoutrements of the several corps, with every other matter or thing which, in their judgment, or under the orders of their superior officers, may relate to the good order and government of the militia, and the general advancement of military discipline, according to the plan of a blank form or forms to be furnished by the general superintendent of militia affairs and distributed among the several States and Territories of the United States.

SEC. 7. *And be it further enacted*, That there shall be in each State and Territory of the United States one adjutant general, and one quartermaster general, with the rank of brigadier general, to be appointed as the legislatures of said States and Territories may direct; and it shall be the duty of said adjutant generals to distribute all orders from their respective commanders-in-chief among the several classes and corps of militia to which such orders may be addressed; to obey all orders from their respective commanders-in-chief intended to carry into effect and to perfect the system of military discipline adopted by this act; to distribute blank forms of the different returns which may be required, and to explain the principles on which they shall be made; to receive from the several officers of the different divisions and corps throughout their respective States and Territories returns of the militia thereof, exhibiting the age, strength, condition, and organic arrangement of said militia, with every other thing connected with, or intended to advance, the good order and discipline thereof; all which the commanding officer of each division shall cause to be made by the commanding officers of companies, regiments, and brigades, under their command respectively, to the adjutant general of the States and Territories in which they respectively command, according to the plan of blank forms to be furnished by the general superintendent of militia affairs; and the adjutant generals aforesaid shall make and keep a regular and correct record of the returns so made to them. And it shall be the duty of said adjutant generals to make annually, on or before the first day of October, to the commanders-in-chief of the States and Territories to which they respectively belong, a perfect return of the militia thereof, giving a consolidated abstract view and exhibit of the age, strength, condition, classification, and organic arrangement of said militia, conformed to the plan of blank forms to be furnished by the general superintendent of militia affairs, a duplicate of which the said adjutant generals shall return to the office of the general superintendent of militia affairs on or before the first day of December annually; such returns to be marked on the envelope "Militia Service," and addressed to the general superintendent of militia affairs.

SEC. 8. *And be it further enacted*, That the militia so enrolled as aforesaid shall, on or before the first day of December annually, or as soon thereafter as practicable, be divided into two classes: the first class, to be denominated the junior class, shall annually include all persons so enrolled as aforesaid who may, on the said first day of December, be between twenty-one and thirty years of age; the other class, to be denominated the senior class, shall include the residue of all persons enrolled as aforesaid; both classes to be and remain under the same organization and officers as before provided, subject to be trained, reviewed, and inspected together, under such rules and regulations as may be prescribed by the legislatures of the respective States and Territories of the United States. Each class of said militia shall be subdivided annually on the said first day of December, as follows: the junior class of said militia shall form three subdivisions; the first subdivision of the junior class shall include all persons belonging to said class between twenty-one and twenty-four years of age; the second subdivision of the junior class shall include all persons belonging to said class between twenty-four and twenty-seven years of age; and the third subdivision shall include the residue of all persons belonging to the junior class The senior class of said militia shall form two subdivisions: the first subdivision of the senior class shall include all persons belonging to said class between thirty and thirty-five years of age; and the second subdivision of the senior class shall include the residue of all persons belonging to said class.

SEC. 9. *And be it further enacted*, That when the militia shall be so enrolled and organized into divisions, brigades, regiments, battalions, and companies, the two oldest companies in each regiment shall act as light infantry; to each division there may be one company of artillery and one company of cavalry, to consist of volunteers, provided that not more than one-fifteenth part of the privates of any one company shall be permitted to join such volunteer corps. There shall be to each company of artillery one captain, two lieutenants, four sergeants, four corporals, one drummer, one fifer, and forty-two privates; the officers, non-commissioned officers, and privates, to be armed with swords or hangers. To each company of cavalry there shall be one captain, two lieutenants, one cornet, four sergeants, four corporals, one saddler, one farrier, one trumpeter, and one hundred privates; the commissioned officers to furnish themselves each with a good horse, at least fourteen hands and a half high, and to be armed with a sword and brace of pistols, the holsters of which to be covered with bear skin caps; each non-commissioned officer, musician,

and private, shall furnish himself with a serviceable horse, at least fourteen hands and a half high, a good saddle, bridle, mail-pillion, and valise, holsters, breast-plate, and crupper, a brace of pistols, a sabre, and cartridge-box, to contain twelve cartridges for his pistols; the calibre of the pistols to be used by volunteer corps of the militia shall be, if practicable, the same throughout each State and Territory. The uniform dress of volunteer corps shall be such as may be prescribed by the governors of the States and Territories to which they belong respectively And whenever any officer, non-commissioned officer, or private, of any volunteer corps shall neglect, for the space of two months, to comply with the requisitions of this act, he shall be discharged from the corps to which he may belong, and be immediately enrolled and do duty in the infantry.

SEC. 10. *And be it further enacted*, That all commissioned officers shall take rank according to the date of their commissions; and when two or more of the same grade bear an equal date, then their rank shall be determined by lot, to be drawn under the superintendence of the officer immediately superior in grade.

SEC. 11. *And be it further enacted*, That the Vice-President of the United States, the officers, judicial and executive, of the government of the United States, the members of both houses of Congress, with their respective officers, all post officers and mail-carriers, all ferrymen employed on the post roads, all inspectors of exports, all pilots, all mariners actually employed in the sea-service of any citizen of the United States, with all persons which are now, or hereafter may be, exempted by the laws of the respective States and Territories, provided the same shall not exceed in any one State or Territory one-fifteenth part of the whole number of militia in such State or Territory, shall be, and are hereby, exempted from militia duty; *Provided, also*, That the exemptions by the States and Territories shall not extend beyond a time of peace, except to their principal officers of State, judges of their supreme and superior courts of law and equity, clerks of courts of record, sheriffs of counties, keepers of public mills, and professors and teachers in public and private seminaries and schools of learning, and regularly ordained ministers of the gospel.

SEC. 12. *And be it further enacted*, That when the United States may require the service of any portion of the militia thereof, the chief magistrate of the State or States, Territory or Territories, on which the requisition shall or may be made, shall cause the number of militia required of them, respectively, to be detailed from the junior class as follows: the first subdivision shall be first subject, and on failure of that to supply the requisition, the detail shall be made from the successive subdivisions of the junior class in their numerical progressive order; and if at any time exigencies shall require the service of a greater number of militia than is or may be contained in the junior class, the additional number required shall be detailed in like manner from the senior class, the subdivisions thereof being subject in their numerical progressive order; and it shall be the duty of the commanding officer of each company to make a return of the number and names of the persons so detailed from their companies, respectively, to the commanding officers of regiments or battalions to which they severally belong within two days thereafter; and it shall be the duty of the commanding officers of regiments or battalions to make return of the number and names of the persons so detailed from their regiments or battalions, respectively, with the place of their residence or designation of the company from which they may be so detailed, to the commanding officers of the brigades to which such regiments or battalions may severally belong, within four days after receiving the same; and it shall be the duty of commanding officers of brigades, within six days after receiving the same, to make return of the number and names of all persons so detailed from their respective brigades, designating the companies from which they may be so detailed, to the commanding officers of the divisions to which such brigades respectively belong; and it shall be the duty of such commanding officers of divisions to make, forthwith, by express if required, a consolidated return of all the militia so detailed from their respective divisions to the commander-in-chief, or chief magistrate of the States and Territories to which they severally belong; and if not required to make such return forthwith, said returns shall be made within ten days from the time they may be received by said commanders of divisions; and said militia, so detailed and officered as aforesaid, shall be immediately organized and arranged by the commanders-in-chief of the several States and Territories to which said militia respectively belong into companies, and when the number detailed from a State or Territory is sufficiently great into battalions, regiments, brigades, and divisions, and shall be considered in the service, and under the control and government of the United States, subject to the performance of a tour of duty not exceeding twelve months: *Provided*, That nothing in this act contained shall be so construed as to compel any member of the senior class to march or do duty without the limits of the State or Territory in which he may reside: *And provided, also*, That no member of either class shall be held to the performance of more than one tour of duty until each member of the class to which he may belong shall have performed a like tour of duty; and each person so detailed as aforesaid shall perform such tour of duty, if required, notwithstanding he may arrive to the age of thirty years, if detailed from the junior class, or to the age of forty years, if detailed from the senior class, during the term of service for which he may be so detailed.

SEC. 13. *And be it further enacted*, That the militia so detailed and called into the service of the United States shall, while in said service, be subject to the rules and articles prescribed for the government of the army of the United States, and shall receive the same pay, clothing, and rations, as are or may be provided for, allowed and paid to persons in the regular army of the United States. *Provided*, That no non-commissioned officer or private of the militia shall be entitled to more than one suit of clothing, which shall be appropriate to the season, for any term of service not exceeding six months.

SEC. 14. *And be it further enacted*, That if any person, whether officer or private, of the militia so called into the service of the United States, shall be wounded or disabled while in actual service, the person so wounded or disabled shall be taken care of and provided for at the expense of the United States.

SEC. 15. *And be it further enacted*, That in each State and Territory of the United States where, by the laws of the State or Territory, the commissioned officers and sergeants of the militia of such State or Territory shall be called out by States, Territories, divisions, or brigades, to be actually encamped not less than six nor more than ten days, at any one time, in each year successively, and shall be compelled to do and perform camp duty and field exercises diligently, according to the system of discipline prescribed by Congress, and according to military usage, with a view to the perfection of said officers and sergeants in the line of their duty, and shall moreover conform to the rules and regulations prescribed for the government of the army of the United States, and to instructions which may, from time to time, be prescribed, under the direction of the President of the United States, for the government of said officers and sergeants in the details of camp duties and field exercises, to each such State and Territory as aforesaid tents and camp-kettles shall be furnished by the United States, under the direction of the President thereof, sufficient

for the officers and sergeants so to be called out as aforesaid. The annual return of the officers, non-commissioned officers, and privates, required by this act to be made by the adjutant generals of the respective States and Territories of the United States to the office of the general superintendent of militia affairs, shall be the evidence on which the President of the United States shall direct the number of tents and camp-kettles to be furnished to the executive of each State and Territory so accepting them, for the use of the officers and sergeants as aforesaid: *Provided, however,* That tents and camp-kettles shall not be furnished more than once in twenty years, except such additional number as may be necessary to supply any increase of numbers of officers and sergeants in such State or Territory. The tents and camp-kettles so furnished to be secured and preserved under rules and provisions to be prescribed and made by the legislatures of the States and Territories among which they may be distributed. And each commissioned officer and sergeant so called out as aforesaid shall receive from the United States the sum of ——— per day for each day he may be in service in said camps of instruction, with the additional allowance of four cents per mile for each mile said officers and sergeants may necessarily and respectively travel in going to and returning from their respective encampments. And the certificate of the commanding officer of each encampment, exhibiting the names of the officers and sergeants who served in said camps, respectively, with the number of days which each performed diligently the duties assigned them, and the number of miles said officers and sergeants respectively travelled in going to and returning from the encampment, and returned to the office of the general superintendent of militia affairs, marked on the envelope, *militia service,* shall be evidence of the right of the individuals who shall have performed such service to receive the aforesaid allowance, to be paid under such rules and regulations as may be prescribed by the President of the United States.

Sec. 16. *And be it further enacted,* That the commanding officer of each camp of instruction which may be so organized according to the provisions of this, is hereby authorized to detail from the whole militia of the States or Territories to which they respectively belong musicians to attend the exercises of said camps of instruction, not exceeding one fifer and one drummer from each brigade, who shall receive not exceeding ——— dollars for each day they may be actually in service, respectively, to be paid by the United States, under the direction of the President thereof; the certificate of the commanding officer of the camps in which said musicians shall have respectively performed such service, distinctly stating the number of days which they severally and diligently performed their duty, and returned to the office of the general superintendent of militia affairs, shall be the evidence on which payments shall be made to said musicians.

Sec. 17. *And be it further enacted,* That the abstract of infantry tactics, including exercises and manœuvres of light infantry and riflemen, with the system of exercise and instruction of field artillery, including manœuvres for light or horse artillery, reported by the Secretary of War on the eighth of January, one thousand eight hundred and twenty-seven, be, and the same is hereby, adopted for the use of the militia of the United States, to be made by all officers thereof a rule of action or practice in the training and disciplining said militia.

Sec. 18. *And be it further enacted,* That the sum of ———— dollars be, and the same is hereby, appropriated, annually, for the purpose of purchasing muskets, bayonets, cartridge-boxes, and belts, for the use of the militia of the United States; and that the muskets, bayonets, cartridge-boxes, and belts, heretofore distributed among the several States and Territories of the United States, with such as may hereafter be so distributed, shall be secured, preserved, and reserved for the use of the junior class of the militia of the United States, under such rules, regulations, and provisions, as may be made and adopted by the States and Territores respectively: *Provided, however,* That the subdivisions of said class shall be furnished according to their numerical progressive order, commencing with the first: *And provided, also,* That each State and Territory shall be held pledged to the United States for the security and preservation of the arms so distributed among them, respectively.

Sec. 19. *And be it further enacted,* That the sum of ———— be, and the same is hereby, appropriated, out of any money in the treasury not otherwise appropriated, to carry the provisions of this act into effect.

Sec. 20. *And be it further enacted,* That all laws heretofore passed which militate against the provisions of this act be, and the same are hereby, repealed.

21st Congress.] No. 427. [1st Session.

ON THE ERECTION AND REPAIRING OF FORTIFICATIONS ON THE PENOBSCOT BAY AND RIVER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 4, 1830.

Mr. Drayton, from the Committee on Military Affairs, to whom was referred a resolution of the legislature of the State of Maine, "instructing her representatives to use their influence to obtain an appropriation for the purpose of erecting and repairing, as soon as may be, fortifications on the Penobscot bay and river, sufficient for the protection thereof," reported:

That they have had the foregoing subject under consideration, and being of opinion that it would be inexpedient at this time to make any appropriation for the purposes expressed in the resolution, they resolved that the committee be discharged from the further consideration of the resolution.

DEPARTMENT OF WAR, *January* 27, 1830.

SIR: I have the honor to enclose a report from the Chief Engineer, in reply to your letter of yesterday, relative to the expediency of fortifying Penobscot bay and river.

I am, sir, respectfully, your obedient servant,

JOHN H. EATON.

Hon. WM. DRAYTON, *Chairman Committee on Military Affairs, House of Reps.*

ENGINEER DEPARTMENT, *Washington, January* 27, 1830.

SIR: On the subject of the Hon. Mr. Drayton's letter, relative to fortifying Penobscot bay and river, I have the honor to state that no knowledge is had in this department of any fortifications now existing there, and that the most essential and prominent point for defence on that part of the coast is Mount Desert island, of which the surveys have not been completed, and, consequently, no plans of defence settled on. The accompanying extracts from a report of the board of engineers will show their views with regard to the defence of that part of the coast.

In reference to the expediency of commencing any of these works at present, I beg leave to refer to the reports I have before made on the subject of fortifying the harbor of New London and the outlet of Lake Champlain.

Very respectfully, sir, your obedient servant,

C. GRATIOT, *Brigadier General.*

Hon. J. H. EATON, *Secretary of War.*

The northeastern section of the coast.

The northeastern section is characterized by its serrated coast and its numerous harbors, and, though differing in these respects entirely from the other sections, is no less distinguished in its climate by the prevalence, at certain seasons, of dense and lasting fogs. The extent of this section, measuring where the breaks in the coast are abrupt, from point to point, is about 500 miles; while a straight line from Cape Cod to Quoddy Head is hardly half that distance. The eastern half of this coast is singularly indented by deep bays, the shore being universally rocky, and having numerous islands, surrounded by deep water, which not only add to the number of harbors, but afford an interior navigation perfectly understood by the hardy sailors of the country, and measurably secured, by its intricacies and the other dangers of this foggy and boisterous region, from interruption by an enemy The western half, though it has two very prominent capes and a few deep bays, is much less broken in its outline than the eastern. It is covered by few islands in comparison, but contains, nevertheless, several excellent harbors.

Considering the sparseness of the population in the eastern part of the State of Maine—the little comparative value of any existing establishment there—the proximity of a province of another power, within which is situated an important post of naval rendezvous—the board think it would be inexpedient to undertake, under present circumstances at least, the defence, by permanent works, of any position to the east of Mount Desert island; especially as the capture of any work there, whereof the strength would be proportionate to the importance of the place covered, might, owing to its destitution of succor, be easily achieved by an enemy, who would not fail to profit of its situation to harass both our commercial and naval operations.

Mount Desert island, situated between Frenchman's and Penobscot bays, and centrally as respects the Kennebec and St. Croix, rivers—having a capacious and safe roadstead, affording anchorage for first-rate vessels, easily accessible from the sea, and being easily defended by batteries—offers a station superior to all others on this portion of the coast for the navy of an enemy. From this point his cruisers can act with great effect against the navigation of the eastern coast, especially that of Maine, and his enterprises of every kind can be conducted, with little loss of time, against any point he may select. These considerations, added to the advantages which would result from possessing ourselves of a naval station which would afford protection to this commerce, and which would enable us to assume the offensive, should our political relations again make it necessary, in the immediate vicinity of a formidable provincial establishment of another power, together with the necessity of providing places of succor on a part of the coast where vessels are so frequently perplexed in their navigation by the prevailing fogs, lead the board to the conclusion that the fortification of this roadstead in a strong manner is indispensable.

From the incomplete state of the surveys, however, they are not at present able to state the particular mode nor the expense of the defences.

Penobscot bay.—The next important part of this coast, proceeding westward, is Penobscot bay. Upon this bay, and upon the river of the same name flowing into it, are situated several flourishing towns and villages. Of the many bays which intersect this coast, the Penobscot is the one which presents the greatest number of safe and extensive anchorages. Their number, indeed, is such as to render it inexpedient to attempt, under present circumstances, the defence of any of them. Unless all were fortified, which would involve an expense out of all proportion to the objects secured thereby, an enemy would find all the shelter he could desire in either of the neglected harbors; while the local interests which would be covered by the defence of either are not regarded as being yet of sufficient amount to excite the cupidity of an enemy, especially considering the protection afforded by an establishment at Mount Desert island against all minor enterprises.

It is necessary, however, to protect the valuable commerce of the bay and river, and to afford a secure retreat for such vessels as, endangered by an enemy, may be unable to place themselves under the protection of the works to the right or left of the bay. The lowest point at which this object can be accomplished without great expense is at the narrows of the river, opposite Bucksport; and the committee have accordingly presented a project for a fort at that position, accompanied by a memoir and estimate. The expense is estimated at $101,000.

21st Congress.] No. 428. [1st Session.

ON THE PURCHASE OF ADDITIONAL LAND IN THE VICINITY OF FORT WASHINGTON ON THE POTOMAC.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 4, 1830.

Mr. Drayton, from the Committe on Military Affairs, to whom was referred a resolution of this House instructing them "to inquire into the expediency of purchasing additional land in the vicinity of Fort Washington for the more complete extension and security of that work," reported:

That the possession of the land referred to in the above resolution is of great importance to the United States, inasmuch as it is necessary to render complete and efficient the defences of Fort Washington upon the river Potomac. This subject has been under negotiation since the commencement of the year 1823 to the present time, and the acquisition of the land has always been deemed a matter of primary consideration by the government. In February, 1823, the value of the premises, by mutual agreement between the parties, was submitted to referees without any obligation on the part of the United States to be bound by the award. The referees estimated its value at $29,600, including rights to certain fisheries which were regarded as productive; but the government, deeming this estimation to be disproportionate and extravagant, refused to acquiesce in it. After an interval of some years, upon a renewal of the application to the War Department to purchase this land, made by its proprietor, the former proposed, upon receiving a conveyance of it in fee simple, to release the latter from the payment of a judgment for which he was responsible to the United States, amounting to $13,369 87, with interest from June 9, 1819, until paid, and costs. This proposition having been rejected, no bargain was concluded. During the present session of Congress the widow, and, as is understood, the sole executrix and devisee of William Dudley Digges, deceased, in whom the absolute title to the before-mentioned property was vested, has signified her desire to convey it absolutely to the United States, upon receiving a release of their claim under the judgment against her testator. The committee, being of opinion that this offer should be accepted, have therefore reported a bill in conformity to it.

For detailed information relative to all the facts and circumstances connected with the expediency of the purchase of the land contiguous to Fort Washington, the committee beg leave to refer to the reports of the committees of the House of Representatives in the 2d session of the 18th Congress, vol. 1, document No. 74, and of the 2d session of the 20th Congress, vol. 1, document No. 79.

21st Congress.] No. 429. [1st Session.

ANNUAL RETURNS OF THE MILITIA OF THE UNITED STATES FOR 1829.

COMMUNICATED TO THE SENATE FEBRUARY 4, 1830.

Department of War, *February* 1, 1830.

Sir: I have the honor to transmit herewith abstract of the returns of the militia of the United States, required by the first section of the act of the 2d of March, 1803, entitled "An act in addition to an act entitled 'An act the more effectually to provide for the national defence, by establishing an uniform militia throughout the United States.'"

I have the honor to be, sir, your obedient servant,

JOHN H. EATON.

The Vice-President *of the United States and President of the Senate.*

Abstract of the general annual return of the militia of the United States, by States and Territories, according to the act of March, 1803.

States and Territories.	RETURNS.		INFANTRY, ETC.								CAVALRY.						ARTILLERY.						RIFLEMEN.						Aggregate.
	For what year received.	Date.	Number of divisions.	Number of brigades.	Number of regiments.	Number of battalions.	Number of companies. ADJUTANT GENERAL'S OFFICE, *Washington, February* 1, 1830.

S. COOPER, *Acting Adjutant General.*

21ST CONGRESS.] No. 430. [1ST SESSION.

ON THE EXPEDIENCY OF MERGING THE MARINE CORPS INTO THE ARTILLERY OR INFANTRY OF THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 5, 1830.

Mr. DRAYTON, from the Committee on Military Affairs, to whom, among other parts of the President's message, was referred so much of it as related to the expediency "of merging the marine corps in the artillery or infantry of the army," reported:

That the anomalous character of the corps of marines, sometimes governed by the laws and regulations of the navy and sometimes by those of the army, would unavoidably lead to occasional embarrassments, unless their rights and duties were expressed with the utmost fulness and precision. According to existing usages, whenever a detachment of marines is on duty at a navy yard or any other naval station, its commander does not consider himself to be subject to the orders of the naval officer present, whatever may be his rank, because no law has declared that the command under such circumstances should devolve upon the officer of the navy. The naval officer, upon whom the responsibility rests, is thus unable to take those precautions which in his judgment are the most appropriate; and although it is probable that his views and those of the officer of marines would accord, or that the latter would comply with the instructions or requests of the former, yet ought not a matter of so much importance to be dependant upon coincidence of opinion or courtesy. It is believed that no military principles are better established than that priority of rank should be clearly defined, and that responsibility should be accompanied with command.

By law only one officer with the rank of a lieutenant colonel has been assigned to the marine corps, and yet, as has been brought to the view of this House in the President's message, besides its lieutenant colonel commandant, there are attached to it five brevet lieutenant colonels, who receive the full pay and emoluments of their brevet rank.

To remedy the defects in the regulation and organization of the marine corps which have been noticed, and also some others of minor consequence, the committee are of opinion that it would be expedient to pass the bill which they now report.

21ST CONGRESS.] No. 431. [1ST SESSION.

ON THE EXPEDIENCY OF DISCONTINUING THE USE OF WHISKEY IN THE ARMY RATION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 8, 1830.

Mr. DRAYTON, from the Committee on Military Affairs, to whom was referred a resolution of this House, instructing them to inquire into the expediency of inducing the soldiers of the army of the United States to discontinue the use of whiskey, reported:

That, in their opinion, the use of whiskey is not, under any circumstances, essential to the health of the soldier; and although the gill which is given with his daily ration might not be prejudicial, yet experience demonstrates that the habitual consumption of ardent spirits, even in moderate quantities, creates a desire for more, and gradually leads to the grossest excess. It is believed that drunkenness operates more extensively than all other causes combined in producing insubordination, desertion, disease, and death, among our troops. Could their passion for stimulants be suppressed, their moral, intellectual, and physical condition would be incalculably improved, and a better class of our citizens would be induced to enter into the army. Deeply sensible as the committee are of the miseries which are introduced by intemperance, they are, nevertheless, averse to recommending the interdiction of ardent spirits to the soldiers now in the service. It might perhaps be regarded as a violation of its contract on the part of the government to deprive the soldier of an allowance which, upon his enlistment, it was stipulated that he should receive; and a spirit of opposition might thus be provoked against any regulation, however salutary, when abstractedly regarded. Besides, little reliance is to be placed upon the efficacy of any sudden exercise of authority in subduing propensities long inherent in the system. Reformation, to be permanent, must commence with the delinquent; mere legislation is comparatively powerless. When the drunkard rouses himself to a temporary effort of sobriety, he is strongly excited to perseverance by the beneficial results upon his health and spirits, and the observation, which cannot escape him, of the superior estimation among their comrades which is enjoyed by the temperate. Should these feelings be lasting, the habits of the individual would be changed and his example would encourage imitation. If to this moral influence some inducement contributing to the comfort or increasing the pecuniary means of the soldier were added, by thus calling into action self-esteem and interest, a degrading and baleful practice might doubtless be greatly diminished should it not be altogether eradicated.

Under existing regulations, sutlers, with the permission of the commanding officers of the posts or garrisons, may sell spirits. This permission ought in no case to be granted. It is never necessary, and it affords a facility to the gratification of a morbid appetite, injurious to the health and destructive of the usefulness of a soldier.

In conformity with the foregoing views, the committee would suggest that the non-commissioned officers and soldiers, in lieu of their rations of whiskey, should, with their acquiescence, be allowed a

certain quantity of coffee and brown sugar, or the value of whiskey in money, estimating it at two cents the gill, the pecuniary compensation to be credited to them monthly, provided they have been sober during that period, and to be received by them when they are regularly paid.

Should all the non-commissioned officers and soldiers accept either the coffee and sugar, or the pecuniary compensation for whiskey which has been specified, it is ascertained that the expenditures upon the army would thereby be increased by $21,900. A much greater sum than this would doubtless be saved by the diminution in the number of deserters, which would exonerate the government from the expenses attendant upon their apprehension and of courts-martial necessary for their trial.

To accomplish the objects recommended by the committee, they beg leave to submit the bill which accompanies this report.

OFFICE OF COMMISSARY GENERAL OF SUBSISTENCE, *Washington, February* 2, 1830.

SIR: I have the honor to acknowledge the receipt of yours of the first instant, requesting me "to inform the military committee how much, upon an average, a gill of whiskey costs to the government, and what would be the price per day of an adequate allowance of coffee and sugar." And in reply have to state that the average cost of a gill of whiskey, at all the military posts in the United States, including the necessary wastage thereon, is one cent. And from the best information attainable, it is my opinion that the cost of sugar and coffee to each man per day would be two cents; making an annual increase of $21,900 in the cost of subsisting 6,000 men. The average cost of the whiskey is obtained from existing contracts on file in this office, and my opinion as to the probable cost of coffee and sugar is derived from the fact that a mess of six or eight men, orderlies attached to the military offices here, have expended fifty cents each per month in the purchase of sugar and coffee; to this should be added the cost of transportation to distant posts, and wastage, which it is presumed will bring it to two cents per man per day.

With great respect, your most obedient servant,

GEO. GIBSON, *Commissary General of Subsistence.*

Hon. WM. DRAYTON, *Chairman of the Military Committee, H. R.*

21ST CONGRESS.] No 432. [1ST SESSION.

ON A CLAIM FOR THE REIMBURSEMENT OF EXPENSES INCURRED IN OBEYING THE ORDER OF A SUPERIOR OFFICER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 8, 1830.

Mr. DRAYTON, from the Committee on Military Affairs, to whom was referred the memorial of Major M. M. Payne, reported:

That the memorialist, whilst in the command of a detachment of United States troops at Amelia island, East Florida, received an order from Major General Gaines, in the year 1819, to take possession of all slaves landed on the coast of Florida contiguous to the State of Georgia, when just grounds existed for suspecting that it was intended to introduce them into Georgia. Major Payne having received information from a respectable source that several convict slaves from Jamaica had been landed near the mouth of St. John's river, East Florida, and that it was intended to convey them into Georgia for sale, in conformity with the orders which he had received, caused ten of them to be seized and brought to Amelia island. Whilst Major Payne was on a temporary tour of duty at Charleston, South Carolina, in the year 1820, he was arrested, and held to bail in the sum of $10,000 to answer the suit of one Robert Robinson, the claimant of these negroes, in consequence of which the memorialist was compelled to attend the courts in Charleston twice a year in 1821, 1822, 1823, 1824, 1825, and 1826. In travelling so often from a distant post in Florida to attend to the management of his cause, the memorialist was necessarily exposed to much inconvenience and subjected to considerable expense; he therefore prays, as the suit against him, after two trials, has ultimately terminated in his favor, and as his conduct has been directed by a sense of duty and a strict obedience to orders given to him by his superior officer, that he may be reimbursed the money which he has expended in travelling, board, and lodging, and the amount of the fees to two lawyers whom he retained as his counsel.

From papers accompanying Major Payne's memorial the facts which have been detailed having been clearly substantiated, he would be entitled to the reimbursement which he asks for. Were there any doubts upon this subject, they would be completely removed by a recurrence to the peculiar circumstances under which Major Payne acted, which sufficiently appear by the following extract from the decision of the presiding judge in the court of appeals in South Carolina: "It is difficult to imagine a case which could present a stronger claim to the protection of the sovereign power than the one now before the court. A foreigner (Robert Robinson) gets into the country with a cargo of convicts, under pretence of settling there. He sells his cargo, in opposition to the known laws and policy of the province, as well as of the United States. The convicts, as he must have expected, raise the standard of insurrection, alike dangerous to Florida and Georgia. They arm themselves, steal, rob, and threaten the destruction of the weak and defenceless, and then he (Robinson) complains that the power in the exercise of sovereignty interfered to prevent the consummation of mischief against which humanity alone afforded a sufficient authority to act, and which interference the laws of nature and nations imperatively demanded. I can see no ground upon which the plaintiff can recover. The interference on the part of the defendant (Major Payne) was authorized by the government. No more force was used than was sufficient to quell the insurrection, and their detention lasted no longer than the government supposed necessary to the occasion."

The committee submit a bill for the relief of the memorialist.

21st Congress.] No. 433. [1st Session.

PROTECTION OF THE TRADE BETWEEN MISSOURI AND SANTA FÉ, IN NEW MEXICO.

COMMUNICATED TO THE SENATE FEBRUARY 8, 1830.

To the Senate of the United States:

I herewith communicate to the Senate a letter from the Secretary of War, with the papers which accompany it, in answer to the resolution of the Senate of the 2d of February, requesting "so much of a report received from the officer of the United States army who had command of the detachment for the protection of the caravan of traders to Santa Fé, of New Mexico, during the last summer, as may be proper to be made public and material to be known, in devising further means for the security of the inland trade between Missouri and Mexico."

ANDREW JACKSON.

February 5, 1830.

Department of War, *February* 5, 1830.

In obedience to a resolution of the Senate of the 2d of February, asking from the President such information relative to the caravan of traders to Santa Fé as he may consider proper to be made public, I have the honor to communicate to you a copy of the official report of Major Riley, who was in command of that detachment. Also the substance of a correspondence with the Spanish officer, Joseph Anthony Viscarra, on the subject of that trade, and on the importance and necessity of protecting it.

Very respectfully,

J. H. EATON.

The President *of the United States.*

No. 1. A letter from Joseph Anthony Chaves, civil chief the Territory of New Mexico, to citizen B. Riley, major in the United States army, acknowledging the receipt of his two letters of the 10th of July, 1829, favored by Mr. Charles Bent, and recommending to his particular attention citizen Joseph Anthony Viscarra, adjutant general and commandant, who undertakes the command of the auxiliary expedition, for the departure from that Territory, under his command, of the citizens, merchants of North America, and his secretary and actual deputy, who accompanies said Viscarra.

No. 2. A letter from Joseph Anthony Viscarra, stating that experience has taught him that unless there be a perfect understanding between the United States and his government to protect their commerce, that it will not be safe for any merchant to undertake any kind of traffic; he therefore requests to urge with the Congress of the United States the importance of such an understanding, and engages to do his best, on his return to the capital of New Mexico, to do the same.

No. 3. Joseph Anthony Viscarra's statement of the number of men, &c., with whom he arrived at Rio Napeste, amounting to 285.

Report of four companies of the sixth regiment of the United States infantry, which left Jefferson Barracks on the 5th of May, 1829, *under the command of Brevet Major Riley, of the United States army, for the protection of the trade of Santa Fé.*

Cantonment Leavenworth, *November* 22, 1829.

Sir: I have the honor to report my arrival here with the United States troops I have the honor to command, on the 8th of this month, all well and in good spirits, but rather thinly clad for the season. The command left this place on the 3d of June, and the opposite side of the river on the 4th. The reason for my crossing the river and going on the other side I have already stated in my communications to the department—that is, from all the information I could get, that it was the best side; but on my return I found that the people had given me wrong information of the road. However, we had little or no trouble, except with the oxen, they being of different ages, some old and some young, and not used to be put together, and the teamsters not accustomed to drive them. All these things combined troubled us a little; but after five or six days we had no trouble. Nothing occurred worthy of notice until the 11th, when a cart, which had been purchased by the assistant quartermaster, Lee, broke down, and on examining it we found that the inside of the hubs was entirely decayed, and that the boxes had become so loose that it could not be repaired on the prairie. I directed my assistant quartermaster, Lieutenant Brooke, to have it left behind, rather than lose time by calling a board or trying to repair it. On the same day we fell in with the company of traders, at a place called Round Grove, consisting of about 79 men and 38 wagons, which we took under our protection, and on the 12th left the Grove.—(Please to see, per journal, the arrivals, and departures, and progress of each day.)

On the 20th we left Council Grove. After going some miles we found a piece of bark stuck up in the road, that had written on it, "The Kansas have been attacked a few days since by the Pawnee Picks, and one of them has been killed." We saw several of their camps as we passed along, but after this we saw but one, which we took to be the camp of some other nation of Indians, and concluded that they had gone back; but on our return we learned that they had pushed ahead and waited for me at Cow Creek, the place where we saw the last Indian camp, where they had stayed two or three days, and then, being out

of provisions, had crossed the Arkansas lower down than where we struck it, and had gone low down on the Semirone, so that we missed them altogether.

I had followed your instructions inviting the Kansas, Ioways, and Shawnese, to accompany the expedition without pay or rations, but to have my protection on their hunts, but received no answer from either of them; if I had, I should have sent a runner ahead to inform them that my command was at hand. In a few days after that we lost six horses belonging to individuals, and some of the traders reported that they had seen signs of Indians, which determined me to abandon the idea of sending an express after we should have left Turkey creek, which you will see was for the good of the service.

On the 9th of July we arrived at Chanteau's island, where the traders determined to cross the river. The next day I received the enclosed communications, marked A and B. The next day, the 11th, I delivered to them the enclosed copy of a letter to the governor of Santa Fé, marked C, and received the enclosed communication, marked D. The communication marked D I thought was requisite, in order that I should know where and when they were to meet us. They crossed the river on the 10th, and on the 11th I went across to see them, and at about one o'clock they started.

I had given them my views and advice of the manner they should proceed, and they promised to adhere to it, but it was soon forgotten. I told them they must stick together, and not leave their wagons more than one hundred yards, without they sent out a party to hunt, but it had no effect: for at about half-past six of the same evening an express arrived from them, stating that Mr. Lamme, a merchant from Liberty, was killed, and they were only six miles off, and the Indians were all around them, and if I did not go to their assistance that they expected to be all killed and scalped. I could not hesitate, but struck my tents immediately and commenced crossing; but, unfortunately for my oxen, the river had risen about two feet during the day, so that we had some difficulty in getting across, but eventually succeeded. I reached them with the first division, composed of companies A and B, with the six-pounder and ammunition wagon, at about eleven o'clock at night, and the second division, under the command of Captain Wickliffe, in about an hour after, with companies F and H, and the rest of the baggage and wagons. We found them in a very dangerous situation, surrounded by very high sand hills, with deep ravines running in every direction; so that, I think, if they had been attacked by any other enemy but the Indians of that country they must have been all killed and scalped; but fortunately for them, in the midst of misfortune, the Indians run off after having killed and scalped Mr. Lamme. As soon as I arrived I selected the best position I could, and remained under arms all night, but saw no Indians.

At reveille some of the traders gave an alarm, and said they saw the Indians in great numbers, but we could see nothing of them. They expressed a wish that I would go further with them. I consented to travel with them two days, or until they should reach the Semirone; they appeared to be very well satisfied, and after burying Mr. Lamme, about ten o'clock a. m. we took up our line of march. The next day, the 13th, we reached a little creek, where there was good grass and water, which was very fortunate for us, for thirteen yokes of oxen had given out on that day. We rested on the 14th, and the traders stayed with us, when in the evening I received the enclosed communication, marked E, and I herewith enclose a copy of my answer to all their communications. We parted on the next day and I arrived at Chanteau's island on the 16th, after a fatiguing march of five days since we left the river. We encamped on the Mexican side for six or eight days, during which time we found it necessary to have the oxen unyoked and herded in good grass. We re-crossed at the expiration of the time above named and encamped a little above, opposite Chanteau's island. The position was as good as we could get at that point. The wood above was a little too near, but we had to encamp there for the purpose of giving our cattle a chance of gaining strength and spirits, there being good grass and wood there. We remained quiet until the 31st of July, when four discharged soldiers, Simmons, Fry, Colvin, and Gordon, started for the settlements. They had, a few days previous, asked my advice about going in. I told them that they ought not to think of such a thing, for that I had given up sending expresses, and that was a proof of the danger, but added that they were citizens, and to do as they pleased; but if they wished to stay they should have something to eat. All this had no effect; they wanted to go.

I wrote to the department and told you everything, and added at the bottom that it was very doubtful if you ever got the letter. At night of that day three of them only got back to camp, and I think it very doubtful, if it had not been for a hunting party under the command of Lieutenant Searight, whether any of them would have got back or not. They stated that they had not gone more than eight or ten miles when they discovered about thirty Indians riding across the river. They landed and soon galloped up to them, when one of the men made a sign of peace, which they returned, and the parties shook hands. Then the Indians made signs for them to go across the river, which they declined, and started on their journey, the Indians still making signs for them to cross the river. George Gordon looked back and said they were all friends, and that he would go and shake hands with them again; the others told him not, but in the act of shaking hands with them a second time he was killed by another Indian with a gun. The other three immediately took off their packs and prepared to defend themselves. The Indians began to ride round and cut capers on their horses; the three men fired one at a time at them, and retreated towards my camp, and met Lieutenant Searight's party. They said they killed one of the Indians.

The next day, 1st August, I sent Captain Wickliffe, with about forty or fifty men, and one of the discharged men, in search of the body of Gordon, and he returned in the evening without effecting his object. The man that went with him was so alarmed that he could not find the place. On the 3d, in the morning, I determined to make another search, and if possible to find and bury the bones of the man who had been killed. Accordingly, I ordered Lieutenant Isard, acting adjutant, to take charge of a party of forty men, and the two other discharged men, to proceed, search for, and bury the bones if he could find them. Whilst he was absent with his company, between one and two o'clock, p. m., the Indians made a desperate charge on horseback on our cattle and their guard, which was about four or five hundred yards from our camp. It was a perfect level; there was nothing to obstruct the advance of anything, or prevent us from seeing at the first onset. I immediately ordered light company B, that was armed with rifles and commanded by Captain Pentland, to advance and skirmish with the enemy until I could form the line, thinking at the time that they intended a general attack. Lieutenant Cooke, with his guard, was also ordered to that point, for the cattle guard was in great danger; but the promptness of the movement checked the charge of the enemy. They had, however, wounded Samuel Arrison, a private of grenadier company A, 6th regiment. He was brought in by some of light company B, and died of his wounds a few hours after. These wounds were nine in number. In the meantime I had formed company H, commanded by Lieutenant Waters, and company F, commanded by Captain Wickliffe, and marched them forward at double quick time towards the thickest of the enemy; and when about one hundred and fifty yards fired a volley. At that moment I discovered that the Indians were

around my camp. Lieutenant Searight was playing away with the six-pounder with good effect, and changing his position as circumstances required. I gave the command of the two companies to Captain Wickliffe, and went to the right flank, where I directed grenadier company A, commanded by Lieutenant Van Swearingen, to protect it, which was promptly executed. In the meantime, Captain Wickliffe, with great presence of mind, had crossed his company to the island to protect the rear, and opened a fire on the enemy. The Indians, seeing that we were well guarded on every side, began to gallop around and to move off. Our cattle and horses had taken fright at the first onset, but a great part of them had been stopped by the company in the rear. On the right flank there were about twenty, and very few Indians about them. I thought probably they might be saved. I directed Lieutenant Van Swearingen with his company to advance, and if possible to recover them; after he had got some distance from camp, and knowing that he had a good bugler with him, I ordered my bugler to sound double quick; he did, and Lieutenant Van Swearingen's bugler mistook the call, and the company returned without the cattle. By this time the enemy was retiring after a loss of eight killed and one wounded. Our loss, one man wounded, who died in a few hours after, fifty-four oxen, ten public horses, ten private horses, and a few public mules. Think what our feelings must have been to see them going off with our cattle and horses, when, if we had been mounted, we could have beaten them to pieces; but we were obliged to content ourselves with whipping them from our camp. We did not get any of the killed or wounded, but we saw the next day where they had dragged them off. They have said since that our fire from the big gun killed five or six. Lieutenant Brooke, my assistant quartermaster and commissary, seeing that there was very little to do in the staff, shouldered his rifle, marched out with the companies, and fought with them. The pitching of our tents was according to regulations, so that they formed a square. The cannon was in front of company A, on the right flank; company F, in the rear; companies B and H on the left flank. Lieutenant Brooke very promptly marched his guard to its proper place in front, after he, with his guard, had assisted in charging the first onset of the enemy. I have never seen officers and men more anxious to have a good fight. Every officer appeared to vie with each other who should do most for his country. After all was over I had the men formed and gave them an extra gill, and signified my satisfaction at their conduct. The Indians were about three hundred strong, well mounted, and with guns, bows, and spears; and our force about one hundred and thirty or forty. Lieutenant Izard being absent with his command, about forty men. The nation or nations we could not tell, but I have reason to believe that there was a part of the Camanchies, Arapahoes, and Hiaways, as one of my men's tin pans was found with some of these three nations that attacked the traders on their return, as also King's powder horn, that was recognized by some of my men when they showed things they had taken from the men killed in battle. We moved down the river in three or four days after this affair. On the 10th Corporal Astor came to us and informed us that he and Nation had been sent with an express, and that on the 23d July they were attacked by about fifteen Indians, who succeeded in getting the mail and horses and wounding them both, Nation dangerously, by a spear in the breast, and him slightly in the wrist by an arrow. He reported that Nation then laid sick with his wound, about ten miles off, and that he had been wandering about since the attack of the 23d in hopes of finding us. He also stated that they had fed on snakes and frogs a great part of the time. He says that somewhere about the Council Grove they saw some Indians who showed them something of hostility, but did not attack them. I immediately ordered a command of forty men, and Lieutenant Van Swearingen to command them, and to take a cart and bring in Nation. He returned at about nine or ten o'clock at night with him; he was very low; he reports that his joy, at seeing the party, was beyond expression; he shed tears, and tried to make a noise, but was unable in consequence of his weakness. The next day, 11th August, between 10 and 11 o'clock in the morning, we saw some Indians about two miles and a half from the camp, walking in and out of a ravine; and, after a little, saw some leading horses. They would sometimes come up the river and then go down again. It was evident that they wanted to decoy us from our camp. I had sent three or four men across the river, a little above our camp, to lay under the bank, about four or five hundred yards, for the purpose of killing buffalo, which I had done every day since we had been at this camp with a great deal of success. On the appearance of the Indians I had the recall sounded, and they returned and reported that they had killed three buffaloes. The Indians having disappeared, about one or two o'clock, I directed a party of sixteen men, an officer, and a non-commissioned officer to be detailed, and to take with them a wagon and team and bring in the buffaloes that had been killed. Shortly after Captain Pentland reported to me that he had been detailed to go on the command; I directed him to take bugler King, of company A with him to show him where the buffaloes laid, as he was one of the party which assisted in killing them; which, with the teamster, made the party twenty in number. I gave him instructions, stating that he had seen the Indians in the morning, and that he must keep his party together and not be dispersed; that in case he was attacked he must fight the enemy, and that I should support him in a very short time; but added again, "keep your party on the alert;" but, instead of that, as soon as he had crossed the river, King saw a buffalo crossing to the river, and obtained Captain Pentland's permission to leave the party and try to get a shot at him. In the meantime our camp was attacked by about one hundred and fifty Indians. I had the command turned out and formed as before, of one company on each side of the square. They did not, however, come within musket shot.

Lieutenant Searight had commenced a fire with the 6-pounder with some effect. I had told Captain Wickliffe that if he heard a fire on the other side of the river he, with his company, must move to support Captain Pentland. The enemy having gathered to the left flank of the C. P. was moved to that point. Captain Wickliffe marched in the direction of Captain Pentland's party. When he approached the river he discovered the party had crossed to a sand bank near the side of the river, and understood by one of the party that belonged to the company that King had been killed. On my hearing that King was killed, and that Captain Pentland had retreated across the river, I despatched my adjutant, Lieutenant Izard, to direct Captain Wickliffe to cross the river and secure the body, thinking that they had in the skirmish no time to take his scalp, and also directed Captain Pentland, with his party, to support him. As Captain Wickliffe crossed the river he was fired at by about fifteen or twenty Indians, and he returned the fire from his company. He then saw the wagon and team running down the river. He directed Captain Pentland to recover the body of King and he would with his company recover his wagon and team, after exchanging several fires with the enemy. In the meantime Captain Pentland had recovered the body and brought it into camp. On the first fire of Captain Wickliffe, I directed company B, under the command of Lieutenant Sevier, (his captain being on detached service and his lieutenants on guard,) to support Captain Wickliffe, which he did, and reached the point of support in about four or five minutes. Captain Wickliffee seeing that the enemy had dispersed, had the buffaloes cut up and brought into camp.

It is said by the men, and I believe, that there was not more than fifteen or twenty Indians on that side of the river, and as soon as they were discovered in pursuit Captain Pentland ordered his party to retreat. There are two instances in this report in support of my opinion, that in the case of discharged soldiers, when four were attacked by thirty, and they got off safe, after they showed resistance, and the case of Arter Nation, two attacked by fifteen, and when a show of resistance was made they went off. The way Nation was killed was in shaking hands with them, and in the act of giving tobacco. I am thus particular to show the government that I have done the best in my power, and that my arrangements in this case were as good as they could be, but unfortunately they were not carried into effect as they will be seen in the report. The loss on both sides was equal in number. Mathew King, a bugler in grenadier company A, 6th regiment; one Indian killed by the 6-pounder under the direction of Lieutenant Searight.

After the enemy had dispersed I directed Captain Pentland to hand in a written report; he did, and I have the honor to enclose it, marked K. He says he was attacked. I venture to assert that he was not fired on by the enemy, neither did he fire at them; then how could it be called an attack. They killed King about two or three hundred yards from the party, it is said. He says in his report that there were forty-six or fifty Indians. Admit there were—in the name of God, cannot twenty Americans whip fifty Indians? I answer yes, that they can whip one hundred such as we came in contact with in that country.

After this we kept moving every day to get grass and to find buffalo, which we had the good fortune to find plenty to have supplied five hundred men. It was not fat, but our men fattened on it. They had as much as they could eat the whole time, and half ration of flour and salt. Nothing of moment occurred from the 11th of August until the 11th of October, except the death of Nation, which took place a few days after he arrived. The last of September and first of October we were engaged in overhauling our wagons and carts. By a board of officers they have condemned five wagons and three carts, which they say are entirely unfit for service. There being no purchasers, according to the regulations, I ordered them to be burned, and the iron cached in a safe place, which was done. You will see by the enclosed, marked D, that we meant to wait until the 10th of October, but we staid a day longer, and did not move until the 11th. Early in the morning of the 11th, the moment this transportation having been put in as good order as it could be in at that place, with fifteen days' full rations of pork, beans, salt, vinegar, soap, candles, and about twenty-eight days' of flour and bread, with about thirty-two —— of dried buffalo meat, which I had ordered the company to save during the time we were lying still. On my arrival at Chauteau's island, on the 9th of July, I had directed the company to lay by fifteen days' full rations, in order that, if at any time we were obliged to abandon the expedition, we should have plenty to eat. Shortly after our departure on the 11th we received an express from the traders, stating that they were only one day's march from us, and they had a Spanish escort with them, under the command of Lieutenant Colonel Viscarra. I ordered a halt, pitched my tents, and waited for their arrival, which was on the next day, the 12th. When the colonel got nearly across the river, I had my line formed parallel to it, and received him with presented arms. I had sent my adjutant, on his landing, to escort him down to the line. After he had passed I dismissed the battalion, and received and welcomed him to the territory of the United States, and invited him and the secretary of state of Santa Fé to my tent, where we exchanged civilities, and he left us awhile to see the pitching of his camp. That evening he visited some of the officers, and appeared to be pleased. The next day I had a short battalion drill, and after a company of light infantry drill. I was very anxious to show the character of the American troops, and, from his and the secretary's appearance, I succeeded. In the evening he had his troops formed, and invited me and my officers to accompany him. He took us down the line, they at present arms, and fired several times with a brass 4-pounder which he had. After that we went with him to his marquee, and partook of an excellent cup of chocolate and other refreshments. During that day I had shown him everything about my camp. He was particularly pleased with the cannon, the carriage, and implements, which were entirely different from his. He looked at it several times. He said he was very sorry that we did not come into Santa Fé. The secretary handed me the enclosed document (G) from the governor, in answer to mine of the 10th of July. The other that he alludes to was a letter of introduction to him by Mr. Bent. The documents marked H, P, T are the returns and statements of his force, and of the caravan which he had under his command. The next morning (13th) we parted, he for Santa Fé, and I for this place, not without mutual professions of friendship, and hopes of seeing each other in the Spanish country next year. The caravan I received from the detachment amounted to about two hundred thousand dollars worth, probably of different kinds. One Spanish family, eight or ten other Spaniards, who were punished by their laws for having been born in old Spain, all of which, in my humble opinion, would have been destroyed and the people killed if it had not been for the Mexican escort. They were attacked, as it was, near the Semirone spring on their return, but the colonel, with his troops and Indians, beat them off. He lost one captain and two privates killed of his command. The traders say that they killed eight Indians; but there are several stories about it. It is hard to know which to believe, but it is certain that they killed some. We travelled on with them under our protection until we parted, which was at the Little Arkansas. On the fifth or sixth day after we started our oxen began to fail, and we were obliged to leave some on the road almost every day until we got in. I cannot account for it, unless it was that hard night's drive across the Arkansas, or after the attack of the 3d of August, for we had to keep them yoked and tied to the wagon wheels every night until our return; and another thing is, that we had to diminish the extent of range from necessity. In fact, it was impossible to protect them any distance from camp. We only got in with twenty-four yokes, and the most of them could not have drawn another day. One strong ground for the above reasons being correct is, that I let Mr. Bent have a yoke on the 10th of July, (that was not in those hard times,) and he writes in that he went through to Santa Fé better than the mules; and he had sent them back to me in good order, but they were stolen or strayed in the mountains. I let Mr. Bent have them to try whether oxen in future, if we could get them, would answer, they are so much cheaper. One team of three yokes of oxen will not cost more than two mules. On the 8th of November, at night, got to the end of our journey at Cantonment Leavenworth.

I have the honor to be, with great respect and esteem, your obedient humble servant,

B. RILEY, *Major United States Army, commanding.*

Brigadier General LEAVENWORTH.

21ST CONGRESS.] No. 434. [1ST SESSION.

APPLICATION OF THE CITY OF ST. LOUIS, MISSOURI, FOR AID TO ESTABLISH A PUBLIC HOSPITAL FOR SICK AND DISABLED SOLDIERS, AND OTHERS.

COMMUNICATED TO THE SENATE FEBRUARY 11, 1830.

To the Congress of the United States:

The mayor, aldermen, and citizens of the city of St. Louis, in the State of Missouri, most respectfully represent: That this city contains about *five thousand* inhabitants, and has but recently risen from the condition of a frontier village to that of a flourishing commercial town—the emporium of two States, and the *entrepot* of all the trade of the Upper Missouri and Mississippi. It is now in the act of change and of improvement; and its citizens (though in general industrious, prosperous, and comfortable,) are now necessarily burdened with great expenses, incurred as much for posterity as for themselves; the erection of the necessary public buildings, the graduation and pavement of the streets, and the construction of walls and embankments of the river. These are necessary works, and are sufficient to exhaust the revenue of so young a city, whose inhabitants are rather in a state of preparation than enjoyment. And hence other institutions, hardly less necessary, have been either wholly neglected, or attempted with insufficient means, and consequently have produced unsatisfactory results. Among these the most prominent and necessary is a public hospital for the sick and disabled.

Your petitioners take pleasure and pride in declaring that here there is no such class as in other countries is called *the poor*. Among the fixed inhabitants none are paupers but the blind, the crippled, and the insane; and for these ample provision is made by the laws of the State. But such is the local position of St. Louis, and such the circumstances of its present condition, that a public hospital, for the reception and cure of unfortunate strangers, is indispensable. In advancing to the northwestern frontier, St. Louis is the last considerable town; and hence it becomes the rendezvous of all who seek their fortunes in that direction. The public lead mines attract some; the fur trade others; and not a few, driven from their native homes by imprudence or misfortune, with the vague hope of rising with a new country, find themselves with minds enervated by disappointment, and constitutions broken by disease, thrown upon the bounty of strangers. The constant passage of steamboats from the Ohio and Lower Mississippi affords temptation to removal, and the means of transportation, to persons of the most indigent circumstances and unsettled habits; and many avail themselves of the means. But the army of the United States is the most fruitful source of the evil; to redress which, your petitioners now pray the bounty of Congress.

Jefferson barracks, the largest military post in the Union, is within ten miles of, and all the posts on the Upper Missouri and Mississippi are in direct connexion with St. Louis. The soldiers discharged from those garrisons are thrown upon society, without regular employment or industrious habits; many of them disabled by wounds received, or diseases contracted, in the public service; and perhaps a still greater number are driven to a premature old age and decrepitude, brought on by intemperance and debauchery. These unfortunates *cannot* be allowed to perish in our streets with sickness and want; and they *ought not* to be left to private charity.

Therefore, your petitioners most respectfully pray that an adequate sum of money may be granted them to be applied, in aid of their own means, to the erection and support of a public hospital in or near the city of St. Louis.

JOS. C. LAVEILLE, *President Board of Aldermen City of St. Louis.*
DANIEL D. PAGE, *Mayor.*

Attest:

J. A. WHERRY, *Register.*

21ST CONGRESS.] No. 435. [1ST SESSION.

ON A CLAIM FOR PAY FOR SERVICES AS A SPY IN THE WAR OF 1812.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 12, 1830.

Mr. DRAYTON, from the Committee on Military Affairs, to whom was referred the petition of David Kilbourn, reported:

That the petitioner sets forth that he is a native citizen of the United States, within which he remained until after the termination of the revolutionary war, when he removed into Upper Canada; that although residing in that province his attachment to his country was undiminished, and he was always desirous of promoting its interests; that in the year 1813, at the solicitation and by the authority of General Wilkinson, then commanding officer of the American army upon the northern frontier, he engaged to examine secretly the British posts in Canada, to procure accurate information of their numbers and position, and to communicate the result to the American commander; that he executed this commission to the entire satisfaction of General Wilkinson, by whose agent he was promised ample compensation for his services, and indemnity against any loss which he might suffer for having undertaken them; that the enemy, having been informed of the petitioner's employment and acts, apprehended him, confined him

in prison, treated him harshly, and purposed putting him to death, when he made his escape; that he was again taken, again subjected to similar ill treatment, and again threatened with death, which would inevitably have been his portion had he not a second time effected his escape; that after his escape he repaired to General Wilkinson's camp at the French Mills, who renewed to him his former promises, furnished him with money to defray his expenses to Sackett's Harbor, and recommended him to the quartermaster at that post, who employed the petitioner in his office; that from ill health he was obliged to relinquish this situation; since when he has resided in the State of New York, where he is now living under the complicated burdens of old age, infirmity, and indigence; and that since his compulsory abandonment of Canada his property there, which he valued at ten thousand dollars, has been confiscated, and its proceeds paid into the provincial treasury. Under these circumstances, he prays that he may be compensated for his services, and indemnified for the loss of his property.

That such services as were performed by the petitioner would, if discovered, expose him to the penalty of death, no other testimony is requisite to establish than the universal and well known practice of nations in similar cases; that he did perform these services faithfully, and that they were highly useful and important, is proved most fully and satisfactorily; and that justice and policy would dictate that he should be liberally remunerated for them is unquestionable. It must be recollected that the petitioner was not a traitor to his country when he penetrated into the British encampments, but an American citizen. Had he been a traitor, whatever odium might have been attached to his conduct, our government would have been bound to reward his treason. The committee feel no hestation in awarding to him what they consider to be a compensation for his services and the personal perils to which they exposed him, and for that purpose they report a bill. They entertain as little doubt as to the justice and policy of indemnifying the petitioner for any property which he lost by the execution of his dangerous commission; but as the testimony submitted to them is defective, both as to the value of the property which he alleges to have been confiscated, and its confiscation, they recommend that no further allowance be made to him until he produces stronger evidence to substantiate these facts than the committee have been furnished with.

21st Congress.] **No. 436.** [1st Session.

ON THE CLAIM OF THE WIDOW OF THE SUPERINTENDENT OF HARPER'S FERRY ARMORY (WHO WAS MURDERED FOR THE PERFORMANCE OF HIS DUTY) FOR PECUNIARY AID FROM THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 19, 1830.

Mr. Drayton, from the Committee on Military Affairs, to whom was referred the petition of Mrs. Matilda B. Dunn, reported:

That the petitioner is the widow of Thomas B. Dunn, late superintendent of the United States armory at Harper's Ferry, who was recently killed by a person formerly a workman at that establishment, whom the superintendent had refused to continue in his employment. The petitioner represents that her husband died in narrow circumstances, (a fact which was sufficiently proved;) she therefore prays that Congress will grant her a sum of money to aid her in the support of herself and her family, consisting of two small children,

The committee being of opinion that the application of the petitioner could not be granted without the exercise of a power which the Constitution has not vested in Congress, therefore recommend the adoption of the following resolution:

Resolved, That the petitioner have leave to withdraw her petition and documents.

To the Senate and House of Representatives of the United States of America in Congress assembled:

The petition of Matilda B. Dunn respectfully showeth: That some time during the last summer her husband, the late Thomas B. Dunn, was appointed superintendent of the United States armory at Harper's Ferry; that he was engaged in the discharge of the duties of his station until Friday, the 29th day of January, when he was assaulted in his office and murdered.

Your petitioner is convinced, from her knowledge of her husband's concerns, that he has left your petitioner and her two fatherless children in very humble circumstances in life.

Your petitioner does not hesitate to affirm that her husband was, during his continuance in office, faithful in the discharge of his duties to his country. From these considerations, your petitioner hopes that her situation will claim the favorable attention of Congress.

MATILDA B. DUNN.

Harper's Ferry, *Jefferson county, Va., February* 8, 1830.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:

The undersigned, citizens of Jefferson county and State of Virginia, respectfully represent: That they have been for some time past acquainted with the late Colonel Thomas B. Dunn, superintendent of the United States armory at Harper's Ferry; they state that he was cruelly murdered on Friday, the 29th day

of January last, while sitting in his office. A number of us, whose names are hereto annexed, were witnesses to some of the circumstances attending the bloody transaction. They can state with the utmost truth that, so far as they have been enabled to judge, Colonel Dunn was a truly faithful public servant, and in private life a most estimable man. By the death of Colonel Dunn the general government has been deprived of a truly valuable officer, and society of one of its most useful members. So far as the undersigned are capable of judging, (and many of us are more or less acquainted with his circumstances in life,) they feel warranted in stating that Colonel Dunn has left his bereaved family without the means necessary to render them comfortable in life. Mrs. Dunn, an amiable and much respected female, is in a languishing condition. She is the mother of two amiable and lovely children. From the considerations above mentioned, the undersigned sincerely hope that the bereaved and agonized family of Colonel Dunn will claim the favorable attention of Congress, and the undersigned, as in duty bound, will every pray, &c.

THE COMMONWEALTH vs. EBENEZER COX.—*Charge of murder.*

JEFFERSON COUNTY, *ss:*

FEBRUARY 15, 1830.

The following is a copy of the depositions in the above case, viz:

Armstead Beckham, being sworn, deposeth and saith that on the day which Colonel Dunn was murdered he had business with Major Stephenson in "*the upper office;*" that whilst in said office with said Stephenson he heard some one enter "*the lower office,*" presumed by witness to be Colonel Dunn; in about five minutes after he heard a sudden noise and a shriek; witness hastened down, and saw Ebenezer Cox walking off from the office. Witness threw open the door and saw the corpse of Colonel Dunn lying on his back upon the floor, a gun lying beside it about fifteen inches from it, and a large *wound* in the side. Cox was about thirty-five or forty feet from the door of the office; the gun was about fifteen inches off from a large wound in the side of Colonel Dunn. The witness gave the alarm of murder, and Cox continued walking off. Witness cross-examined, said he knew of no threats (except by rumor) that the prisoner had ever made against Colonel Dunn. Witness thinks that Colonel Dunn was killed by large duck shot. He also judges by the prisoner's expressions that he did not like the deceased. Witness said he had seen the prisoner with a musket with brass mounting frequently.

James Stephenson, being sworn, deposeth and saith that on the 29th of last month he was in the office in which he is employed, when Mr. Beckham came in to see him; they were conversing when Mr. Dunn came in and stirred the fire; in a few minutes after they heard a sudden noise, it was a dull heavy sound, like as if the house was falling; Mr. Beckham being more active than himself reached Mr. Dunn's office before him, and exclaimed Mr. Dunn was murdered! Witness did not see Cox.

Philip Strider, being sworn, deposeth and saith that on the day of the murder he went to see Mr. Dunn; he took a stand in the street so that he could see his office door and his house door; in a few minutes after he saw Cox enter the door with something under his cloak which made the right side stick out; in a very short time he heard the report of a gun, which he took to be the proving of a barrel; Cox came out, drew the door to with his right hand, drew his cloak around him, and walked away. Instantly Mr. Beckham came from the upper office, opened Mr. Dunn's office door, and then gave the alarm that Colonel Dunn was murdered.

William Smallwood, being sworn, deposeth and saith that on the day of the murder he was going to the armory; passed Mr. Dunn's office, near to which he met Ebenezer Cox, with a musket on his shoulder; passed on about thirty yards; stopped to converse with Mr. Adams, with whom he was in company, and in a short time heard the report of a gun; turned round and saw Cox coming away from the office, within thirty yards of the office; shortly after Mr. Beckham walked round the office and gave the alarm that Mr. Dunn was murdered; he returned to the office went in, and found Mr. Dunn lying on his back, with a large wound, and a gun lying on the floor near to and towards the wound. Witness says it was the same gun he had first seen Cox with, that was in the office, and he knew it by a white mark on the breech, like as if something had been marked on or scraped off of the wood.

Samuel D. Harding, being sworn, deposeth and saith that on the day of the murder he was in company with Cousaid, at Carter's door; he went down to Mr. Keyes's store; stood in sight of Mr. Dunn's office; saw Cox coming down towards the office, go in, and as Cox went in saw the muzzle of a gun sticking out from his cloak; he closed the door, and immediately a gun was heard discharged, and Cox then came out, closed the door after him, wrapped the cloak around him, and walked off; presently Mr. Beckham gave the alarm; he went into the office and saw Mr. Dunn lying on his back, dead, with one foot confined under the plate of the stove. Mr. Beckham said that Cox had murdered Colonel Dunn. Witness says Cox had no gun when he came out of the office.

Mr. Handskey, being sworn, deposeth and saith that on Thursday previous to the murder Cox was at witness's house; Cox spoke abusively of Mr. Dunn; witness took Mr. Dunn's part; Cox said he had been to Brien's works, and said he would go back and apply to Mr. Dunn for work, and if he would not give it to him he damned himself that he would make an alteration; Cox had a gun, which was the same, he thought, that was found lying by the side of Colonel Dunn's body after being murdered. Witness laughed with Cox about *making an alteration*, and said he supposed the alteration would be to leave the place. Cox said, "I don't say nothing," but seemed to look scornful.

Johnson Garrett, being sworn, deposeth and saith that on the day of the murder he was going to a blacksmith shop; found Cox at the shop about eleven or one o'clock; Cox seemed dissatisfied; was swearing, and said if some circumstance did not take place he be damned if he would not commit murder before night.

John A. Schaeffer, being sworn, deposeth and saith that on the day of the murder, about five minutes after bell-ringing, was passing by Mr. Dunn's office, and in proceeding he met Mr. Cox within five steps of the office, after hearing the report of the gun; witness spoke to Mr. Cox, and thought Cox appeared very much terrified. Mr. Beckham ran towards the office, and asked the witness what was the matter. Mr. Beckham opened the office door, looked in, and then exclaimed, "My God! Mr. Dunn is murdered." Shortly after Mr. Beckham exclaimed, "Ebenezer Cox has murdered Colonel Dunn! Stop the murderer!"

Mr. Adams, being sworn, deposeth and saith that on the day of the murder, returning from his dinner in company with Mr. Smallwood, and within about eight or ten steps of Mr. Dunn's office, met Cox with a gun on his shoulder; Cox passed on, and witness and Smallwood stopped to converse, and whilst con-

versing heard a report of a gun; turned his face towards the office, saw no one, and in a short time after heard Mr. Beckham giving an alarm that Mr. Dunn was murdered; stop Ebenezer Cox, the murderer.

Singleton Chambers, being sworn, deposeth and saith that on the day of the murder he was in his shop, and shortly after heard Mr. Dunn was murdered; understood that Cox had committed the murder; went in pursuit of Cox, and found him concealed under a shed that covers a water wheel.

Henry Bideman, being sworn, deposeth and saith that he borrowed the gun from Cox, and on the day before the murder Cox came and got it back. Witness says it is the same gun found by the body of Colonel Dunn; witness says he saw Cox load the gun with buckshot.

Reuben Stipes, being sworn, deposeth and saith that he went in search of Cox; found him concealed under the water wheel, where it was so dark that he could scarcely see him at first, with a cloak over his head; witness caught him, dragged him out, and said, come out here you rascal. Cox said, what do you want? Witness replied, you know what you have done. Well, said prisoner, come on, I am fond of fun. Witness asked the prisoner how he felt—if he did not feel miserable? No, said the prisoner, I wish you felt as well satisfied as I do.

A copy. Teste:

S. J. CRAMER, *C. J. C.*

VIRGINIA, *Jefferson county, sct:*

I, Samuel J. Cramer, clerk of the county court of Jefferson, do certify that Ebenezer Cox was on this day examined by the said court for the murder of Thomas B. Dunn; that on the said examination he was found guilty, and sent on for further trial; and that the aforegoing is a true copy of the depositions of the witnesses sworn on behalf of the Commonwealth, and now filed and made a part of the record.

In testimony whereof I have hereunto set my hand and caused the public seal of my office to be [L. S.] affixed this 15th day of February, 1830, and in the 54th year of this Commonwealth.

S. J. CRAMER.

WAR DEPARTMENT, *February* 10, 1830.

GENTLEMEN: To your application asking if any relief can be extended to Mrs. Dunn and her children, whose husband was lately murdered at Harper's Ferry, I answer that no discretion or authority attaches to this department to enable a compliance with so proper and benevolent a request. It is suggested to you to bring the application before Congress. When they are informed that he was a valuable and faithful officer; that in the line of and in the discharge of his duty he was assassinated, leaving little or nothing for the support of his wife and children, I have full confidence the appeal to their justice and benevolence will not be made in vain. Precedents in support of the application do exist.

Very respectfully,

J. H. EATON.

Messrs. GEORGE B. BALCH and GEORGE B. BEALL.

We, the undersigned, do certify that it is our belief that the death of the late superintendent of the United States armory at Harper's Ferry, Virginia, Colonel Thomas B. Dunn, arose out of circumstances connected with a strict discharge of his duty as superintendent of that armory, and that it would not have occurred at that time but for those circumstances.

Given under our hands this 17th day of February, 1830.

JOHN H. HALL.
WILL BROADUS.

21ST CONGRESS.] **No. 437.** [1ST SESSION.

ON THE CAUSES OF DESERTION OF SOLDIERS IN THE ARMY AND SUGGESTION OF REMEDIES FOR PREVENTING THE SAME.

COMMUNICATED TO THE SENATE FEBRUARY 19, 1830.

DEPARTMENT OF WAR, *February* 17, 1830.

SIR: In reply to a resolution of the Senate respecting desertion in the army and the causes thereof, I have the honor to present the following remarks, accompanied with a communication from the commanding general:

The subject of desertion involves much that is important to the army, and demands legislative interposition if a remedy can be effected. Numerous theories have been suggested, but, as yet, they have led to the adoption of no effectual plan. The essential cause of this failure may, perhaps, be ascribed to the false,

though prevalent, belief that punishment is the most effectual means by which to control the actions of mankind. In this country, where man is free from every restraint save what the law imposes, it will not answer to exact from him a correct course of conduct, through no other means than that which penalty and punishment impose. Failure must be the attendant consequence, or, if success follow, it will be obtained by humbling and degrading those on whom it is to operate.

Societies must be regulated by the principles which properly belong to them. The action of government upon mankind should be in conformity to their condition, improvement, and capabilities. To apply to man in all situations precisely the same rule, would be as futile as to expect to direct civilized and savage nature to the same general course of conduct.

However desirable it may be to place the army on a more respectable footing, there is no disguising the fact that the rank and file which compose it are too often without those considerations of high self-respect which should invariably belong to this important arm of national defence. If some plan could be devised which would remove from the public mind the received opinion of inferiority attached to this service, much benefit might be expected. Men of intemperate habits and of dissolute character should not be received into the army, as those who are regulated by better principles cannot be associated with such persons without feelings of humbled pride. Different feelings, altered habits, higher self-respect, and honorable incentive, in some form or other, must be produced, or the evils deservedly complained of in our army will continue. Partial remedies are mere palliatives, and cannot answer any permanent good.

The lawgiver who would reach reform must, in the adoption of his means, look for the approbation and sanction of society; and here allow me to say that popular opinion, in the absence of war, is not with the existing law for the punishment of desertion. In time of peace, public opinion turns with abhorrence from the severity of the penalty, and renders the law a dead letter on the statute book. Milder punishments should be resorted to, carrying with them a more appropriate and certain effect.

A more important consideration, however, than the infliction of punishment as a remedy, should be looked to. If we inspirit the soldiers of our army, rather than dishonor them, and excite them through the avenues of honorable emulation, may we not expect a return more in accordance with the dignity of human nature, the character of our people, and the genius of our institutions? There is a constant proneness in man to better his condition, and every obstacle that society interposes to check this is impolitic and unwise.

As our army is at present organized, the gallant and faithful soldier has no opportunity afforded him to rise above his enlisted condition. He may become a corporal or sergeant, but with that humble advance his hopes and his ambition terminate. Knowing that impassable barriers exist to prevent his elevation, all incentive is destroyed, and ambition is quieted. He feels that his country has placed on him the seal of abasement, and he sinks dispirited under its withering influence. But if the door to promotion be unbarred, and the law shall recognize no distinction except merit—that the highest honors may be reached by the humblest private—what a noble incentive would it create, what enthusiasm would not follow! Multitudes then would be found advancing who now feel the stubborn interdiction which hangs upon their hopes and expectations. There is a buoyancy in hope that sustains in adversity, and which leads on in prosperity; extend it to the soldier, and the creations of his own fancy will give a moral force and an elevated cast of character to which without it he will be an alien.

The graduates of West Point Academy, from establishad practice, and not by authority of law, have the exclusive privilege of entering the army. All other portions of the community are excluded. The private who has served faithfully through danger and privation, and who, from experience, has learned to obey, (thereby making himself the better qualified to command,) on surveying the prospects before him, finds that each year brings a stranger to command him—a junior officer from the Military Academy. This state of things must weaken the inducements to a correct and faithful course of conduct. The non-commissioned officers knowing that no servitude, however long or faithful; no deportment, however exemplary; no valor, however distinguished, entitle them to promotion—that they but serve only as instruments for the advancement of others—feel the injustice, and sink under the despondency it produces.

I wish not to be understood as intending by these remarks anything to the prejudice of the graduates of the Military Academy. Experience has abundantly taught that the young gentlemen from that institution carry with them the richest stores of usefulness for their country, and are highly distinguished by those elevated principles of honor which are indispensable to the soldier and the citizen. But history teems with evidence of the fact that to the learned and scientific does not always belong success in war, or fitness for the profession of arms. The schools are but an auxiliary to the officer. Talent moves through its own channels, and full often the soldier who by no analysis can work from cause to effect, or project his plans of operation upon acknowledged rule, may, in the discharge of his military duties, succeed to the extent of his ambition, and accomplish all that could be expected for the glory of his country.

Whatever is calculated to disclose genius and bring it into active operation should be encouraged; to this end let promotion in the army be extended to the ranks. Graduates of the Military Academy, in cases where extraordinary merit is discerned, to be arranged to the navy or army as the judgment of the Executive shall determine; the others to retire to private life, there to follow whatever pursuit their preference may direct. The country will still have the benefit of the knowledge they possess, operating in various useful forms, and none more beneficially than in the diffusion of military information amongst the militia. Should our country be again called to arms, these citizen soldiers will be found ready to rally in defence of those rights dear to freemen.

This course will present opportunities to the non-commissioned officers of rising to any rank, however high. The common soldier will perceive the road to promotion open and accessible; new feelings will be inspired; ambition, honor, and pride will concentrate their influence to regenerate the soldier's character, and with it the evils of desertion may cease. Pride is everything to a soldier! It is this, and this only, which can render him heroic amidst danger and invincible in battle.

While in revolutionary France every man, however humble his origin, could look to the army with consciousness that merit was the passport to distinction, and was faithfully rewarded, it brought to her legions invincibility, and success to her against confederated Europe. If none but those of patrician rank and of affluence could have succeeded to military promotion, this state of things could not have existed. He who had not numerous and powerful friends to assist him would have remained at home, and only when compulsion made it necessary would have come forth to the combat. In the galaxy of distinguished names which shine conspicuously in the history of the French revolution, some of the brightest stars rose from the ranks. If such was the policy of France, how much more appropriate would be the same policy for republican America! There is a moral grandeur in beholding genius to emerge

from obscurity and rise to the first honors. It is every man's birthright, and no statute should exist to impair it. If the declared policy of our government be strictly regarded, which recognizes no distinction except that which merit creates, then shall we possess an army always ready and always efficient; but if this great controlling principle be disregarded, the future, like the past, will be encompassed with difficulties.

Barriers to advancement should not exist in a country which avers that men are born free and equal. To prevent this anomaly, and the train of attendant evils, is surely desirable, and, as far as practicable, should be obviated. To effect this, our laws should be so framed that the soldier may have extended to him all the privileges of promotion, even to the first rank of command if he be sustained by merit. Then will the hope of reward rise superior to the fear of punishment, and the soldier be seen in the attitude of dignity, shaping his course by the allurements of honor.

One of the expedients suggested is to take away the ration of ardent spirits; that its tendency is to encourage desertion, and hence should be discontinued. This certainly cannot be an inducing cause to the evil, because the allowance is too inconsiderable. The supply which soldiers obtain through other sources may have such a tendency, and may tend, too, to demoralize and to debase them. The evil thus existing can only be reached through the volition and power of the States; and so great is their interest in preserving the efficiency of the army that, if requested, they would no doubt consent to pass such laws as would restrain, under proper penalties, their citizens from vending spirituous liquors to the soldiers.

Another suggestion in connexion with this subject deserves consideration. At present the law allows a premium to the recruiting officer for every soldier he shall enlist; this, either in whole or in part, passes to the non-commissioned officer who superintends the performance of this duty. Under the temptation presented it operates as a bounty for the encouragement of frauds, as it leads to active efforts to entrap the young, the inconsiderate, and the intemperate, by improper allurements and vicious devices. This regulation ought to be abrogated, that every inducement to impropriety may be removed, that the citizen may not be imposed on, and that the army may be composed of men who seek the service voluntarily rather than those who have been entrapped in a moment of intoxication, and who awake from their stupor with abhorrence, anxious only to devise means how they are to escape from their dread condition. If none other present, desertion becomes the alternative; and this is sustained by the fact that more than half the desertions which take place are with the new recruits.

A country possessing twelve millions of people ought surely to be able at all times to possess itself of an army of six thousand men, obtained upon principles of fair contract; if this cannot be effected, then it will be better to rely on some other mode of defence rather than resort to the expedient of obtaining a discontented and besotted soldiery. To this end orders have been given to our recruiting officers forbidding any enlistments if the persons be in the least intoxicated.

I would also recommend that the bounty to the recruit be dispensed with or bestowed under a modified form, as I consider it in its present shape a co-partner in the impositions and evils that exist under the operation of the premium for recruits. It tempts the needy to forego all other considerations than the immediate possession of a few dollars—their poverty and not their will consenting; and it invites the unprincipled to defraud the government by receiving its funds without a requital. I would, therefore, propose to make the bounty contingent, to depend upon good behavior, and to be paid at some reasonable period subsequent to the enlistment.

Another beneficial reform might be to reduce the period of enlistment to three years.

I forward with this communication a report upon the same subject by Major General Gaines.

All of which are respectfully submitted.

JOHN H. EATON.

The PRESIDENT OF THE SENATE *of the United States.*

HEADQUARTERS OF THE ARMY, *Washington, January* 29, 1830.

SIR: I have the honor to transmit herewith a report from the Adjutant General, containing the information directed to be furnished by the resolution of the Senate of the 13th of January, 1830, on "the subject of desertions from the army annually since the year 1822, together with the probable causes of desertion, and, as far as practicable, the number which have deserted from the recruiting rendezvous; the number which have deserted after joining ther companies or commands, and the year of the soldier's enlistment in which the desertion occurred; the number of deserters who have been apprehended, and the loss sustained by the United States in consequence of such desertions." The subject is one that has commanded the attention of the superior officers of the army generally, and various opinions prevail as to the most effectual mode of preventing the commission of a crime so pernicious to the character of the army, and so detrimental to the public interest.

It has been recommended that the bounty should not be paid in hand, and that it should be altogether abolished, as it has been supposed that in many instances evil-disposed men enlist merely for the purpose of obtaining the bounty in hand, with a view of defrauding the government by deserting immediately thereafter. There is no doubt but that such is the fact. I am not, however, of the opinion that the bounty ought to be withheld, but that it should be disposed of in procuring for the recruit those necessaries which he naturally requires for his comfort and decent appearance on entering the service, as he can receive no pay until after he has been mustered in some company of a regiment to which he may be attached.

The 12th section of the act of the 16th March, 1802, directs that there shall be allowed and paid to each able-bodied citizen recruited to serve for the term of five years a bounty of twelve dollars; but the payment of six dollars of said bounty shall be deferred until he shall be mustered, and have joined the corps in which he is to serve.

By disposing of the bounty as suggested above, and on its being so explained to the person who offers to enlist, if the bounty be an object with him, and he being disposed to take advantage of the government, will have a tendency to prevent his enlisting, and thereby the government will avoid the enlisting of such unworthy subjects, and being defrauded by them.

In order to procure good men, and to insure their continuance in the service during the period for which they may be enlisted, it is proper to offer them for their services what would be considered a fair compensation. I therefore would propose that the whole pay, subsistence, clothing, and all other allow-

ances, including hospital, which are now allowed to a soldier, should be stated in their full value, in money, say twelve dollars a month, as follows:

Pay	$5 00
Subsistence	3 00
Clothing	2 50
Fuel	50
Quarters	50
	12 00

Which sum, it is presumed, will procure good men, considering that they are paid punctually, and for every day in the year.

Although the sum is stated at twelve dollars, it is proposed that the government shall continue to furnish the soldier with his subsistence, clothing, fuel, quarters, &c., as are now furnished; but should the soldier be able to economize upon his allowance, subsistence, or any other items allowed, by not consuming them, then he shall be paid the same in money, according to the contract prices, at the end of his enlistment, and will also receive the moiety of bounty due, to wit, six dollars. Thus, there will be an object for the soldier to fulfil his enlistment, in order to obtain whatever may be accumulated to his account at the end of five years.

In order to retain in service such of the faithful old soldiers that may have served for five years and are qualified to serve longer, it is recommended that authority be vested in the commanding officer of the regiment, garrison, troop, or company to which the soldier belongs, to re-enlist such of them as the interest of the service may require, for one, two, three, four, or five years, at the option of the soldier; the bounty for such re-enlistment to be doubled, and in proportion to the time they may engage to serve.

By this arrangement the expense of recruiting and transporting the recruit to the headquarters of his regiment would be saved to the government, besides having the services of a well-drilled soldier.

When men of good character shall be procured, the necessity for punishment will naturally wear away. The soldier being content with his situation, governed by wholesome regulations, and under the protection of experienced and well-informed officers, will find his condition so much improved that his attachment to the service will banish from his thoughts all ideas of desertion.

Respectfully submitted.

ALEXANDER MACOMB, *Major General Commanding the Army.*

Hon. JOHN H. EATON, *Secretary of War.*

REPORT ON THE SUBJECT OF DESERTIONS.

ADJUTANT GENERAL'S OFFICE, *Washington, January* 25, 1830.

Statement of the annual number of desertions from the army of the United States since the year 1822, *specifying the number of soldiers who have deserted after joining companies, and the year of the enlistment in which the desertion may have occurred; the number of recruits who have deserted from the rendezvous, or on their march to join their regiments; and also the probable amount of the annual loss in money in consequence of the crime of desertion.*

Year.	Number of recruits who deserted from the rendezvous, or before joining companies.	Number and period of desertions after joining companies.						Aggregate number of desertions, exclusive of convicts.	Number apprehended or joined from desertion.	Estimated loss in money by desertions.		
		First year of enlistment.	Second year of enlistment.	Third year of enlistment.	Fourth year of enlistment.	Fifth year of enlistment.	Total from companies.			By recruits from rendezvous.	By soldiers from companies.	Total loss in money.
1823	159	366	75	36	18	14	509	668	298	$7,506	$51,171	$58,677
1824	208	432	86	43	22	20	603	811	269	9,960	60,453	70,398
1825	249	402	76	41	20	15	554	803	218	11,550	55,938	67,488
1826	179	330	66	32	16	13	457	636	198	8,354	46,039	54,393
1827	187	303	125	120	72	41	661	848	192	8,754	52,590	61,344
1828	176	343	113	71	70	47	644	820	272	8,264	54,873	62,137
1829	182	620	141	57	45	38	901	1,083	406	8,580	88,246	96,826
Total	1,340	2,796	682	400	263	188	4,329	5,669	1,853	62,968	409,292	471,263

[One company of artillery for the month of December, 1829, twelve companies of infantry for November, and forty for December, 1829, remain to be heard from. Some few desertions may probably have occurred in some of these companies, which of course would swell the aggregate.

For the six years ending December 31, 1828, one hundred and ninety-eight *military convicts* (who had been tried for desertion) have *deserted;* of which number it appears that seventy were apprehended.]

It has been officially stated, on a former occasion, that the *records* of the office furnish no data on which any specific cause of desertion can be assigned. But experience and observation may sometimes

supply what cannot be derived from records; and in searching for the "probable causes of desertion," these may be best understood by suggesting such measures as may tend to diminish if not entirely correct a practice so degrading and calamitous to the military service.

I. *The bounty system as now established by law should be abolished, thereby dispensing with any bounty in hand or previous to two years' faithful service.*

The results given in columns Nos. 1 and 2 of the table incontestably prove that a vast majority of the desertions under these respective subdivisions is ascribable to the influence of the bounty paid in advance, in order to induce what has been called success in the recruiting service. Without the lure thus presented in the charm of *a bounty paid down*, such vagrants as compose the recruits who desert from the rendezvous or before joining companies would seldom if ever be tempted to enlist. The absence of motive or temptation would certainly cut off all that class who "enlist to-day and desert to-morrow," as well as a majority of that other class of kindred morality whose good faith may induce them to continue on the rolls just long enough to join a regiment, receive the retained bounty, and the four or five months' pay which may have accrued, besides the additional supply of the most costly part of a year's uniform clothing, and then desert.—(See columns Nos. 1 and 2 of the table.) (1.)

II. *The term of service should be reduced to four years.*

The pay of the non-commissioned officers should be increased.

One dollar should be added to the monthly pay of the private soldier: Provided, that the same be *retained* until the expiration of his term of service, or a given portion of it, when, upon evidence of faithful service, this accumulating fund, like a retained bounty, should be paid to him. (2) Such an improvement in the condition of the non-commissioned officer and private soldier would unquestionably induce voluntary enlistments from a class of citizens far more respectable than have hitherto been willing to serve in the army; and this inducement would be still stronger when it should be known that their comrades most probably would no longer be drawn from that exceptionable portion of society which now, in too many instances, appear to furnish its pernicious quota of recruits, scarcely for any other purpose than to obtain present and temporary relief.

It will be perceived that each of the foregoing propositions embrace a principle which, when united, combine a twofold operation—that of repulsion and allurement; and that they are calculated rather to influence individuals who look to the army for *employment*, while yet in their civil relations, or before they enter into the military service. The division of the subject, which remains to be considered, has reference to the individual in his capacity of an *enlisted soldier*, and to the legal and moral obligation to serve honestly and faithfully the full period of his enlistment; for, under any system, however liberal and ameliorated, some desertions may be expected to occur. Hence the absolute necessity of—

III. *Establishing, by law, a uniform, certain, and adequate punishment for the crime of* DESERTION.

The history of the army for the last fifteen years, and the experience of every intelligent officer who has either served with or exercised command over the troops, prove that the punishments which have been usually awarded in the case of desertion have had but little tendency to *prevent* desertion.

The number of trials by courts-martial is not less remarkable than the number of desertions, and the frequent convention of military courts for the trial of enlisted soldiers denote some radical defect somewhere in our military practical system. The annexed table, although not entirely complete, exhibits some facts which may deserve consideration.

Statement of the number of enlisted soldiers annually tried by courts-martial, for the six years ending December 31, 1828.

Year.	Number tried by general courts-martial.	Number tried by regim'l courts-martial.	Aggregate number tried by general and regimental courts-martial.
1823.....	156	937	1, 093
1824.....	187	988	1, 175
1825.....	170	1, 038	1, 208
1826.....	94	1, 021	1, 115
1827.....	134	857	991
1828.....	113	1, 363	1, 476
Aggregate.....	854	6, 204	7, 058

There can be but one opinion on this subject among military men; and if the voice of the army could be heard, with one accord it would be raised in support of the recommendation of a distinguished and experienced general officer, who says: "In recommending these punishments to be prescribed by law, I wish it to be distinctly understood that lashes are recommended in no possible case except for the five crimes of DESERTION, nor under any possible authority but that of a *general court-martial;* for I am convinced that the best of men, for their country's service, in the ranks of the army would have no more objection to this description of punishment, thus guardedly applied according to law to the five atrocious crimes above designated, than that the best of citizens should object to a residence in a State where piracy, or robbery, or forgery, or perjury, were deemed to be capital offences, and punishable by death or hard labor in the penitentiary for ten or twenty years."

The theory of the sentiment which for some years past has successfully opposed the infliction of corporeal punishment on malefactors in the army should, at least for the sake of consistency, be extended also to the navy; for if it be *true* that the age in which we live and the pride and nature of man revolt at this species of punishment, how can it be justified when by law it is made an auxiliary to the discipline of that chivalrous corps of national defenders whose march is "on the mountain wave?" That necessity which sanctions the law and justifies this practice in the naval service should authorize and justify it in the land service. The aggregate of crime, the amount of punishment, and the cost of courts-martial, &c., it is believed, would be greatly diminished if corporeal punishment for the crime of DESERTION should ever

be authorized. The class of offenders to whom this species of punishment, with the sanction of the law, would be applied, could not be more degraded by the infliction of stripes. He who shall have been convicted of *desertion* has thrown away the mantle which would have shielded the faithful soldier from the reproach and penalty of the lash. Why, then, let it be respectfully inquired, continue the present system of military punishment, which is oppressive only to the exemplary soldier?" And why withhold the legal authority to apply the only corrective adequate to the offence, and which would be afflictive *only to the deserter*—to such unworthy citizens as compose the 5,569 individuals exhibited in the table—who, to the crime of *desertion*, superadd perjury, and which, during the last seven years, has cost in money not less than $471,263—a pecuniary loss confessedly the most ungracious which the republic can sustain. (3.)

IV. *The absence of too many captains from company duty, the frequent changes in company commanders, and the consequent exercise of command by young, inexperienced officers, who, although otherwise qualified, have not acquired the art of commanding or administering to the comfort of the private soldier.*

The value of that experience and well-tempered discipline which captains and senior subalterns generally possess, and which they have occasion habitually to practice in their daily intercourse with the men of their company, becomes still more important when exercised toward the *newly-enlisted* recruits. The season of probation on joining the army is the period which presents the greatest trial to the soldier; that restless spirit which not unfrequently may prompt him to enlist is ever on the alert until he becomes reconciled to and aquainted with the service and his duty. Hence the absolute *necessity* why every company should be *commanded by its captain or a senior lieutenant.* Facts exhibited by the records furnish a striking commentary on the insufficiency of that part of our practical system which should insure the presence at all times of a due proportion of company officers, and especially of the rank of captain, for duty *with their companies.* The records show that the average number of captains in some of the regiments who are reported present on company duty do not equal one-half of the number of companies; that in many instances the command of companies devolves upon some of the most junior subalterns in the regiment; that in other instances not one officer belonging to the company has been present with it; that the same officer has had charge of more than one company at the same time; that at one frontier post, garrisoned with four companies, each of the four captains and each of the eight subalterns attached to the same has been absent at the same time on distant service, or otherwise, &c.

V. To the foregoing causes may be added the *prevalence of intemperance.*

Ardent spirits should be discontinued in the army as a part of the daily ration. I know from observation and experience when in the command of troops the pernicious effects arising from the practice of *regular daily issues of whiskey.* If the soldier has acquired some taste for alcoholic drink previously to enlistment, which is the case with a majority, the practice of administering to him half a gill of whiskey twice every day most probably confirms the habit; thus the tempter being presented in due form and with military precision is more than he can withstand; and thus is a fair opportunity to practice self-denial almost unattainable after enlistment. If the recruit joins the service with an unvitiated taste, which is not unfrequently the case, the *daily privilege* and the *uniform example* soon induce him to taste and then to drink his allowance. The habit being presently acquired, he too soon becomes an habitual toper. I would therefore substitute coffee and sugar, and also molasses, for the whiskey part of the ration.

From the foregoing remarks it may be perceived that the prevalence of *desertion* in the army is ascribable not to any one cause, but to a combination of causes; and the tabular exhibit shows that the evil is progressive, and that it would seem it has not yet attained the maximum. Its baneful march can be arrested only by the power of legislation. Whatever system may be devised, the one, in my humble opinion, most likely to succeed the best, should provide a certain and specific punishment, and so regulate and dispense the pay of the soldier as may be calculated to induce a greater proportion of respectable persons to enter into the service with the view to *employment*, and, at the same time, banish from the rendezvous that class of fraudulent schemers whose devices prove alike injurious to the recruiting funds, the efficiency and the moral of the army.

Respectfully submitted.

R. JONES, *Adjutant General.*

Major General ALEXANDER MACOMB, *Commanding the Army.*

NOTES.

(1.) Although the number of desertions in the second column of the table (2,796) is put down under the head of "*first year* of enlistment," it is known that a majority of this number have deserted within the first six months of their enlistment; and a considerable proportion within three or four months, or almost immediately after the first muster for pay. Generally, therefore, the most numerous class of deserters have neither rendered service nor learned the duties of a soldier.

(2.) If the soldier *re-enlist*, he should then be entitled to receive the full monthly pay of six dollars. The knowledge of this prospective and contingent provision for increased pay would add another inducement to re-enter the army, and another motive to faithful service during a first enlistment. Every reasonable inducement should be presented to the soldier in order to encourage him to *re-enlist.* If every good soldier would re-enlist in his regiment, the expenses of recruiting would be greatly diminished, and the condition of the rank and file much improved, &c.

(3.) "I recommend stripes or lashes only in cases where the *crime* itself degrades the offender so low that the *punishment* inflicted on him cannot tend to sink him any lower in the scale of degradation."

"This means of punishing the most vicious will tend rather to invite good men into the service than to deter them, as without this kind of punishment the best of the men are obliged to watch and to labor whilst the worst of them sleep under guard."—*Major General Gaines—extract from his report of* 1829.

[It is well known that arms and equipments when first placed in the hands and used by *recruits* sustain the most injury, and especially by those who *enlist to desert*, or such as are enumerated in the second column of the table. It has been stated by Inspector General Wool, "that muskets generally in the hands of recruits in the course of a few months are so much injured as to be unfit for active service." The damage has been estimated at one-half of the first cost; this item of pecuniary loss, and some others, such as the expense of convening courts-martial, &c., are not included in the calculation of the annual loss by desertion.—R. J.]

GENERAL COURTS-MARTIAL.

Crimes and punishments.

It is believed that desertions have been increased and the service otherwise injured by the latitude allowed to general courts-martial in the species of punishment which they are authorized by law to award to offenders, and particularly to those of enlisted men. For most of the capital offences, as well as the minor ones, the law authorizes such punishment as a court-martial may direct. With this broad latitude every court feels itself authorized by law to decree any description of punishment but that which is known to be forbidden, such as "stripes and lashes," and such as is deemed to be very "unusual." Hence the great variety and often apparently whimsical punishments awarded by different courts-martial. Many of these punishments tend rather more to degrade the offenders and to render them *incorrigible* than to produce penitence or reformation. Nor can I say that these punishments appear to have the desired tendency of examples to deter men of vicious propensities from the commission of offences, nor from their repetition after being once tried and punished.

The class of punishments to which I object are such as the following: 1st. Branding, marking with durable ink, and all such inflictions as tend durably to cripple or mutilate the offenders. 2d. An iron collar, a ball and chain, and with either of these attached to the neck, leg, or other part of the offender, for him to perform hard labor in public, or otherwise, except in solitary cells. 3d. Shaving the head, putting a rope of straw around the neck of the offender, or requiring him to stand upon a barrel, &c., &c. All punishments of this description are decidedly objectionable. Some of the first are repugnant to natural law, and at variance with the genius and spirit of our institutions. All of them tend rather to corrode and destroy the latent elements of moral feeling, and lead the miserable offender to irretrievable infamy, than to open to him the path of repentance and reformation.

To obviate these evils, it is very desirable that certain salutary punishments should be designated by law or general regulations for each offence or each class of offences, to be clearly defined. And all other kinds of punishment to be expressly prohibited. For example: 1st. The punishment of death, or from 39 to 100 lashes, might be prescribed for the crimes of *desertion, cowardice,* or *mutiny;* 2d, from 10 to 50 lashes for *drunkenness* or for *stealing;* 3d, from one to thirty days' solitary confinement to hard labor on bread and water for some two or three of the above crimes, and for the most aggravated of the minor offences; and 4th, fines, not to exceed one-half of the pay of the offender for one to six months, in part for any one of the above offences, and for such of the minor offences as may, in the opinion of the court, require a small fine. But no fine should ever extend beyond half the pay of the soldier, as at least one-half his pay is usually necessary to meet expenses that are unavoidable, and essential to his health and the neatness of his person on duty.

In recommending the above punishments to be prescribed by law, or by general regulations, I wish it to be distinctly understood that lashes are recommended in no possible case except for the five crimes of *desertion, cowardice, mutiny, habitual drunkenness,* and *stealing,* nor under any possible authority but that of a *general court-martial.* For I am convinced that the best of men, for their country's service, in the ranks of the army would have no more objection to this description of punishment, thus guardedly applied, according to law, to the five atrocious crimes above designated, than that the best of citizens should object to a residence in a State where piracy, or robbery, or forgery, or perjury were deemed to be capital offences, and punishable by death or hard labor in a penitentiary for ten or twenty years. I recommend stripes or lashes only in cases where the *crime* itself degrades the offender so low that the *punishment* inflicted on him cannot tend to sink him any lower in the scale of degradation.

I have seen, I think, hundreds of idle men who appeared better satisfied with a ball and chain attached to one of their legs, with the privilege of indulging in the filthy habits of drinking, and eating, and sleeping in a warm guard-house, without the trouble of cleaning themselves and their arms for honorable service, than when in the discharge of the regular duty of men under arms. But I have never seen one of those vicious idlers whipped without seeing some positive indication of the fact that the operation *intended* as a *punishment* was *felt as a punishment,* and by bad men only *feared* as a punishment. This means of punishing the most vicious will tend rather to invite good men into the service than to deter them, as without this kind of punishment the best of men are obliged to *watch* and labor whilst the worst of them *sleep* under guard.

Desertions are to be attributed in part to the foregoing causes; but in part, and perhaps for the most part, to the inveterate habits of intemperance which prevail in the ranks of the army. Upon this point I have for some years past, and more particularly during the present year, availed myself of every means in my power to arrive at a correct conclusion. In my inspections I have drawn from personal observation, as well as from free conversations with officers of every grade, and with sutlers and other intelligent persons whose opportunities had been such as to give weight to their statements, evidence which leaves no doubt in my mind that most cases of desertion may be traced to habits of intemperance. The proceedings of courts-martial are alone sufficient to prove that the crime of intoxication almost always *precedes,* and is often the *immediate cause* of desertion. For these facts I have principally to refer to the testimony recorded in the proceedings of regimental and general courts-martial. And I am moreover convinced that most of the soldiers who enter the army as sober men acquire habits of intemperance principally by falling into the practice of drinking their gills or half gill of whiskey every morning.

I have known sober recruits who would often throw away their morning allowance, but whose constant intercourse with tipplers would soon induce them to taste *a little,* and in time *a little more,* until they became habitual drunkards. I am therefore decidedly of the opinion that the whiskey part of the ration does slowly but surely lead men into those intemperate and vicious habits out of which grow desertions and most other crimes. In support of this opinion I will only advert to one other document: it is the subjoined extract of a letter from one of the most excellent and exemplary officers of the army, which contains little or nothing more than the verbal statements which I have received upon the same subject from many other meritorious officers.

Upon this subject I will only add that the healthiest and most orderly and gallant troops I have ever commanded were the least addicted to spirituous liquors, and were, in many cases, often for some weeks in succession without any part of their regular allowanace of whiskey or other spirituous liquors. These liquors should be kept in the medical stores, to be issued only as medicine, on the requisition of the

company officer approved by the surgeon, and ordered upon every occasion by the commanding officer. Let the soldier have the price of his liquor added to his monthly pay

The frequent changes that have occurred for some time past in the *command of companies* tend materially to favor those disorders in the ranks of the army which often lead to desertion. These sudden and frequent changes tend to destroy that mutual confidence and respect which ought to subsist between officers and men of the same corps, and which can be produced only by steady habitual intercourse in the discharge of their relative duties, consisting of daily and hourly vigilance, with care and kindness on the part of the officer, individually enforcing obedience to military law, attending to the proper wants and protecting the rights and interests of his men, who never fail in return to yield a hearty, respectful, and often affectionate obedience to such an officer; but when, before one commander has time to know his men or they to know him or to enjoy the benefit of his qualifications as a commander, another and another often follow him in rapid succession, (as in the case described by Colonel House in his report, hereunto annexed, in reference to "Belona arsenal;") hence disorders and often desertions follow.

In addition to the foregoing suggestions as to the means of remedying the great and growing evil of desertion, I am persuaded that an increase of pay to all enlisted men, and more particularly to non-commissioned officers, would tend materially to insure the enlistment of a better class of men, and such as would willingly suffer death rather than the dishonor of this atrocious crime. The United States, with a population of twelve millions, are able, and I think willing, to keep in service a force of one thousand soldiers for each million of inhabitants, and to give as good wages as private individuals usually give, and thereby to insure the employment of men qualified to make the best of soldiers. I have also to recommend that the period of enlistment be reduced from five to three years.

All which is respectfully submitted.

EDMUND PENDLETON GAINES, *Major General by brevet.*

Extract of a letter from Lieutenant Joseph S. Gallagher, dated Bangor, Maine, September 21, 1829.

"It would be difficult to trace up certain evils which exist in the army, that are known to result from intemperance, directly to the issue of ardent spirits as a part of the daily rations.

"To know how far the whiskey issued to the troops is the occasion of these evils, we must know how far it causes intemperance. Without entering into any discussion of this question, I do not hesitate to affirm that the direct tendency of administering to a sober man in the army in time of peace a gill of ardent spirits daily for a year would be to make him a drunkard, provided there was always, as at present, an abundant supply to be found with the sutler to satisfy the demands of his increasing appetite.

"If I am correct, the government allowance, under the existing arrangements for sutlery, is sufficient to produce the very state of intemperance which exists. How far withholding this allowance, either with or without a banishment of spirits from the sutler's store, would change this state, experiment alone will determine.

"I said there were evils in the army which were known to result from intemperance. Were this vice banished, I question if one-third of the desertions which now take place, or one-fifth of the lesser crimes for which men are brought before courts-martial, would occur.

"Eighteen months ago I marched a company of the second infantry from Sackett's Harbor to the vicinity of Houlton, Maine; we were six weeks on the march, during which time, after the first day, they had no means of obtaining ardent spirits, and scarcely an instance of drunkenness occurred.

"Not a man deserted, and hardly a crime was committed, which came to my knowledge, for which in garrison I would have brought a man to trial; and though much exposed to rains, but very few cases of sickness occurred. Within six weeks after the arrival of the company at Houlton, where ardent spirits could be had in abundance, not less than four or five desertions took place, and petty crimes were committed without number.

"I have served extensively as the recorder of regimental courts-martial, and do not hesitate to say that five out of six cases of the crimes which are proved before these courts have resulted from intemperance; and nine years' experience in the army has convinced me that no inconsiderable proportion of desertions occur in consequence of intemperate drinking, either of the deserters themselves or others; I say others, because bad treatment from petty officers, while under the influence of ardent spirits, has caused many to become disgusted with the service, and, finally, to desert.

"I have known cases like the following, and think them not uncommon: A non-commissioned officer, either inebriated or not, oppresses a young soldier, who complains to his commander; the subject is investigated by him; the witnesses upon whom the complainant relied to sustain his charge, either from fear of the displeasure of their non-commissioned officer, or from being bribed to hold their peace by whiskey, '*know nothing.*'

"The petty officer produces his witnesses, bought with spirits, to exculpate himself, and perhaps cast blame upon the complainant. The accused, thus cleared, is prompted by revenge to render the situation of the soldier as irksome as possible, who, despairing of redress, *deserts*

"There are other circumstances, perhaps, still more frequently connected with desertions:

"A soldier becomes intoxicated, and absents himself from roll-call; is confined, and after a night's lodging in the guard-house, tortured with thirst and all the nameless agonies which succeed a debauch, he is set at liberty, and perhaps 'detailed for duty.' He resorts to the bottle to free himself from what he justly calls the *horrors*, and is found 'drunk on duty.' He is again confined, tried, and perhaps sentenced to a forfeiture of pay; when, disheartened, vexed with himself and all around him, he flies again to the bottle for relief, and anticipating further punishment, *deserts.*

"I have frequently conversed with apprehended deserters, and feel safe in saying that the foregoing cases are not uncommon.

"I have before me the roll of a company, (as it stood more than a year ago,) with the character of every individual of which I feel perfectly acquainted. It contains thirty-five men; concerning twenty-nine of them, I do not hesitate to say they were drunkards. Of the remaining six, five drank daily, and may become intemperate before many years, and one was in ill health. There were eight of the twenty-nine who might possibly be reclaimed by withholding the whiskey part of the ration, for they were once

persuaded to dispense with ardent spirits for a short time, but the daily proffer of the *gill* at length overcame their resolutions.

"Intemperance is a social vice; a few confirmed drunkards may corrupt a company. Something must be done to raise the tone of moral feeling in the army in relation to this one vice at least. This may be done, in part, by inflicting disgrace upon the habitual tippler, and by removing all *above* the *private soldier* who *will* indulge. If we cannot deny ourselves for the good of those who look to us for example, we should be compelled to move in a sphere where our influence would not be so extensively and injuriously felt. I forbear to offer a hint upon other and, in some respects, more direct moral means, because in the existing state of things they are out of the question.

"It perhaps better becomes surgeons than myself to speak of the influence of intemperance upon the health of the army, but, from an account which I kept several years ago, at a very healthy post, I find that of six deaths which occurred in something more than a year, four or five could be traced to intemperance as the cause.

"I forbear to offer an estimate of the probable loss to the United States arising from the issue of ardent spirits to the troops, because it must necessarily be mere conjecture; and I fear I have already trespassed too far upon your patience by a rehearsal of what has probably not escaped one of your judgment and very extensive observation.

"I could enlarge upon the topic of our conversation between this place and Portland, in relation to the intellectual (not to say moral) improvement of enlisted men; but this lies beyond the limits of the subject on which you directed me to communicate.

"I am, general, with great respect, your obedient and humble servant,

"JOSEPH S. GALLAGHER, 2*d Lieutenant* 2*d Infantry, A. C. S.*

"Major General GAINES, *Com. Eastern Department U. S. Army, New York.*

"I have often thought that should government grant an allowance of tea, coffee, and sugar, in lieu of whiskey, it would have a happy influence upon the health, morals, and efficiency of the army."

21ST CONGRESS.] **No. 438.** [1ST SESSION.

ON THE CLAIM OF GATES HOIT FOR SECRET SERVICES AS A SPY UNDER MILITARY OFFICERS DURING WAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 20, 1830.

Mr. DRAYTON, from the Committee on Military Affairs, to whom was referred the petition of Gates Hoit, reported:

That the petitioner states that he was employed by certain military officers of the United States to perform some secret services, during the late war, under the promise of being amply rewarded; that he did perform the services required of him to the satisfaction of those with whom he contracted; and although in the prosecution of his engagement he encountered difficulties, and expended money from his private funds, that he has never been remunerated or in any manner compensated; he therefore prays that Congress would grant to him the relief to which he is equitably entitled.

From testimony which has been submitted to the committee it is clearly established that the petitioner did furnish important information to our military officers, of a secret nature, relating to the positions and numbers of the British troops during the late war, and that he was promised remuneration; but they are not in possession of any evidence to guide them as to the value of that information, or the rule by which it ought to be estimated. As the committee are of opinion, were they to award any sum to the petitioner, that the amount would probably be more or less than he ought to receive, they recommend that he have leave to exhibit to the Third Auditor of the Treasury the proof which he may deem necessary to substantiate his claims; that the Auditor be authorized to examine them, and to report to this House the result of his investigation, and the amount which, in his judgment, ought justly and equitably to be paid to the petitioner.

21ST CONGRESS.] **No. 439.** [1ST SESSION.

APPLICATION OF MASSACHUSETTS FOR THE SETTLEMENT AND PAYMENT OF THE CLAIMS OF THAT STATE FOR MILITIA SERVICES IN THE WAR OF 1812–'15.

COMMUNICATED TO THE SENATE FEBRUARY 22, 1830.

COMMONWEALTH OF MASSACHUSETTS, EXECUTIVE DEPARTMENT, *February* 18, 1830.

SIR: In compliance with a request of the senate and house of representatives of this Commonwealth, I have the honor herewith to transmit a copy of resolutions passed on the 15th instant, in relation to the claim of Massachusetts upon the general government for the services of the militia of this State during

the last war, together with a copy of the report accompanying the resolutions, and respectfully to ask that the same may be communicated to that branch of the national legislature over which you preside.

I have the honor, sir, to be, respectfully, your obedient servant,

LEVI LINCOLN, *Governor of Massachusetts.*

The PRESIDENT OF THE SENATE *of the United States.*

COMMONWEALTH OF MASSACHUSETTS.

IN SENATE, *January*, 1830

The special committee of both houses, to whom was referred so much of his excellency the governor's message as relates to the Massachusetts claim, report:

That they approach this subject as a matter of history which may now be appreciated, independently of its association with events that were once the occasion of much irritability and excitement.

The claim has been before the national government for thirteen years. That it may now be understood by the legislature, your committee would exhibit at a single view the opinions entertained and the grounds assumed from time to time during the negotiation. This, they trust, they have impartially done by extracts from documents, which, in the language of the official agents of the two governments, present a succinct account of the progress of the claim.

As early as February, 1817, the presentation of the Massachusetts claim was made to the Secretary of War by Messrs. Lloyd and Sumner, agents for the State at Washington. The auditing of the claim was then denied on the ground that the services, "with one exception," were rendered independently of the authority of the United States, and that the militia were withheld from the command of the officers of the United States.

Messrs. Lloyd and Sumner were only able at this time to place upon the files of the War Department "an abstract of the claim," with a request that it might be received and preserved as an evidence in perpetuance of the claim of the State of Massachusetts."

About five years after, in March, 1822, the delegations in Congress from Massachusetts and Maine, by their memorial to the President of the United States, requested him "to instruct the proper executive department to entertain a discussion of the merits of the claim," and to permit them to introduce "proofs and reasons" to establish its "legality and justice."

About one year after, in January, 1823, the Secretary of War, Mr. Calhoun, informed our delegation in Congress that "the Third Auditor of the Treasury Department had been directed to take up the claims for auditing, in conformity to the principles which have been established and applied in the settlement of similar claims, and that the settlement must be subordinate to the general views in relation to the constitutional powers of the general government over the militia of the State which were taken by the department when the accounts were originally presented and discussed."

In March, 1823, Messrs. Lloyd and Mills, senators from Massachusetts, in a letter to Governor Brooks, recommended "that an able jurist should be associated with some individual conversant with the details of the claim, who would attend to the clerical part of the business," for its prosecution at Washington.

In June, 1823, Messrs. Sullivan and Pierce were appointed agents for the claim by Governor Eustis.

In September of the same year the Secretary of War, by direction of the President, Mr. Monroe, instructed the Third Auditor "to examine such items of the claim as the commissioners might present, *and report the amount which would have been due*," according to the rules theretofore established, "if the troops had been in service under the authority of the general government."

In December following, President Monroe, in a note to the Secretary of War, states that he has "examined with great attention the report of the Third Auditor upon the claims of the 5th division of the Massachusetts militia," and is of opinion that "the services to which they refer were called for by the exigencies of the times, and were intended to repel in many instances actual invasion, and in others that the troops were called out on well-founded apprehension of it; that they were spontaneous movements of those who were exposed to danger, and for the purposes of self-defence." And that he is of opinion that "it would not be proper to decide on any particular class of claims until the whole has been audited, so that the merits of each, under their various classifications, may be distinctly seen and perfectly understood."

Orders were accordingly given to the accounting officer to proceed in auditing the whole accounts before the decision should be given on any particular class of the claims.

On the 23d of February, 1824, President Monroe, in a message to Congress, gave a brief account of the progress of the claim, and of the *objections* to its allowance at an earlier day, arising from the constitutional principles in controversy between the executives of both governments, wherein he remarks "that it is well known that the great body of our fellow-citizens in Massachusetts are as firmly devoted to the Union, and to the free republican institutions of our government, as our fellow-citizens of the other States. Of this important truth, their conduct, in every stage of our revolutionary struggle, bears ample testimony; and I add, with profound interest and thorough conviction, that although the difficulty adverted to in the late war with their executive excited equal surprise and regret, it was not believed to extend to them. There never was a moment when the confidence of the government in the great body of their fellow-citizens of that State was impaired, nor is a doubt entertained that they were willing at all times to support their rights and repel invasion by the enemy," and recommends to Congress "to make provision for the settlement of the claim of Massachusetts in conformity with the rules which have governed in the settlement of claims for services rendered by the militia of other States."

In May, 1824, the Committee of Congress on Military Affairs made a report in the House of Representatives, from which are the following extracts:

"It will be sufficient for present purposes to premise *that a large portion of the claim of Massachusetts does not appear to be affected by those constitutional difficulties which have so long, in the consideration of the Executive of the United States, operated as an impediment to its adjustment.* Your committee are unanimously of opinion that the services rendered by the militia of Massachusetts, which may be considered beyond all exceptions, and as entitled to remuneration, are comprised in a class of cases in which, by spontaneous impulse of the militia, with or without the sanction of the executive of that State, or with or without a requisition on the part of the officer of the United States commanding the department, they assembled, either for the purpose of repelling actual invasion, or under a well-founded apprehension of

invasion." "*It is a fact that on this principle, and this principle only,* the claims for militia services of the various States have been audited and allowed at the Department of War.

"Services of this description, patriotically performed, ought not to be prejudiced by a pre-existing opinion between the executive of Massachusetts and the commanding officer of the United States forces as to an abstract construction of the Constitution, when such an opinion appears to have no sort of effect on the extent and character of the services afforded. On the other hand, your committee are equally unanimous in declaring that, in all cases where the acts of the executive of Massachusetts gave a direction to the services of the militia of that State in opposition to the views of the general government, the claim is altogether *inadmissible.*"

* * * * * * * * *

"Your committee, in conclusion, recommend that in all cases where the militia of the State of Massachusetts were called out in conformity with the desire of an officer of the general government, or to repel actual invasion, or under a well-founded apprehension of invasion, during the late war, the claim of the State for such military service be allowed, under the usual rules of auditing and allowing similar claims."

In January, 1826, a committee of Congress again had the subject under consideration. They adopted the report of the Committee on Military Affairs, made in 1824, "as forming the substantial grounds upon which they were prepared to report favorably on the allowance of the Massachusetts claim."

The report of 1826 does not differ in principle from that of 1824, but the committee give an explanation of what they consider services rendered in opposition to the views of the general government. They say that, "in all cases where specifically the command was refused to be given to an officer of the general government applying for the same in each particular service of this description, for which compensation may be asked, it should be withheld." But in all cases *where, in point of fact,* there was no refusal on the part of the government of Massachusetts to place her troops under the command of an officer of the general government, but where, at the same time, services were rendered indispensable to her defence, either to repel invasion or under a well-grounded apprehension of invasion, that her people have, under the Constitution of this country, a just claim for compensation by virtue of that provision which guarantees the common defence to all the States." "That they should receive compensation for services performed under the requisition of the general government has never been denied, *however long even this may have been* INJURIOUSLY WITHHELD."

About one year after, in December, 1826, the claim was again referred to the Secretary of War by Congress, with instructions to report to the House "what classes and what amount of said claim may be allowed and paid upon the principles and rules which have been applied to the adjustment of claims of other States, *and to which the assumed authority* of the governor of that State to control the militia, and judge of the necessity of ordering them into service, does not apply."

About eighteen months after, in May, 1828, the Secretary of War accordingly submitted a report of the Third Auditor to the House of Representatives, from which it appears the whole amount claimed is $843,349 60.

The amount inadmissible is $412,601 34.

The amount admissible is $430,748 26.

In the winter of 1828 and '29 a bill, in conformity to this result of the report of the Third Auditor, was introduced by the Committee on Military Affairs, and laid upon the table of the House.

On the 5th of January, 1830, Mr. Silsbee, senator from Massachusetts, obtained leave to bring in a bill, the fate of which is not yet decided.

Your committee have intentionally presented this statement in the language of the official organs of the general government, and without comment. The Executive, the Secretaries of War, the committees of Congress, have invariably and uniformly admitted, during the progress of the negotiation for thirteen years past, the validity and justness of so much of the claim as may be within the rules and principles upon which the services of other States have been compensated. On the other hand, the people of Massachusetts, by their legitimate representatives, the legislature, their delegation in Congress, their agents at Washington, and their executive at home, have respectfully asked no more than equal justice—not at the price of "State humiliation," but upon a liberal and equitable construction of the constitutional powers and obligations of the general government. This is the result to which an honest investigation has brought every honest man, whatever may have been originally his prejudices, who has been officially called to examine the subject. It is the ground upon which the honesty of public opinion will place it when it shall be understood by the nation.

A committee of Congress, in 1826, stated the fact that the claim for services rendered in conformity to the principles of the Constitution "had never been denied, however long it had been INJURIOUSLY DELAYED." May not the people of this Commonwealth ask, in the presence of the nation, why has Congress permitted an *additional* "*injurious delay*" of four years since 1826?

Your committee submit the following resolves, and respectfully recommend that his excellency the governor be requested to transmit them, with this report annexed, to each branch of the national legislature in Congress assembled.

By order of the committee.

SAMUEL M. M'KAY, *Chairman.*

Resolves of the Commonwealth of Massachusetts.

Resolved by the senate and house of representatives, That we fully concur in the sentiments expressed by his excellency the governor in his late communication to the two branches of the government in relation to the delay in the settlement of the claim of this Commonwealth upon the general government for the services of the militia of Massachusetts in the last war.

Resolved, That the citizens of this Commonwealth entertain a deep sense of the great advantages of that form of general government adopted by the independent States of this Union; and that they would view with great solicitude and regret any appearance of a disposition in the Congress of the United States to refuse a prompt adjustment of the just claims of any of its members, as tending to lessen, in

every part of the confederacy, that perfect confidence in the justice of the government which can alone insure its permanency.

Resolved, That the claim of this Commonwealth upon the general government, for services rendered by the militia of Massachusetts in the late war with Great Britain, having been before Congress for thirteen years; the particulars of that claim having been repeatedly examined by the executive officer of the government, the Secretaries of War, and committees of Congress, and a large portion thereof declared by them to be admissible and justly due, upon the principles and rules which have been applied to the adjustment of similar claims of other States; and the precise amount so admissible having been reported to Congress by the Secretary of War nearly two years since, it does not comport with those principles of equal justice to which, by the Constitution of the United States, the general government is bound to conform in its transactions with the individual States, nor with the rights and dignity of this Commonwealth, that the payment of that portion of this claim, admitted to be due, should be longer withheld.

Resolved, That the early attention of Congress to the final adjustment of the Massachusetts claim is most earnestly requested; and that the senators and representatives in Congress from this Commonwealth be, and they are hereby, requested to urge an immediate provision for the payment of the same.

Resolved, That his excellency the governor be, and he hereby is, requested to transmit to each branch of the national legislature copies of these resolutions, with the report annexed, and to cause copies of the same to be furnished to each senator and each member of the House of Representatives in Congress from Massachusetts.

IN THE HOUSE OF REPRESENTATIVES, *February* 13, 1830.

Read twice and passed. Sent up for concurrence.

W. B. CALHOUN, *Speaker.*

IN SENATE, *February* 15, 1830.

Read and passed in concurrence.

SAMUEL LATHROP, *President.*

FEBRUARY 15, 1830.—Approved.

LEVI LINCOLN.

A true copy. Attest:

EDWARD D. BANGS, *Secretary of the Commonwealth.*

21ST CONGRESS.] **No. 440.** [1ST SESSION.

DEFENCE OF THE NORTHERN FRONTIER OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 2, 1830.

DEPARTMENT OF WAR, *February* 26, 1830.

SIR: On the subject of the resolution adopted yesterday by the House of Representatives, relative to plans for the defence of the northern frontier of the United States, I have the honor to inform the House that there are no such plans in the possession of this department the publication of which would not be injurious to the public service.

Very respectfully, sir, your obedient servant,

J. H. EATON.

Hon. A. STEVENSON, *Speaker of the House of Representatives.*

21ST CONGRESS.] **No 441.** [1ST SESSION.

ON A CLAIM FOR PAY FOR SERVICES IN THE MILITIA OF MICHIGAN DURING THE WAR OF 1812-'15.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 3, 1830.

Mr. WHITTLESEY, from the Committee of Claims, to whom was referred the petition of Antoine Dequindre and Richard Smith, for themselves and for the officers and soldiers under their command, as a part of the quota of volunteers, under the act of February 6, 1812, in the service of the United States, reported:

That, by the law of the 6th of February, 1812, the President of the United States was authorized to accept the services of fifty thousand volunteers for the period of one year. The companies whose services were tendered and accepted were liable to be called into the service at any time, at the discretion of the

President, within two years; and when ordered into the service were to perform duty for one year, unless sooner discharged. Companies were to be formed by voluntary enrolment of individuals, without any regard to the corps in the militia in which they were liable to perform duty; or any company, battalion, regiment, brigade, or division, might volunteer that was then organized, and in the first instance the officers were to be elected by the volunteers, and in the last the officers in commission were to command. In March, 1812, William Hull, as governor of the Territory of Michigan, had ordered the militia to hold themselves in readiness for duty, and ordered them to rendezvous to perfect themselves in military discipline. The petitioner, Antoine Dequindre, then commanded a company of riflemen, and the petitioner, Richard Smith, commanded a troop of horse. On the 17th of April, 1812, the acting governor of Michigan Territory, under the authority of the government of the United States, informed the militia that he was empowered to protect the Territory, and called on Captain Dequindre's company, and on Captain Smith's company, to volunteer their services, and to affix their signatures to an enrolment, and to take an oath to support the Constitution of the United States. These companies met on the 21st of April, 1812, and most, if not all, of the members of the companies enrolled themselves as volunteers, and with them several volunteered who were not liable to perform military duty. These companies immediately rendezvoused, and were continued in active service until they were surrendered by General Hull, at the capitulation of Detroit, on the 16th of August, 1812, and participated in most of the engagements that preceded that event. Previous to the arrival of General Hull with the main body of the army in the Michigan Territory, these companies were perfecting themselves in discipline, and constructing roads. At the time of the capitulation Cornet Lee, with a detachment from Captain Smith's company, was at the River Raisin; and although he was, with the other troops at that place, included in the articles of the capitulation, he effected his escape, and joined the army under the command of General Harrison, and was engaged in the Massasiniwa battle, and served out the year's engagement. During the time the companies were operating with the volunteers from Ohio they were on a footing of perfect equality. So many of the members of these companies as were at Detroit were paroled with the other volunteers, and were not exchanged until some time in the summer of 1814, of which notice was given by General Mason, commissary general of prisoners, on the 26th of July, 1814. The petitioners say their companions have only been paid to the 16th of August, 1812, whereas the Ohio volunteers were paid for one year; and they pray that the government performs its part of the contract, and allow them pay for the entire year.

The first inquiry is, whether these companies volunteered under the act of February 6, 1812.

Joseph Watson, then acting as aid to the commander-in-chief of the Michigan Territory, says the companies were organized by him, under the immediate orders of the said commander-in-chief; that he advised that they should be called into the service under the provisions of that act; and that, with a view of all the circumstances of the case, the order was intended to impart to them all the advantages of such provisions, and to hold them to service accordingly; that it has ever been his understanding that, by the enrolments made under the order, they did engage to serve twelve months; that such views were not confined to those composing the detachment, but was common to many officers of the army with which they served. The Hon. Mr. Magee says he signed the roll of Captain Dequindre's company, and engaged to serve for twelve months; that he always considered himself as a volunteer under the act of the 6th of February, 1812; that such was the understanding of the other members of the corps to which that company was attached; that he was paroled and remained at home until the 9th of February, 1813, when he was, with others, forced from his home and taken to Fort George.

Colonel Snelling says he arrived at Detroit on the 7th of July, 1812; that the army was reinforced by a corps called the Michigan legion, which he was informed was accepted into the service of the United States under the act of Congress passed February 6, 1812. Governor Cass says his impression is that they were universally considered in the army as volunteers under the act of February 6, 1812, and in the same situation with the Ohio volunteers. Other witnesses testify to the same fact. There was no law which authorized the acceptance of volunteers for twelve months except the act of February 6, 1812, nor was there any act in force which authorized the President of the United States, on the 21st of April, 1812, to accept the services of volunteers, except the act of February 6, 1812.

The enrolment, the universal understanding at the time, and the service for a year of the command under Cornet Lee, that escaped from the River Raisin, with other facts and circumstances, satisfy the committee that these companies did volunteer under the act of February 6, 1812, and were ordered into the service under the provisions of that act.

There is no express evidence that the President accepted the services of these companies, nor is there any express evidence that General Hull was authorized to accept their services. The government, however, has recognized them as being in the service of the United States, and the rolls in the Third Auditor's office describe them as twelve months' volunteers. It is to be borne in mind that General Hull's papers and baggage were destroyed soon after the capitulation, and that in 1814 many if not most of the public papers in the offices here were destroyed. No acceptance by the President of the services of the Ohio volunteers, nor any order to Governor Meigs to accept the services of such volunteers, can be found; nor do the muster-rolls describe them as having volunteered under the act of February 6, 1812; still no one will doubt that they were considered by the President as being volunteers under that act.

The next question is, for what period are they entitled to pay? The second section of the act, after authorizing the President of the United States to call any volunteer company, &c., into the service of the United States within two years, prescribes that said company, &c., "shall be bound to continue in service for the term of twelve months after they shall have arrived at the place of rendezvous, unless sooner discharged; and when so called into service, and whilst remaining therein, shall be under the same rules and regulations, and be entitled to the same pay, rations, forage, and emoluments of every kind, bounty and clothing excepted, with the regular troops of the United States."

The enrolment constitutes a contract with the United States, to be effective from the time of being called into the service, and to continue until the President exercised the power vested in him to put an end to it by a discharge. No such discharge was given. The parole is equally for the advantage of the government, as for the benefit of the captive.

When the claims of the Ohio volunteers for a year's service were presented for payment they were rejected by the accounting officers of the treasury on the ground, it is understood, that they were entitled to pay for no longer period than to the time of the surrender; and, perhaps, an additional allowance for returning home. Colonel Cass, who commanded one of the regiments, acting in behalf of his own regiment and in behalf of the regiments commanded by Colonel Findley and Colonel McArthur, applied to the

President, Mr. Madison, who, after a full investigation of the facts and the law, ordered payment to be made to these regiments for a year.

John Campbell raised a company under the provisions of the same act, and was ordered into the service by Governor Meigs. His company rendezvoused on the 4th of July, 1812, and was ordered to join General Hull at Detroit. He had proceeded as far as the River Raisin, at the capitulation of Detroit, and was included with the other troops at that station in the surrender. This company was paid for their arms and clothing, as provided for by the said act, and for six months' service. The merits of their claim were not fully investigated nor its adjustment pressed until last year, when the President, Mr. Adams, having come to the same conclusion that Mr. Madison arrived at, as above mentioned, ordered additional payment to be made to this company for six months.

The petitioners state their sufferings, hardships, and losses to have been great; but these the committee will not suffer to mingle with or influence any decision it makes. The opinion, however, is expressed that the petitioners have cause to complain that the paymaster charged them, and those they represent, with twelve per cent. on the money paid; nevertheless, it is not within the province of the committee, in this particular, to grant relief. After duly weighing the whole case, the committee think the petitioners are entitled to the full benefits of the act of February 6, 1812; and to extend to them its provisions a bill is herewith reported.

21st Congress.] No. 442. [1st Session.

ESTIMATES OF THE EXPENSE OF ARMING AND ORGANIZING THE MILITIA OF THE UNITED STATES ACCORDING TO A PARTICULAR PLAN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 3, 1830.

DEPARTMENT OF WAR, *February* 27, 1830.

SIR: In answer to your letter of the 1st instant, I have the honor to enclose reports from the commanding general and the Ordnance department, which furnish the information required.

The militia bill, No. 168, is herewith returned.

Very respectfully,

J. H. EATON.

Hon. WILEY THOMPSON, *Chairman of Com. on Militia, House of Reps.*

HEADQUARTERS OF THE ARMY, *Washington, February* 27, 1830.

SIR: I have the honor to submit to you a report made by the Adjutant General, furnishing, as near as practicable, the estimates asked for by the Hon. Wiley Thompson, chairman of the Committee on the Militia, in his letter of the 1st of this month addressed to you, having reference to the probable expense of carrying into effect the provisions of bill No. 168, reported in the House of Representatives January 27, 1830.

Very respectfully,

ALEX. MACOMB, *Major General, Commanding the Army.*

Hon. JOHN H. EATON, *Secretary of War.*

ADJUTANT GENERAL'S OFFICE, *Washington, February* 23, 1830.

SIR: I have the honor to furnish herewith the information requested in a letter from the chairman of the Committee on the Militia in the House of Representatives to the Secretary of War, dated February 1, which has been referred to this office.

The information desired being confined to estimates, it has been found practicable to exhibit it in a tabular form, and that has been preferred for its distinctness as well as its compactness. The information is shown in the table in its maturer state; and as it may be satisfactory to know upon what data it has been founded, a full explanation of it is furnished separately. The explanation will show that the data upon which it is based has been assumed or deduced from existing analogous circumstances.

The establishment of an office at Washington for the general superintendent would involve the expense of employing clerks and providing stationery and other contingencies, including postage, the annual expense of which would be about $3,500.

The duties of the general superintendent would correspond generally with those of the Adjutant General of the army of the United States, and his salary, as an equivalent to the compensation allowed to the latter, has been stated at $2,500.

The annual expense of providing the blanks issued from this office to the army, exclusive of the Army Register, is between $100 and $200, and it is supposed that the annual expense of providing those required for the superintendent general's office would not exceed $100.

The estimates required to carry into effect the provisions of the 15th, 16th, and 18th sections of the bill depend upon the ascertainment of the numbers belonging to the 1st and 2d classes, respectively, together with the proportions of officers and sergeants included in both classes.

There are no certain data upon which could be estimated the numbers of the militia belonging to the junior and senior classes, as distinguished in the bill. The returns in this office show only the aggregate numbers of the militia between the ages of eighteen and forty-four, inclusive. The only distinction that is made in returns that would have a bearing on the subject is in those of the census of 1820 of the

population of the United States. Those returns show that the whole number of white male population between the ages of 16 and 44, inclusive, a period of twenty-nine years, amounted to 1,542,233; and between the ages of 26 and 44, inclusive, a period of nineteen years, 766,083.

The mean of the ages between 26 and 44, inclusive, is 34½, and corresponds very nearly with the mean of the ages between 30 and 40, which would be 35. The mean of the two periods being so nearly the same, the annual ratio of each may be assumed as being the same. The number, 766,083, as above stated, divided by 19—the number of years embracing the ages between 26 and 44, inclusive—would show 40,320 to be the annual ratio; and that applied to the ten years—embracing the ages between 31 and 40, inclusive, which corresponds with the ages comprised in the senior class—would produce 403,200.

The white male population constitutes the militia, with the exception of such as are exempted by law from the performance of militia duty. This exemption applies to all ages within the prescribed limits; and therefore it may be assumed that the ratio of white male population of the ages embraced between any term of years may be applied to the ratio of the militia of the corresponding term of years. This being admitted, the ratio of the militia of the senior class may be deduced from the ratio which has been made of the population between the ages corresponding with the ages comprised in the senior class.

The last returns in this office of the militia of the United States make the aggregate 1,191,388; but these returns do not include any return from Florida, and they give the return from Mississippi for the year 1812; that for Delaware for 1814; and returns from several other States between the year 1822 and the present date. Moreover, in the remarks accompanying the general returns of several of the States, it is stated that the returns from several of the brigades had not been received. It is therefore to be inferred that the last returns received at this office do not embrace the whole of the militia of the United States, and it is proper, in order to fulfil the purpose for which this report is intended, that an estimate should be made of the deficiency. If 1,300,000 be assumed as the number of militia at this time, the allowance for that deficiency would be 108,612, which it is supposed would not be too great.

The returns of the census for the year 1820 show the aggregate of white male population between the ages of sixteen and forty-four, inclusive, to be 1,542,233. The aggregate of the militia at this time, as assumed, of 1,300,000, refers to the ages between eighteen and forty-four, inclusive. It will be perceived that there is a slight difference between the ages embraced, respectively, by these aggregates. If the return of the militia had embraced the ages between sixteen and forty-four in the same way as the returns for the population, this difference would be provided for, and the aggregate, instead of 1,300,000, would be 1,445,408. This case must be supposed to admit of the adaptation to the militia of the ratio which has been ascertained respecting the population. The number stated as the aggregate of the militia that would be so produced of 1,445,408 is obtained in this way. It has been shown that the white male population for twenty-nine years amounts to 1,542,233, and for nineteen years, between the ages of twenty-six and forty-four, inclusive, to 766,083, or $49\frac{87}{100}$ per cent., which would give the average of $2\frac{81}{100}$ per cent. for one year. The difference between 1,542,233 and 766,083 is 776,150, which is the number for the remaining ten years, embracing the ages been sixteen and twenty-six, inclusive, and is equal to $50\frac{33}{100}$ per cent., or $5\frac{3}{10}$ per cent. for one year. The two years, embracing the ages of sixteen and seventeen, would therefore, at $5\frac{3}{10}$ per cent. each, amount to $10\frac{6}{10}$ per cent. The number assumed as the aggregate for the militia for twenty-seven years, embracing the ages between eighteen and forty-four, of 1,300,000, multiplied by $10\frac{6}{10}$ per cent., and the remainder divided by the difference between $10\frac{6}{10}$ per cent. and 100 per cent., or $89\frac{94}{100}$ per cent., would produce 145,408, the number for these two years; which, added to the assumed aggregate of 1,300,000, would produce 1,445,408, as has been stated. This sum multiplied by $5\frac{3}{10}$ per cent. would produce 72,704, which would be the average number in each year of the junior class, and multiplied by 9, the number of years in the junior class, would produce 654,336 as the aggregate number of the junior class. In like manner, 1,445,408 multiplied by $2\frac{81}{100}$ per cent. would produce 37,725 as the average number of each year of the senior class; and multiplied by 10, the number of years embraced by the senior class, would produce 377,251 as the aggregate of the senior class. The aggregate of the two classes amounts to 1,031,587.

The numbers in the junior and senior classes, respectively, being thus ascertained, the explanation of the estimates required by the 15th, 16th, and 18th sections of the bill may be proceeded with.

The table showing the component parts of a division has been made according to the provisions of the bill, in all respects, as far as they have been specified. The bill provides that a brigade shall consist of any number of regiments not less than two or exceeding four. In the table two has been taken as the number of regiments in a brigade, which is understood to be the composition of a brigade of the army. The aggregate of a division, as shown in the organization, of 4,756, divided into 1,031,587, the aggregate of the two classes would produce 217 nearly, and that number has been taken for the number of divisions.

The number of the junior and senior classes divided in like manner by the aggregate of a division would produce, respectively, $137\frac{58}{100}$ as the number of divisions in the junior class, and $79\frac{42}{100}$ as the number in the senior class. The fraction has been thrown off the junior class and added to the senior class; making the number of divisions in the junior class 137, and in the senior class 80.

The number of tents and camp-kettles stated in the estimate are made up by allowing to general officers three wall tents and three camp-kettles; to field officers, two wall tents and two camp-kettles; to captains, one wall tent and one camp-kettle; to every two subalterns, one wall tent and one camp-kettle; and to every six sergeants, one common tent and one camp-kettle; being conformable to the allowances made to the army.

The musicians are not included in the estimates for camp equipage and transportation, as they are omitted in the provisions of the bill referring to these allowances.

To determine the distance to be estimated for transportation to and from the encampment, an average was made of the distances between the centre and extremes of the States and Territories, respectively, the mean of which was ascertained to be about forty-nine miles. If the estimate had been made on the supposition that there would be only one place of encampment in each of the respective States and Territories, the distance for the transportation would be ninety-eight miles for going and returning; but as it is probable there will be a number of encampments in each State and Territory, and as the distance of travelling would be reduced in proportion to the increase of these numbers, the distance stated in the estimate is probably a fair average of the distance that would be travelled.

Respectfully submitted.

S. COOPER, *Acting Adjutant General.*

Major General ALEXANDER MACOMB, *Commanding the Army.*

Table showing the organization of a division of militia, and of the whole militia of the United States, computed at two hundred and seventeen divisions, distinguishing the junior and senior classes, as required by bill No. 168, reported in the House of Representatives on January 27, 1830; also, showing the number of officers and sergeants comprised in both classes, and the number of non-commissioned officers and privates of the infantry in the junior class.

NOTE.—The number of tents and camp-kettles stated in the estimate are made up by allowing to general officers each three wall-tents and three camp-kettles; to field officers, each two wall-tents and two camp-kettles; to captains, each one wall-tent and one camp-kettle; to every two subalterns one wall-tent and one camp-kettle; and to every six sergeants one common tent and one camp-kettle, being conformable to the allowance made to the army.

Expense of encamping one division, $6,137 49.

ADJUTANT GENERAL'S OFFICE, *Washington, February* 23, 1820.

S. COOPER, *Acting Adjutant General.*

ORDNANCE DEPARTMENT, *Washington, February* 26, 1830.

SIR: In answer to such part of the communication of the honorable chairman of the Committee on the Militia as refers to this department, I have the honor to report that the statement marked A exhibits the number and description of arms and equipments which have been furnished to the militia of the United States since the 1st of January, 1816, and the number now on hand ready for delivery whenever called for by the States to which they are due. This statement exhibits also the number of arms which have been procured and apportioned during the same period. The results shown are as follows, viz:

Arms and equipments procured and apportioned, estimated in muskets		199,000
Number distributed	145,672	
Number remaining on hand to be distributed	50,097	
		195,769

The difference between these numbers arises from the circumstance of there having been an excess of arms delivered to some of the States prior to 1816.

By this statement it appears that for the last fourteen years the average annual product of the present appropriation for arming and equipping the militia is 14,214 muskets. For a few years past the product has been greater, and it will be safe to estimate it at 15,000 for the future.

The bill, however, provides for furnishing equipments as well as arms, and the fund is, therefore, insufficient for arming that number of men per annum.

In order to ascertain the number of militia organized in the manner proposed by the bill, which may be fully armed and equipped by the present appropriation of $200,000 per annum, I beg leave to refer to the annexed estimate, marked B. By this estimate it will appear that, by including infantry, cavalry, and artillery in the proportions prescribed by the bill, the average cost of arms and accoutrements for each man will be about sixteen dollars. Upon this basis the present appropriation will arm and equip about 12,500 men per annum.

The number of men who may compose the junior class of militia, according to the provisions of the bill, cannot be ascertained with any reasonable exactness without further information as to the number of persons subject to militia service within the ages prescribed for this class. It is probable, however, that, as the whole number of enrolled militia at present exceeds 1,200,000, the junior class may consist of five or six hundred thousand. Assuming the lowest of these numbers as the minimum of the junior class we have 500,000 as the number of men to be armed. The number of arms distributed, as above stated, amounts to nearly 200,000; deducting these, there remains 300,000 men for whom arms are yet to be provided.

It has been shown that the present appropriation will arm and equip about 12,500 men per annum. It would, therefore, require a period of twenty-four years to complete the arming of the junior class, with the means which are now provided for that purpose. At the end of that period, however, this class would probably have increased to double its present number; for it is found that the militia have increased fifty per cent. during the last twelve years.

Upon the supposition that the junior class would at the present time consist of 500,000 men, its annual increase may be estimated at 20,000. And it follows that if this class were now fully armed and equipped the present appropriation would be inadequate to meet the demands of the annually increasing number of the militia. Hence it appears that, in order to completely arm and equip the junior class and keep pace with its annual augmentation, provision should be made, *first*, for arming 300,000 men; *second*, for obtaining an annual supply sufficient for 20,000. The latter may be effected by increasing the present annual appropriation of $200,000 to $320,000. The armories now employed in fabricating arms for the militia can be extended in this proportion without inconvenience or delay.

The appropriations necessary for effecting the former, that is to say: for arming 300,000 men, must depend much on the period within which it may be desired to accomplish the object. If it be required that all the arms shall be furnished in a short time, resort must be had to the armories of Europe. The armories of the United States are, however, capable of being very considerably extended, without increasing the cost of the arms. Their products may be increased 50 per cent. within one year, and may be doubled in the course of two or three years.

In order to exhibit more fully the course pursued under the present laws for arming the militia, a printed copy of the established regulations upon this subject is annexed. And I would respectfully refer to a report of the Committee on Military Affairs in the House of Representatives, of March 10, 1824, relating to the expediency of amending the present laws. The report is contained in vol. 14, State Papers, 1st session 18th Congress, No. 83.

It will be perceived that the preceding refers only to the arms procured and distributed since the 1st of January, 1816. During the period between that date and the passage of the act in 1808 a considerable number of arms was procured. A part only of the money appropriated was applied to that object; large sums were carried to the surplus fund and expended for other purposes. The arms furnished for that period were delivered during the war, and it is probable that very few of them could now be found in good order for service. And, for this reason, they are not included in the estimates, as forming any part of the available resources of the country at the present time.

I beg leave to add a remark on the proportion of artillery provided for by the bill. It provides for one company of artillery of 42 privates, for each division consisting of 4,000 men at least. To a company of 42 privates, a half division, or three pieces of artillery, would be a suitable allowance. This proportion gives a full division of artillery, of six pieces to 8,000 men. This proportion of artillery is less than is usually considered necessary. No exact proportion has been prescribed, either by law or usage, for our service. But it has been usual to allow from a half to a full division to each 1,000 men, giving a larger proportion to newly raised troops than to old well disciplined soldiers. And it is conceived that the circumstances under which the militia would generally be called into active service would require the largest allowance of artillery to be furnished.

I have the honor to be, sir, respectfully, your obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance service.*

Hon. JOHN H. EATON, *Secretary of War.*

A.

Statement of the arms and military equipments procured and apportioned to the militia of the several States and Territories, under the act of 1808, *for arming and equipping the whole body of the militia, from the* 1*st January,* 1816, *to the* 31*st December,* 1829. *Also, the number and description of arms and equipments distributed to the militia during the same period.*

ARMS AND EQUIPMENTS PROCURED.

These consist of muskets, rifles, swords, pistols, cannon, gun carriages, and other military equipments; the whole of which, procured from 1816 to 1829, inclusive, are equal in value to 199,000 muskets. And this number has been apportioned to the several States and Territories, in proportion to the effective militia of each.

NUMBER AND DESCRIPTION OF ARMS AND EQUIPMENTS DISTRIBUTED.

93, 271 muskets.	
11, 041 rifles.	
521 repeating rifles.	
17, 529 pistols.	
10, 428 cavalry sabres.	
2, 404 swords.	
16, 057 sets infantry accoutrements.	
5, 386 sabre belts.	
945 sword belts.	
200 cavalry cartridge boxes and belts.	
720 pairs of holsters.	
5, 879 sets rifle accoutrements.	
4 4-pounder brass cannon, mounted, complete.	
42 6-pounder brass cannon, mounted, complete.	
157 6-pounder iron cannon.	
156 6-pounder field carriages, complete.	
9 6-pounder caissons.	
2 4-pounder caissons.	
2 24-pounder iron howitzers, mounted complete.	
2 ammunition wagons.	
1 travelling forge.	
3 bugles.	
12 drums.	
12 fifes.	
The whole of which are equal in value to	145, 672 muskets.
Arms and equipments now in store for distribution	50, 097
Total	195, 769

ORDNANCE DEPARTMENT, *February* 26, 1830.

B.

Estimate of the cost of arming and equipping the militia.

FOR A COMPANY OF INFANTRY.

100 muskets, at $13 each	$1, 300
100 sets of accoutrements, at $2 50 per set	250
4 sergeants' swords and belts, at $5 each	20
	1, 570

FOR A COMPANY OF CAVALRY.

100 sabres, at $6 each	$600
200 pistols, at $8 each	1, 600
100 sabre belts, at 50 cents each	50
100 pairs holsters, at $2 per pair	200
	2, 450

FOR A COMPANY OF ARTILLERY.

3 6-pounder cannon, with carriages and equipments complete, at $400 each	$1, 200
50 artillery swords and belts, at $5 each	250
	1, 450

One full division to consist of 40 companies of infantry, 100 men each	4,000
One company of cavalry	100
One company of artillery	50
Total number	4,150
Arms and equipments for 40 companies of infantry, at $1,570 per company, is	$62,800
One company of cavalry	2,450
One company of artillery	1,450
	66,700

To arm 4,150 men will cost $66,700; which gives an average of $16 07 per man.

ORDNANCE DEPARTMENT, *February* 26, 1830.

Regulations for apportioning to the several States and Territories the arms and military equipments procured under the act of April, 1808, "for arming and equipping the whole body of the militia of the United States."

The act provides "That the annual sum of two hundred thousand dollars be, and the same hereby is, appropriated for the purpose of providing arms and military equipments for the whole body of the militia of the United States, either by purchase or manufacture, by and on account of the United States." And it further provides "That all the arms procured in virtue of this act shall be transmitted to the several States composing this Union and Territories thereof, to each State and Territory, respectively, in proportion to the number of the effective militia in each State and Territory, and by each State and Territory to be distributed to the militia in such State and Territory, under such rules and regulations as shall be by law prescribed by the legislature of each State and Territory."

The arms are apportioned annually, and as soon after the close of each year as the number of arms procured during the year can be ascertained. The number of arms apportioned to any State or Territory bears the same proportion to the number of its militia that the whole number of arms procured bears to the whole number of militia in the United States.

To determine the number of effective militia in each State and Territory the official returns of each, respectively, which are required by the act of March 2, 1803, to be made annually to the President of the United States, are taken as a guide. In cases where no return has been received for the year for which the apportionment is made, then the latest return which has been received is taken.

The arms procured consist of muskets, rifles, pistols, sabres, swords, and accoutrements for small arms generally, with a few pieces of field artillery. The principal part of the arms, however, consist of muskets, therefore the apportionments are made, and the quotas are assigned, in muskets only. The whole of the quota assigned to any State or Territory will be furnished in muskets, if desired, or in any other description of arms or accoutrements, of equal value, (except field artillery,) which the proper authorities of the State may require. Field artillery will be furnished whenever practicable, but not without special application and instructions therefor. When other arms than muskets are furnished they will be given in such numbers as will be equal in value to the assigned quota of muskets, estimated according to the average contract price of each, respectively.

The arms will be transported at the expense of the United States, and will be delivered at any place within the State or Territory, situated upon navigable waters, which may be designated by the governor or other authorized officer. But the United States cannot incur any expense for transporting the arms to the interior by land.

The quotas assigned to any State or Territory will be transmitted annually, if desired by the proper authorities; but if not so desired the distribution will be made less frequently.

Triplicate receipts are necessary for all arms and equipments delivered, and they should be signed by the governor, or other duly authorized officer of the State or Territory. The form for the receipt is subjoined.

The relative value of the several kinds of arms and equipments procured during the undermentioned periods is as follows, viz:

For the years 1823, 1824, 1825, and 1826:

Muskets, each	$13 00
Rifles, each	16 00
Pistols, each	8 00
Cavalry sabres, each	6 00
Artillery swords, each	4 00
Non-commissioned officers' swords, each	4 00
Accoutrements for muskets, per set	2 50
Accoutrements for rifles, per set	2 00
Cavalry sabre and sword belts, each	60
Six-pounder cannon, with carriage and equipments complete, exclusive of harness	400 00

The number of arms apportioned to the ——— of ——— for the years herein stated is as follows, viz:

Period.	Number of militia.		Number of arms.	
	Total in United States.	In the State or Territory.	Total procured.	Apportioned to the State or Territory.

FORM OF RECEIPT.

I hereby acknowledge to have received of the United States, by the hands of ———, of the United States army, the following arms and accoutrements, viz:

100 rifles equal in value to	123	1-13	muskets.
100 sets of accoutrements for rifles equal in value to	15	5-13	do.
350 pistols equal in value to	215	5-13	do.
50 non-commissioned officers' swords equal in value to	15	5-13	do.
175 cavalry sabres equal in value to	80	10-13	do.
175 cavalry belts equal in value to	8	1-13	do.
1,000 muskets equal in value to	1,000		do.
500 sets of accoutrements for muskets	96	2-13	do.
4 six-pounder iron cannon, 4 six-pounder field carriages, with equipments complete, } equal in value to	123	1-13	do.
Total	1,677	4-13	do.

The whole being equivalent to sixteen hundred and seventy-seven muskets, which are received on account of the quota of arms due to the ——— of ———, under the act of April, 1808, for arming and equipping the whole body of the militia, and for which I have signed triplicate receipts.

Given at ———, this ——— day of ———, 182—.

NOTE.—The numbers given above are used merely as an example. The numbers to be inserted in the receipts will, of course, correspond with the articles actually issued.

21ST CONGRESS.] **No. 443.** [1ST SESSION.

AMOUNTS OF THE APPROPRIATIONS FOR CONSTRUCTING AND REPAIRING FORTIFICATIONS ON THE HARBORS AND COASTS OF THE UNITED STATES FROM 1815 TO 1829, AND OF THE NUMBER OF TROOPS GARRISONING THE SAME.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 9, 1830.

WAR DEPARTMENT, *March* 9, 1830.

SIR: I forward the enclosed report from the Engineer department, in answer to a resolution of the House of Representatives of the 27th ultimo.

Very respectfully,

J. H. EATON.

The SPEAKER *of the House of Representatives.*

ENGINEER DEPARTMENT, *March* 8, 1830.

SIR: In conformity with your instructions, I have the honor to submit herewith a statement showing the amount of appropriations made by Congress, since the year 1815, for the purpose of constructing and repairing fortifications on the harbors and coasts of the United States, being so much of the information called for by a resolution of the House of Representatives of the 27th ultimo as can be furnished from the files of this department.

I have the honor to be, sir, very respectfully, your obedient servant,

C. GRATIOT, *Brigadier General.*

Hon. JOHN H. EATON, *Secretary of War.*

Statement showing the amount of appropriations made by Congress since the year 1815, *for the purpose of constructing and repairing fortifications in the harbors and coasts of the United States.*

Objects of appropriation.	1816.	1817.	1819.	1820.	1821.	1822.	1823.	1824.	1825.	1826.	1827.	1828.	1829.	Aggregate.	Remarks.
Fortifications in general	$838,000	$838,000	$500,000	$800,000										$2,976,000 00	Applied chiefly to the construction of Forts Lafayette, Delaware, Washington, Monroe, Calhoun, and of forts at Dauphin island, the Rigolets, and Chef Menteur.
Fort Delaware, Delaware bay					$55,000	$20,000	$58,000		$71,679 50					204,679 50	Finished; in good preservation, though a slight settling continues, in consequence of the foundations not having been originally secure.
Fort Washington, Maryland					22,000	25,000	46,000							93,000 00	Not in good condition, in consequence of its unfinished state.
Fort Monroe, Virginia					65,000	75,000	100,000	$95,000	100,000 00	$115,000	$90,000	$100,000	$100,000 00	840,000 00	Unfinished, but in very good condition; construction still in progress.
Fort Calhoun, Virginia					50,000	50,000	80,000	90,000	70,000 00	80,000	55,000	80,000	100,000 00	655,000 00	Do. do.
Fort at Rigolets and Chef Menteur, La					60,000	100,000	100,000	100,000	100,000 00	85,000	30,000			575,000 00	Both works completed, and in excellent condition.
Fort at Mobile Point, Alabama					30,000	50,000	50,000	125,000	100,000 00	90,000	70,000	80,000	100,000 00	695,000 00	Unfinished; work in progress.
Fort Jackson, Louisiana						30,000	40,000	110,000	100,000 00	90,000	80,000	88,500	16,000 00	554,500 00	Will be completed this year.
Fort Adams, Newport, Rhode Island								50,000	60,000 00	100,000	70,000	80,000	100,000 00	460,000 00	Unfinished; work in progress.
Fort Hamilton, New York								50,000	40,000 00	75,000	55,000	60,000	100,000 00	380,000 00	Will probably be completed this year.
Fort Macon, North Carolina									30,000 00	25,000	15,000	52,500	60,000 00	182,500 00	Unfinished; construction in progress.
Fort at Oak island, North Carolina									50,000 00	30,000	25,000	60,000	62,834 00	227,834 00	Do. do.
Battery at Bayou Bienvenue, Louisiana										90,000			6,447 80	96,447 80	Finished as far as is now advisable.
Fortifications at Charleston, S. Carolina												25,000	75,000 00	100,000 00	Commenced last year.
Fortifications at Savannah, Georgia												25,000	75,000 00	100,000 00	Do.
Fortifications at Pensacola, Florida												50,000	75,000 00	125,000 60	Do.
Tower at Bayou Dupré, Louisiana													16,677 41	16,677 41	Will be completed this spring.
Repairs and contingencies of fortifications					20,000	20,000	26,000	26,000	8,320 50	15,000	15,000	15,000	15,000 00	160,320 50	
Repairs to Fort Jackson, Savannah							8,000							8,000 00	
Preserving islands in Boston harbor									52,972 56			2,000	7,310 54	62,283 10	Sea-wall completed and in good preservation.
Repairs to Fort Constitution, in Portsmouth harbor										2,500				2,500 00	
Purchase of Throg's Point, New York										17,000				17,000 00	
Repairs at Fort Delaware													15,000 00	15,000 00	Applied to wharves and embankments of the island.
Repairs at Fort Lafayette, New York													33,386 70	33,386 70	Repairs nearly completed, which will put the work in very good condition.
	838,000	838,000	500,000	800,000	*302,000	370,000	508,000	646,000	782,972 56	814,500	505,000	718,000	957,656 45	8,580,129 01	

* The appropriation for the year 1821 includes an unexpended balance of former appropriations for *fortifications* of $100,000 00

Total amount appropriated for *constructing* and *repairing* fortifications, and for *purchasing* and *preserving sites* for fortifications since 1821 .. 8,480,129 01

DEPARTMENT OF WAR, *March* 9, 1830.

SIR: The enclosed report from the commanding general, relative to "the number of troops" which garrison the "fortifications on the harbors and coast of the United States," should have accompanied the report from this department of yesterday, but was accidentally omitted. I have now to request that it be received as part thereof.

Very respectfully,

J. H. EATON.

Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

HEADQUARTERS OF THE ARMY, *Washington, March* 3, 1830.

SIR: I transmit herewith a statement of the number of troops constituting the garrisons of the several fortifications in the harbors and on the coasts of the United States, this being all the information which can be furnished from the headquarters of the army on the subject to which the resolution of the House of Representatives of the 27th of February, 1830, has reference.

I am, sir, with great respect, your most obedient servant,

ALEX. MACOMB, *Major General, Commanding the Army.*

Hon. JOHN H. EATON, *Secretary of War.*

Statement of the number of troops forming the garrisons of the fortifications of harbors and coasts of the United States, taken from the latest returns on file in this office, and furnished in compliance with a resolution of the House of Representatives of the 27th of February, 1830.

Posts.	State.	Regiment.	Number of companies.	Aggregate.
Fort Sullivan	Eastport, Maine	3d artillery	1	63
Fort Preble	Portland, Maine	do	1	62

ADJUTANT GENERAL'S OFFICE, *Washington, March* 2, 1830.

S. COOPER, *Acting Adjutant General.*

21ST CONGRESS.] No 444. [1ST SESSION.

ON A CLAIM FOR PAY FOR SERVICES AS A COLONEL OF THE MILITIA OF NEW YORK DURING THE TIME HE WAS A PRISONER OF WAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 15, 1830.

The Committee on Military Affairs, to whom was referred the memorial of Cyrenius Chapin, reported:

That the memorialist sets forth that he was a colonel in the service of the United States during the late war. That upon the approach of the enemy towards Buffalo, in the State of New York, he met them, with a flag of truce, for the purpose of agreeing upon terms for the inhabitants of that village, in which there was not a sufficient force to make any opposition. That whilst discharging this duty, he was

detained as a prisoner of war by the enemy and sent to Quebec, where he remained from the 30th of December, 1813, until the 4th of June succeeding, when he was exchanged and permitted to return home; and that his pay as a colonel has been refused to him during the period of his captivity at Quebec, upon the ground that his name was not inserted in any muster-roll. He therefore prays that a law may be passed allowing to him the pay and emoluments of his rank which he considers to be equitably due to him.

It was established to the satisfaction of the committee that the memorialist had served as a colonel during a part of the late war with the militia of the State of New York in the service of the United States, and that he had conducted himself with distinguished courage and ability; but as at the time when he undertook to be the bearer of a flag of truce to the enemy he was not in the military service, either of the State of New York or of the United States, the compensation which he asks for cannot legally be granted to him.

The committee therefore recommend that the prayer of the memorialist be rejected.

21ST CONGRESS.] **No. 445.** [1ST SESSION.

APPLICATIONS AND APPOINTMENTS AS CADETS AT THE MILITARY ACADEMY AT WEST POINT FROM ITS ESTABLISHMENT TO 1829, AND THE ANNUAL AND GENERAL EXPENSES OF THE SAME DURING THAT TIME.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 15, 1830.

DEPARTMENT OF WAR, *March* 15, 1830.

SIR: I have the honor to transmit herewith three reports from the Chief Engineer and the Second and Third Auditors of the Treasury, containing, as far as it is practicable to furnish it, the information on the subject of the Military Academy which was called for by a resolution adopted by the House of Representatives on the 26th of January last. These reports contain—

1. A register exhibiting the names and number of all the cadets that have been received into the Military Academy of the United States, in each and every year, from its first establishment until the present time; the States and Territories, including the District of Columbia, from which they came, respectively, distinguishing between those who have graduated and have received commissions and such as have withdrawn or have been dismissed from the institution; stating also the names and number of those graduates now in the army of the United States, and designating, as far as practicable, those whose fathers or guardians were, or are now, members of Congress or other officers of the general government, or governors of States or Territories, or holding offices in the District of Columbia.

2. A register of those applicants who were appointed cadets, but failed to report at the academy, or did not obtain admission; stating also the names of those foreigners who have been received into the academy, and the countries of which they are natives.

3. A register showing the names and number of rejected applicants for appointments as cadets, with the State and Territory from which they came, respectively.

4. A register showing the names and number of professors, instructors, and all other officers employed in the Military Academy, with their pay and emoluments as such.

5. A statement of the annual expense of the institution; showing also the monthly pay of the cadets, and whether they are supplied with fuel and quarters, &c., at the public expense, or are furnished by themselves.

6. A statement exhibiting the annual pay and emoluments of the professors, instructors, cadets, and all others employed in the Military Academy, from the 1st of July, 1815, to the 31st of December, 1829, and embracing other items of disbursement, so as to show the entire expense of the institution for those years, as far as can be ascertained from the books of the Second Auditor's office.

7. A statement exhibiting the amount expended at the Military Academy for the construction of buildings and appurtenances, the purchase of books, maps, apparatus, and all other purposes, for the use of the Military Academy, pay and subsistence of teachers, officers, and cadets, and other persons employed or attached to the institution, as far as the same has been ascertained from accounts rendered and settled in the office of the Third Auditor.

These reports contain information on all the subjects embraced in the resolution, except that part which calls for a statement of the number of cadets "who were in circumstances too indigent to be educated on their own means or those of their parents." This information it is impracticable to give, because no testimonials with regard to pecuniary circumstances are required from those who apply for admission into the Military Academy.

I have the honor to be, very respectfully, sir, your obedient servant,

J. H. EATON.

HON. ANDREW STEVENSON, *Speaker of the House of Representatives.*

ENGINEER DEPARTMENT, *Washington, March* 15, 1830.

SIR: I have the honor to present herewith statements, numbered from 1 to 6, containing such part of the information on the subject of the Military Academy, called for by a resolution of the House of Representatives of the 26th of January, as can be furnished from the records of this office.

I am, very respectfully, sir, your obedient servant,

C. GRATIOT, *Brigadier General.*

HON. JOHN H. EATON, *Secretary of War.*

No. 1.

A register exhibiting the names and number of all the cadets who have been received into the United States Military Academy, in each year, from its first establishment until December 31, 1829; the States and Territories, including the District of Columbia, from which they came, respectively, distinguishing between those who have been graduated and have received commissions and those who have withdrawn or have been dismissed from the institution; stating also the names and number of those graduates now in the army of the United States, and designating (as far as practicable) those whose fathers or guardians were, or are now, members of Congress or other officers of the general government, or governors of States or Territories, or holding offices in the District of Columbia.

The following names of foreigners who have been received into the Military Academy are not embraced in either of the preceding statements not included in the recapitulations:

John B. Windham, a native of England, was admitted in May, 1805; he was commissioned in the army and withdrew from service.

Lewis and Matthew Blanco, natives of Chili, were received into the Military Academy on the 2d of December, 1815; they were paid as cadets up to the 31st of January, 1818, at which time they were removed from the academy by order of the Secretary of War.

Juan A. P. Paez, a native of the republic of Colombia, and nephew of General Paez, came to the United States in 1823 to obtain instruction in military and other science, for which purpose, on the recommendation of General Scott, the President of the United States permitted the superintendent of the Military Academy to receive him into that institution. He was admitted in July, 1823. He bore his own expenses, and remained at the academy the usual term of four years, in order to go through the course of instruction with the class to which he was at first attached; and at the expiration of that time was dropped from the rolls. This indulgence, it may be supposed, was granted to young Paez in the same spirit of courtesy in which a similar one has been extended by the French government to officers of our own army desirous of obtaining instruction at the military schools of that nation.

No. 3.

Register showing, as far as practicable, in each year, the names and number of rejected applicants for cadet appointments, with the States and Territories from which they came, respectively.

NOTE.—In this, as well as in the preceding recapitulation, the number in each column, under the heads graduated, withdrawn, dead, &c., designates not the actual number of those who were graduated or withdrawn in each year, but the number of graduates, withdrawals, deaths, &c., among those who were appointed in each year. It must also be remarked, that no graduations having taken place since 1825, the number admitted since that time should be deducted from the whole number in comparing the number admitted with the number of graduates.

In the above statement of the annual expense of the academy, the cost of supplies for the troops stationed at West Point, who formed no part of the institution, is not included. The amount expended under that head is $21,450 22.

C. GRATIOT, *Brigadier General.*

ENGINEER DEPARTMENT, *March* 15, 1830.

No. 5.

Names of individuals who have acted as professors, assistant and acting assistant professors, teachers, assistant and acting assistant teachers, and instructors and assistant instructors, at the Military Academy, West Point, New York, from its establishment as an "artillery school," in 1801, to February 2, 1830, with a statement of the amount paid to each.

No.	Names.	Nature of appointment.	Date of appointment.	Amount of pay received to Dec. 31, 1829.	Remarks.
1	Francis de Massau	Teacher of French	July 12, 1803	$9,064 31	Resigned March 31, 1812.
2	Captain A. Partridge	Assistant professor of mathematics	Nov. 4, 1806	1,153 60	Professor of mathematics April 13, 1813; professor of engineering Sept. 1, 1813; resigned Dec. 31, 1816.
3	F. R. Hasler	Professor of mathematics	Feb. 14, 1807	3,355 05	Resigned February 14, 1810.
4	C. E. Zoeller	Teacher of drawing	Sept. 1, 1808	7,880 17	Resigned April 30, 1810; reappointed July 1, 1812; resigned January 5, 1819.
5	J. Mansfield	Professor of philosophy	Oct. 7, 1812	25,021 98	Resigned August 31, 1828.
6	Rev. A. Empie	Chaplain and professor of ethics	Aug. 9, 1813	5,525 40	Resigned April 30, 1817.
7	A. Ellicott	Professor of mathematics	Sept. 1, 1813	8,615 22	Died August 29, 1820.
8	P. Thomas	Sword master	Mar. 1, 1814	7,118 52	Resigned December 12, 1825.
9	Lieutenant J. Wright	Assistant professor of mathematics	April 1, 1814	480 00	Relieved December 1, 1816.
10	Lieutenant W. S. Evelyth	Assistant professor of engineering	Jan. 1, 1815	311 00	Relieved September 20, 1816.
11	D. B. Douglass	Assistant professor of philosophy	.....do.....	14,039 65	Professor of mathematics August 29, 1820; professor of engineering April 28, 1823; present.
12	C. Berard	Teacher of French	Jan. 3, 1815	13,373 32	Present.
13	C. Crozet	Assistant professor of engineering	Sept. 20, 1816	7,377 12	Professor of engineering January 1, 1817; resigned April 28, 1823.
14	Cadet S. S. Smith	Acting assistant professor of mathematics	Nov. 26, 1816	1,230 00	Promoted July 24, 1818, and continued assistant professor of mathematics; assistant professor of philosophy September 1, 1823; died September 10, 1828.
15	Cadet H. Webster	.....do.....do.....	Nov. 28, 1816	1,041 98	Promoted July 24, 1818, and continued assistant professor of mathematics; resigned October 3, 1825.
16	Cadet J. D. Graham	.....do.....do.....	.....do.....	.....	Till July 17, 1817.
17	Cadet J. P. Emmett	.....do.....do.....	Nov. 29, 1816	.....	Till July 28, 1817.
18	C. Davies	Assistant professor of mathematics	Dec. 1, 1816	14,891 20	Assistant professor of philosophy October 31, 1821; professor of mathematics April 28, 1823; present.
19	Cadet J. R. Vinton	Acting assistant teacher of drawing	Dec. 5, 1816	.....	Till July 17, 1817.
20	Cadet E. A. Hitchcock	.....do.....do.....	.....do.....	.....	Till promoted, July, 1817; assistant instructor of tactics December 19, 1823, to April 20, 1827; instructor of tactics March 13, 1829; present.
21	Cadet R. Delafield	.....do.....do.....	.....do.....	.....	Till June, 1818.
22	Cadet H. H. Loring	.....do.....do.....	.....do.....	.....	Till June, 1817.
23	R. Willis	Teacher of music	June 16, 1817	7,525 00	Died February 1, 1830.
24	Cadet Giles Porter	Acting assistant professor of mathematics	Sept. 1, 1817	.....	To February 19, 1818.
25	Cadet A. Talcott	.....do.....do.....	Sept. 7, 1817	29 67	Till June, 1818.
26	Cadet W. A. Eliason	.....do.....do.....	Sept. 8, 1817	100 00	Promoted and relieved July 1, 1819.
27	Lieutenant C. M. Eakin	Assistant professor of engineering	..... do.....	488 52	Relieved July 31, 1820.
28	Lieutenant G. W. Gardiner	Instructor of artillery	Sept. 15, 1817	.....	Relieved February 29, 1820.
29	Cadet G. W. Whistler	Acting assistant teacher of drawing	.....do.....	255 92	Till January 17, 1819; promoted and relieved July 1, 1819; joined October 19, 1821; relieved April 30, 1822.
30	J. Ducommun	Teacher of French	March 1, 1818	10,482 20	Present.
31	Captain John Bliss	Instructor of tactics	April 2, 1818	.....	Relieved January 11, 1819.
32	Cadet T. Ragland	Acting assistant professor of mathematics	April 24, 1818	191 25	Dismissed November 30, 1819.
33	Reverend Thomas Picton	Chaplain and professor of ethics	July 20, 1818	9,773 12	Resigned January 1, 1825.
34	Cadet A. K. Woolley	Acting assistant professor of mathematics	Aug. 30, 1818	146 66	Till November 20, 1819.
35	Cadet F. Brewerton	Acting assistant teacher of drawing	.....do.....	180 00	Promoted and appointed assistant professor of engineering July 1, 1819; relieved August 31, 1821.
36	Cadet S. Tuttle	Acting assistant teacher of French	.....do.....	283 00	Acting assistant professor of mathematics November 20, 1819; promoted and appointed acting assistant professor of philosophy July 1, 1823; relieved December 30, 1820.

No. 5.—*Names of individuals who have acted as professors, &c.*—Continued.

No.	Names.	Nature of appointment.	Date of appointment.	Amount of pay received to Dec. 31, 1829.	Remarks.
37	Cadet W. M. Fairfax	Acting assistant professor of mathematics	Sept. 3, 1818	$115 48	Dismissed November 30, 1819.
38	Cadet W. H. Bell	do do	Nov. 27, 1818	746 33	Promoted July 1, 1820; relieved September 1, 1823.
39	Cadet J. Baker	do do	do	152 41	Till February 20, 1819; promoted and relieved July 1, 1819; joined as acting assistant professor of philosophy October 25, 1819; relieved June 7, 1820.
40	Lieutenant W. G. Belnap	Assistant instructor of tactics	Dec. 10, 1818	18 57	Relieved April 7, 1819.
41	Thomas Gimbrede	Teacher of drawing	Jan. 5, 1819	9,745 75	Present.
42	Captain J. R. Bell	Instructor of tactics	Feb. 8, 1819	.....	Relieved March 17, 1820.
43	Cadet T. E. Sudler	Acting assistant professor of mathematics	Feb. 20, 1819	108 38	Till January 18, 1820; promoted July 1, 1820; relieved July 23, 1821.
44	Cadet J. A. de Lagnel	Acting assistant teacher of French	Mar. 8, 1819	230 77	Afterwards acting assistant teacher of drawing; deprived of appointment February 9, 1821.
45	Lieutenant R. L. Armstrong	Assistant instructor of tactics	April 30, 1819	.....	Relieved October 31, 1819.
46	Cadet N. P. Twist	Acting assistant teacher of French	Aug. 31, 1819	249 00	Resigned August 31, 1821.
47	Cadet W. W. Wells	Acting assistant professor of mathematics	do	173 57	Afterwards acting assistant professor of philosophy; deprived of appointment February 9, 1821.
48	Cadet J. C. Holland	do do	do	62 58	Deprived of appointment March 8, 1820.
49	Cadet D. Wallace	do do	Jan. 18, 1820	126 48	Deprived of appointment February 9, 1821.
50	Cadet C. Burdine	do do	Mar. 1, 1820	40 00	Afterwards acting assistant professor of philosophy; promoted and relieved July 1, 1821.
51	Lieutenant Colonel W. J. Worth	Instructor of tactics	Mar. 17, 1820	.....	Relieved November 27, 1828.
52	Captain F. Whiting	Instructor of artillery	Aug. 15, 1820	.....	Relieved August 7, 1821.
53	Assistant Surgeon J. Cutbush	Acting professor of chemistry and mineralogy	Sept. 1, 1820	262 09	Died December 16, 1823.
54	Cadet J. Prescott	Acting assistant teacher of drawing	do	710 16	Promoted and appointed assistant professor of engineering July 1, 1821; relieved September 1, 1822; joined as acting assistant professor of chemistry and mineralogy January 29, 1823; relieved August 9, 1826.
55	Cadet E. C. Ross	Acting assistant professor of mathematics	do	1,588 37	Promoted and continued July 1, 1821; assistant professor of mathematics October 3, 1825; present.
56	Lieutenant S. McRee	Assistant instructor of tactics	do	46 50	Relieved December 2, 1820.
57	Lieutenant Z. J. D. Kinsley	do do	Dec. 2, 1820	164 01	Instructor of artillery December 18, 1823; present.
58	Lieutenant H. W. Griswold	do do	Jan. 27, 1821	90 00	Relieved January 21, 1822.
59	Cadet T. R. Ingalls	Acting assistant professor of mathematics	Feb. 9, 1821	135 35	Afterwards acting assistant professor of philosophy until January 31, 1822.
60	Cadet J. H. Latrobe	Acting assistant teacher of drawing	do	93 22	Resigned November 21, 1821.
61	Cadet W. T. Washington	Acting assistant professor of mathematics	do	66 78	Deprived of appointment August 31, 1821.
62	Lieutenant E. H. Courtenay	Acting assistant professor of philosophy	July 23, 1821	2,321 65	Assistant professor of engineering September 1, 1822; relieved August 31, 1824; resigned February 16, 1829; professor of philosophy September 1, 1828; present.
63	Lieutenant C. Dimmock	Assistant professor of engineering	do	108 37	Relieved March 1, 1822.
64	Cadet A. Mordecai	Acting assistant professor of mathematics	July 25, 1821	387 73	Promoted, and acting assistant professor of philosophy, July 1, 1823; assistant professor of engineering September 1, 1824; relieved July 12, 1825.
65	Cadet William M. Bayce	Acting assistant teacher of drawing	Aug. 27, 1821	100 00	Promoted and relieved July 1, 1822.
66	Cadet R. Holmes	Acting assistant professor of mathematics	do	129 60	Acting assistant teacher of drawing September 29, 1822; promoted and relieved July 1, 1823.
67	Cadet G. Nauman	Acting assistant teacher of French	Sept. 2, 1821	136 77	Deprived of appointment October 23, 1822; promoted and relieved July 1, 1823; joined as acting assistant teacher of French July 31, 1828; relieved August 15, 1829.
68	Cadet D. H. Mahan	Acting assistant professor of mathematics	Nov. 19, 1821	73 66	Promoted July 1, 1824; professor of engineering August 30, 1825; relieved August 1, 1826.
69	Lieutenant J Dimmick	Assistant instructor of tactics	Jan. 21, 1822	81 61	Relieved September 25, 1822.
70	Cadet J. Mansfield	Acting assistant professor of philosophy	Jan 27, 1822	51 28	Promoted and relieved July 1, 1822.
71	Cadet George Dutton	Acting assistant professor of chemistry	do	51 28	Do. do.
72	Cadet John Farley	Acting assistant teacher of drawing	Sept. 1, 1822	100 00	Promoted and relieved July 1, 1823.

No. 5.—*Names of individuals who have acted as professors, &c.*—Continued.

No.	Names.	Nature of appointment.	Date of appointment.	Amount of pay received to Dec. 31, 1829.	Remarks.
73	Cadet J. W. A. Smith	Acting assistant professor of mathematics	Sept. 1, 1822	$121 28	Acting assistant professor of chemistry October 4, 1823; promoted, and acting assistant professor of mathematics, July 1, 1824; acting assistant professor of chemistry and mineralogy November 4, 1824; relieved March 26, 1825.
74	Lieutenant H. H. Gird	Assistant instructor of tactics	Sept. 2, 1822		Relieved March 20, 1824.
75	Cadet G. S. Greene	Acting assistant professor of mathematics	Sept. 29, 1822	205 32	Promoted and continued July 1, 1823; assistant professor of engineering August 29, 1826; relieved April 20, 1827.
76	Cadet J. K. Findlay	Acting assistant teacher of French	Oct. 24, 1822	202 25	Promoted, and acting assistant professor of chemistry, July 1, 1824; assistant professor of ethics, &c., November 4, 1824; relieved April 17, 1825.
77	Cadet A. D. Bache	Acting assistant professor of mathematics	Aug. 25, 1824	121 92	Acting assistant professor of chemistry August 29, 1824; promoted, and acting assistant professor of engineering, July 1, 1825; relieved July, 1826.
78	Cadet A. H. Bowman	do do	do	221 93	Promoted, and assistant professor of ethics, &c., July 1, 1825; relieved June 15, 1826.
79	Cadet G. W. McGehee	do do	do	121 93	Resigned August 31, 1824.
80	Cadet P. McMartin	do do	do	121 32	Deprived of appointment August 29, 1824; promoted, and acting assistant professor of chemistry, July 1, 1825; relieved December 2, 1825.
81	Cadet R. P. Parrott	do do	do	287 73	Promoted, and acting assistant professor of philosophy, July 1, 1824; acting assistant professor of mathematics September 8, 1826; assistant professor of philosophy September 1, 1828; relieved September 12, 1829.
82	Cadet R. C. Smead	Acting assistant teacher of drawing	do	78 70	Resigned the appointment on account of ill health April 21, 1824; promoted, and acting assistant professor of mathematics, July 1, 1825; relieved April 30, 1826.
83	Cadet Francis Taylor	Acting assistant teacher of French	do	121 26	Deprived of the appointment August 29, 1824.
84	Cadet W. G. Williams	Acting assistant teacher of drawing	do	81 93	Till April 30, 1824.
85	Lieutenant A. Kinnard	Acting assistant professor of chemistry	Sept. 1, 1823		Relieved October 10, 1823.
86	Assistant Surgeon Percival	Acting professor of chemistry and mineralogy	Mar. 2, 1824	41 28	Relieved July 6, 1824.
87	Cadet A. D. Mackay	Acting assistant teacher of drawing	April 21, 1824	142 90	Promoted and continued July 1, 1825; relieved August 9, 1826.
88	Cadet J. Catlin	do do	May 6, 1824	18 06	Promoted and continued July 1, 1824; relieved June 11, 1825.
89	Lieutenant S. M. Capron	Assistant instructor of tactics	May 90, 1824		Relieved May 29, 1825.
90	Assistant surgeon Jno. Torrey	Assistant professor of chemistry and mineralogy	Aug 25, 1824	481 93	Resigned September 1, 1828.
91	Cadet A. Brisband	Acting assistant teacher of drawing	Aug. 29, 1824	100 64	Promoted and relieved July 1, 1825.
92	Cadet T. S. Brown	Acting assistant professor of mathematics	do	100 64	Promoted and continued July 1, 1825; relieved December 2, 1825.
93	Cadet William Bryant	do do	do	220 64	Promoted, and acting assistant professor of chemistry and mineralogy, July 1, 1826; relieved August 15, 1829.
94	Cadet W. H. Bartlett	do do	do	670 64	Promoted, and acting assistant professor of engineering, July 1, 1826; relieved June 7, 1828; joined as assistant in engineering June 30, 1828; relieved August 31, 1829.
95	Cadet C. G. Ridgely	Acting assistant teacher of French	do	220 64	Promoted and continued July 1, 1826; resigned February 22, 1827.
96	Cadet T. S. Twiss	Acting assistant professor of mathematics	do	220 64	Promoted and continued July 1, 1826; acting assist. prof. of philosophy Sept. 8, 1826; relieved May 12, 1828.
97	Rev. C. P. McIlvaine	Chaplain and professor of ethics	April 6, 1825	4,157 40	Resigned December 31, 1827.
98	Lieutenant C. G. Smith	Assistant instructor of tactics	May 16, 1825		Relieved November 26, 1825.
99	Cadet E. Sibley	Acting assistant professor of mathematics	Aug. 31, 1825	360 00	Promoted and relieved July 1, 1828.
100	Lieutenant J. Grier	Assistant instructor of tactics	Nov. 26, 1825		Relieved July 17, 1827.
101	Lieutenant T. J. Cram	Acting assistant professor of mathematics	Nov. 27, 1825	131 16	Promoted and continued July 1, 1826; assistant professor of philosophy September 1, 1829; present.
102	P. Trainque	Sword master	Dec. 12, 1825	377 00	Died June 27, 1826.
103	Lieutenant W. F. Hopkins	Acting assistant professor of chemistry	Dec. 29, 1825	280 00	Relieved April, 1826; assistant professor of chemistry September 13, 1826; acting professor of chemistry and mineralogy September 1, 1828; present.

No. 5.—*Names of individuals who have acted as professors, &c.*—Continued.

No.	Names.	Nature of appointment.	Date of appointment.	Amount of pay received to Dec. 31, 1829.	Remarks.
104	Lieutenant F. N. Barbarin	Assistant instructor of tactics	Dec. 29, 1825		Relieved April 1826.
105	Lieutenant H. Bliss	do do.	do		Relieved June 23, 1826.
106	Lieutenant W. A. Thornton	do do.	Aug. 17, 1826		Relieved July 10, 1829.
107	Lieutenant B. H. Henderson	Assistant professor of ethics and belles lettres	Aug. 30, 1826		Relieved December 19, 1829.
108	Cadet C. Mason	Acting assistant professor of mathematics	Sept. 3, 1826	$399 66	Promoted, and assistant professor of engineering, July 1, 1829; present.
109	Cadet W. H. Harford	do do.	do	219 66	Till August 31, 1828; acting assist. prof. of chemistry March 15, 1829; promoted and relieved July 1, 1829.
110	Cadet R. E. Lee	do do.	do	239 66	Till August 31, 1828.
111	Cadet C. F. Buckingham	do do.	do	239 66	Do.
112	Cadet J. Barnes	Acting assistant teacher of French	do	339 66	Promoted and continued July 1, 1829; present.
113	L. S. Simon	Sword master	Oct. 5, 1826	2,296 92	Present.
114	Lieutenant J. M. Berrian	Assistant instructor of tactics	Dec. 15, 1826		Relieved May, 1828.
115	Lieutenant T. B. Brown	Assistant teacher of drawing	do		Present.
116	Cadet J. A. Smith	Acting assistant teacher of French	Jan. 24, 1827	192 25	Till August 31, 1828; promoted, and acting professor of ethics, &c., July 1, 1829; present.
117	Lieutenant N. Tillinghast	Acting assistant professor of chemistry	May 7, 1827		Relieved October 26, 1829.
118	Lieutenant E. Sterrett	Assistant instructor of tactics	Sept. 23, 1827		Relieved October 15, 1827.
119	Lieutenant J. H. Winder	do do.	Oct. 2, 1827		Relieved October 12, 1828.
120	Rev. Thomas Warner	Chaplain and professor of ethics, &c.	Jan. 1, 1828	3,040 80	Present.
121	Lieutenant L. B. Webster	Acting assistant professor of mathematics	July 8, 1828		Do.
122	Lieutenant G. W. Long	Assistant professor of philosophy	do		Relieved February 1, 1829.
123	Lieutenant A. Church	Acting assistant professor of mathematics	July 16, 1828		Present.
124	Lieutenant J. F. Lane	do do.	do		Acting assistant professor of philosophy February 1, 1829; relieved August 15, 1829.
125	Lieutenant W. Palmer	Assistant instructor of tactics	Aug. 11, 1828		Relieved September 4, 1829.
126	Lieutenant R. E. Temple	Acting assistant professor of mathematics	Sept. 24, 1828		Acting assistant professor of philosophy September 1, 1829; relieved January 18, 1830.
127	Cadet A. J. Swift	do do.	Mar. 23, 1829	87 00	Deprived of appointment December 14, 1829.
128	Lieutenant W. Mather	Assistant professor of chemistry	Mar. 26, 1829		Present.
129	Lieutenant C. F. Smith	Assistant instructor of tactics	May 15, 1829		Do.
130	Lieutenant J. B. Smith	Acting assistant professor of mathematics	Aug. 12, 1829		Do.
131	Lieutenant C. W. Hackley	do do.	do		Do.
132	Lieutenant O. M. K. Mitchell	do do.	do		Do.
133	Lieutenant J. L. Locke	Assistant instructor of tactics	Aug. 25, 1829		Do.
134	Cadet R. Park	Acting assistant professor of mathematics	Sept. 2, 1829	39 35	Do.
135	Lieutenant J. F. Kennedy	Assistant instructor of tactics	Oct. 10, 1829		Relieved December 28, 1829.
136	Lieutenant L. J. Bibb	do do.	Nov. 24, 1829		Present.
		Total amount paid to December 31, 1829		184,696 32	

NOTE.—By the law of 1802, "fixing the military peace establishment," the senior officer of the corps of engineers present at West Point is the superintendent of the Military Academy. Since the establishment of the academy on its present footing, in pursuance of the act of 1812, "making further provisions for the corps of engineers," there have been but two superintendents, viz: Captain Alden Partridge, of the corps of engineers, until July 4, 1817; and Lieut. Col. S. Thayer, of the same corps, since the latter date.

To December 31, 1815, the pay is calculated at the amount each individual was entitled to receive. From January 1, 1816, (the date of the first payment made by me,) I have entered the actual amount paid.

THOS. J. LESLIE, *Paymaster Corps of Engineers.*

No. 6.

Annual amount disbursed by the pay department on account of the United States Military Academy.

	Pay.	Subsistence.	Forage.	Clothing.	Total amount.
For one professor of natural and experimental philosophy, pay and emoluments of a lieutenant colonel	$840 00	$512 40	$288	$60	$1,700 40
For one assistant professor of natural and experimental philosophy, $15 per month in addition to his pay as second lieutenant	180 00				180 00
For one professor of mathematics, pay and emoluments of a major of infantry	720 00	439 20	288	60	1,507 20
For one assistant professor of mathematics, $10 per month in addition to his pay as first lieutenant	120 00				120 00
For one professor of engineering, pay and emoluments of a major of infantry	720 00	439 20	288	60	1,507 20
For one assistant professor of engineering, $15 per month in addition to his pay as second lieutenant	180 00				180 00
For one chaplain and professor of ethics, pay and emoluments of a major of infantry	720 00	439 20	288	60	1,507 20
For one acting professor of chemistry and mineralogy, $10 per month in addition to his pay as assistant surgeon	120 00				120 00
For two teachers of the French language, pay and emoluments of a captain	1,080 00	729 60		60	1,869 60
For one teacher of drawing, pay and emoluments of a captain	540 00	364 80		30	934 80
For one sword master	559 92	146 40			706 32
For one cadet, acting assistant professor, $10 per month in addition to his pay as cadet	120 00				120 00
For two hundred and thirty-eight cadets, (average number for twelve years)	45,696 00	34,747 80			80,443 80
For one clerk to the paymaster and treasurer	600 00				600 00
For one teacher of music	600 00				600 00
For twenty musicians, attached to the corps of cadets	1,440 00				1,440 00
	54,235 92	37,818 60	1,152	330	93,536 52

UNITED STATES MILITARY ACADEMY, *February* 22, 1830.

THOS. J. LESLIE, *Paymaster Corps of Engineers.*

REMARKS.

The annual current expenditures in the quartermaster's department of the Military Academy, for repairs of buildings, fuel, transportation, expenses of the board of visitors, &c., have averaged, during the last twelve years, about	$10,500
To which adding the above sum	93,536
We have for the aggregate expense of the institution annually	104,036

This sum is exclusive of the cost of new buildings, and the purchase of books, apparatus, and models, for which special appropriations have been made by Congress. Hence the discrepancy between this statement and that of the annual expense of the academy, contained in the general recapitulation, which exhibits the entire aggregate expense of the institution in each year.

The monthly pay of a cadet is $16, as established by the act of March 16, 1802. He is allowed, by the same act, two rations a day, each ration being valued at 20 cents, and is furnished by the government with quarters and fuel, but supplies himself with the requisite furniture for his room, with uniform clothing, stationery, and class books.

Statement exhibiting the annual pay and emoluments of the professors, instructors, cadets, and all others employed in the Military Academy, from July 1, 1815, to December 31, 1829, and embracing other items of disbursements, so as to show the entire expense of the institution for those years, as far as can be ascertained from the books of this office; furnished in pursuance of a resolution of the House of Representatives of the United States of the 26th of January, 1830.

	Pay and subsistence, forage, and allowance for servants.

Recapitulation

Amount expended in 1815	$142,422 27
1816	102,208 11
1817	105,756 99
1818	93,178 80
1819	93,112 80
1820	93,984 40
1821	95,056 80
1822	94,934 80
1823	95,377 80
1824	95,154 80
1825	95,213 80
1826	95,273 80
1827	95,153 80
1828	95,104 80
1829	94,700 80
Aggregate amount expended from July 1, 1815, to December 31, 1829	1,486,634 57

NOTE.—Brevet Lieutenant Colonel Thayer, as "superintendent," received triple rations as major from September 1, 1820, and as lieutenant colonel from March, 1823.

The commandant of the corps of cadets received brevet pay and double rations of major to December 31, 1828, and double rations as captain for 1829.

The senior teacher of the French language receives $10 per month additional as librarian, per order of Secretary of War, March 12, 1823.

The teacher of music receives $50, by order of Secretary of War, June 16, 1817.

The sword master receives $20 per month extra, by order of President, from the 1st January, 1815.

The clerk to the treasurer receives $50 per month, by order of Secretary of War of November, 1818.

W. B. LEWIS.

TREASURY DEPARTMENT, *Second Auditor's Office, March* 8, 1830.

Statement exhibiting the aggregate amount expended on the Military Academy at West Point in the purchase, erection, and repair of buildings and barracks; for stationery, books, mathematical instruments, and printing; for wood and hauling, transportation of stores, officers' baggage, and for expenditures of a contingent nature in the quartermaster's department for said institution, including the amount that has been expended in the pay and subsistence of the teachers, officers, and cadets, as far as the same has been ascertained from the accounts of the disbursing officers, settled and rendered at the office of the Third Auditor; furnished in pursuance of a resolution of the House of Representatives of the United States of the 5th December, 1820.

Pay, subsistence, &c., to teachers, officers, and cadets	$73,210 38
Wood and hauling, &c	26,612 36
Buildings purchased and erected, materials for ditto, and repairs	141,824 82
Stationery, printing, books, and mathematical instruments	43,470 37
Transportation of materials, stores, and officers' baggage, &c	4,166 11
Furniture, tools, postage, expenses of the board of visitors, and other contingent expenses	5,014 69
Aggregate amount	294,298 73

It is proper to remark that, prior to the act of the 3d March, 1809, no separate account was kept of the appropriation for the Military Academy; and, up to the year 1812, inclusive, all the accounts of expenditures of the War Department, which had been settled and sent to the treasury for revision, were destroyed, in the year 1814, with the public buildings. It is, consequently, impossible to furnish all the particulars required by the above-mentioned resolution. It is also proper to add that the items of pay and subsistence, &c., are only such as have been collected from the documents of the paymasters settled since 1812, and up to July, 1815, and from such only, in which it was supposed payments would appear. Other payments have doubtless been made within that period, but they are so distributed through the accounts (no separate account having been rendered or kept for the corps of engineers) that it will be impracticable to ascertain them without particular examination of every paymaster's account through the war.

PETER HAGNER, *Auditor.*

TREASURY DEPARTMENT, *Third Auditor's Office, January* 4, 1821.

Statement exhibiting the amount expended at the Military Academy at West Point for the construction of buildings and appurtenances, the purchase of books, maps, apparatus, and all other purposes, for the use of the Military Academy; pay and subsistence of teachers, officers, and cadets, and other persons employed or attached to the institution, as far as the same has been ascertained from accounts settled and rendered at the office of the Third Auditor; furnished in pursuance of a resolution of the House of Representatives of the United States of January 26, 1830.

Period.	Pay and subsistence to teachers, officers, and cadets.	Fuel and hauling, and distributing the same.	Buildings purchased and erected, and for material and repairs.	Stationery, printing, and for books, mathematical instruments, chemical apparatus, diplomas, &c.	Furniture, tools, transportation, postage, improving parade grounds, reservoir and conduit, expenses of the board of visitors, and other contingencies.	Expenditures appertaining to the quartermaster, transportation of baggage, and supplies for the troops, &c.	Aggregate.
This amount expended, as appears from a statement made by the Third Auditor on the 4th of January, 1821, a copy of which is annexed, furnished in pursuance of a resolution of the House of Representatives of December 5, 1820, (see Doc. No. 51, vol. 4, State Papers, 2d session 16th Congress,) viz:							
Up to December of the year 1820	$73,210 38	$26,612 36	$141,824 82	$43,470 37	$5,014 69	$4,166 11	$294,298 73

NOTE.—In ascertaining the amount expended at West Point, the expenses incident to the troops stationed there are embraced in the 6th column.

TREASURY DEPARTMENT, *Third Auditor's Office, March* 1, 1830.

PETER HAGNER, *Auditor.*

21ST CONGRESS.] **No. 446.** [1ST SESSION.

ON THE CLAIM OF DANIEL JOHNSON, APPRENTICED TO THE SUPERINTENDENT OF THE ARMORY AT HARPER'S FERRY, FOR INJURIES FROM THE NON-PERFORMANCE OF THE CONTRACT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 26, 1830.

Mr. DRAYTON, from the Committee on Military Affairs, to whom was referred the petition of Daniel Johnson, reported:

That the petitioner sets forth that, on the 16th September, 1800, he was bound, by indentures of apprenticeship, to the then superintendent of the United States armory at Harper's Ferry, to learn the trade of an armorer, from the date of his indentures until he should attain the age of 21 years; that he was entitled, under his indentures, to board, clothing, and lodging, and a certain portion of education, and, at the expiration of his service, to two suits of clothes; that he remained during the whole period of his apprenticeship, the duties of which he diligently and faithfully performed, without the benefit of any education, and without receiving the two suits of clothes to which he was entitled; he therefore prays that Congress would grant to him either the amount which accrued to the United States from his manual labor whilst he was at the armory, as a compensation for the injury which he has sustained from the non-performance of its contract on the part of the government, or at least that a sum of money may be awarded to him equivalent to what his schooling for a reasonable time would cost, and to the price of two suits of clothes.

The facts alleged by the petitioner, which are established by the clearest testimony, exhibit a case of peculiar injury and injustice towards him. Immediately after leaving Harper's Ferry he married, and

shortly became the father of a family, for whose support he was compelled to give so unremitting an attention to his business as to be deprived of the opportunity of devoting any leisure time to the acquisition of even reading and writing, the mere elements of education. Under these circumstances, the committee consider the petitioner entitled at least to a sum of money equal to what would have been expended by him, after he had quitted the armory, upon his schooling, clothing, board and lodging, for one year, and also to the cost of two suits of clothing; for which amount they therefore report a bill.

For schooling, clothing, board and lodging, for one year, at $12 a month	$144 00
For the cost of two suits of clothing	50 00
	194 00

21st Congress.] No. 447. [1st Session.

STATEMENT OF THE EXPENDITURES AT THE UNITED STATES ARMORIES, AND OF THE ARMS MANUFACTURED THEREIN, DURING THE YEAR 1829.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 26, 1830.

DEPARTMENT OF WAR, *March* 25, 1830.

SIR: In pursuance of an act of Congress of the 2d April, 1794, concerning arsenals and armories, I have the honor to transmit herewith a statement of the expenditures at the United States armories, and of the arms, &c., manufactured therein, during the year 1829.

Very respectfully,

JNO. H. EATON.

Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

ORDNANCE DEPARTMENT, *Washington, March* 23, 1830.

SIR: In pursuance of an act concerning arsenals and armories, passed April 2, 1794, I have the honor to transmit herewith a statement of the expenditures at the national armories, and of arms made therein, during the year 1829.

It will be perceived that the operations of the Springfield armory during the past year have been very successfully conducted, yielding a greatly augmented product of arms at a diminished cost. The operations of the Harper's Ferry armory during the same period have not been alike successful or satisfactory. Its product of arms is somewhat lest than usual, and the cost of them is greater than that of former years.

It is due to the memory of the late superintendent, Thomas B. Dunn, whose life fell a sacrifice to the zeal with which he labored to resuscitate the energies of the establishment, to state that the armory was under his control for a portion of the year only, and that its results, as exhibited in the report, are not attributable to his administration of it.

There is cause to believe that the actual cost of the arms made was not so excessively great as is stated in the report, but that some portion of the amount charged on those made in the last year was properly chargeable on those made in previous years. It will be perceived that large deductions have been made on account of the errors in former statements, occasioned by over estimates of the value of stock remaining on hand and omitting to notice the debts due on it. The value of the stock now on hand has been ascertained by disinterested persons, and may, therefore, be considered accurate.

It is considered proper further to remark, that from the unhealthiness of the position of the Harper's Ferry armory, as compared with that of Springfield, the cost of the arms made at the former will, from that cause, always be somewhat greater than at the latter.

I have the honor to be, sir, respectfully, your obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance service.*

Hon. JOHN H. EATON, *Secretary of War.*

Statement of the expenditures made at the national armories, and of the arms, &c., made therein during the year 1829.

	Expenditures.					Arms, &c., made.					
	For lands, buildings, canals, repairs, and other permanent improvements.	For the manufacture of arms.	For the manufacture of Hall's rifles.	For miscellaneous purposes, not embraced in the foregoing.	Total amount expended.	Muskets.	Screw-drivers.	Wipers.	Ball-screws.	Spring vices.	Arm chests.

G. BOMFORD, *Bvt. Col., on Ordnance service.*

ORDNANCE DEPARTMENT, *Washington, March* 22, 1830.

21ST CONGRESS.] No. 448. [1ST SESSION.

APPLICATION OF MAINE FOR THE SETTLEMENT AND PAYMENT OF THE CLAIMS OF MASSACHUSETTS FOR THE SERVICES OF THE MILITIA OF THAT STATE DURING THE WAR OF 1812–'15.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 29, 1830.

STATE OF MAINE.

The committee of both houses, to whom was referred so much of the governor's message as relates to the Massachusetts claim, report:

That this claim is made on the government of the United States by the Commonwealth of Massachusetts, for disbursements made and expenses incurred for the defence of the State during the late war with Great Britain, and by the terms and conditions of the separation of this State from the Commonwealth, whatever shall be derived from the United States on account of this claim shall be received by the Commonwealth, and when received, shall be divided between the two States in the proportion of two-thirds to the Commonwealth of Massachusetts, and one-third to the State of Maine. This claim is founded on those principles of our government which are beyond dispute. The power of controlling the relations of war and peace, and of providing for the common defence of the country, having been yielded to the general government at the forming of the Union of the States, the whole means of the country to be used for defence and protection were placed within the control of that government. To correspond with this power the United States were laid under express obligation to guarantee to every State in the Union a republican form of government; "to protect each of them against invasion, and, on application of the State authority," against domestic violence.

Among the means for fulfilling this obligation which have been placed under the control of the general government is the power of Congress "to provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States," as well as the power "to provide for calling forth the militia to execute the laws of the Union, suppress insurrections and repel invasions;" and the authority vested in the President of the United States, to be commander-in-chief of the militia of the several States, when called into the actual service of the United States. On the happening of any of the contingencies laid down in the Constitution of the United States, the President has been vested by a law of Congress with power to call out the militia for service "by issuing his orders" to such officer or officers of the militia as he should think proper. By law likewise, penalties and the mode of enforcing them are provided, as to all officers, non-commissioned officers, and privates of the militia, who should fail to obey the orders issued by the President. The pay and sustenance for such of the militia as should be called into the service of the United States has been limited and fixed by law, so that, as far as is practicable, the expense for the service of each individual according to his grade is made uniform through the different States. And if these laws were inadequate to enforce the exercise of the powers of the general government upon the militia of the several States, it was at all times within the authority of Congress to make such provisions as could not be evaded by the executive power of a State.

Under these principles of the Constitution, and provisions made by the laws of Congress to enforce and insure their operation, it became the duty of the general government of the United States to protect every State and every part thereof with the people from invasion; and the obligation to perform that duty during a war declared by that government became imperious in the highest degree. If ,then, owing to any fault in any of the agents or constituted authorities of that government; or if, through the defects of the operation of government itself, any State, or any of the people of a State, were from the necessity of the case obliged to do that for themselves in anticipation of the movements of the government which the government would be under obligation to do for them, such State and such people would be justly entitled to indemnity for such service from the government. And it is well understood, that on this principle the claims of various Sta es for militia services rendered without any call or agency of the general government of the United States have been audited and allowed. A large portion of the Massachusetts claim, formerly objected to as not being for such services of the militia as was rendered under the authority of the United States, has been found, on more mature examination, to come within the scope of this principle, and to be for services rendered at a time of invasion, or well grounded apprehension of invasion.

Thirteen years since the Commonwealth of Massachusetts presented her claim for disbursements made and expenses incurred for the defence of that State during the late war to the War Department for examination and allowance; but the auditing of it was denied when first presented in 1817, upon the ground *that the services, "with one exception," were rendered independently of the authority of the United States, and that the militia were withheld from the command of the officers of the United States.* In January, 1823, measures were first taken for auditing the items of the claim, and in September of the same year instructions were given, under the direction of the President, to the *Third Auditor* of the Treasury Department to report the amount which would have been due, according to the rules heretofore established, "if the troops had been in service under the authority of the general government." In 1824, the subject of the Massachusetts claim was referred to Congress by message from the President, and the Committee on Military Affairs in that year reported on the principles applicable to the claim; and the subject was again taken up and reported upon by a committee in 1826. This latter committee say, in their report, "that the State of Massachusetts should receive compensation for services performed under the requisition of an officer of the general government, or at his desire, in the exercise of a sound discretion has never been denied, *however long even this may have been imperiously withheld.*" The subject was afterwards referred by Congress to the Secretary of War, with instructions to report to the House "what classes and what amount of said claim may be allowed and paid upon the principles and rules which have been applied to the adjustment of claims of other States, *and to which the assumed authority* of the governor of that State to control the militia and judge of the necessity of ordering them into service does not apply." In May, 1828, it appears from a report made by the Secretary of War that the whole amount claimed is $843,349 60; that the amount of this sum, reported admissible, is $430,748 26; that the amount of the same, reported inadmissible, $412,601 34.

A bill has been presented and is now before Congress to provide for the payment of the amount allowed by the principles of this report.

It will be perceived that the amount reported as inadmissible by the Secretary of War may have been so reported on two grounds, viz: either that the items of claim do not come within the "principles and rules which have been applied in the adjustment of the claims of other States," or that the items of claim, otherwise admissible upon those principles and rules, are rejected because the service in which the items of claim arose are affected by the conduct of the governor of Massachusetts, in "assuming an authority to control the militia and to judge of the necessity of ordering them into service."

All of which is respectfully submitted by your committee together with the accompanying resolve.

WM. CLARK, *Per Order.*

STATE OF MAINE.

RESOLVE respecting the Massachusetts claim.

Resolved by the senate and house of representatives, That the people of this State entertain a deep sense of the justice of the claim made by the Commonwealth of Massachusetts on the government of the United States, for the services of her militia in defending that Commonwealth, then including the territory of this State, from invasion, as well as for the services rendered on well-founded apprehension of invasion during the last war.

Resolved, That the senators and representatives in Congress from this State be, and they hereby are, requested to use their best endeavors to obtain an immediate provision by Congress for the payment of such portion of the Massachusetts claim for the services rendered by the militia of that State during the late war with Great Britain as is now admitted to be due, upon the principles and rules which have been applied to the adjustment of similar claims from other States.

Resolved, That the governor be, and he hereby is, requested to cause copies of these resolutions to be furnished to each senator and each member of the House of Representatives in Congress from the State of Maine.

IN THE HOUSE OF REPRESENTATIVES, *March* 18, 1830.

Read and passed.

DANIEL GOODENOW, *Speaker.*

IN SENATE, *March* 18, 1830.

Read and passed.

JOSHUA HALL, *President.*

MARCH 18, 1830. Approved:

JONATHAN G. HUNTON.

STATE OF MAINE.

SECRETARY OF STATE'S OFFICE, *Portland, March* 20, 1830.

I hereby certify that the foregoing is a true copy of the original deposited in this office.
Attest:

EDWARD RUSSELL, *Secretary of State.*

21ST CONGRESS.] No. 449. [1ST SESSION.

ON THE MEASURES NECESSARY TO PRESERVE PEA PATCH ISLAND, AND ESTIMATES FOR ADDITIONAL APPROPRIATIONS FOR FORT DELAWARE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 31, 1830.

To the House of Representatives:

GENTLEMEN: I respectfully submit to your consideration the accompanying report from the War Department, exhibiting the state of the fortifications of Pea Patch island, and the necessity of further appropriations for the security of that site. The report specifies the improvements deemed proper and the estimate of their cost.

ANDREW JACKSON.

MARCH 31, 1830.

DEPARTMENT OF WAR, *March* 30, 1830.

SIR: I have the honor to submit herewith for your consideration a report from General Macomb, and another from the chief engineer, relative to measures necessary for the security of the Pea Patch island, on which Fort Delaware is built, and for the health of the garrison.

I respectfully suggest that these papers may be transmitted to Congress, whose action will be required in obtaining the necessary funds, as the cost of the proposed works is greater than the amount of the appropriation for contingencies of fortifications.

I have the honor to be, respectfully, sir, your obedient servant,

J. H. EATON.

The PRESIDENT *of the United States.*

HEADQUARTERS OF THE ARMY, *Washington, March* 29, 1830.

SIR: The commanding officer of Fort Delaware states that owing to the insufficiency of the embankments intended to secure the Pea Patch island on which Fort Delaware is built, the whole island has become inundated, and the very fortifications in danger of being injured, and even sapped. General Gratiot is acquainted with the state of the works, and has prepared an estimate for the construction of such an embankment as will effectually secure the island from further inundation; and if you should approve, it might be submitted to Congress in time to procure an appropriation for constructing it. I beg leave to request your early consideration of this subject, as there is great danger of the fort being materially injured if some measures are not soon taken for keeping out the water.

With great respect, I am, sir, your obedient servant,

ALEX. MACOMB, *Major General, Commanding the Army.*

Hon. JOHN H. EATON, *Secretary of War.*

ENGINEER DEPARTMENT, *Washington, March* 30, 1830.

SIR: General Macomb has transmitted to me a report from the officer in command at Fort Delaware, stating that the repair of the embankments of the Pea Patch island is absolutely requisite for the security of the site, as well as for the health of the garrison; and I have been personally informed by the surgeon

of the post that the embankments have been so much broken by a recent storm as to cause the island to be inundated, and to place it in such a condition as to make it highly inexpedient for the garrison to remain there during the next summer.

The appropriation made last year has been applied, as was contemplated, to the completion and repair of the wharves on the island, and to securing some of the weakest parts of the embankment; but to render the island permanently secure and healthy a much larger sum will be required; and, believing that it is of essential importance to effect this object fully and speedily, I submit an estimate for that purpose, prepared agreeably to my instruction by the local engineer, under whose direction the repairs were conducted last year; and I would respectfully suggest that the estimate may be transmitted to Congress in order that an appropriation for the required amount may be asked for.

I am, respectfully, sir, your most obedient servant,

C. GRATIOT, *Brigadier General.*

Hon. JOHN H. EATON, *Secretary of War.*

Remarks upon the present condition of the fort and Pea Patch island.

The fort and its appendages generally may now be considered as in the most excellent order; the following are the exceptions, viz:

1st. *The water tanks.* It is scarcely necessary to repeat that resting on the main foundations (of the casemates) they are liable to settlement and fissures.

2d. The parade has never been completed.

3d. The embankments appear to have been constructed in a temporary manner, only with a view to the construction of the fort, without regard to the permanent security of the island. This post being justly considered as the most important position on the Delaware river, it would seem reasonable that no expense should be spared for its security. It is well known that the island is of modern formation; that the channel of the river is constantly and rapidly changing; and that at the present time it is seriously encroaching upon the eastern side of the island.

Several plans might be pursued in order to secure it, either in a temporary or in a permanent manner. The best plan would undoubtedly be to keep up a line of wooden piers, similar to those at present, constructed around part of the island. This would, however, be a source of continued expense on account of the repairs which would be requisite about every ten years.

The least expensive, and probably the least serviceable plan, would be to heap sufficient quantities of stone on the exterior of the embankments.

Probably the most permanent plan would be effected for a medium cost between the two former. Each plan would alike require the raising and widening the earthen embankments.

The third is the plan which I would suggest as combining part of the advantages of the other two, and also in possessing the additional property of being susceptible of being converted into an effective coast battery if such should ever be useful.

The plan proposed consists in the construction of a dry stone wall on the interior of and parallel to the embankments, filling up the interior from the outside with mud in the form of a glacis coupée, and supporting the foot at low water mark with a small line of stone. This glacis might be covered with trees for its security against the action of the ice and tides without injury to the defence.

Estimate of the funds requisite for the security of the Pea Patch island; for the construction of a new water tank, and for gravelling the parade at Fort Delaware.

Stone wall in the interior of the dyke, 6,000 cubic yards, at $5 per yard		$30,000 00
Embankment of earth, 11,250 cubic yards, at 50 cents per yard		5,625 00
Construction of an iron tank, to contain 30,000 wine gallons, 49,836 lbs., at 6 cents	$2,989 80	
Grillage for ditto	72 00	
		3,061 80
Gravelling for the parade, 1,000 cubic yards of gravel, at 66⅔ cents		666 67
		39,353 47
Contingencies and unforseen expenses, say 5 per cent		1,967 67
Total amount of estimate		41,321 14

21ST CONGRESS.] **No. 450.** [1ST SESSION.

ON THE REORGANIZATION OF THE ARMY WITH A VIEW OF REDUCING THE NUMBER OF OFFICERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES APRIL 2, 1830.

Mr. DESHA, from the Committee on Military Affairs, to whom was referred a resolution of the House, instructing them to inquire into the expediency of "reorganizing the army of the United States, with a view of reducing the number of officers in commission," reported:

That, in their opinion, an organization of the army might be effected reducing the number of its officers without injury to the public service; but as the investigations necessary to be made to arrive at a satisfactory conclusion upon this subject would require so much time and consideration as probably to prevent

them from reporting any bill until so late a period as to prevent its being acted upon during the present session, they recommend the adoption of the following resolution:

Resolved, That the Secretary of War be directed to report to this House, at the commencement of the next session, whether any reduction in the number of officers in the army of the United States can be made without injury to the public service, and if any, what reduction; together with a plan for the most efficient organization of the army in conformity with the reduction proposed.

21st Congress.] **No. 451.** [1st Session.

RECOMMENDATION OF GENERAL JESUP THAT A MOUNTED FORCE BE EMPLOYED FOR THE PROTECTION OF THE COUNTRY SOUTH OF THE MISSOURI RIVER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES APRIL 8, 1830.

Letter from General Jesup to the Hon. A. H. Sevier, in relation to mounting a part of the forces of the United States for the protection of the country south of the Missouri river.

QUARTERMASTER GENERAL'S OFFICE, *Washington City, April* 5, 1830.

SIR: I received this morning your letter dated the 3d instant, and have the honor to observe, in reply to your inquiry "whether a mounted force would not, on the whole, be as cheap as an efficient defence by infantry," that it would be difficult to make an estimate of the comparative expense of the two modes; but experience, I think, has abundantly demonstrated that the nature of the country south of the Missouri river, and the character, habits, and resources of the Indians who range on or inhabit it, are such as to render it impossible to secure that portion by infantry alone, how numerous or well appointed soever they may be. As well might we leave the defence of our maritime frontier and the protection of our foreign commerce to the artillery stationed on our seaboard. The means of pursuing rapidly and punishing promptly those who aggress, whether on the ocean or on the land, are indispensable to a complete security; and if ships-of-war are required in one case, a mounted force is equally so in the other. Were we without a navy, piracies might be committed with entire impunity, not only on the high seas, but in our very harbors, and within view of our forts. So, without a mounted force on the frontier south of the Missouri, the Indian, confident in the capacity of his horse to bear him beyond the reach of pursuit, despises our power, chooses his point of attack, and often commits the outrages to which he is prompted either by a spirit-of-revenge or a love of plunder in the immediate vicinity of our troops; and the impunity of the first act invariably leads to new aggressions. To compel him to respect us we must make him feel our power, or, at all events, convince him that he can have no security in flight.

I have the honor to be, sir, your obedient servant,

TH. S. JESUP, *Quartermaster General.*

Hon. A. H. SEVIER, *House of Representatives, Washington City.*

21st Congress.] **No. 452.** [1st Session.

ON A CLAIM FOR THE REIMBURSEMENT OF THE AMOUNT PAID BY AN ASSISTANT SURGEON OF THE ARMY FOR THE RENT OF QUARTERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES APRIL 20, 1830.

Mr. DRAYTON, from the Committee on Military Affairs, to whom was referred the memorial of Joseph Eaton, an assistant surgeon in the army of the United States, reported:

That the memorialist was ordered upon duty at Fort Preble, in Maine, and as there were no quarters at the post fit for his accommodation, he was, for a certain period, furnished with a room in the town of Portland; that he subsequently received an order to repair to the fort, but, from the cause already stated, he was under the necessity of hiring a room for his quarters; he therefore asks to be reimbursed the sums which he has expended in paying for quarters, out of his private funds, which the government was bound to furnish him with.

The fact that there was no room at Fort Preble which was fitted for the accommodation of the memorialist is certified by the Inspectors General Archer, Wool, and Croghan, by the commanding officer of the post, the assistant quartermaster, by Major General Scott, when on a tour of inspection, and by a number of the officers in the service of the United States. The committee, therefore, have reported a bill, granting to the memorialist the sum of seven hundred and eighty-five dollars and twenty-one cents, being at the rate of $140 a year, from 1st September, 1821, to 22d July, 1827, the memorialist having paid that amount for the hire of quarters, and having charged only what he has paid, which is less than he is entitled to under the regulations of the War Department.

21st Congress.] No. 453. [1st Session.

COMPENSATION OF THE OFFICERS OF THE ARMY OF THE UNITED STATES ATTACHED TO THE SEVERAL BUREAUS, &c.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 6, 1830.

DEPARTMENT OF WAR, *May* 6, 1830.

SIR: In compliance with the resolution of the House of Representatives of the 4th of February last, directing the Secretary of War to report to that House:

1. "What portions of the tariff of the present rate of compensation to the officers of the army of the United States, appended to his report accompanying the President's message at the opening of the present session of Congress, are allowed in pursuance of law, and what in pursuance of regulation or precedent, with reference, as far as practicable, to the law, the adoption of the regulation, or the origin of the precedent.

2. "All allowances made to persons embraced in said tariff within the years one thousand eight hundred and twenty-eight and one thousand eight hundred and twenty-nine, respectively, other than those therein designated, whether upon claims accruing within those years or before, and, as far as practicable, all similar allowances made to the same persons at any prior time, the amount allowed each, and for what allowed.

3. "All allowances and emoluments made or accrued to the major general and his staff, and persons employed in and about his office during the years aforesaid, respectively; of all those employed upon bureau or other duty in or about the offices of the Adjutant General, Commissary General of Subsistence, Colonel of Ordnance, Paymaster General, Quartermaster General, the Chief of the Corps of Engineers, and the Surgeon General, including the heads of each department, designating separately the pay, emoluments and allowances they, or any of them, may have been entitled to in the line of the army, and the salary and allowances paid and made to them for extra duty, &c., presenting, in one view, the whole amount of their receipts, of whatever name, and of whatever character, and also the authority by which such pay and allowances have been made, increased, or charged heretofore:

4. "The names of all surgeons and assistant surgeons of the army who have, within the years aforesaid, been absent from the regular posts of the army, the whole time of their absence, and the amount accruing and paid to them for such time; what extra allowances, if any, and to whom, have been made to surgeons and assistant surgeons for attending upon persons in the army, or in the military or engineer service of the government; also the names of all citizen surgeons who have been employed within the years aforesaid, respectively; the time of such employment, and the compensation to each; the names of all commissioners, superintendents, and agents, for the improvement of rivers, bays, harbors, roads, and other public works, employed under the authority of the Department of War, whose compensation is not fixed by law; the nature of the duties performed by each, and the amount allowed to each, as per diem, for commissions or otherwise, within the years aforesaid, designating where such persons are officers of the army, and the amount received by each of them as such."

I have the honor to submit documents numbered 1, 2, 3, 4, and 5, which furnish the information required, except the extra allowances made to officers of the army prior to 1828, and settled in the Third Auditor's office, whose report I beg leave to refer to, explanatory of the reasons for not preparing that statement.

Very respectfully,

J. H. EATON.

Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

No. 1.

Paymaster General and Quartermaster General's reports of the laws and regulations under which the pay and allowances specified in the tariff of compensation to officers, which accompanied the President's message to Congress at its present session, are made; furnished in compliance with the first paragraph of the resolution of the House of Representatives of 4th February, 1830.

Extract of a letter from the paymaster general to the Secretary of War, dated March 1, 1830.

"I have the honor to submit the following in obedience to the resolution of the House of Representatives requiring you to state 'what portions of the tariff of the present rate of compensation to the officers of the army of the United States, appended to [your] report accompanying the President's message at the opening of the present session of Congress, are allowed by law, and what in pursuance of regulation or precedent, with reference, as far as practicable, to the law, the adoption of the regulation, or the origin of the precedent.'

"The several items of that tariff paid by this department are the pay and subsistence of officers and their servants, and such allowances in lieu of forage and clothing as may be drawn in money, all of which are designated by law.—(See acts of 16th March, 1802; 12th April, 1808; 11th January, 1812; 28th March, 1815; 6th July, 1812; 3d March, 1813; 30th March, 1814; 8th February, 1815; 24th April, 1816; 14th April, 1818; 2d March, 1821; 18th May, 1826; 2d March, 1827, and 2d March, 1829.)

"The emoluments of brevet officers are paid under the same heads as those of the line, and differ only in being contingent.—(See act of 16th April, 1818, which directs that officers of the army who have brevet commissions shall be entitled to and receive the pay and emoluments of their brevet rank when on duty, and having a command according to their brevet rank, and at no other time.")

"The regulation of May 8, 1818, defines what commands authorized brevet pay, &c., as follows:

"'Under the act "regulating the pay and emoluments of brevet officers," the President of the United States directs that brevet officers shall receive the pay and emoluments of their brevet commissions when they exercise command equal to their brevet rank. For example: a brevet captain must command a company; a brevet major and a brevet lieutenant colonel a battalion; a brevet colonel a regiment; a brevet brigadier general a brigade; a brevet major general a division.

"'No officer of the corps of engineers is entitled to the pay and emoluments of brevet rank, under the present arrangement, except the officer now commanding at West Point.

"'J. C. CALHOUN.'

"The allowance was afterwards extended to the chief of the engineer department, by special order of the President, as follows:

"'The nature and extent of General Macomb's command, taking into view the Military Academy at West Point, and the topographical engineers, which are attached to his command as chief of the corps of engineers, his brevet pay appears to be clearly within the meaning of the laws applicable to the case.

"'The allowance of the pay of a brigadier to the assistant engineer (General Bernard) is an additional reason in favor of the allowance.

"'JAMES MONROE.'

"'The brevet pay and emoluments of brigadier will commence from the time that he was arranged to his present command. J. M.'

"Upon the same ground (that the importance of the commands was equal to their brevet rank) the emoluments were subsequently granted to other officers of the engineer corps and to the chief of the Ordnance department.

"On the 16th June, 1827, the general regulation was modified so as to authorize the allowance to a brevet lieutenant colonel when commanding a battalion of not less than four companies, and to a brevet major commanding a detachment of not less than two companies.

"The act of March 16, 1802, provides for 'the commanding officers of each separate post such additional number of rations as the President shall from time to time direct, having respect to the special circumstances of each post.' Under this act the orders (enclosed) marked A were issued by the War Department, and have governed in making the payments."

A.

WAR DEPARTMENT, *June* 5, 1802.

SIR: Until a more particular arrangement shall be made respecting extra allowances of rations to officers commanding posts, you will please to consider the commanding officers at the following places as being entitled to double rations, and no others:

Portland, Portsmouth, New Hampshire, Boston, Newport, New London, Connecticut, New York, West Point, Fort Mifflin, Fort McHenry, Norfolk, Fort Johnston, North Carolina, Fort Johnson, South Carolina, Cockspur island, Georgia, Fort Wilkinson, Mobile, Fort Adams, Chickasaw Bluffs, Southwest Point, one post near the mouth of the Ohio, Kaskaskias, Vincennes, Fort Wayne, Detroit, Michilimackinac, and Niagara. In no instance should more than one officer be allowed double rations at one of the above-mentioned posts except at Charleston, South Carolina, and not at that post until further information shall be received on the situation of the troops.

I am, sir, very respectfully, your most obedient servant,

H. DEARBORN.

Major SWAN, *Paymaster of the Army.*

WASHINGTON CITY, *November* 26, 1805.

Are double rations to be allowed to the military commanding officers of the following posts, viz:

Fort Stoddert, Plaquemine, Point Coupée, New Orleans, Ouachita, Natchitoches, Opelousas, Attakapas, Fort Adams, Arkansas, Chickasaw Bluffs, New Madrid, Fort Massac, Vincennes, Kaskaskias, St. Louis, St. Charles, (no post,) St. Genevieve, (no post,) Cape Girardeau, (no post,) Chicago, Michilimackinac, Detroit, Fort Wayne, Niagara, Pittsburgh, Fort Fayette, (no post,) Fort Sumner, Portland, (no officer,) Fort Constitution, Portsmouth, Fort Independence, Boston, Fort Wolcott, Rhode Island, Fort Trumbull, Connecticut, (no officer,) Fort Jay, New York, West Point, New York, (no post,) Fort Mifflin, Pennsylvania, Fort McHenry, Maryland, Fort Nelson, Virginia, Fort Johnston, North Carolina, Fort Johnson, South Carolina, Fort Wilkinson, Georgia, and Southwest Point, Tennessee.

The honorable Secretary of War is respectfully requested to designate the posts at which the President has or will extend the allowance of double rations to the respective military commandants.

I have the honor to be, very respectfully, &c.,

C. SWAN, *Paymaster of the Army.*

Hon. General DEARBORN, *Secretary of War.*

SIR: Double rations are to be allowed to the commanding officers of the within-mentioned posts, except such as are noted as being no posts or having no commissioned officer, and to Lieutenant Colonel Freeman fifteen rations are allowed.

H. DEARBORN.

WAR DEPARTMENT, *July* 5, 1808.

SIR: It will be expedient to have a uniform regulation for the extra allowance to the officers of the corps of engineers while travelling on duty and while superintending the execution or repair of fortifications, which may be as follows, viz: Each officer, while travelling, to be allowed for the expense of stage

hire, and $1 25 per day, in addition; and each officer, while superintending the execution or repair of fortifications, to be allowed double rations; but in no case should double rations be allowed to more than one engineer at the same time at any one place.

I am, &c.,

H. DEARBORN.

WILLIAM SIMMONS, Esq., *Accountant of the War Department.*

WAR DEPARTMENT, *June* 9, 1810.

The President of the United States allows double rations to the commanding officers of the following military posts and stations, viz:

Passamaquoddy, Wiscasset, Georgetown, Portland, harbor of, Maine.
Harbor of Portsmouth, New Hampshire.
Harbor of Boston, New Bedford, *harbors of Salem, Marblehead, Gloucester, and Newburyport, Massachusetts.
Harbor of Newport, Rhode Island.
Fort Trumbull, Connecticut.
Harbor of New York, West Point, New York.
Fort Mifflin, Pittsburg, Pennsylvania.
Fort McHenry, harbor of Annapolis, Fort Washington, Maryland.
Greenleaf's Point, District of Columbia.
Harbor of Norfolk, Fort Powhatan, Virginia.
Fort Johnston, Beaufort, North Carolina.
Georgetown, harbor of Charleston, Beaufort, Rocky Mount or Mount Dearborn, South Carolina.
Savannah, Fort Hawkins, Georgia.
Fort Stoddert, Fort Adams, Washington, Mississippi Territory.
Plaquemine, Natchitoches, Fort St. John's, Orleans Territory.
Bellefontaine, Fort Osage, Fort Madison or Bellevue, Louisiana Territory.
Fort Massac, Illinois Territory.
Vincennes, Indiana Territory.
Highwassee, Tennessee.
Newport, Kentucky.
Chicago or Fort Dearborn, Fort Wayne, Indiana Territory.
Detroit, Michilimackinac, Michigan Territory.
Niagara, New York.
Springfield, Massachusetts.
And to the commanding officer at New Orleans triple rations.

The commanding officer at each of the posts within named will certify, on honor, that he was the actual commanding officer at the post, and for the time stated in his return, or account for additional rations; which certificate will accompany his return, and be considered as a necessary voucher.

One officer only can be considered as entitled to additional rations.

By command of the President.

W. EUSTIS.

ROBERT BRENT, Esq., *Paymaster of the United States Army.*

Add Fort Hampton, Tennessee, March 25, 1811.
Baton Rouge, Orleans Territory.
Pass Christian, Orleans Territory, April 18, 1811.
Colerain, Georgia, April 18, 1811.
Point Petre, Georgia.
Fort Harrison, Indiana Territory, January 1, 1812.
Generals commanding separate armies, August 25, 1812.

WAR DEPARTMENT, *August* 25, 1812.

The President is pleased to direct that generals commanding separate armies be allowed double rations.

W. EUSTIS.

The PAYMASTER *of the Army.*

WAR DEPARTMENT, *February* 23, 1814.

SIR: On the subject of the letter of Nehemiah Freeman, of the 13th January last, it is ordered that general or other officers commanding districts shall, while so doing, receive double rations; which will supersede all other grants of double rations at posts within the district.

I am, sir, yours, respectfully,

J. ARMSTRONG

PAYMASTER GENERAL.

* These are considered as one military station.

GENERAL ORDER.

ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *March* 6, 1816.

Generals commanding divisions, officers commanding military departments, and all officers while in the actual command of permanent posts and garrisons, separate from the stations of commandants of departments, which subject them to the additional expense of independent commands, are allowed double rations.

The pay account in which such charge is made must be supported by the officer's certificate, stating the post or garrison, and that he was actually commanding during the time charged.

No more than one officer can be entitled to double rations at the same station.

By order of the Secretary of War.

D. PARKER, *Adjutant and Inspector General.*

A commutation of double rations is allowed to the adjutant and inspector general in lieu of quarters and fuel.

WM. H. CRAWFORD.

FORT MCHENRY, *March* 28, 1816.

SIR: A general order of the 6th instant states that all officers in actual command of permanent posts, &c., are allowed double rations. It is justice that the most favorable construction should be given to this regulation by a retrospect. I do assure you, during the time those double rations were stopped, my expenses were much greater than at any other time, owing to the circumstances of the bombardment, which induced a number of respectable citizens to visit this post; consequently, greatly and necessarily increased my expenses. Should you have any doubts to the construction I have given to this order I beg you to submit my particular situation to the Secretary of War. Your early reply will oblige

Your most obedient servant,

GEO. ARMISTEAD, *Lieutenant Colonel.*

ROBERT BRENT, Esq., *Paymaster U. S. A., Washington City.*

MARCH 30, 1816.

Respectfully submitted to the Secretary of War by the Paymaster of the army.

ROB. BRENT, *Paymaster United States Army.*

The regulation is to refer to the organization of the peace establishment, viz: May 17, 1815.

W. H. CRAWFORD.

DEPARTMENT OF WAR, *January* 29, 1818.

SIR: Double rations will be allowed to all the commandants of the military divisions, departments, posts, and arsenals, enumerated in the accompanying list.

I have the honor to be your most obedient servant,

J. C. CALHOUN.

ROBERT BRENT, Esq., *Paymaster General.*

DIVISION OF TH. NORTH.

Department No. 1.—Cantonment near Plattsburg, New York; Fort Pike, Sackett's Harbor, New York; cantonment, Sackett's Harbor, New York; cantonment, Greenbush, New York; Fort Niagara, New York; arsenal near Troy, New York; arsenal, Rome, New York.

Department No. 2.—Fort George, Castine, Maine; Fort Preble, Portland, Maine; Fort Constitution, Portsmouth, New Hamsphire; Fort Sewall, Marblehead, Massachusetts; Fort Independence, Boston, Massachusetts; Fort Warren, Boston, Massachusetts; Fort Wolcott, Newport, Rhode Island; Fort Adams, Newport, Rhode Island; Fort Trumbull, New London, Connecticut; arsenal, Charlestown, Massachusetts.

Department No. 3.—Fort Columbus, New York; Fort Lewis, New York; Fort Wood, New York; arsenal, New York.

Department No. 4.—Fort Mifflin, near Philadelphia; Fort McHenry, Baltimore; Fort Severn, Annapolis; Fort Washington, on the Potomac; arsenal, Frankfort, Pennsylvania; arsenal, Pittsburg, Pennsylvania; arsenal, near Baltimore.

Department No. 5.—Fort Shelby, Detroit, Michigan; cantonment, Detroit, Michigan; Grose Isle, Detroit river, opposite Malden; Fort Wayne, head of the river Miami of the Lake; Fort Gratiot, outlet of Lake Huron, Michilimackinac; Fort Howard, Green Bay; Fort Dearborn, Chicago; Fort Harrison, Indiana; arsenal, Detroit.

DIVISION OF THE SOUTH.

Department No. 6.—Fort Nelson, Norfolk, Virginia; Fort Norfolk, Norfolk, Virginia; Craney Island, Norfolk, Virginia; Fort Johnson, Smithville, North Carolina; arsenal, Richmond, Virginia; arsenal, Washington city.

Department No. 7.—Fort Moultrie, Charleston, South Carolina; Fort Johnson, Charleston, South Carolina; Tybee Barracks, Savannah, Georgia; encampment, Point Petre, Georgia; Fort Scott, Point Petre, Georgia; arsenal, Charleston, South Carolina.

Department No. 8.—Cantonment, Montpelier, nine miles from Fort Montgomery; Fort Montgomery, on the Alabama river; Fort Crawford, forty-five miles from Fort Montgomery; Fort Charlotte, Mobile; Fort Boyer, Mobile Point; Fort St. Philip, Plaquemine; Petit Coquille, outlet of Lake Pontchartrain; New Orleans, Louisiana; Natchitoches, Louisiana; Fort Covington, Louisiana; Pass au Christian; Baton Rouge; Fort Hampton, Mississippi; arsenal, Baton Rouge.

Department No. 9.—Fort Osage, Missouri river; Fort Clark, Illinois river; Bell Fontaine, Missouri Territory; Fort Edwards, Illinois Territory; Fort Armstrong, Rock Island; Fort Crawford, Prarie du Chien; arsenal, New Port, Kentucky; arsenal, Belle Fontaine.

Extract.

"Until otherwise ordered, the chief engineer, while resident at Washington, will be allowed at the rate of nine hundred and twelve dollars a year, in lieu of fuel and quarters. He will also receive double rations.

"J. C. CALHOUN.

"Received May 12th, 1818.

"W. LEE."

Extract of a letter from John C. Calhoun, Secretary of War, to Robert Brent, Paymaster General, dated

"War Department, *September* 28, 1818.

"The infantry officer detailed for the purpose of training the cadets at the Military Academy will, also, while so detailed, be allowed double rations."

Department of War, *October* 16, 1820.

Sir: You will instruct the paymaster of the corps of engineers at West Point to pay to the superintendent of the Military Academy at that post *triple* rations from the 1st of September last, until further orders.

J. C. CALHOUN.

Paymaster General.

Second Auditor's Office, *January* 6, 1821.

Does the command of the corps of cadets entitle Major Worth to brevet pay and emoluments? A battalion of infantry consists of 340 men.

Answer.—The command of Major Worth is equal to his brevet rank, and his pay as such is allowed.

J. C. C.

Department of War, *July* 27, 1821.

Sir: The Quartermaster General, Commissary General of Subsistence, the Colonel of Engineers, and the Chief of the Ordnance department, while stationed at the seat of government, will be allowed double rations from this date.

I have the honor to be, your obedient servant,

J. C. CALHOUN.

Paymaster General.

June 4, 1822.

In the absence of the chiefs of staff bureaus, the allowance of *double* rations will devolve on the officer having charge in their absence.

J. C. C.

August 31, 1822.

In consideration of the duties performed by Captain Hook, in commanding the detachment of orderlies, in issuing clothes and provisions, he will be paid ten dollars per month, being the lowest sum allowed to an assistant commissary of provisions, till otherwise ordered.

J. C. C.

War Department, *March* 31, 1826.

The order of the War Department, dated July 27, 1821, authorizing the allowance of double rations to certain staff officers therein enumerated, will be extended to the Adjutant General.

The Paymaster General will settle Colonel Jones's account for double rations.

JAMES BARBOUR.

Paymaster General.

Note.—The account for an arrearage was paid February 23, 1829, and has the following written upon it: "Approved." "P. B. P."

DEPARTMENT OF WAR, *Adjutant General's Office, Washington, April* 5, 1827.

The Secretary of War directs that paragraph 1175 of the General Regulations of the Army shall be modified as follows:

When an assistant commissary of subsistence issues to a detachment of a company or to a single company, and does not perform the duty of quartermaster, he shall receive *fifteen* dollars per month in addition to his pay.

By order.

R. JONES, *Adjutant General,*

REGULATION.

WAR DEPARTMENT, *August* 1, 1828.

Each officer of the corps of engineers charged with the construction of a fortification, or having a separate command, shall hereafter be entitled to receive double rations, in the same manner as is allowed to officers of other arms of the service commanding separate posts or arsenals.

P. B. PORTER.

SPECIAL ORDER.

DEPARTMENT OF WAR, *December* 12, 1828.

The officer in command of the United States ordnance depot in the harbor of New York will be allowed quarters and fuel in the city and double rations, as were heretofore allowed to him while in command of the old United States arsenal at that place; his expenses and responsibility, which were the consideration for double rations, having been increased rather than diminished by the distribution of the ordnance stores to different points in that harbor.

P. B. PORTER.

DEPARTMENT OF WAR, *December* 16, 1828.

A true copy.

CHAS. J. NOURSE.

[Extract.]

QUARTERMASTER GENERAL'S OFFICE, *Washington City, April* 28, 1830.

SIR: Under the first clause of the resolution of the House of Representatives of the 4th of February last, I have the honor to report that fuel and quarters are the only allowances of the army embraced in the statement accompanying the President's message at the opening of the present session of Congress which are derived through this department. Previous to the late war with Great Britain, though those allowances were authorized by executive regulation, (see regulation of the 28th of April, 1801, adopted fifty-six days after Mr. Jefferson became President,) there was no other legal authority for them than that derived from the acts of Congress making the annual appropriations; but an act passed March 28, 1812, made it the duty of the Quartermaster's department, under the direction of the Secretary of War, "to purchase military stores, camp equipage, and *other articles* requisite for the troops," &c.; and an act passed the 3d day of March, 1813, authorizing the Secretary of War to make regulations for the purchase and distribution of supplies; and another act passed on the same day authorizing him to make regulations defining the powers and duties of the several branches of the staff; which regulations, when approved by the President, were to continue in force until revoked by the same authority. The regulations made in pursuance of those acts of Congress authorizing the allowance of fuel and quarters were recognized and adopted by the 9th section of an act for reorganizing the general staff, and making further provision for the army of the United States, approved the 24th day of May, 1816, subject, however, to such alterations as the Secretary of War, with the approbation of the President, might adopt. The regulations thus authorized and sanctioned by law are the authority for the estimates presented to Congress for fuel, rents, repairs, quarters, &c.

THOS. S. JESUP, *Quartermaster General.*

Hon. JOHN H. EATON, *Secretary of War.*

Regulations to be observed in the allowance of barracks or quarters to the officers of the army, and in the delivery of fuel and straw to the garrisons on the sea-coast, and recruiting parties.

Barracks or quarters.

To the commanding general, for himself, four rooms and a kitchen.
To his aid, one room.
To the Quartermaster General, three rooms and a kitchen, and two rooms for officers and clerks.
To each field officer, two rooms.
To the inspector of the army, one room in addition to his allowance as a field officer.

To each captain, one room.
To a field officer or a captain when commanding a separate post, in addition a kitchen.
To two subalterns, one room.
To every mess of eight officers, one room and a kitchen.

Fuel from the 1st day of October to the 1st day of April in each year.

To the commanding general, two cords and one-half of wood per month.
To the Quartermaster General, two cords per month.
To the inspector of the army, two cords per month.
To each field officer, one and one-half cord per month.
To every commanding officer of a garrison, one and one-half cord per month.
To every officer commanding a recruiting party, one cord per month.
To every other commissioned officer, one cord per month.
To every room occupied as barracks by eight non-commissioned officers, musicians, and privates, one cord per month.
To a garrison barrack guard, half a cord per month.
To officers and soldiers, half of the aforesaid allowance of fuel from the first day of April until the first day of October in every year, but none for officers.
To the sick in hospital, the allowance of wood is to be regulated by the surgeon.
The commanding general, under special circumstances, may, by orders in writing, enlarge or diminish the foregoing allowances of fuel, and may, by the like orders, direct or withhold allowances of fuel or straw at such other posts as he may judge expedient in cases not provided for by any special regulation.
No compensation in money to be made in lieu of allowances of fuel, nor is any compensation to be received by or paid to officers in lieu of quarters or barracks.

Straw.

1. One truss of straw, weighing thirty-six pounds, is allowed for each *paillasse* for two men. At the expiration of sixteen days each *paillasse* is to be refreshed with eight pounds. At the expiration of thirty-two days the whole straw is to be removed, and a fresh bedding of one truss to be furnished, and so on every succeeding period of sixteen and thirty-two days.
2. The same quantity of straw is allowed for servants or batmen not soldiers, and for washerwomen attached to each company, in the proportion of one washerwoman to every seventeen non-commissioned officers and privates.
3. The straw is to be changed for the sick in the hospital as often as may be deemed necessary; this necessity to be determined by the surgeon or surgeon's mate in the absence of the surgeon.

Requisitions for fuel or straw.

1. Requisitions for wood or straw must state the number and rank of the officers; the number of non-commissioned officers and privates; servants and batmen not soldiers; and of washerwomen, for whom demanded, and be certified by the commandant of the garrison or recruiting party.
2. No wood or straw shall be drawn for officers, or wood or straw for soldiers whilst on furlough, or any allowance made to them for the same.
3. Whenever it shall appear that more wood or straw has been drawn than there were officers, soldiers, servants, or batmen not soldiers, and washerwomen actually present and entitled thereto, the commanding officer signing such requisition shall be held responsible for the value of the article drawn beyond the quantity allowed by these regulations, and shall have his name and the circumstances of the case reported to the Secretary for the Department of War.
4. Requisitions thus signed, and the receipts given by the officers to whom the articles are delivered for consumption, shall be produced as vouchers by the contractor, agent, or quartermaster, in the settlement of his accounts.

As a smaller quantity of fuel may suffice for the garrisons and recruiting parties to the southward than ordered by the regulations, their commandants are enjoined to regulate the demands for this article by the nature of the climate.

Given at the War Office of the United States this 28th day of April, 1801.

HENRY DEARBORN, *Secretary of War.*

Extract of the report of the Quartermaster General to the Secretary of War, dated April 28, 1830.

"Under the latter clause of the resolution (of the House of Representatives of February 4) I have the honor to submit paper marked B, which is a list of persons employed at the Delaware breakwater, with the duties performed by and the compensation allowed to each; also paper marked C, containing the names of persons employed in the opening and repairing of roads in Florida, and improving Sackett's Harbor, New York. The appropriations for these works are the authority for the payments made to the individuals named; for, Congress having authorized the works, it was evidently their intention that the means necessary to accomplish them should be employed."

B.

List of agents and laborers employed in connexion with the Delaware breakwater, with the compensation allowed to each, in the year 1829.

Names.	Office or employment.	Rate of compensation.	Amount paid.	Remarks.
William Strickland	Engineer of the work	$3,500 00 per annum.	$2,916 66	Employed by Navy Department at $3,500 per annum; since reduced to $3,000.

QUARTERMASTER GENERAL'S OFFICE, *Washington City, April* 28, 1830.

Extract of a letter from the Quartermaster General to the Secretary of War, of the 28th April, 1830.

"The act of the 28th of March, 1812, before referred to, made it the duty of the Quartermaster's department to furnish, under the direction of the Secretary of War, the means of transportation for the *army, its stores, &c.* That act, with the regulations made in pursuance of, and sanctioned by, &c., is the authority for the allowance for transportation to officers when travelling in the performance of their duties."

No. 2.

TREASURY DEPARTMENT, *Second Auditor's Office, April* 7, 1830.

SIR: Under the resolution of the House of Representatives of the 4th February, I have the honor to hand you three statements, embracing all the information required by said resolution that the records of this office afford, viz:

Statement No. 1 comprises allowances, other than those provided by law, made to officers of the army between the 4th March, 1821, and the 31st December, 1827; showing the authority by which such allowances and emoluments have been made, and furnished under the second paragraph of the resolution.

Statement No. 2* comprises allowances and emoluments, other than those to which they were entitled in the line of the army, made in the years 1828 and 1829, to the major general and his staff, and to the persons employed in and about the several bureaus connected with the War Department: furnished in pursuance of the 3d paragraph of the resolution.

Statement No 3† comprises allowances made to officers of the army, other than those employed on bureau duty, in the years 1828 and 1829, in addition to what they were entitled to by law: furnished under the second paragraph of the resolution.

As the resolution of the House of Representatives is indefinite as to the time the statement is to commence, I have prepared it from the 4th March, 1821, the date of the act fixing the present military peace establishment, presuming that it will embrace all the information required.

I also enclose herewith an extract from the general order of the Secretary of War dated 10th August, 1818, authorizing the extra allowance of $1 25 per diem to the officers employed in the several bureaus at the seat of government.

I am, with great respect, sir, your most obedient servant,

W. B. LEWIS.

Hon. J. H. EATON, *Secretary of War.*

Extract from the general order of the Secretary of War dated 10th August, 1818.

"Officers detailed to perform duties in the office of the Chief Engineer, Quartermaster General, Adjutant and Inspector General, or the chief of ordnance, will be allowed, while performing such duties, at the rate of $1 25 per diem, in addition to their usual pay and emoluments."

Since the above date, the allowance has been extended to the officers employed in the offices of the Surgeon General and Commissary General of Subsistence.

No. 1.
